

Zhigui Jing-Zhang · The AI Line · One Spine, Twelve Stations, Three Zones and Two Wings

Overall Concept: One Spine, Twelve Stations, Three Zones and Two Wings

Jing-Zhang Heritage Park as the green spine; twelve AI scenario stations rebuild century-old station memory, linking the three key zones and the two-wing network

Centennial Jing-Zhang Culture Belt

Urban AI Life Experience Belt

AI Integrated Innovation Belt

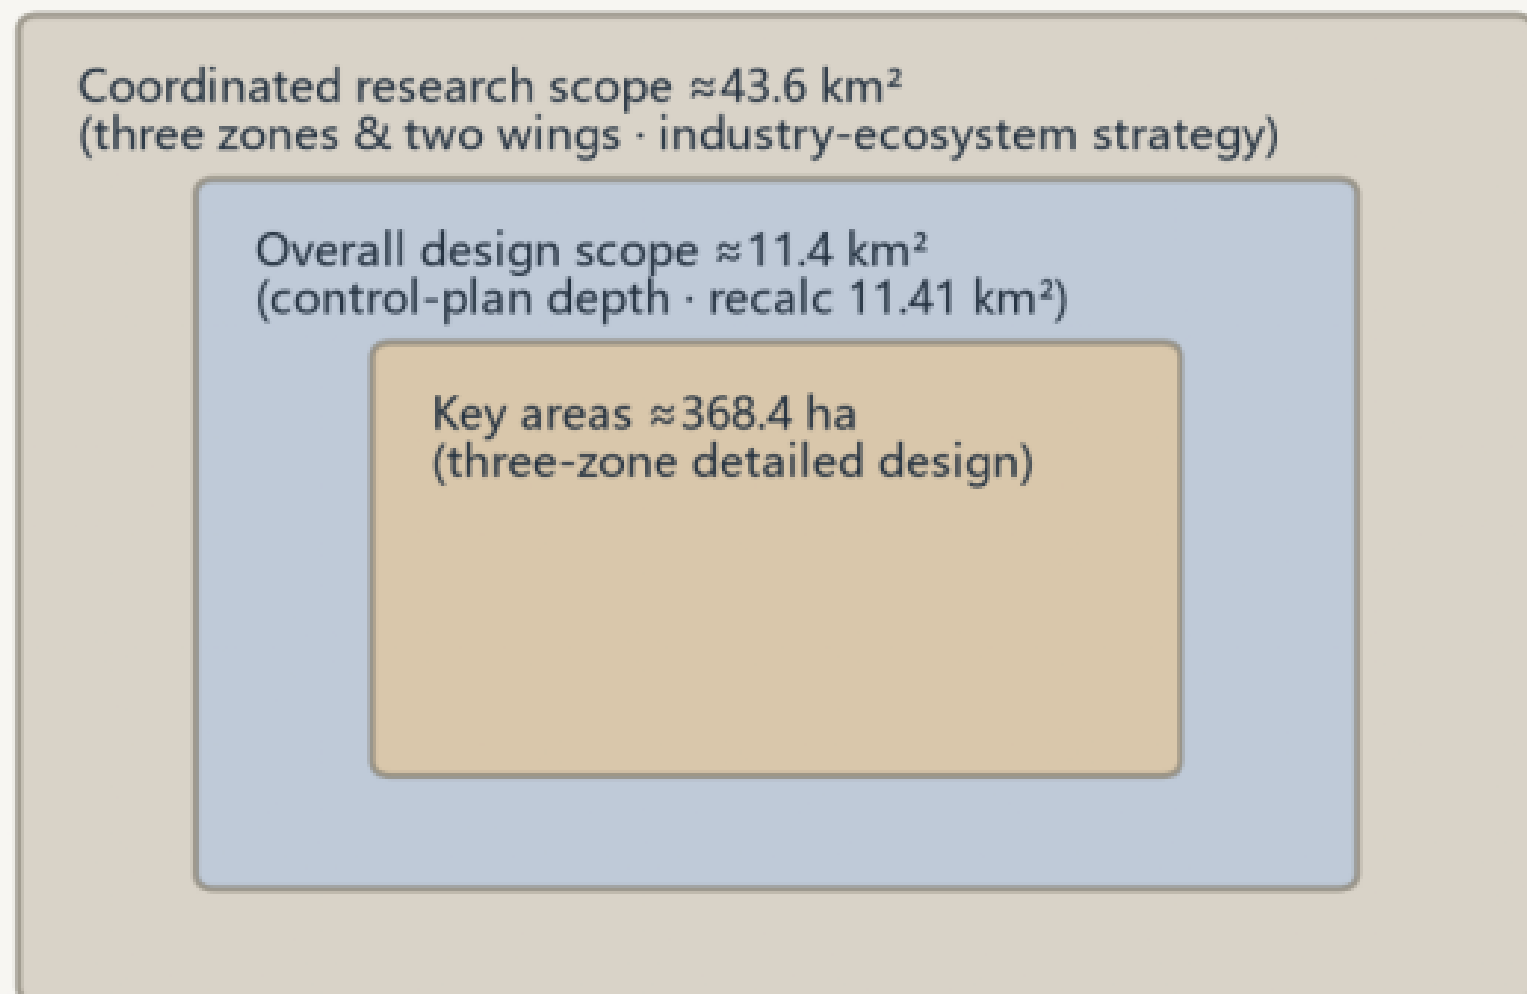

Five functions: full-stack independent AI innovation system · world-class AI innovation ecosystem  
AI+ scenario-enablement paradigm · intelligent AI vitality city · global voice in AI governance

Zhigui Jing-Zhang · The AI Line

Fig. 1 · Overall concept structure site-overview

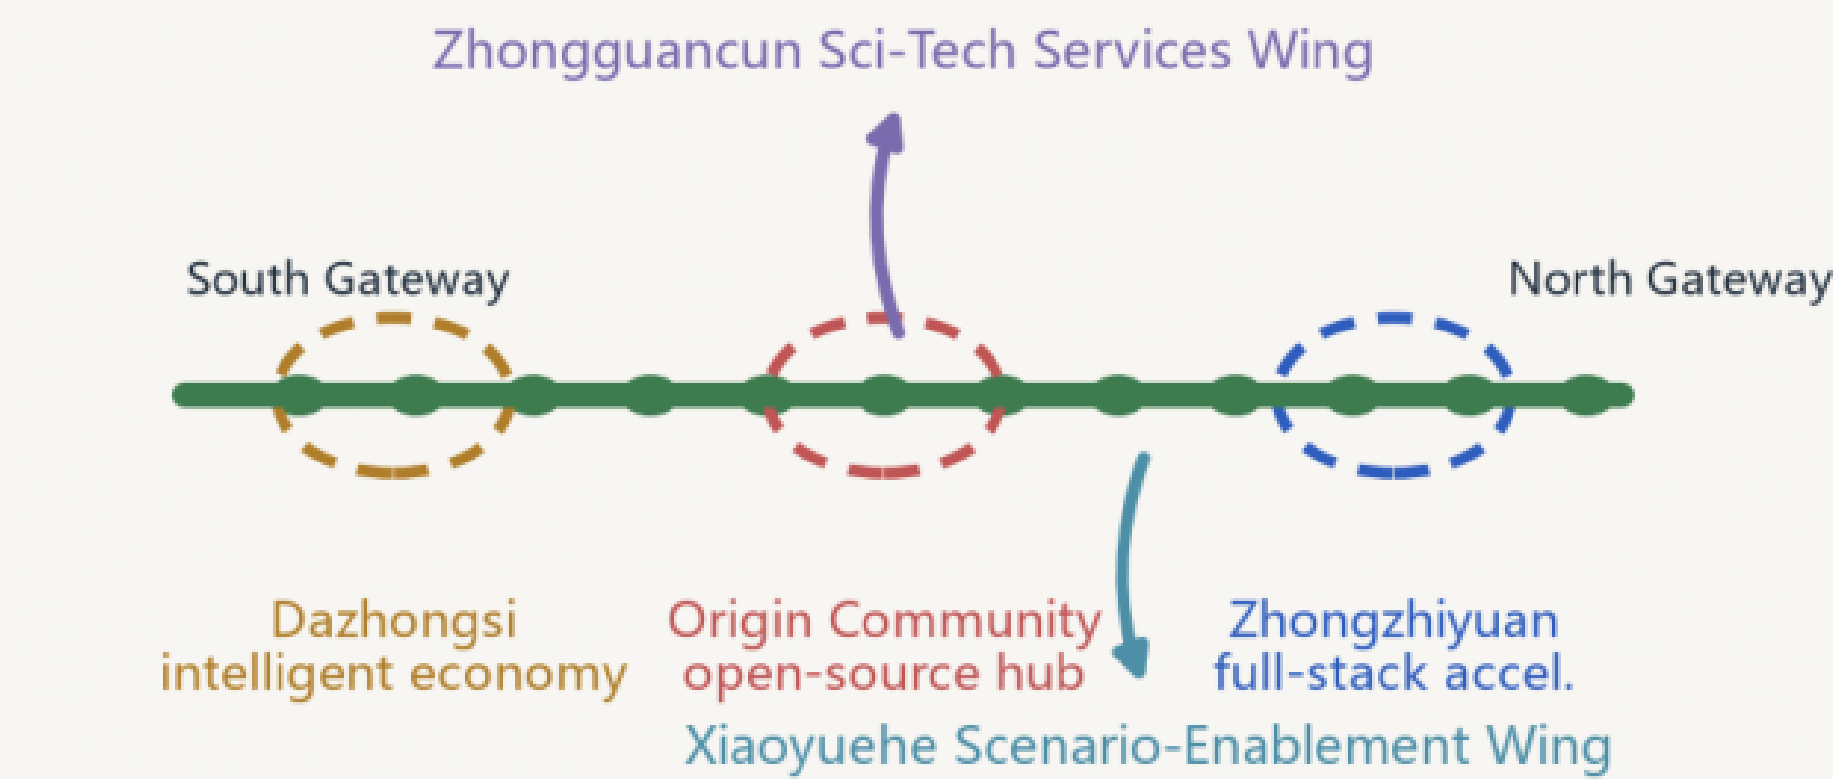

Three-level scope framework

Transmission: industry strategy → overall design → key-area implementation

Provisional rough boundaries (announcement-text inference): for generation and display only, not official redlines; all areas are approximate and will be recalculated when official vectors arrive.

Structure: one spine · 12 stations · 3 zones · 2 wings

"Station" = plaza + AI scenario + honor display + community operations  
Rebuilding AI-era public space with the century-old station typology

Concept highlights

- N-S continuity: green spine from Xizhimenwai to Qinghe Bay (5th Ring)
- E-W suturing: station units open to communities, campuses, parks
- Cultural translation: station typology → AI public-space components

Data: submissions/linzhuo606/the-ai-line/geometry/\*.geojson · metrics.json (EPSG:4548 recalc)

Overall concept

Green spine: the Honor Track along the

Jing-Zhang Heritage Park main axis

Twelve stations: composite units of plaza

+ AI scenario + honor display

+ community operations

Three zones: Zhongzhiyuan / Origin

Community / Dazhongsi

Two wings: Zhongguancun Sci-Tech Services

Wing + Xiaoyuehe Scenario-Enablement Wing

Three positionings:

Centennial Jing-Zhang Culture Belt

Urban AI Life Experience Belt

AI Integrated Innovation Belt

Provisional rough boundaries (announcement-text inference): for generation and display only, not official redlines; all areas are approximate and will be recalculated when official vectors arrive.

Fig. 1 · overall concept structure · geometry/\*.geojson

168 concept parcels fully zoned · station-city weaving · gradient renewal

Land use & renewal

R&D land 2.66 km² (23%)  
Commercial 1.29 km² · residential 2.41 km²  
Park green 1.66 km² · reserve 0.17 km²

Renewal framework: station-unit renewal packs  
Retain 41% · renovate 26% · new 33%  
(conceptual split, pending tenure baseline)

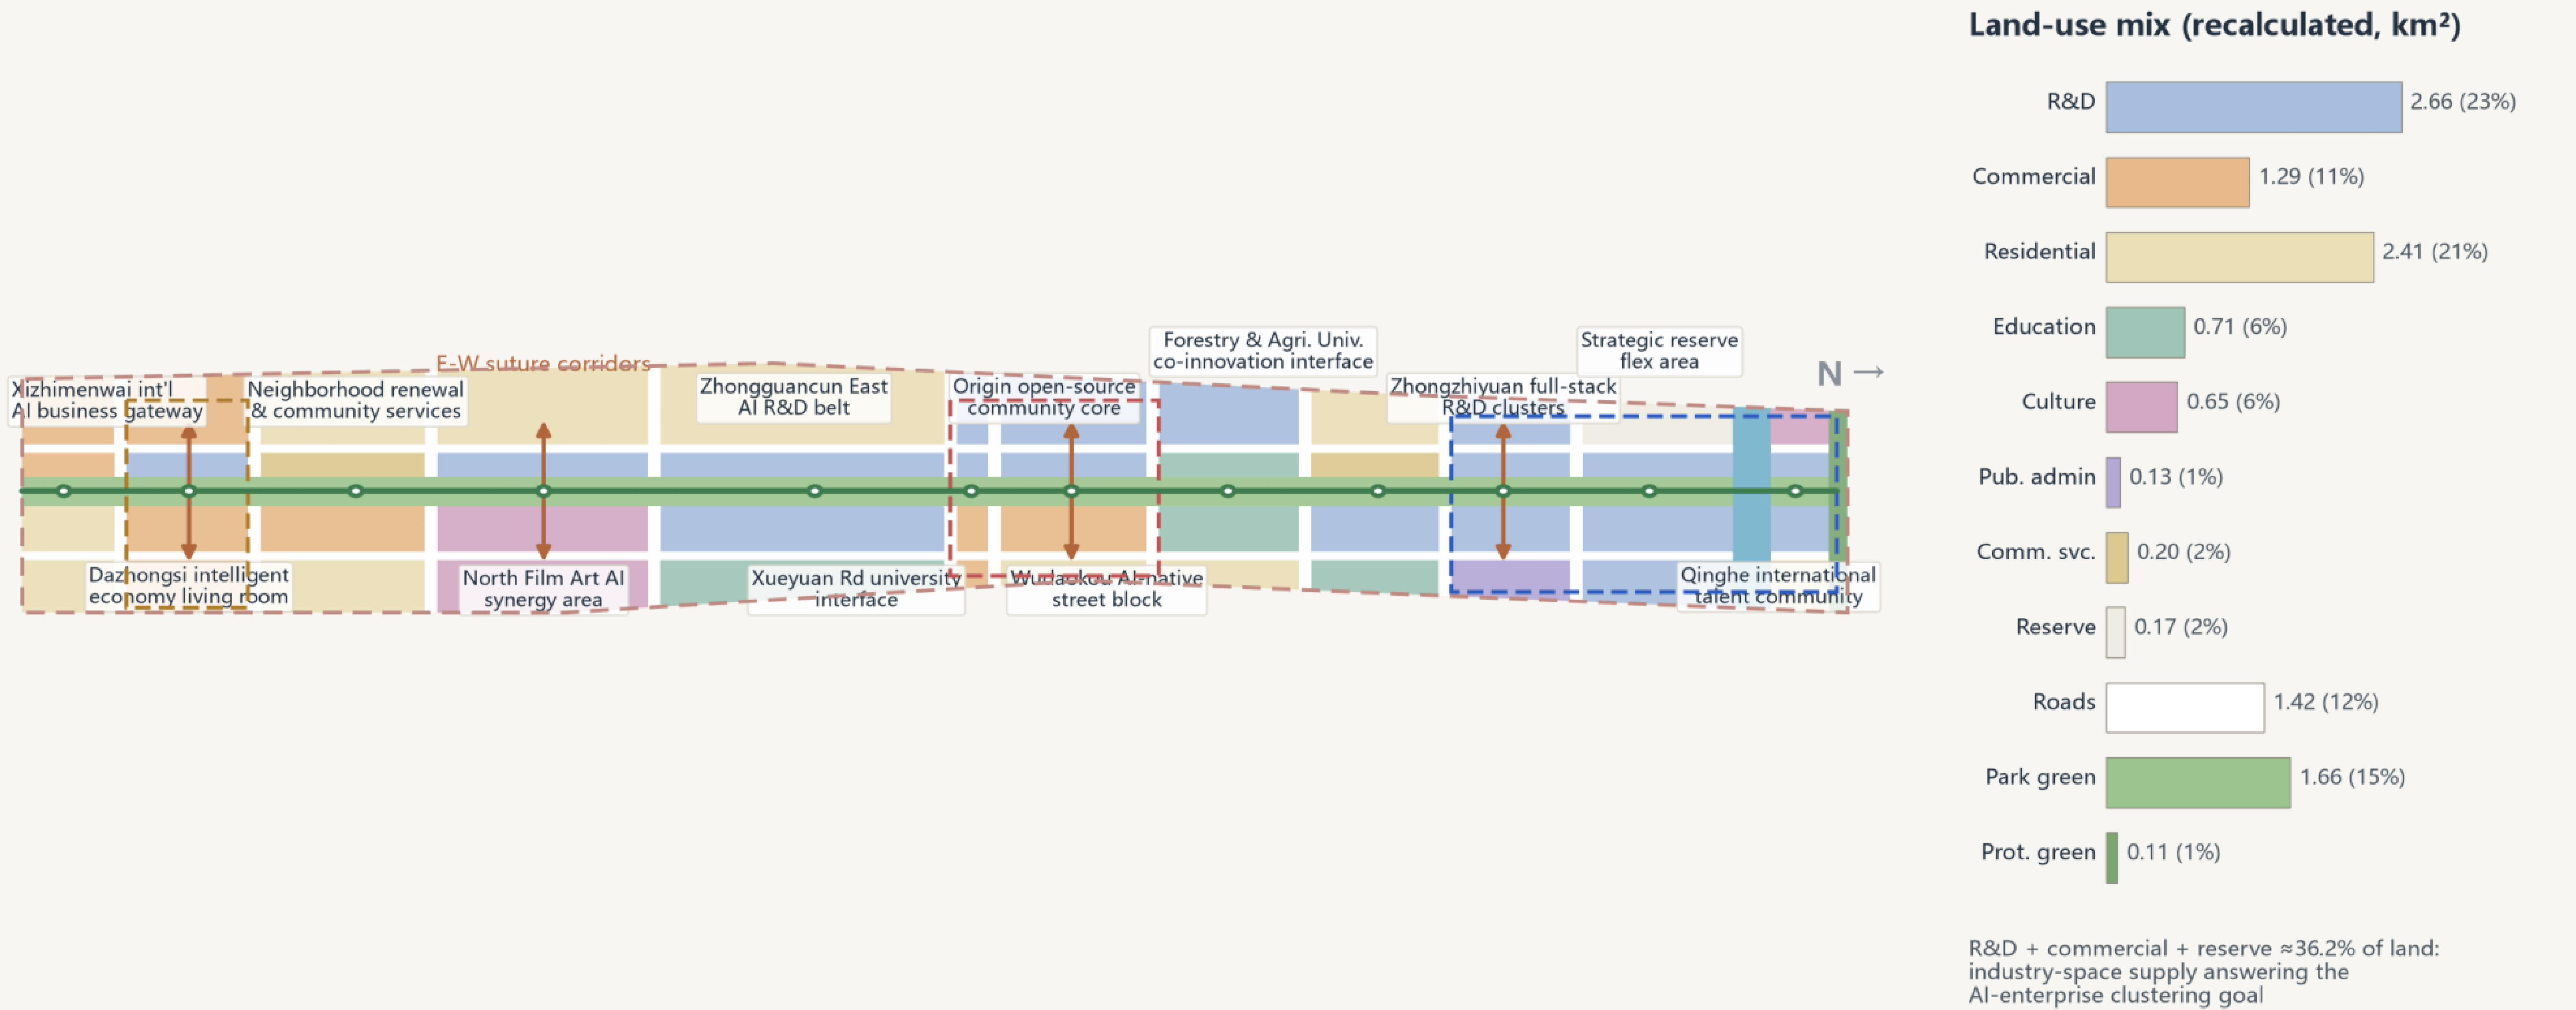

Concept total GFA 16.15 million m²  
Concept gross FAR 1.42 (non-statutory)

Zhigui Jing-Zhang · The AI Line

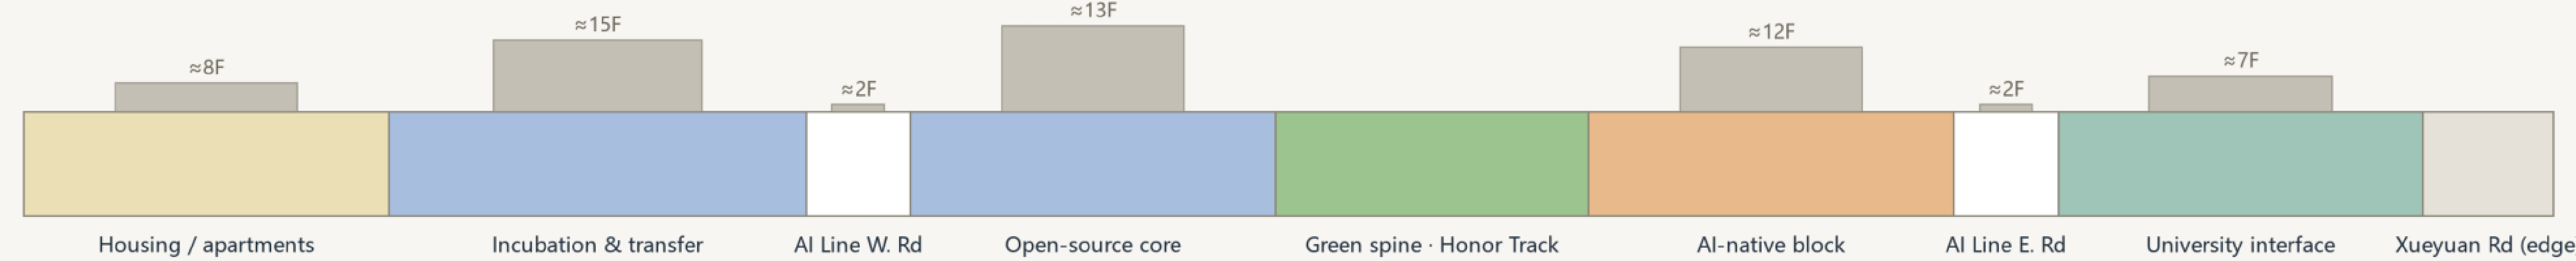

Fig. 2 · Land-use structure land-use-structure

Spatial Structure & Land Use: Green Spine • Weaving • Gradient Renewal

168 parcels fully zoned (EPSG:4548); functions S→N: gateway business — intelligent consumption — sci-edu transfer — open-source wellspring — full-stack acceleration

Typical E-W section (Origin Community segment, W→E)

Intensity gradient: low-intensity transition beside the spine → mid/high-intensity clustering at station groups; heights and massing are conceptual — statutory indicators follow the approved regulatory plan.

Provisional rough boundaries (announcement-text inference): for generation and display only, not official redlines; all areas are approximate and will be recalculated when official vectors arrive.

Data: submissions/linzhuo606/the-ai-line/geometry/\*.geojson · metrics.json (EPSG:4548 recalc)

Provisional rough boundaries (announcement-text inference): for generation and display only, not official redlines; all areas are approximate and will be recalculated when official vectors arrive.

Fig. 2 · land-use structure · land\_use/buildings.geojson

micro-circulation + station-city integration + new-infrastructure fusion

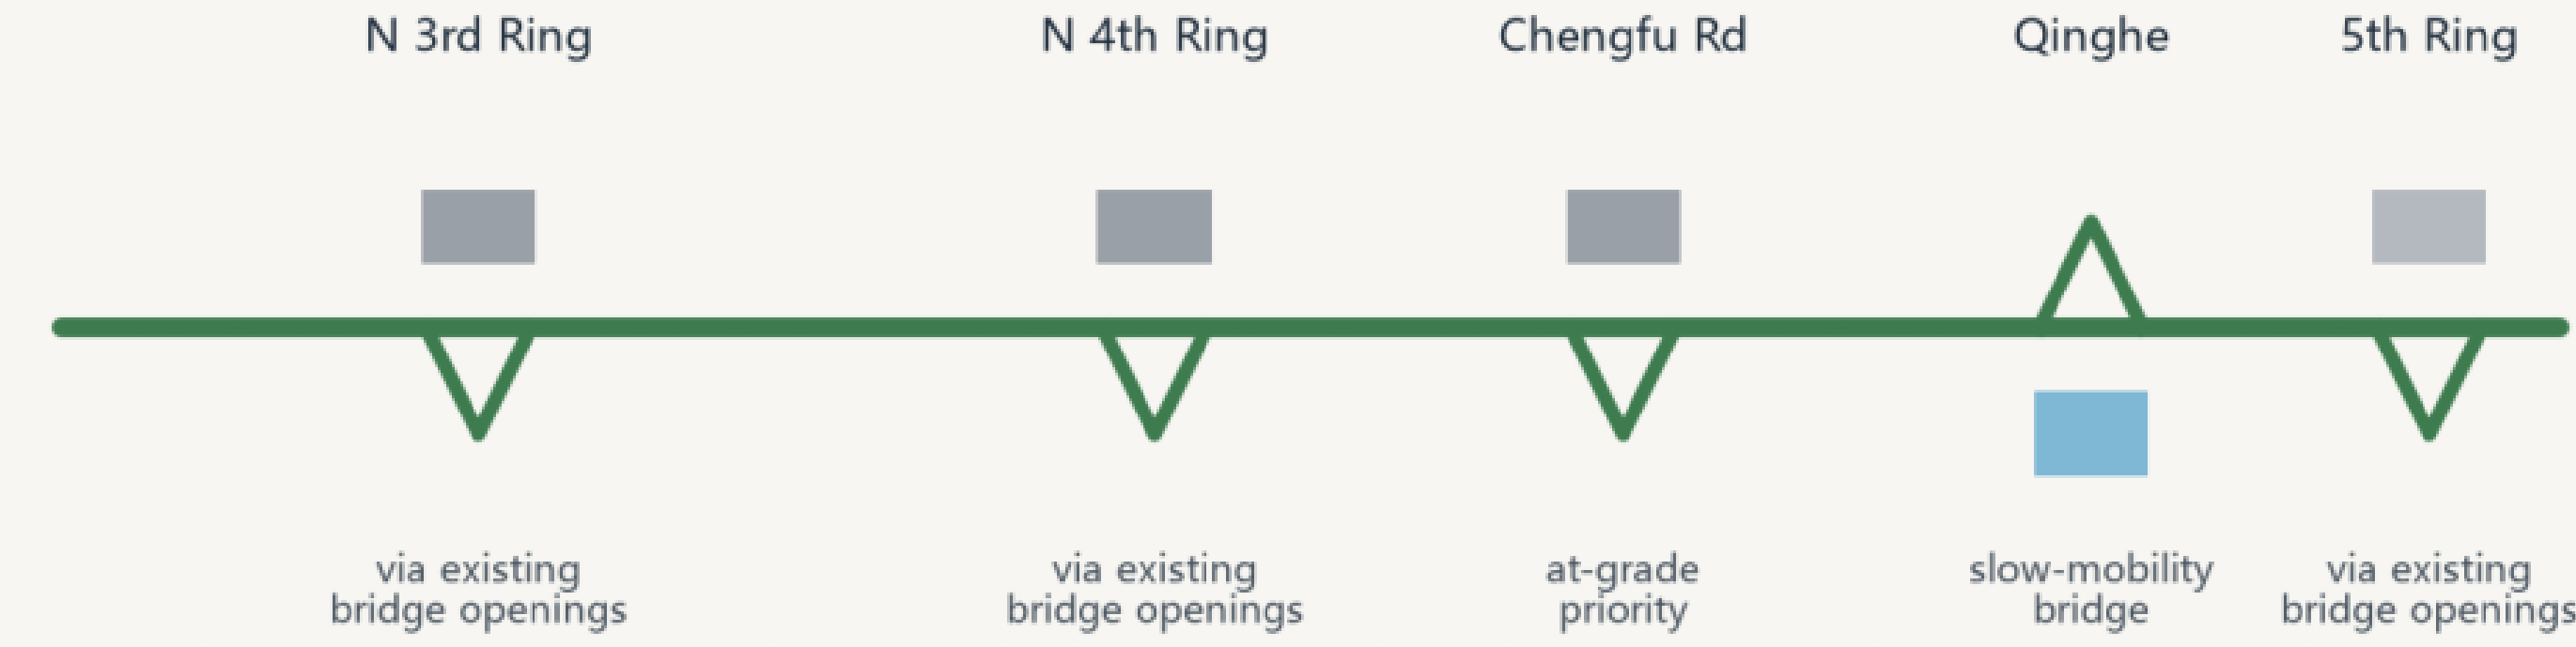

Mobility & Blue-Green System: Continuous Spine • Stations as Scenarios

The Honor Track runs ≈9.7 km end to end; east-west corridors (Zhichun Rd / N 4th Ring / Chengfu Rd) suture breakpoints and link the two wings; 12 station plazas are open AI scenario units

Zhigui Jing-Zhang · The AI Line  
Fig. 4 · Mobility & blue-green system mobility-bluegreen

Spine continuity profile (S→N): breakpoint suturing strategy

Principle: slow-mobility continuity first; vehicle corridors yield or grade-separate at the spine.  
All engineering forms (bridge / tunnel / underpass) are conceptual recommendations pending professional study.

Provisional rough boundaries (announcement-text inference): for generation and display only, not official redlines;  
all areas are approximate and will be recalculated when official vectors arrive.

Stations × AI scenario themes (S→N)

- South Gateway · urban AI inquiry & guidance
- Zhizhong · smart terminals / content consumption
- Zaojunmiao · community health sentinels
- North Film Art · generative art exhibition
- College · AI+education experimental pod
- Sidaokou · robot delivery test lane
- Origin · open-source market / Wall of Fame
- Nongda East · campus co-creation pop-up
- Shuangqing · energy-carbon agent pilot
- Acceleration · autonomous shuttle hub
- Zhongzhi · full-stack pilot demonstration
- Qinghe Bay · low-altitude logistics window

Data: submissions/linzhuo606/the-ai-line/geometry/\*.geojson · metrics.json (EPSG:4548 recalc)

Transport & municipal

Spine slow-mobility route ≈9.7 km end to end  
Ring-road crossings through the clearances of existing bridge openings  
Qinghe slow-mobility bridge · the overpass viewing Ring has been cancelled

Rail access: Dazhongsi four-quadrant links  
Wudaokou / Qinghua East Rd West dual access

Municipal: distributed energy + edge-compute pods + urban sensing data governance framework (capacity sizing pending official baseline)

Provisional rough boundaries (announcement-text inference):  
for generation and display only, not official redlines;  
all areas are approximate and will be recalculated when official vectors arrive.

Blue-green & public space

Green ratio (recalc) 15.7%

Public space ratio (recalc) 5.3%

Green spine + Qinghe greenway + protective belt + six pocket parks, three-level network

The Honor Track: line-wide linear public space

Twelve station plazas as open scenario units

The Accessibility Line (blind author's definition):

guiding strip continuous ≈9.7 km line-wide

36 audible signals + 9 refuge islands

16 tactile models + open-source model library

Component library V2 (author-reviewed · five laws):

12 station pavilions (toilets at five major stations)

Seats: station areas ≤50 m · ordinary ≤100 m

(design target ≈130 line-wide)

Inquiry columns / audio anchors (multilingual)

Shopfront function plaques (original proposal · door side, 1.35 m)

Smart poles / tactile model tables

Sticker-on items deleted; standard interfaces only

Provisional rough boundaries (announcement-text inference):  
for generation and display only, not official redlines;  
all areas are approximate and will be recalculated  
when official vectors arrive.
