

ZHI-BELT 之字京张

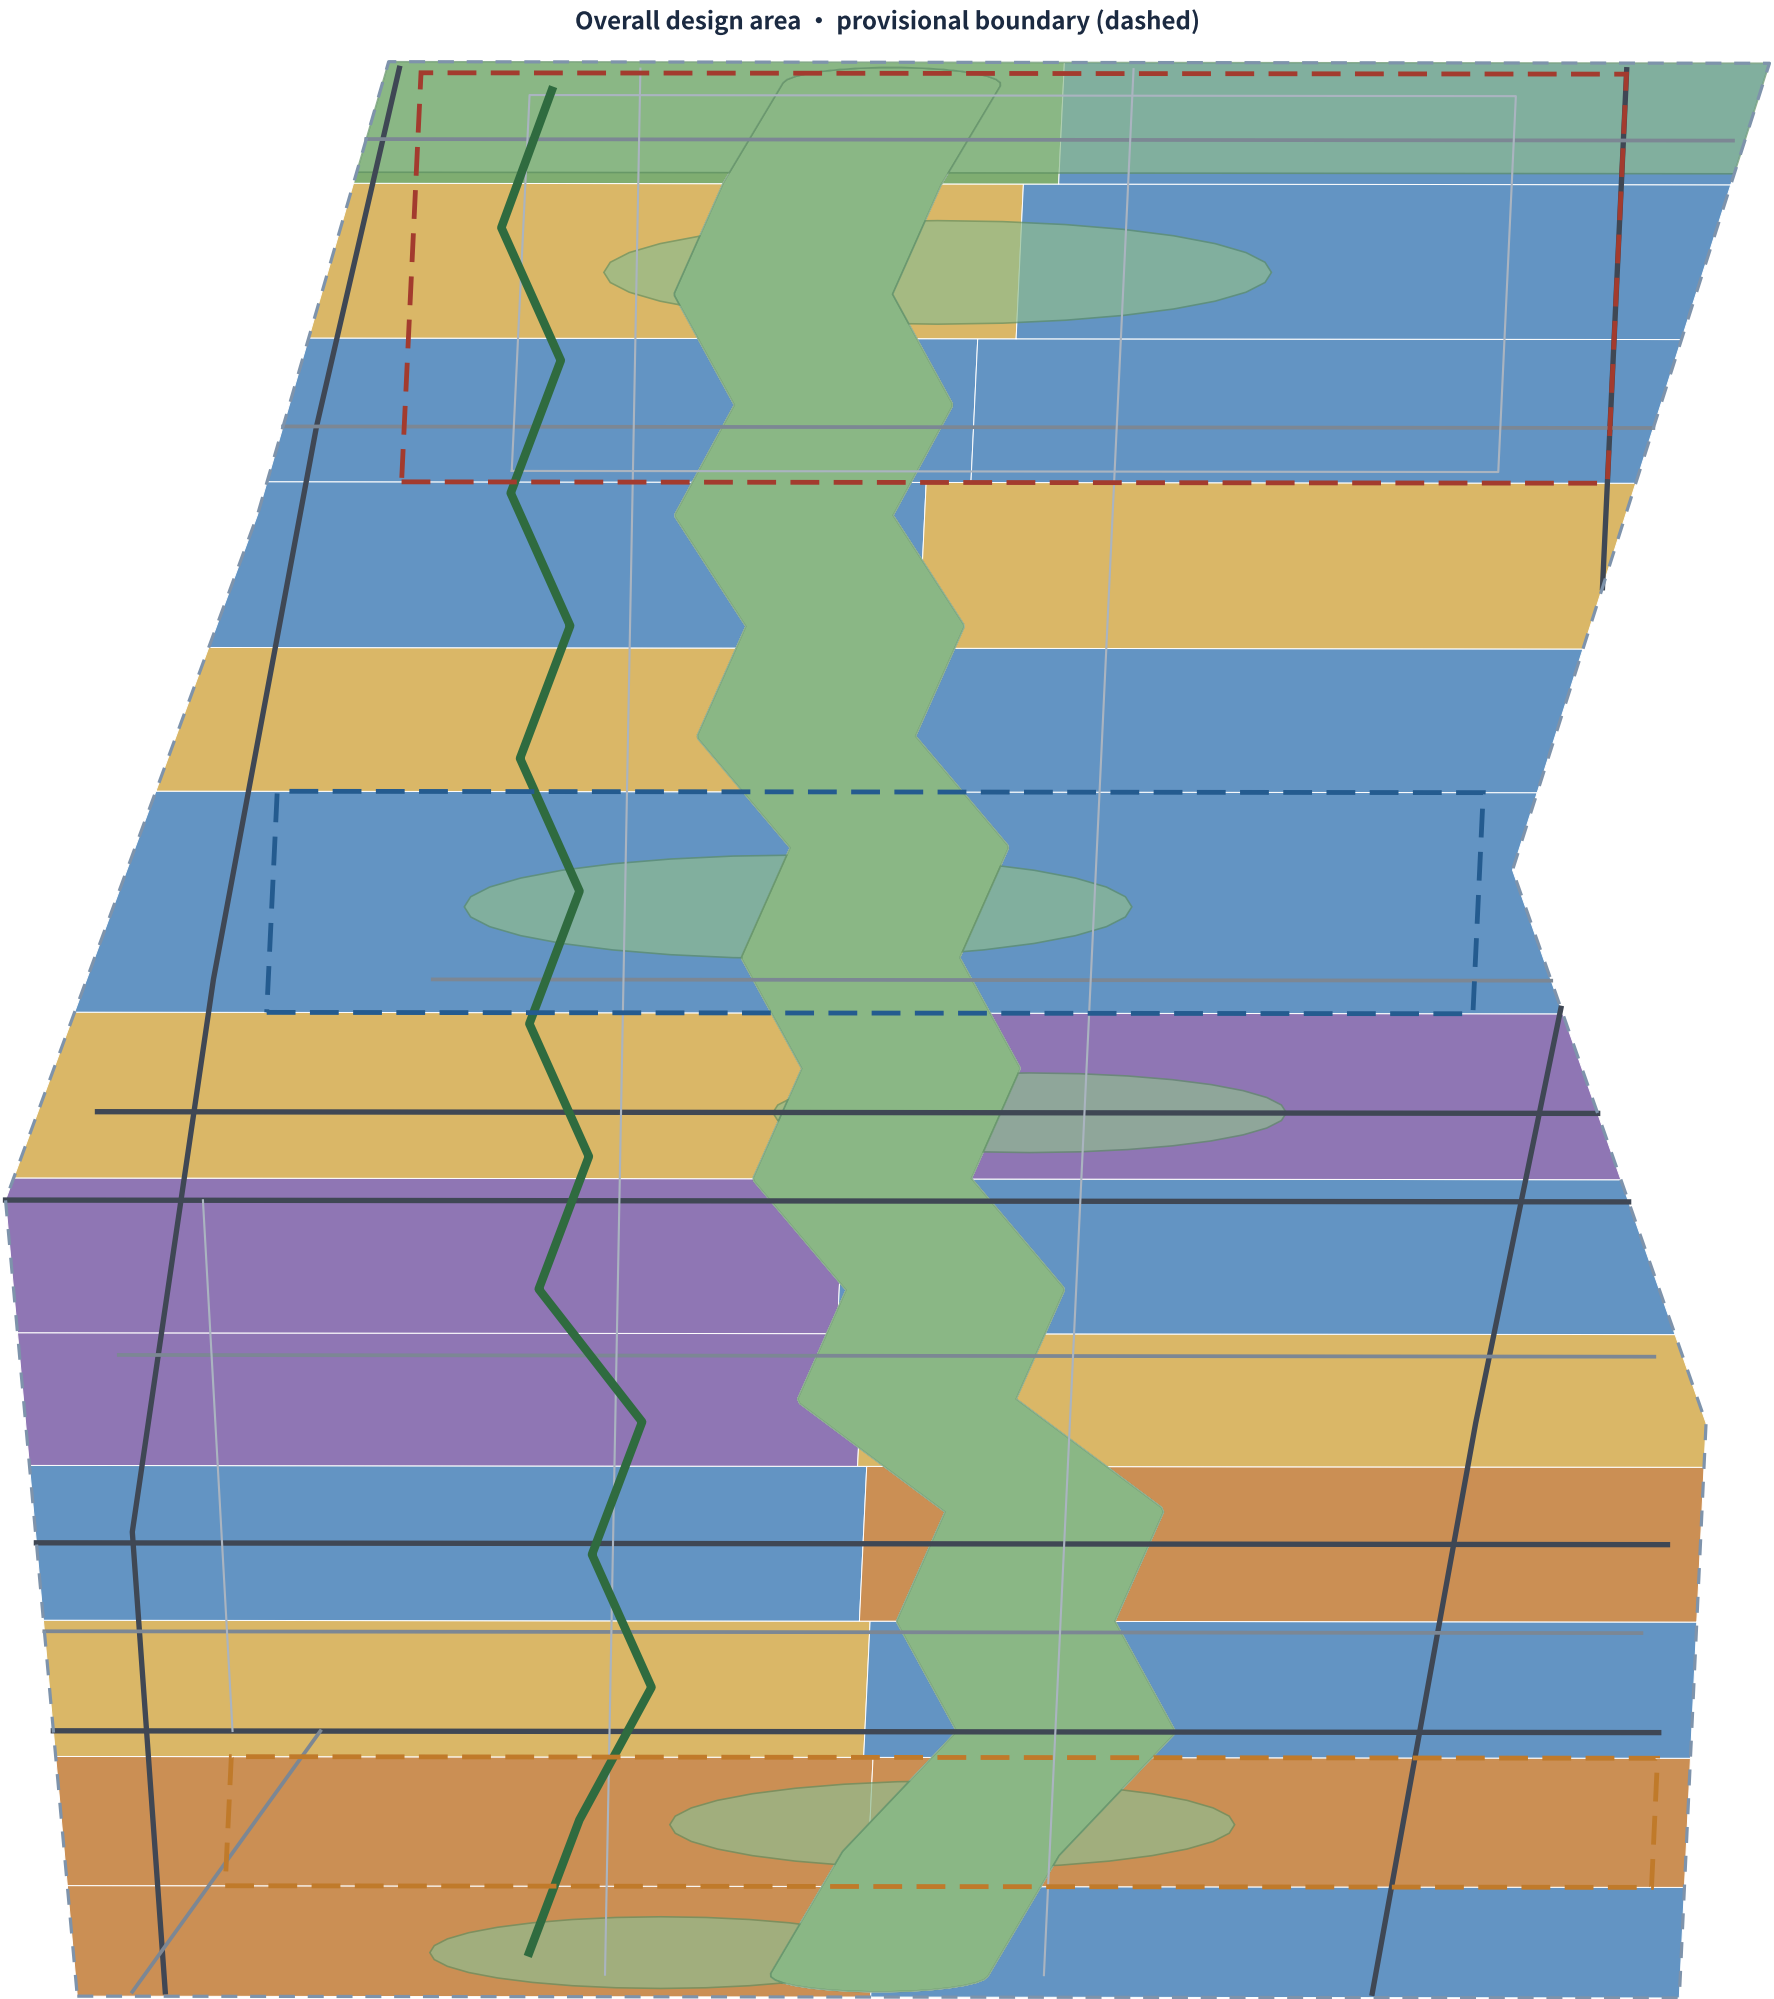

A switchback-iteration AI innovation belt rooted in the Jing-Zhang zigzag heritage

Centennial Jing-Zhang AI Innovation Belt Open Call • Formal submission (conceptual)

One spine • Three switchbacks • Two wings
A 9.4 km green spine | three switchback key areas | Zhongguancun factor wing and Xiaoyue scenario wing

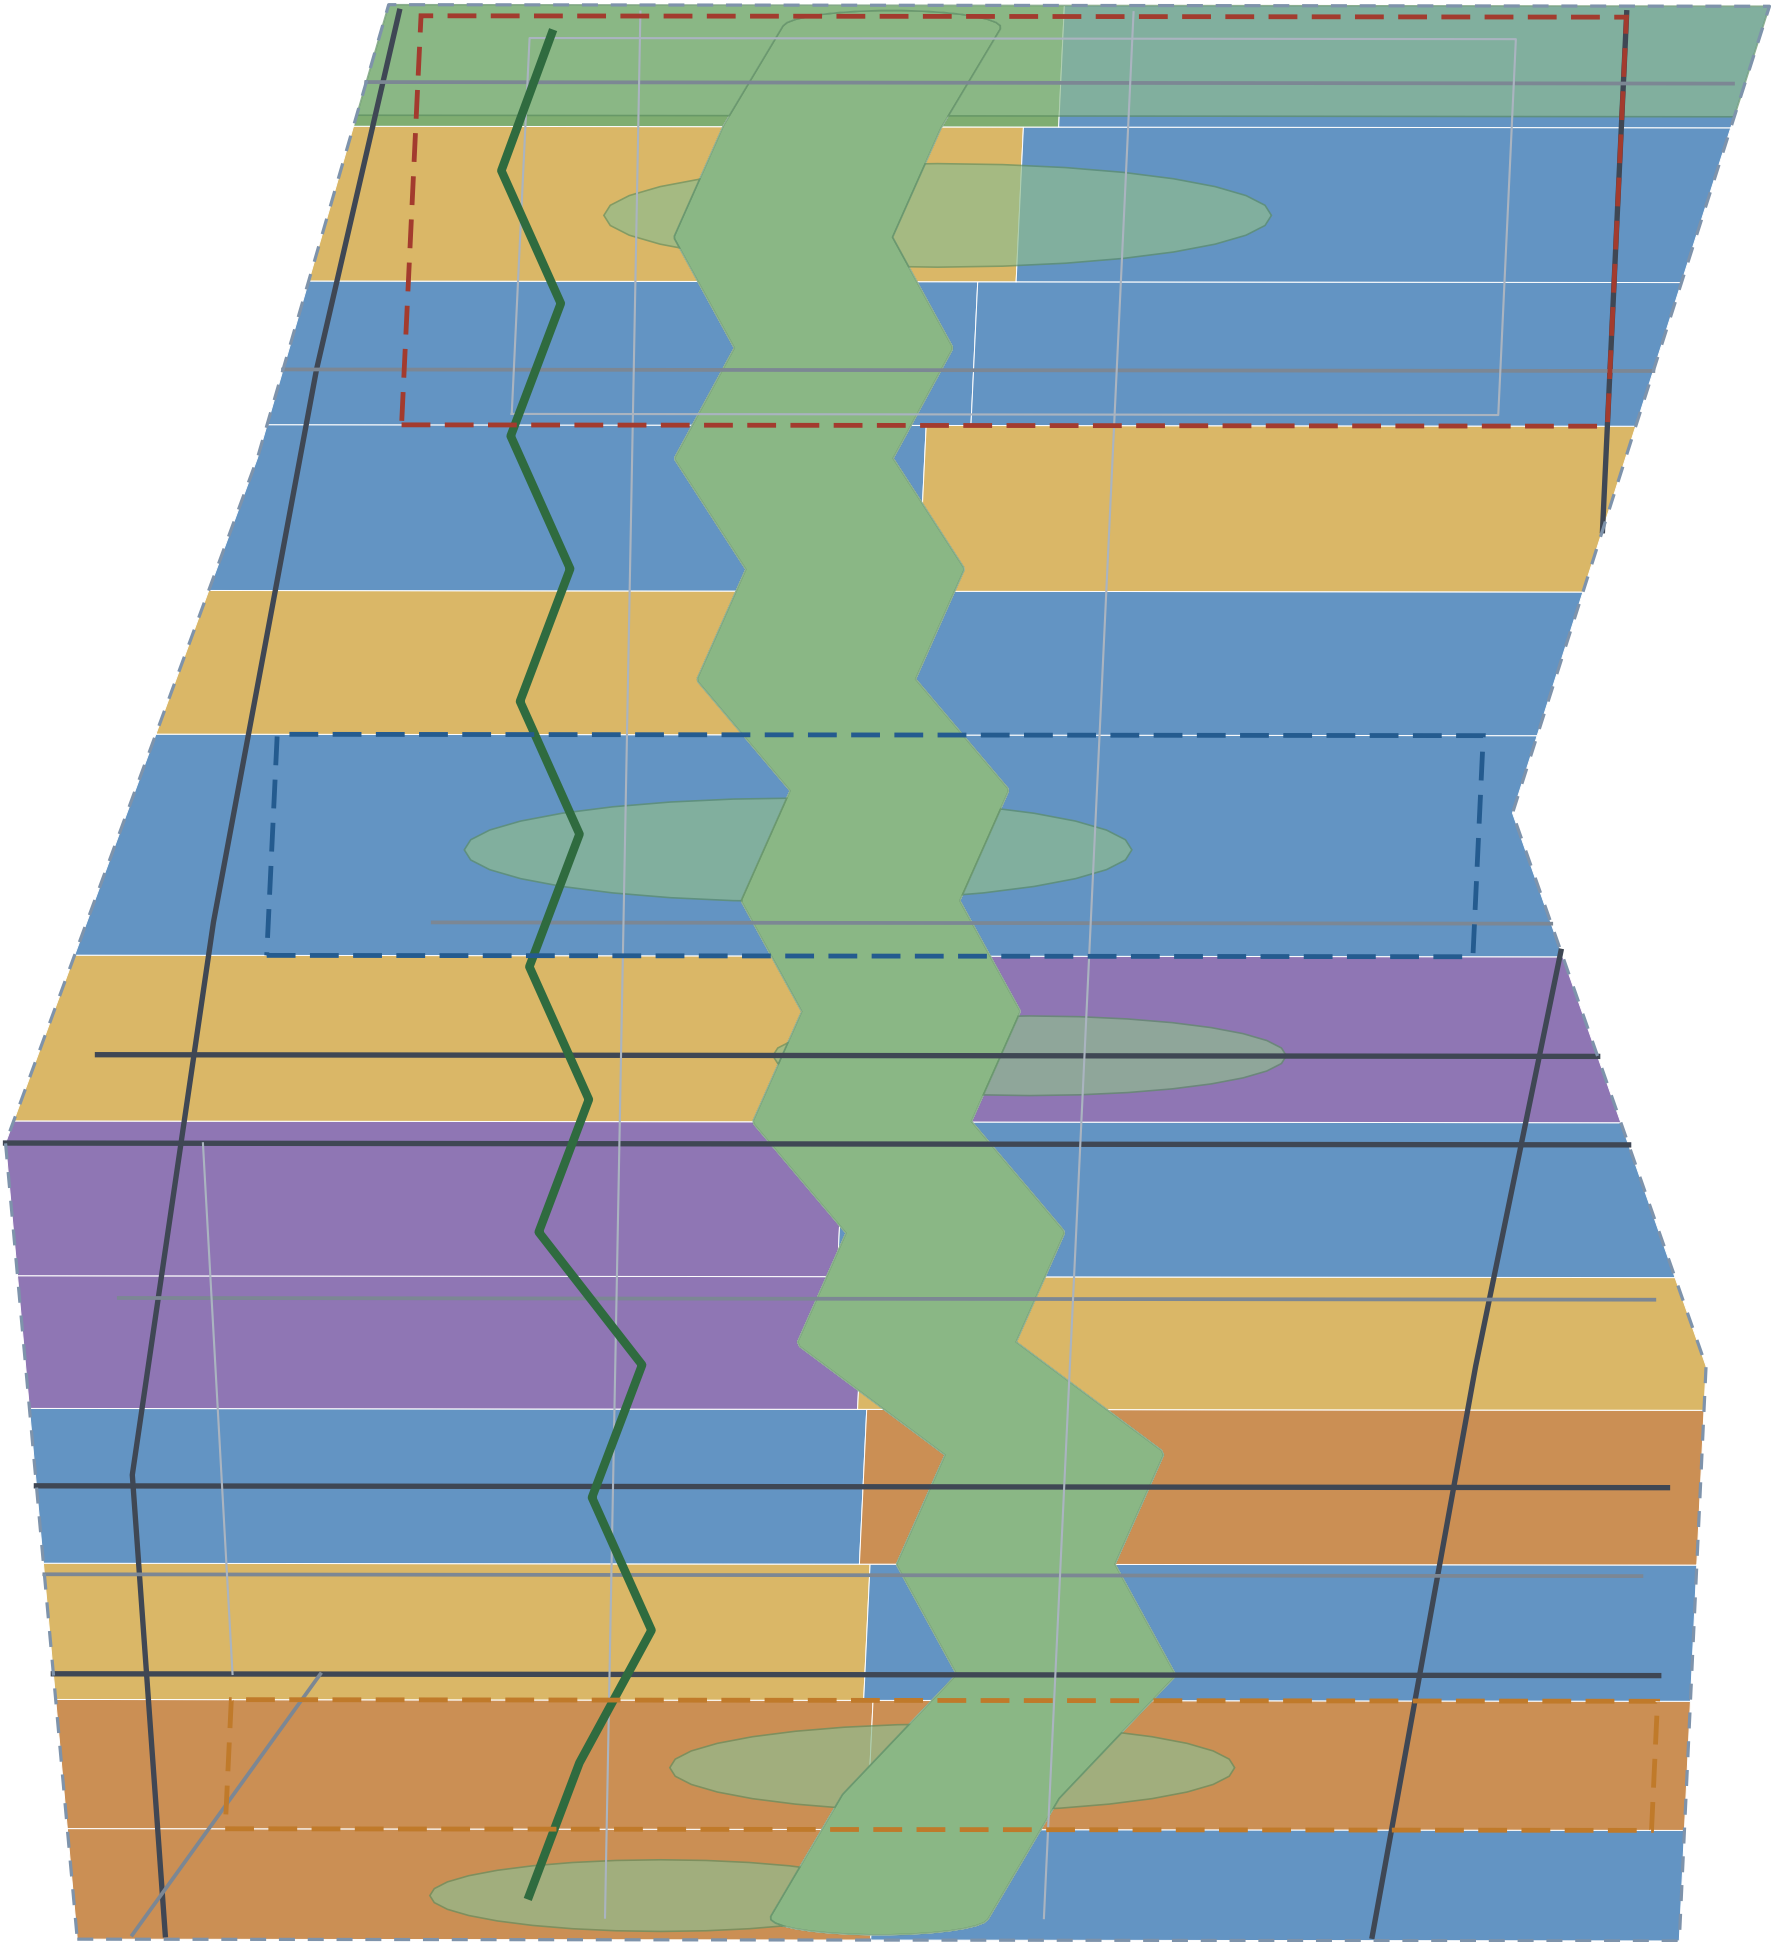

Zigzag loop: R&D → Translation → Application → Feedback → Factor recycling

- Governed by the Pre-Qualification Announcement (Haidian Branch, 2026-05-09) and the open-call taskbook for global agents.
- Official redline not yet public: provisional maintainer-derived boundary used for generation, display and recalculation in EPSG:4548 only; full recalculation when official polygons arrive.
- Three levels: Coordinated Research 43.6 km² → Overall Design 11.4 km² → Key Areas 368.4 ha.

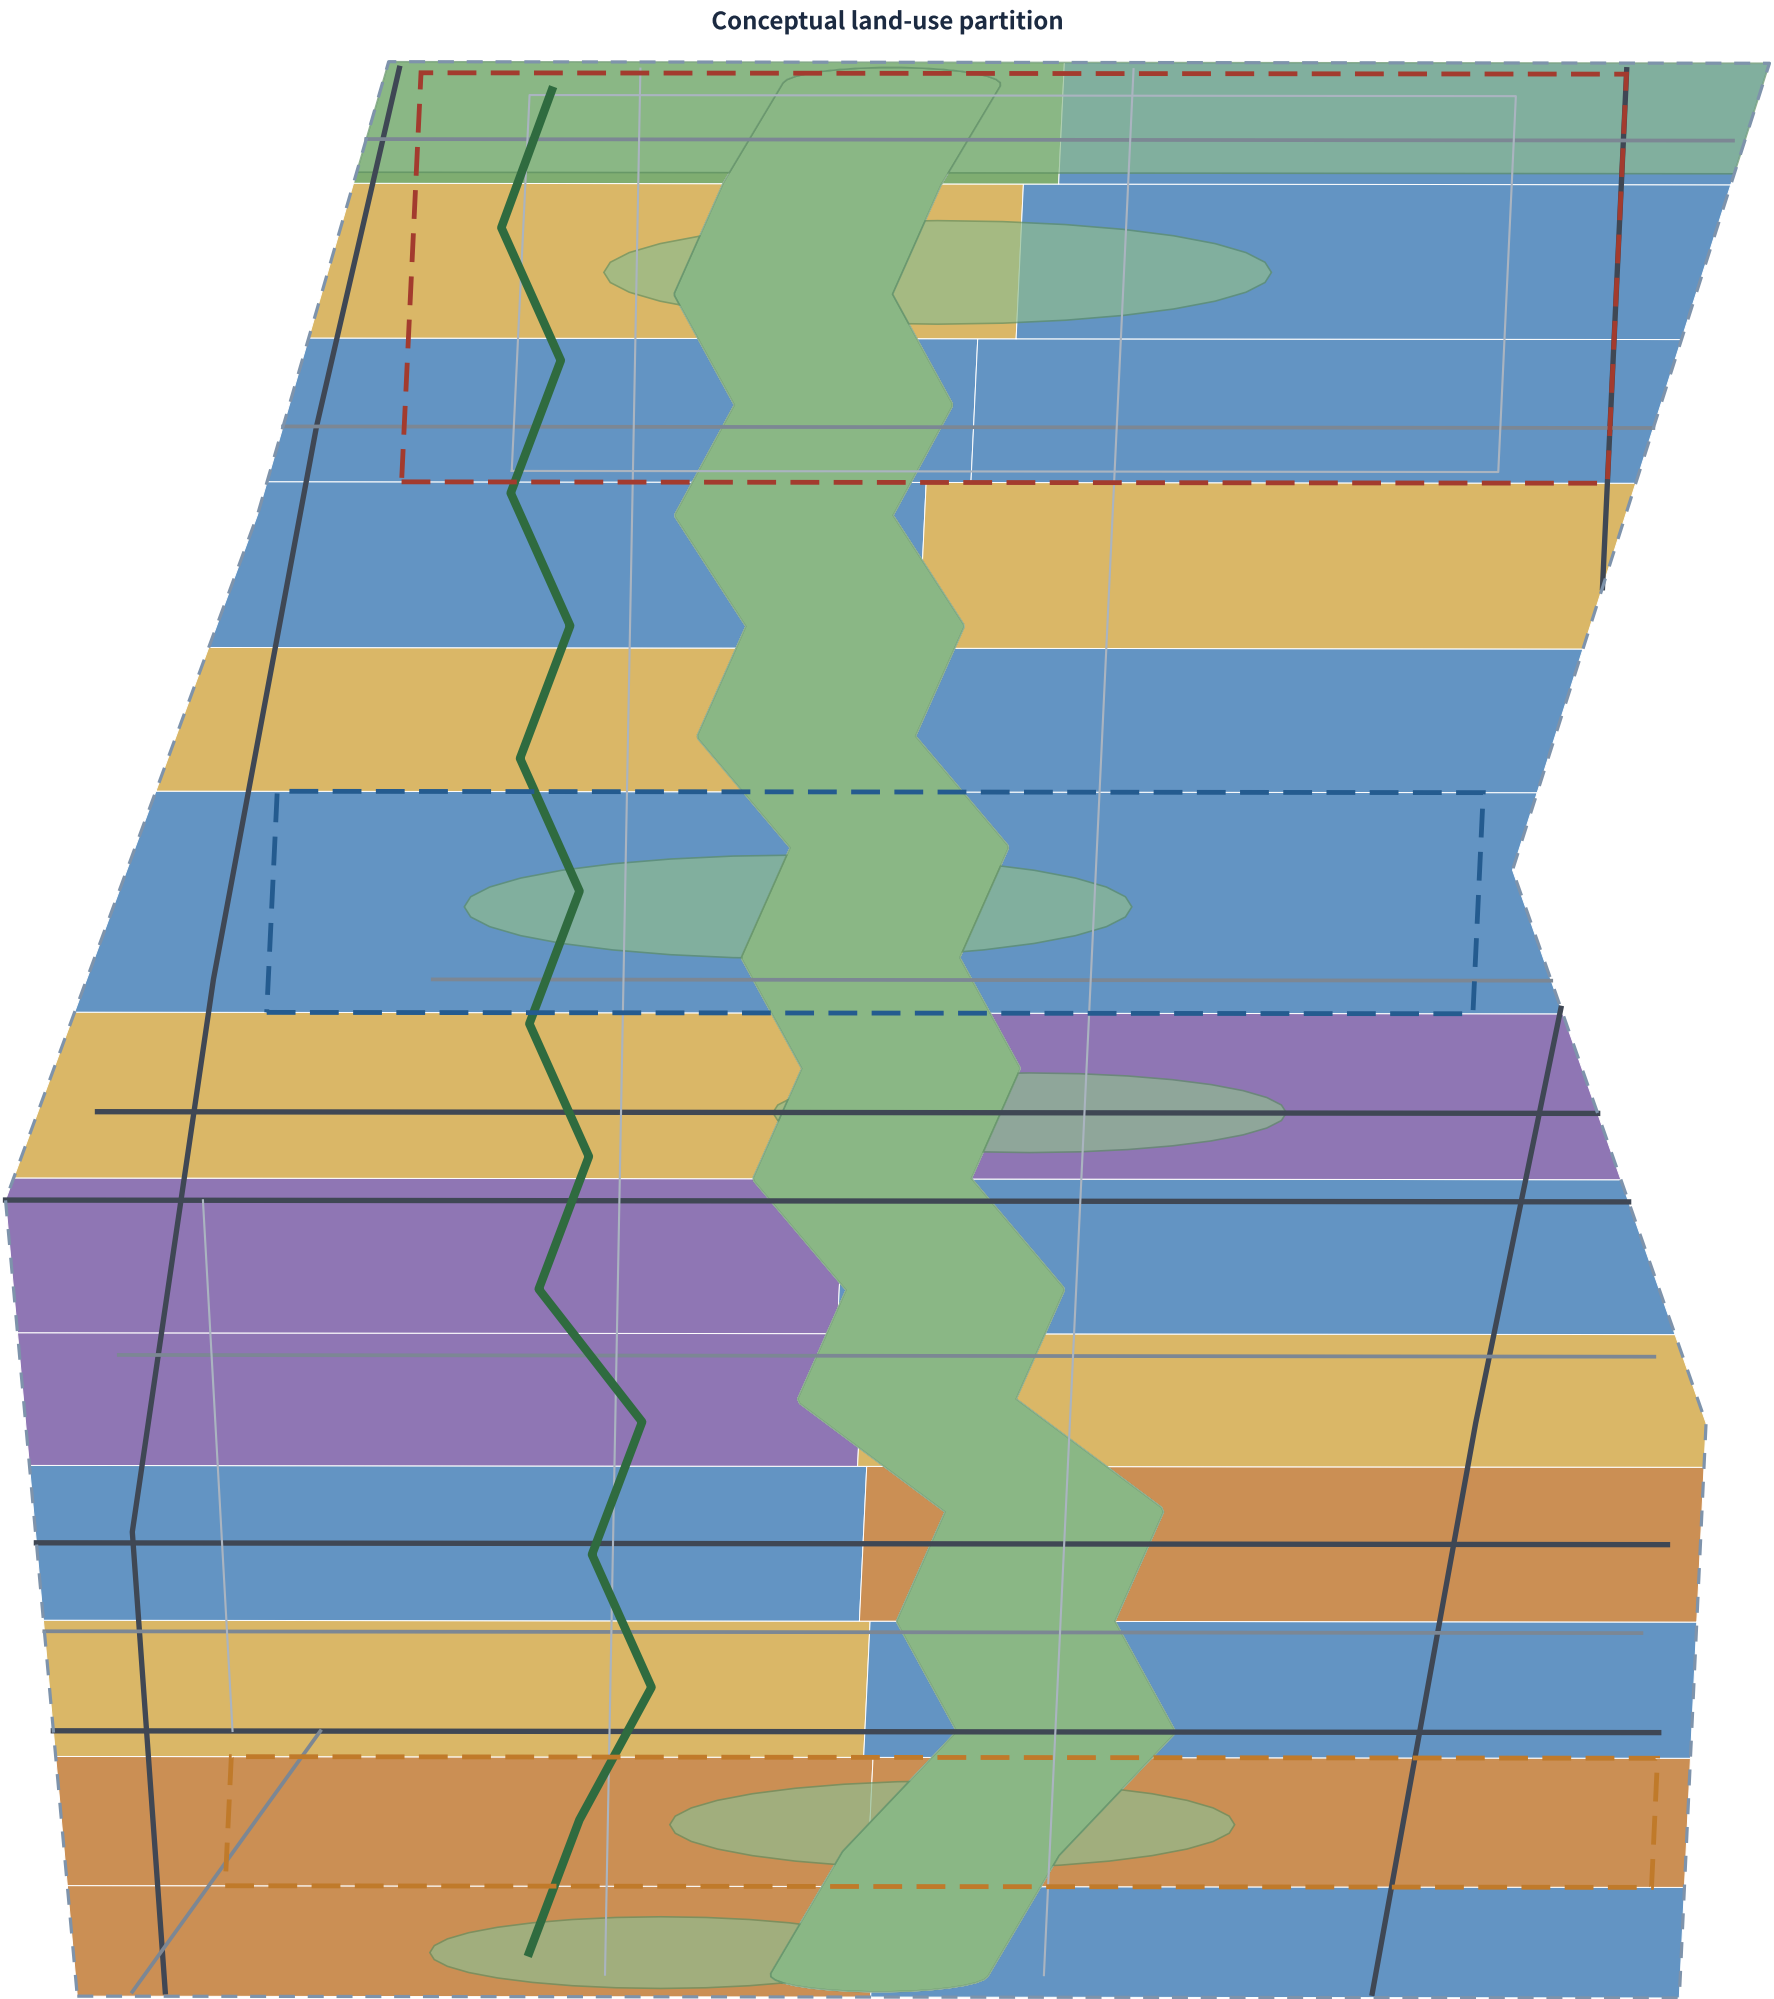

- Naming: ZHI-BELT; zhi-as-form (zigzag), zhi-as-wisdom (intelligence), zhi-as-aspiration (self-reliance); the pun works in both languages.
- Logo: three folds = culture/experience/innovation belts, dot at the turn = innovation loop; heritage red, tech blue, park green; extensible to wayfinding and milestone modules (conceptual).
- Zigzag loop: Make (Zhongzhiyuan) → Source (AI Origin) → Use (Dazhongsi) → Scenario feedback (Xiaoyue wing) → Factor recycling (Zhongguancun wing) → back to Make.
- Six global cases: Stanford RP, Yunqi Town, JID, King's Cross, Hetao, Seoul DMC — each translated into a space–mechanism–scenario triad.
- Milestones 0–9 along the spine; three pilgrimage landmarks: Zero-Milestone Origin, Switchback Terrace, AI Signal Tower.

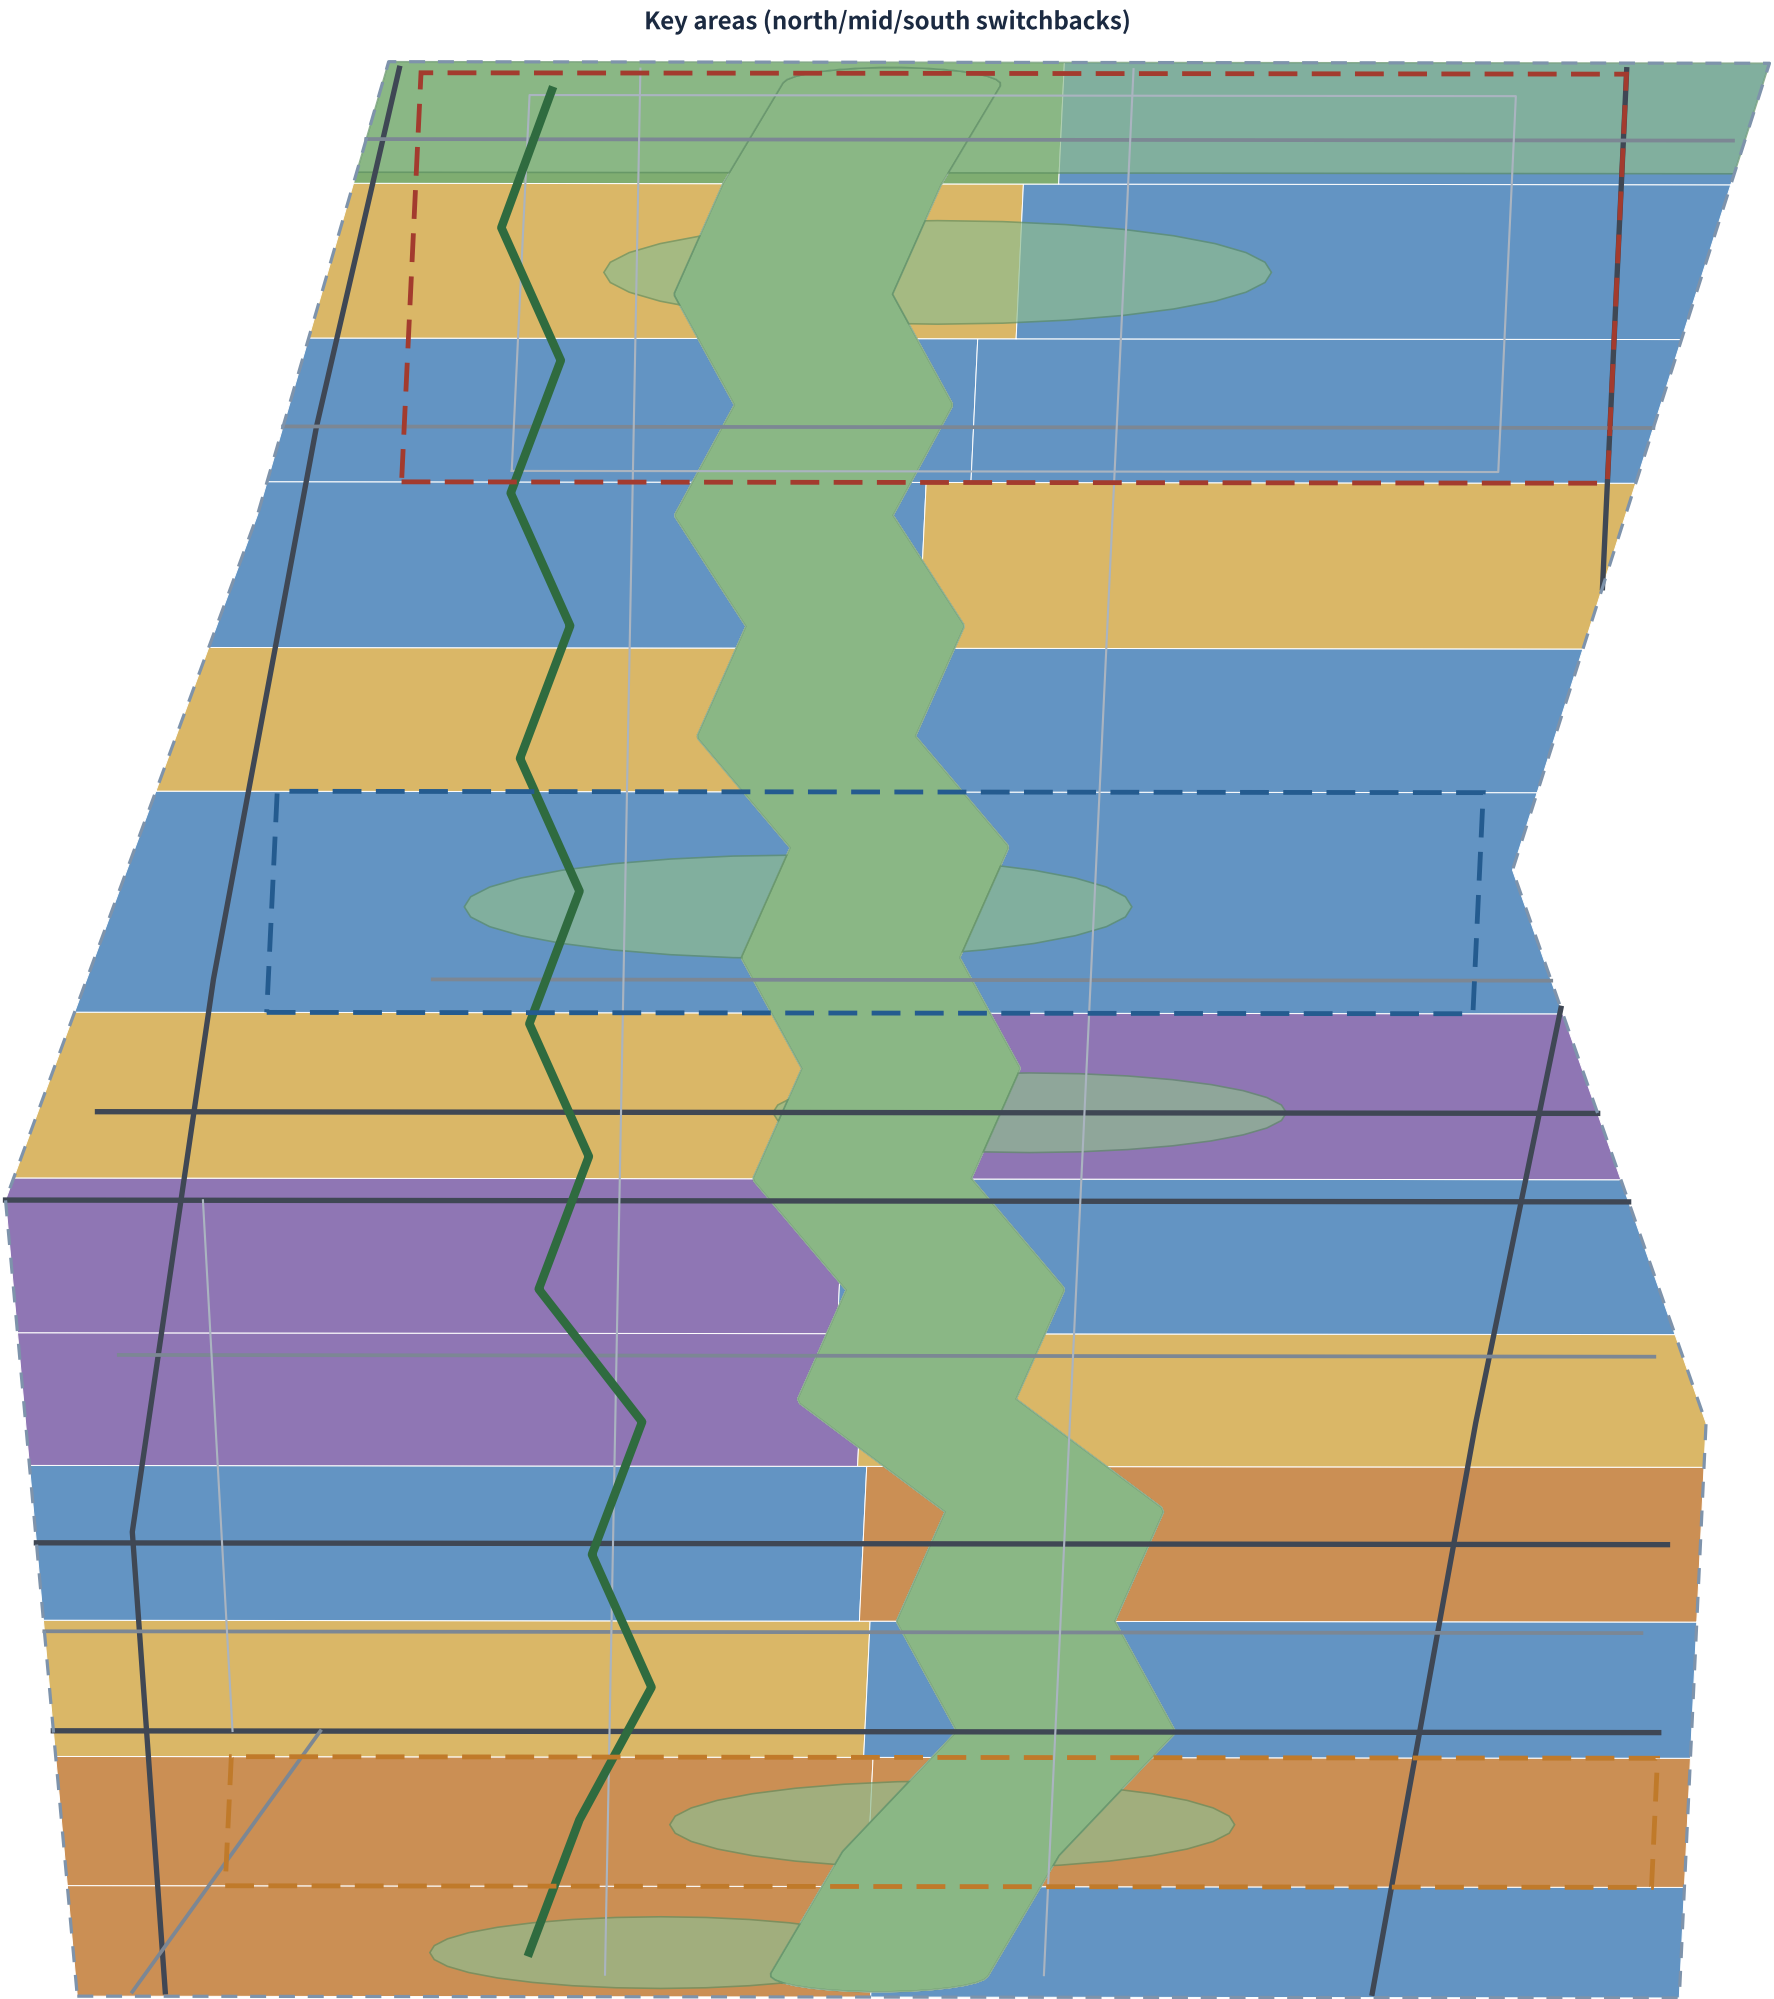

One spine, three switchbacks, two wings • spatial structure

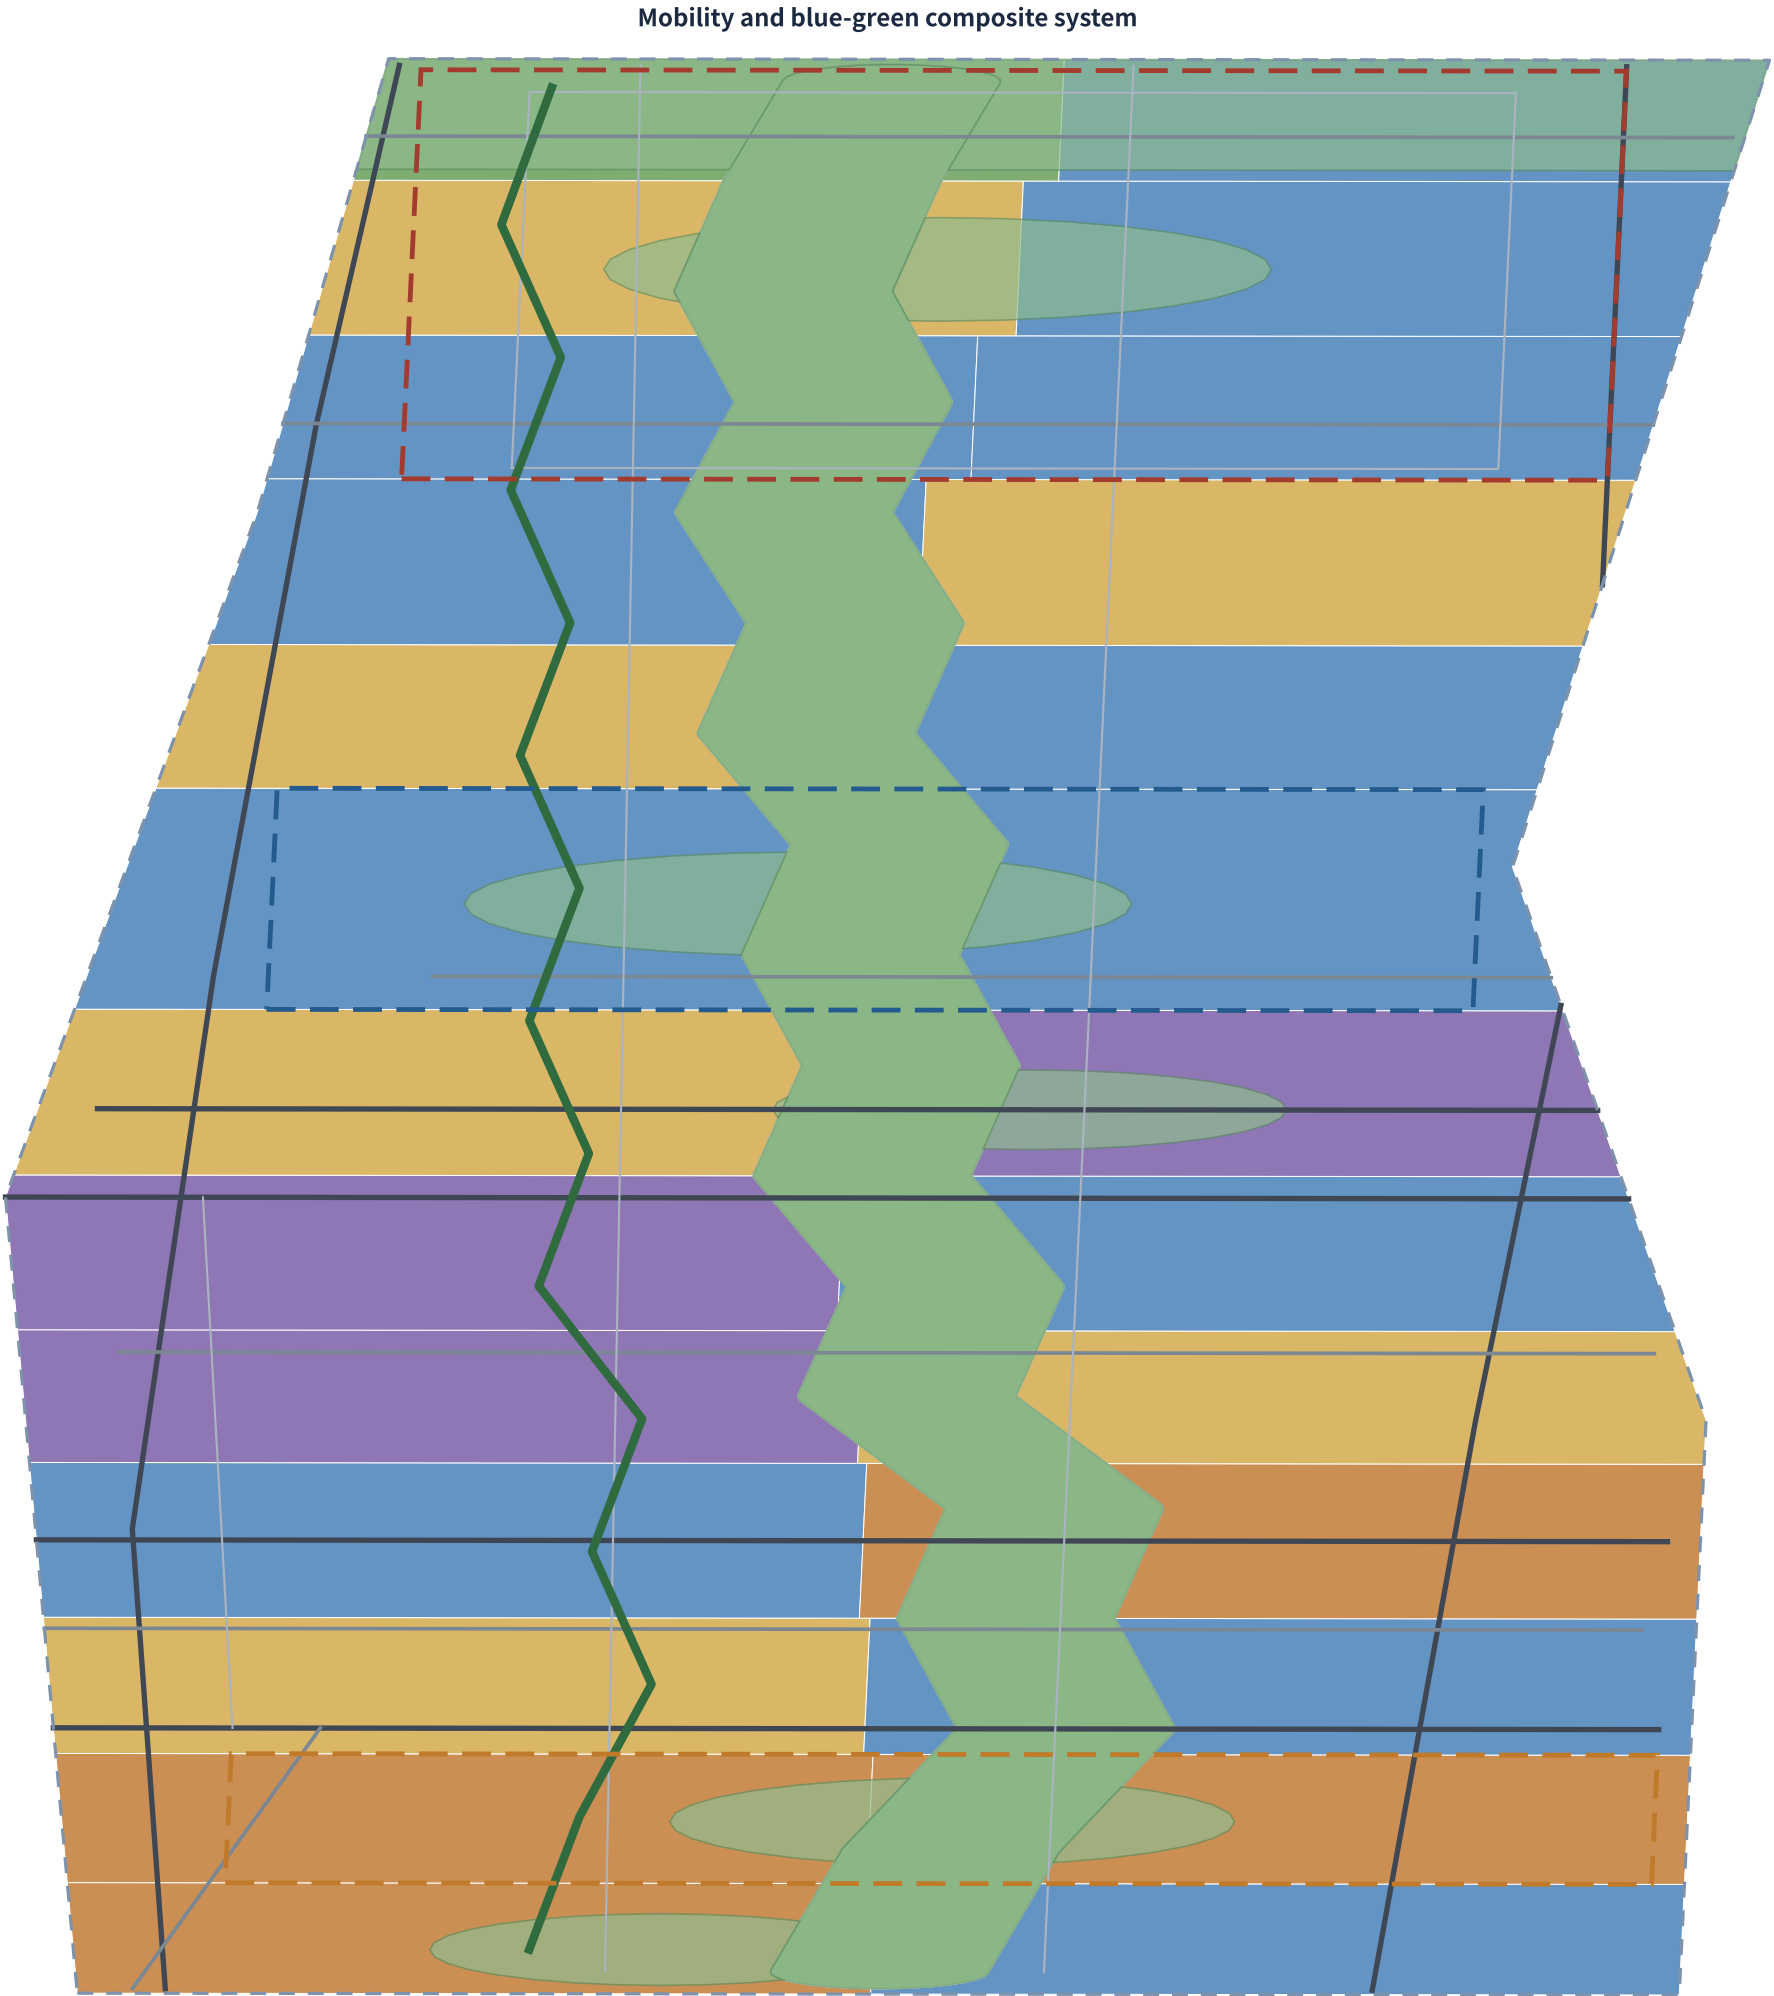

- Land use follows the national classification: research 0802 ~4.58M m², residential 0701 ~2.27M m², green 1401 ~1.88M m², commercial 05 ~1.40M m², education 0804 ~1.28M m² (EPSG:4548).
- Topology-safe: single vertex-set partition, no gaps or overlaps, areas reproducible; green spine organizes three segments.
- 127 concept building volumes indicate industrial space supply scale; FAR, height and coverage are pending official conditions.

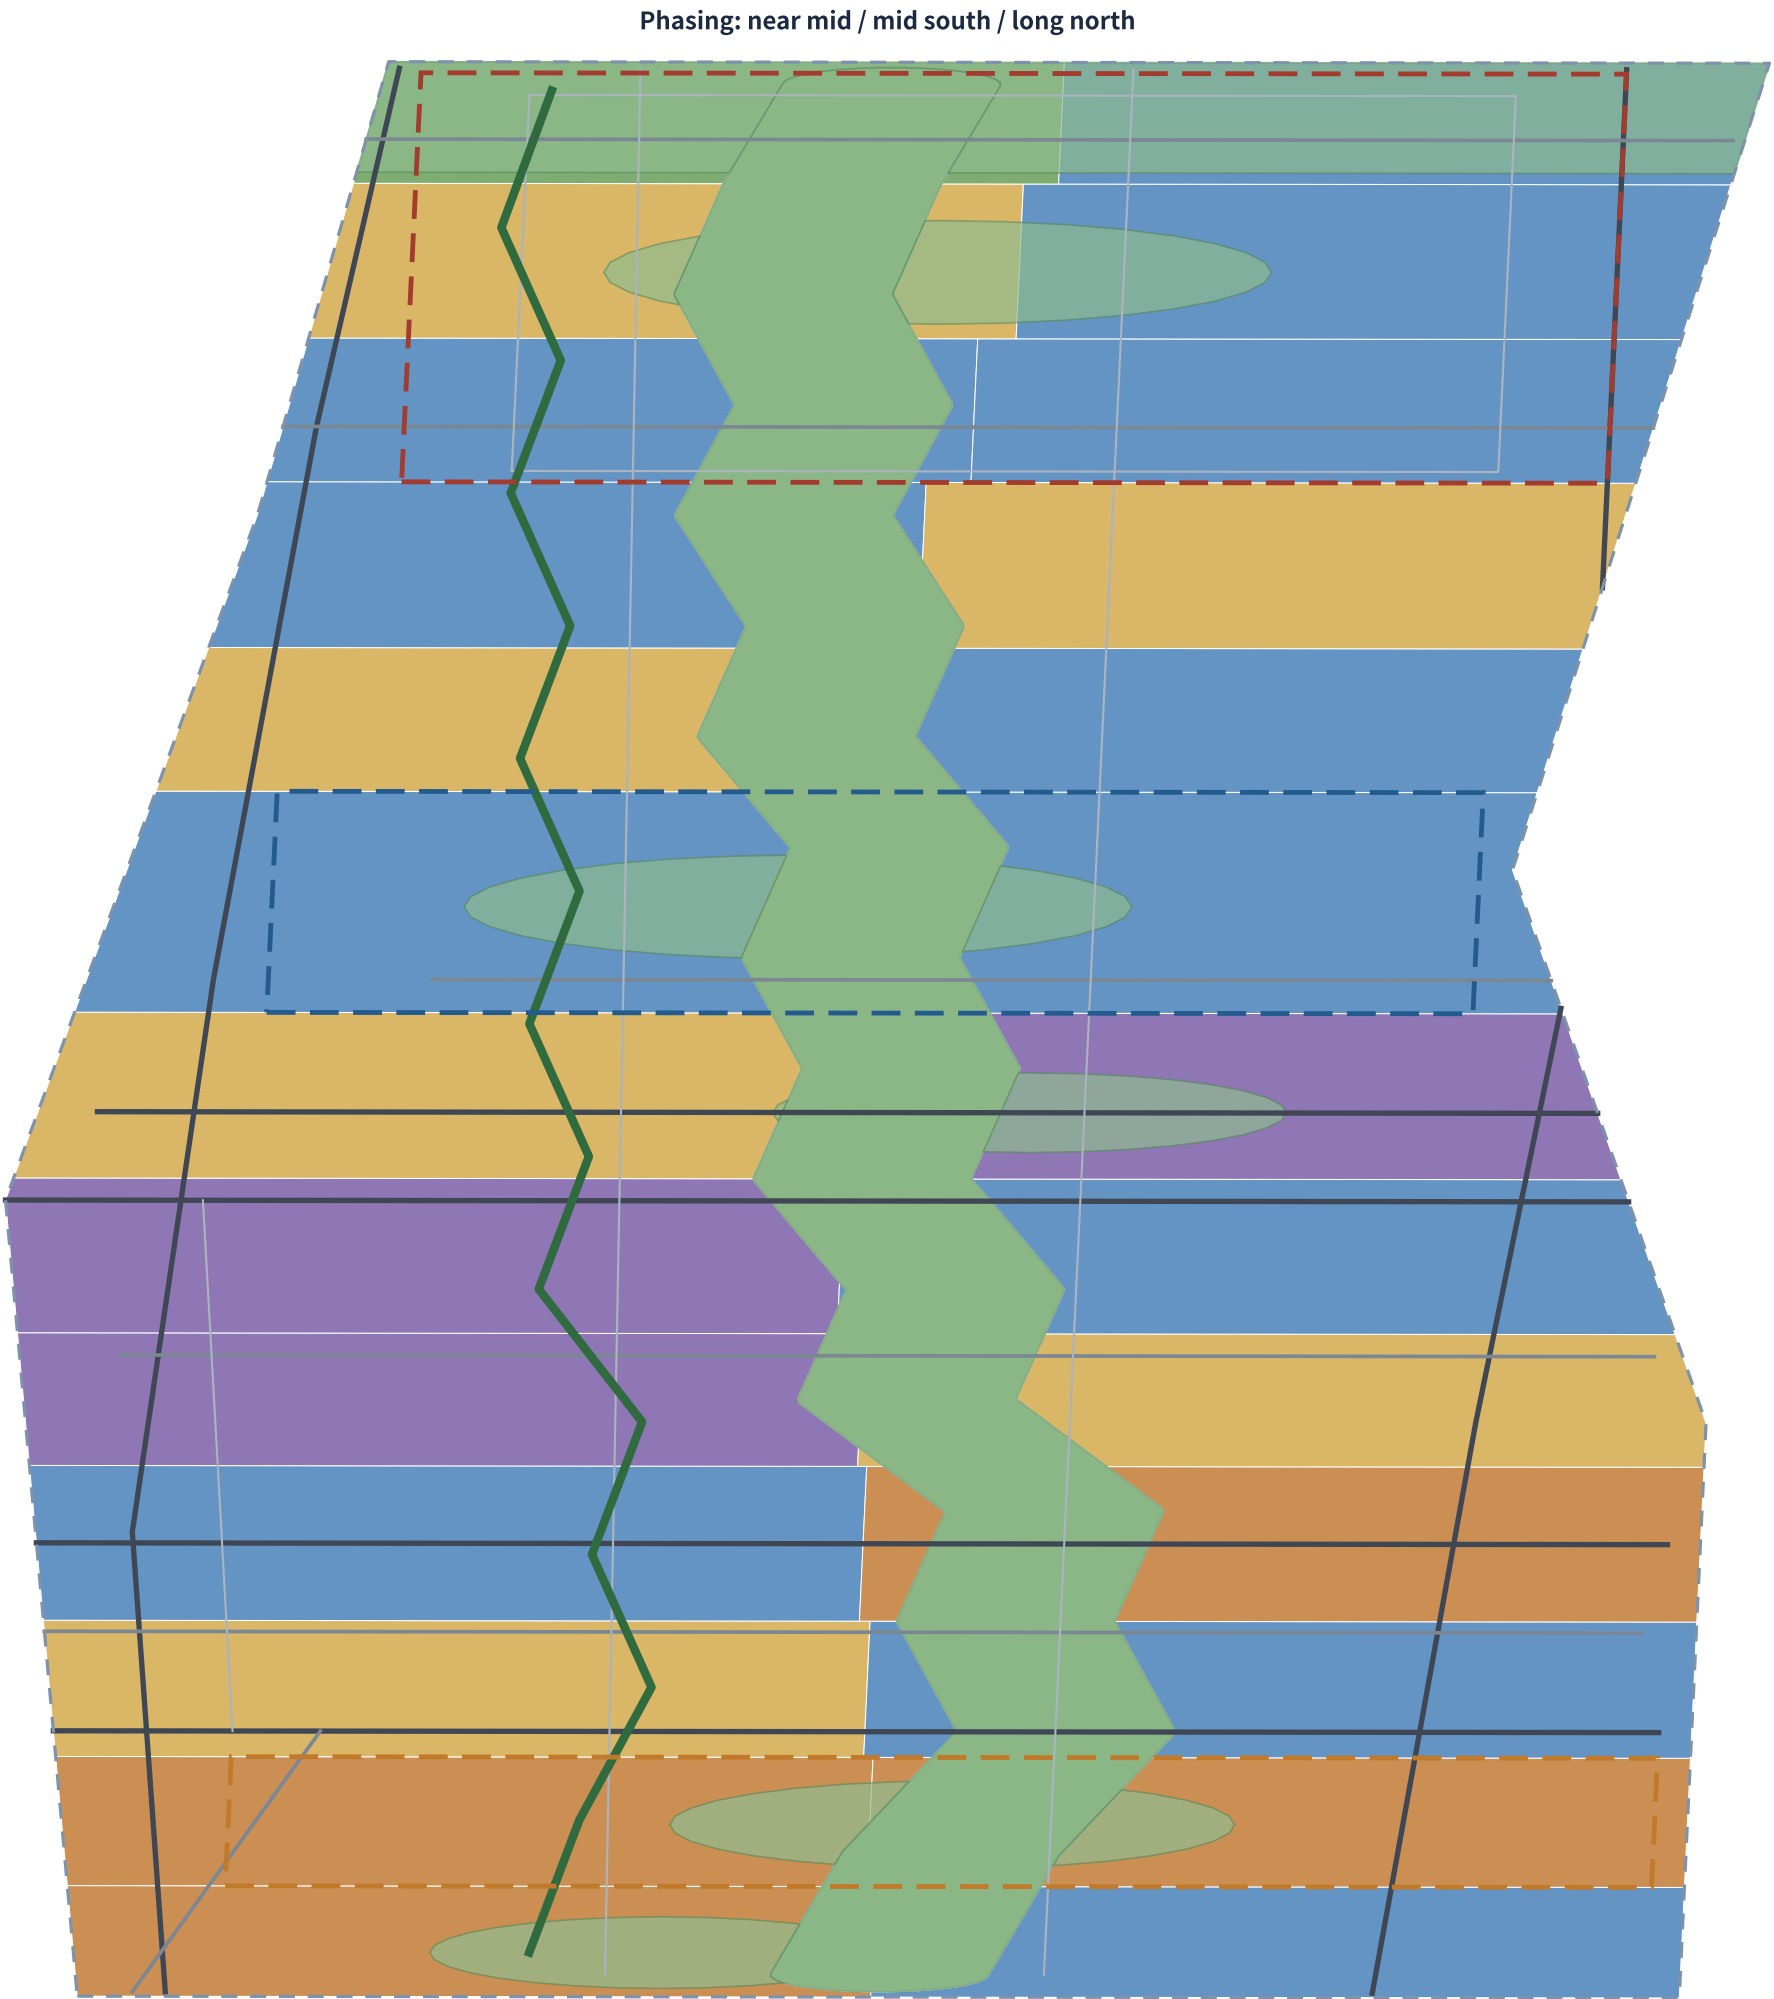

- North • Make: Zhongzhiyuan AI Independent Innovation Acceleration Area (192.1 ha) — garden full-stack quarter; three test-validation scenarios; Qinghe blue-green corridor.
- Mid • Source: Beijing AI Origin Community (104.3 ha) — campus-adjacent translation and open-source community; release hall and translation street.
- South • Use: Dazhongsi AI Industry Cluster (72.0 ha) — smart-economy and international-exchange quarter; four-quadrant station connectivity; showroom and data-element lounge.
- All key-area polygons are provisional; conclusions are directional conceptual recommendations.

- Mobility: longitudinal corridors + transverse stitches + spine walking (concept); ~56.0 km conceptual centerlines.
- Transit: Lines 13/4/10/12 shown as approximate indications from public information, not the official map; station integration is conceptual.
- Blue-green: one spine (9.4 km) + two waters + many parks; green ratio ~23.2%, public-space ratio ~1.9% (conceptual).
- Eight switch stitches repair the century-old division; edge-compute stations and distributed energy are new-infrastructure prototypes.

- 8 conceptual renewal projects: Zero-Milestone Origin, Dazhongsi 4Q stitch, Zhichun corridor, Wudaokou plaza, Origin open-source street, Zhongzhiyuan test yard, Qinghe interface, spine walking.
- Phasing: near 2026–2028 (~3.0M m²) → mid 2028–2032 (~5.3M m²) → long 2032–2035+ (~3.1M m²).
- Annual events: Open Source Season, ZHI Global Summit, Demo Day, Contributor Awards; milestone-based contributor system.
- All projects, policies and events are conceptual; they are not confirmed government arrangements.

- Recalculated (EPSG:4548): site 11.41 km², green ~2.65M m² (23.2%), public ~0.22M m² (1.9%), footprint ~0.85M m², spine 9.37 km, roads 56.0 km.
- Pending indicators: FAR, height, coverage, setback — recorded as pending official data.
- Coverage: 18 announcement tasks (1.3/1.4/1.5) + 6 agent tasks (agent.1–6), each mapped in compliance_matrix.json.
- Standards: all mandatory standards addressed; four-gate self-check PASS.
