核心指标复算与证据链

Recomputed metrics (EPSG:4548) and the evidence chain: sources → geometry → metrics → matrices

· Five-stage full-stack chain: research -> R&D -> acceleration -> industrialization -> capital; graduate without leaving the belt.

· 14 AI scenario cards (4 industry testbeds) · 7 personas · privacy & human-review hard bounds.

· 5 pilgrimage landmarks: Developer Walk / Open-Source Gallery / Agent Honor Wall / Zero-Mile Post / Herringbone Switch.

· Centennial Trilogy + 3 cultural routes; station-culture wayfinding and a 7-component public-space kit.

· Events: Co-creation Week + Signal Seasons + weekly Switch Lab; contribution-ledger community operation.

· Metrics: green ratio 13.1% / public space 182.7k m2 / slow corridor 24.1 km / EPSG:4548 deviation <0.1%.
