

JINGZHANG COMMON TABLE

Evidence before the first bite.

One table · seven gates · three nodes · 90-day minimum pilot

AI-generated concept experience, not a site photo or approved design.

AI CONCEPT EXPERIENCE | NOT SITE EVIDENCE OR APPROVAL

ONE-PAGE REVIEW ENTRY

Three positions, five functions, and three areas plus two wings become one accountable spatial, industry, and operating diagram.

ONE TABLE, SEVEN GATES | EVIDENCE BEFORE THE FIRST BITE

Three positions × five functions × three areas and two wings · a public interface that can be read, challenged, and stopped · north points right

THREE POSITIONS

Century Jingzhang culture belt
Urban AI life-experience belt
AI convergence-innovation belt

FIVE FUNCTIONS

Full-stack autonomy · world-class ecosystem
AI+ scenario model · active AI city
Global AI-governance voice

3 AREAS + 2 WINGS

AI Origin · Zhongzhiyuan · Dazhongsi
Zhongguancun tech-service wing
Xiaoyuehe scenario wing

G1 eligibility → G2 data/IP → G3 safety/permits → G4 batch traceability → G5 public equity → G6 incidents/appeals → G7 exit/restoration

PROVISIONAL ROUGH BOUNDARY · NON-STATUTORY · NOT FOR APPROVAL OR ENGINEERING LOCATION

TASKBOOK CLOSED

Positions: Centennial Jingzhang culture, urban AI life, AI convergence.
Functions: full-stack autonomy, global ecosystem, AI+ scenarios, active city, governance voice.
Areas and wings: AI Origin, Zhongzhiyuan, Dazhongsi; enterprise services and Xiaoyuehe scenarios.

THREE POSITIONS

Centennial Jingzhang culture | urban AI life | AI convergence

FUNCTIONS 1–3

Full-stack autonomy | global ecosystem | AI+ scenario paradigm

FUNCTIONS 4–5

Active city | a voice in global AI governance

THREE AREAS

AI Origin | Zhongzhiyuan | Dazhongsi

TWO WINGS

Zhongguancun enterprise services | Xiaoyuehe scenario validation

DELIVERY TEST

Space, industry, operation, accountability, and exit close in one evidence chain

SEVEN GLOBAL AI ECOSYSTEM CASES

Seoul AI Hub, Hub71+ AI, Mila, Station F F/ai, Cyber Valley, Vector Institute, and JTC LaunchPad. Only mechanisms for talent, compute, capital, research transfer, testbeds, and community are adapted.

SEOUL AI HUB

Combines talent, startup support, and a regional AI ecosystem in one platform

HUB71+ AI

Connects AI startups with compute, capital, specialist support, and market entry

MILA

Institutionalizes research community, talent networks, and responsible-AI interfaces

STATION F F/AI

Uses community programming and peer networks to reduce early-team friction

CYBER VALLEY

Links research, industry, public dialogue, and a physical innovation setting

VECTOR INSTITUTE

Clarifies roles across research translation, talent development, and adoption

JTC LAUNCHPAD

Uses an estate, incubators, and shared connectors for cross-team encounters

PROVISIONAL GEOMETRY

The announcement provides text and approximate area only; Issue #846 does not justify moving the polygon. Statutory intensity, rights, buildings, roads, utilities, fire, contamination, and heritage controls remain unknown.

ONE TABLE, SEVEN GATES | EVIDENCE BEFORE THE FIRST BITE

Three positions × five functions × three areas and two wings · a public interface that can be read, challenged, and stopped · north points right

THREE POSITIONS

Century Jingzhang culture belt
Urban AI life-experience belt
AI convergence-innovation belt

FIVE FUNCTIONS

Full-stack autonomy · world-class ecosystem
AI+ scenario model · active AI city
Global AI-governance voice

3 AREAS + 2 WINGS

AI Origin · Zhongzhiyuan · Dazhongsi
Zhongguancun tech-service wing
Xiaoyuehe scenario wing

G1 eligibility → G2 data/IP → G3 safety/permits → G4 batch traceability → G5 public equity → G6 incidents/appeals → G7 exit/restoration

PROVISIONAL ROUGH BOUNDARY · NON-STATUTORY · NOT FOR APPROVAL OR ENGINEERING LOCATION

EIGHT ECOSYSTEM FACTORS

Land, space, industry, capital, talent, compute, data, and scenarios connect through conditional interfaces. No institution is presented as a committed partner.

LAND USE × THREE ACCESS LAYERS

Controlled back → observable interface → public front at each node • authored, non-statutory allocation • north points right

EIGHT-FACTOR AI ECOSYSTEM

Each factor has an owner, entry rule, cost band, and exit gate.

PROVISIONAL ROUGH BOUNDARY • NON-STATUTORY • NOT FOR APPROVAL OR ENGINEERING LOCATION

ZHONGZHIYUAN | SOURCE LEDGER

Controlled R&D, operations simulation, embodied validation, and professional review; the public can read inputs, failures, and authority.

THREE AREAS, THREE LANDMARKS | PLAN · SECTION · OPERATIONS

THREE KEY AREAS

01 ZHONGZHIYUAN | R&D + STANDARDS

Plan zones, section layers, multimodal evidence, and licensed pilots enter one service blueprint.

Controlled back

Observe

Public front

02 AI ORIGIN | REPRODUCIBILITY + PILOT

Model and facility cards link research, reproduction, coaching, and compliant pilot work.

Licensed work

Reproduce/coach

Kitchen front

03 DAZHONGSI | MARKET + FIRST ORDER

Batch tests, aggregate feedback, non-purchase seats, and reversible exit appear together.

Receive/logistics

Market validation

Public table

THREE CONCEPTUAL AI LANDMARKS: Source Ledger · Seven-Gate Table · Return Bell

SIX PUBLIC COMPONENTS: Gate-and-status frame · Evidence table · Accessible service island

Clean/dirty route band · Batch-ledger post · Removable shade, wash, and rain-garden module

PROTOTYPE: plan + section + service blueprint bind roles, permits, and stops; partners, funding, and engineering remain unconfirmed.

PROVISIONAL ROUGH BOUNDARY · NON-STATUTORY · NOT FOR APPROVAL OR ENGINEERING LOCATION

AI ORIGIN | SEVEN-GATE TABLE

Open-source reproduction, facility cards, shared pilot production, and operator coaching. Real food waits for licensed operation, insurance, hygiene, site, and permission.

THREE AREAS, THREE LANDMARKS | PLAN · SECTION · OPERATIONS

THREE KEY AREAS

01 ZHONGZHIYUAN | R&D + STANDARDS

Plan zones, section layers, multimodal evidence, and licensed pilots enter one service blueprint.

Controlled back

Observe

Public front

02 AI ORIGIN | REPRODUCIBILITY + PILOT

Model and facility cards link research, reproduction, coaching, and compliant pilot work.

Licensed work

Reproduce/coach

Kitchen front

03 DAZHONGSI | MARKET + FIRST ORDER

Batch tests, aggregate feedback, non-purchase seats, and reversible exit appear together.

Receive/logistics

Market validation

Public table

THREE CONCEPTUAL AI LANDMARKS: Source Ledger · Seven-Gate Table · Return Bell

SIX PUBLIC COMPONENTS: Gate-and-status frame · Evidence table · Accessible service island

Clean/dirty route band · Batch-ledger post · Removable shade, wash, and rain-garden module

PROTOTYPE: plan + section + service blueprint bind roles, permits, and stops; partners, funding, and engineering remain unconfirmed.

PROVISIONAL ROUGH BOUNDARY · NON-STATUTORY · NOT FOR APPROVAL OR ENGINEERING LOCATION

DAZHONGSI | RETURN BELL

Verified outcomes share space with non-purchase seats. Price, qualification, batch, and appeal stay visible; no consumer profile is created.

THREE AREAS, THREE LANDMARKS | PLAN · SECTION · OPERATIONS

THREE KEY AREAS

01 ZHONGZHIYUAN | R&D + STANDARDS

Plan zones, section layers, multimodal evidence, and licensed pilots enter one service blueprint.

Controlled back

Observe

PROVISIONAL ROUGH BOUNDARY · NON-STATUTORY · NOT FOR APPROVAL OR ENGINEERING LOCATION

FOUR FLOWS + CULTURAL PATH

Visitors, staff, food logistics, and residual materials separate. Rail history, Zhongguancun reproducibility culture, and accountable AI appear in physical wayfinding and staffed service.

FOUR SEPARATED FLOWS × FIVE PROPOSED REGIONAL INTERFACES

Visitors, staff, food, and residuals have distinct entries, windows, containers, and ledgers; the blue-green armature also carries cultural wayfinding • north right

VISITORS	STAFF	FOOD LOGISTICS	RESIDUAL MATERIALS
Continuous walking, accessibility, ordinary rest, and non-purchase seating first.	Separate check-in, changing, training, and human-takeover path.	Timed loading, cold-chain batches, and controlled receiving back.	Dedicated containers and metering; stop without an approved receiver.

FIVE PROPOSED, UNCONFIRMED INTERFACES: Beiwei Community • Future Science City • Huairou Science City • BDA • Beijing-Tianjin-Hebei

CULTURAL WAYFINDING: Jingzhang railway memory → Zhongguancun innovation history → public AI culture; physical signs and staffed help require no personal tracking.

PROVISIONAL ROUGH BOUNDARY • NON-STATUTORY • NOT FOR APPROVAL OR ENGINEERING LOCATION

ONE BATCH IN ONE DAY

Every G1–G7 step has an object, proof, human owner, and fallback.
NT-01–NT-06 test accountability, temperature/labels, outage/authority, digital fairness, receiver refusal, and environmental approval.

ONE BATCH IN ONE DAY | EVIDENCE JOURNEY + FAILURE FALLBACK

AI proposes candidates and flags anomalies; authorized people decide edibility, allergens, release, permission, and material routes.

SIX FAILURE TESTS THAT MUST BE REHEARSED

NOT AN OPERATING RECORD | ALL STATES UNASSESSED; SITE, PERMISSION, INSURANCE, HYGIENE, AND ACCOUNTABILITY MUST CLOSE BEFORE REAL FOOD ENTERS.

BRAND, LANDMARKS, COMPONENTS

The rail line becomes a table edge. Source Ledger, Seven-Gate Table, and Return Bell are three conceptual landmarks; six components still require site and professional review.

ONE TABLE · SEVEN GATES | BRAND + PUBLIC-SPACE KIT

Evidence before the first bite.

The rail line becomes a table edge; three nodes are accountability points. The dashed return exists only after testing, permission, and human sign-off.

THREE CONCEPTUAL LANDMARKS

Source Ledger
Rail history, public questions, rights, and rejection reasons are visible first

Seven-Gate Table
G1–G7 inputs, failures, human authority, and exit stay visible

Return Bell
Compliant closure and failure are both recorded; return stays conditional

SIX PUBLIC-SPACE COMPONENTS | ALL REQUIRE SITE + PROFESSIONAL REVIEW

Gate-and-status frame
gate_status_frame

Evidence table
evidence_table

Accessible service island
accessible_service_island

Clean/dirty route band
clean_dirty_route_band

Batch-ledger post
batch_ledger_post

Removable shade, wash, and rain-garden module
reversible_service_module

CONCEPTUAL EXPRESSION | NOT EXISTING SIGNAGE, A GOVERNMENT BRAND, OR AN APPROVED FACILITY

90-DAY MINIMUM PILOT

D0–30 evidence and rights; D31–60 synthetic, tabletop, and offline rehearsal; D61–90 controlled rehearsal only after conditions close. Six work packages each have one accountable role; costs remain nonnumeric bands.

FIRST 90 DAYS | ACCOUNTABILITY • COST • KPI • STOP

FIRST 90 DAYS | THREE ACCOUNTABILITY STAGES

DAYS 0 – 30 baseline + co-design
asset steward A • cost L1 • stop on rights/owner gap

DAYS 31 – 60 offline + synthetic drill
platform/food/research R • cost L2 • stop on QA/KPI breach

DAYS 61 – 90 controlled drill after gates close
licensed operator A • reviewer C • cost L3 • stop on permit/safety/appeal breach

FIVE ROLES: asset steward • platform • licensed food operator
research/evaluation • statutory/professional review
One RACI A per decision; 18-field scenario cards record cost, KPI, stop, exit, and ledger.

GEOMETRY-DERIVED METRICS

PROVISIONAL ROUGH BOUNDARY • NON-STATUTORY • NOT FOR APPROVAL OR ENGINEERING LOCATION

PUBLIC VALUE + FIVE INTERFACES

Older people, children, disabled people, low-income visitors, small businesses, and frontline workers receive screen-free, multilingual, accessible, non-purchase, fair-selection, data-minimal, appeal, and human-review controls. Five regional links remain proposed interfaces.

EIGHT EQUITY CONTROLS

Screen-free, multilingual, accessible, non-purchase, fair-selection, data-minimal, appeal, human review

BEIWEI COMMUNITY

Resident co-design and non-purchase public seating; proposed interface only

FUTURE SCIENCE CITY

Research facilities and translation leads; no partnership or resource claim

HUAIROU SCIENCE CITY

Major-science research leads; rights and demand must be verified first

BEIJING E-TOWN

Manufacturing and embodied-validation interface; begin offline and synthetic

BEIJING–TIANJIN–HEBEI

Supply-chain, talent, and scenario direction; no administrative authority implied

METRICS, ACCEPTANCE, STOP

Geometry metrics can be recomputed; budgets, permissions, and operating KPIs remain unknown. Unclear rights, missing accountability, no manual fallback, access failure, food/material risk, or failed appeals stop or end the pilot.

FIRST 90 DAYS | ACCOUNTABILITY • COST • KPI • STOP

FIRST 90 DAYS | THREE ACCOUNTABILITY STAGES

DAYS 0 – 30 **baseline + co-design**
asset steward A • cost L1 • stop on rights/owner gap

DAYS 31 – 60 **offline + synthetic drill**
platform/food/research R • cost L2 • stop on QA/KPI breach

DAYS 61 – 90 **controlled drill after gates close**
licensed operator A • reviewer C • cost L3 • stop on permit/safety/appeal breach

FIVE ROLES: asset steward • platform • licensed food operator
research/evaluation • statutory/professional review
One RACI A per decision; 18-field scenario cards record cost, KPI, stop, exit, and ledger.

GEOMETRY-DERIVED METRICS

PROVISIONAL ROUGH BOUNDARY • NON-STATUTORY • NOT FOR APPROVAL OR ENGINEERING LOCATION

SOURCES, RIGHTS, HANDOFF

The cover is an AI-assisted original conceptual image; no third-party photo, logo, or plan is embedded. Authoritative data trigger layer replacement, recomputation, redrawing, regeneration, and accessibility/operating/professional review.

AI CONCEPT COVER

Original concept experience; not a site photo, government brand, or approval

PUBLIC SOURCES

Source, access date, purpose, and limit stay in sources.json and the evidence index

RIGHTS BOUNDARY

No third-party logo, photo, or proprietary plan; unclear rights trigger removal

AUTHORITATIVE-DATA TRIGGER

Official boundary, rights, roads, utilities, fire, contamination, and heritage prompt recomputation

FIVE-STEP HANDOFF

Replace layers → recompute → redraw → regenerate → accessibility/operation/professional review

SUBMISSION STATUS

Not selection, approval, contract, construction, or government endorsement
