

01 EDGECASE JINGZHANG

Overall Spatial Evidence

[T1] — [T2] — [T3]

One spine • three fields • six stitches • twelve edge nodes

T1

CONTROLLED TEST

Frequent failure allowed; controlled, stoppable, reproducible.

T2

COMMUNITY CO-TEST

Opt-in participation, exit path, accessibility, human takeover.

T3

EVERYDAY OPEN

Low-risk pilots only; accountability and staffed service remain visible.

12 × EDGE

3 × HUMAN OVERRIDE

6 × SLOW LINKS

DATA: package GeoJSON + metrics.json. Boundary = provisional rough geometry; not an official redline or statutory control plan.

02 EDGECASE JINGZHANG

Test Gradient × Land-Use Structure

[T1] — [T2] — [T3]

Complete topology partition; functional tendencies, not statutory controls

03 EDGECASE JINGZHANG

Three Key Areas: Three Types of Edge

[T1] — [T2] — [T3]

One protocol, different sources of failure

T1

Zhongzhiyuan / Controlled Edge Lab

E1 robot mixing

night/rain/occlusion

multi-agent conflict

T2

AI Origin / Human Edge Commons

E2 accessible service

multilingual/no-device

human takeover + exit

T3

Dazhongsi / Market Edge Street

E3 agent handoff

weak network/crowd

accountability + staffed service

#1058 → no precise TOD claim

DATA: package GeoJSON + metrics.json. Boundary = provisional rough geometry; not an official redline or statutory control plan.

provisional rough geometry - not an official redline or statutory control plan

04 EDGECASE JINGZHANG

[T1] – [T2] – [T3]

Slow Mobility, Blue-Green, and Human Fallback

When intelligence fails, the city must remain walkable, legible, and staffed

02 VISIBLE OWNER

03 HUMAN TAKEOVER

04 OFFLINE EXIT

DATA: package GeoJSON + metrics.json. Boundary = provisional rough geometry; not an official redline or statutory control plan.

T1

Controlled Edge Lab: robot mixing, night/rain/occlusion perception and multi-agent scheduling conflict; controlled, stoppable, reproducible.

T2

Human Edge Commons: accessibility, multilingual use, no-smartphone routes for older people and civic-service copilots; opt-in participation, exit rights and human takeover.

T3

Market Edge Street: agent/terminal handoffs, weak networks, crowding and staffed after-sales service; not autonomy for its own sake, but usable and accountable handoffs.

Three knowledge landmarks: Mile Zero, Human Override House and Long-tail Atlas. Annual EDGECASE WEEK combines open field walks, developer reviews, company challenges and public explanation.

05 EDGECASE JINGZHANG

[T1] – [T2] – [T3]

Metrics Evidence and Retest Loop

Not a zero-failure demo: reproducible failure → repair → retest
