

JING-ZHANG AI INN BELT • Urban Design for the Centennial Jing-Zhang AI Innovation Belt

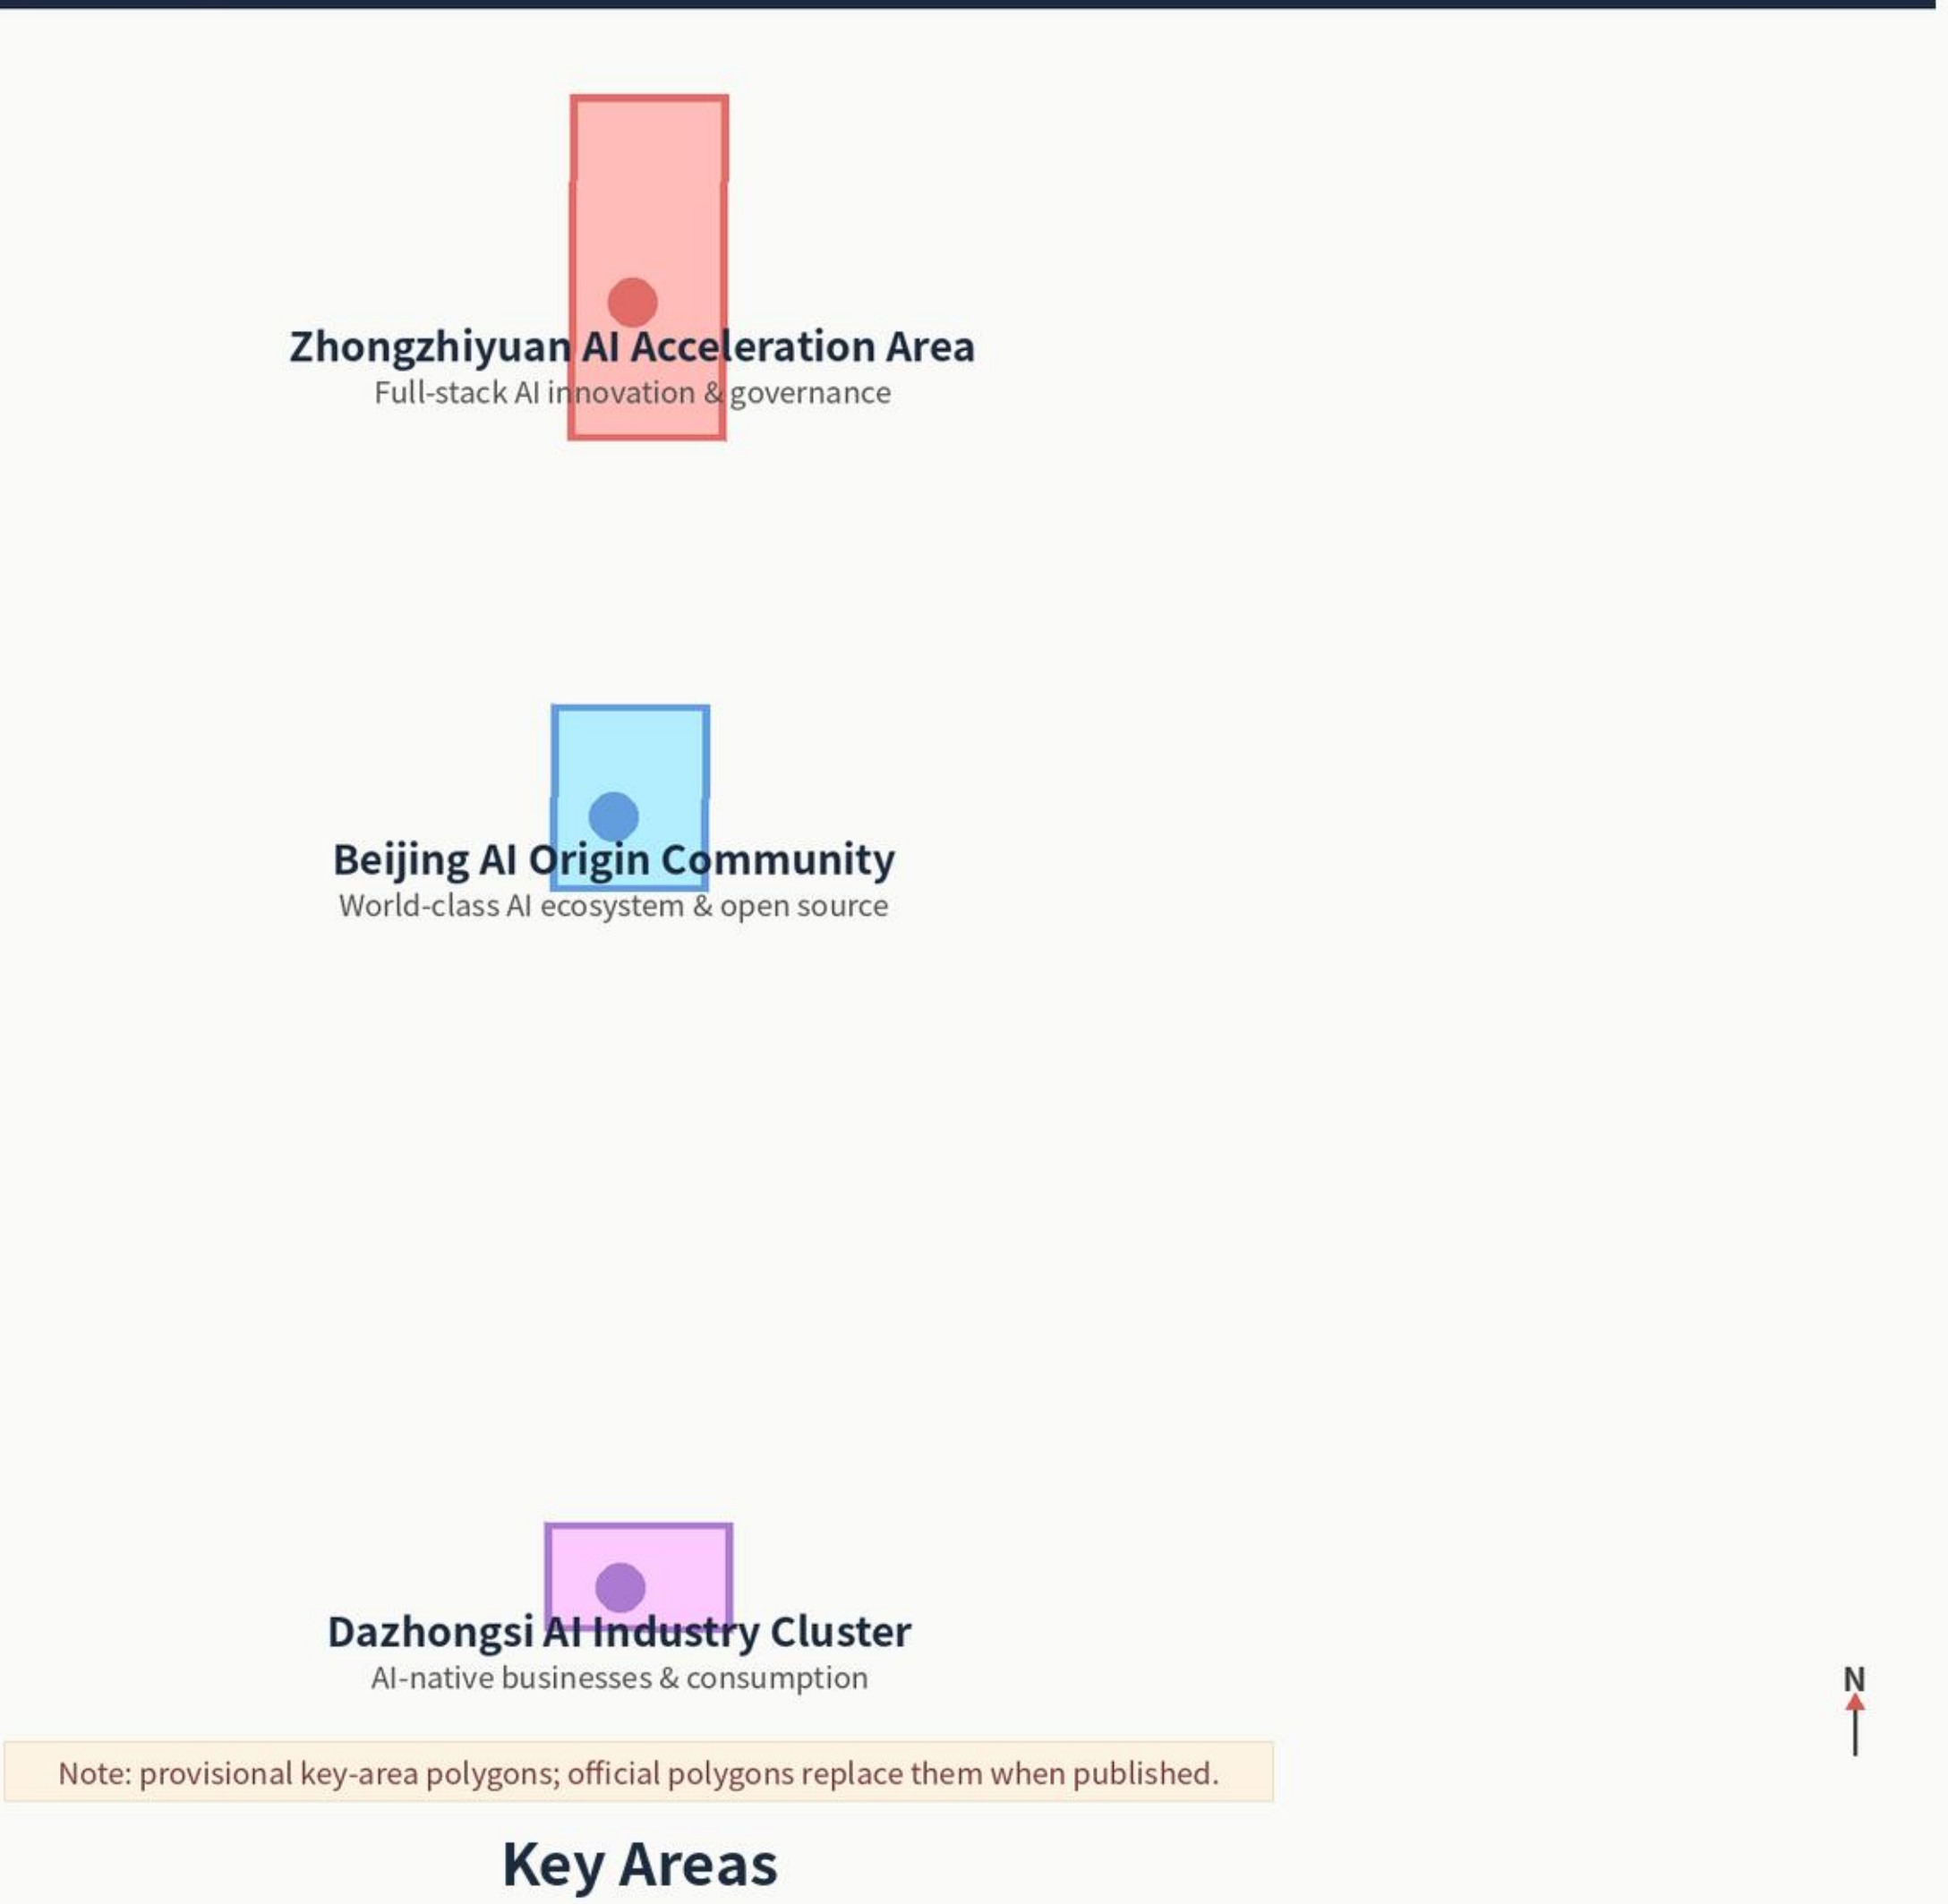

Jing-Zhang AI Inn Belt • Site Overview

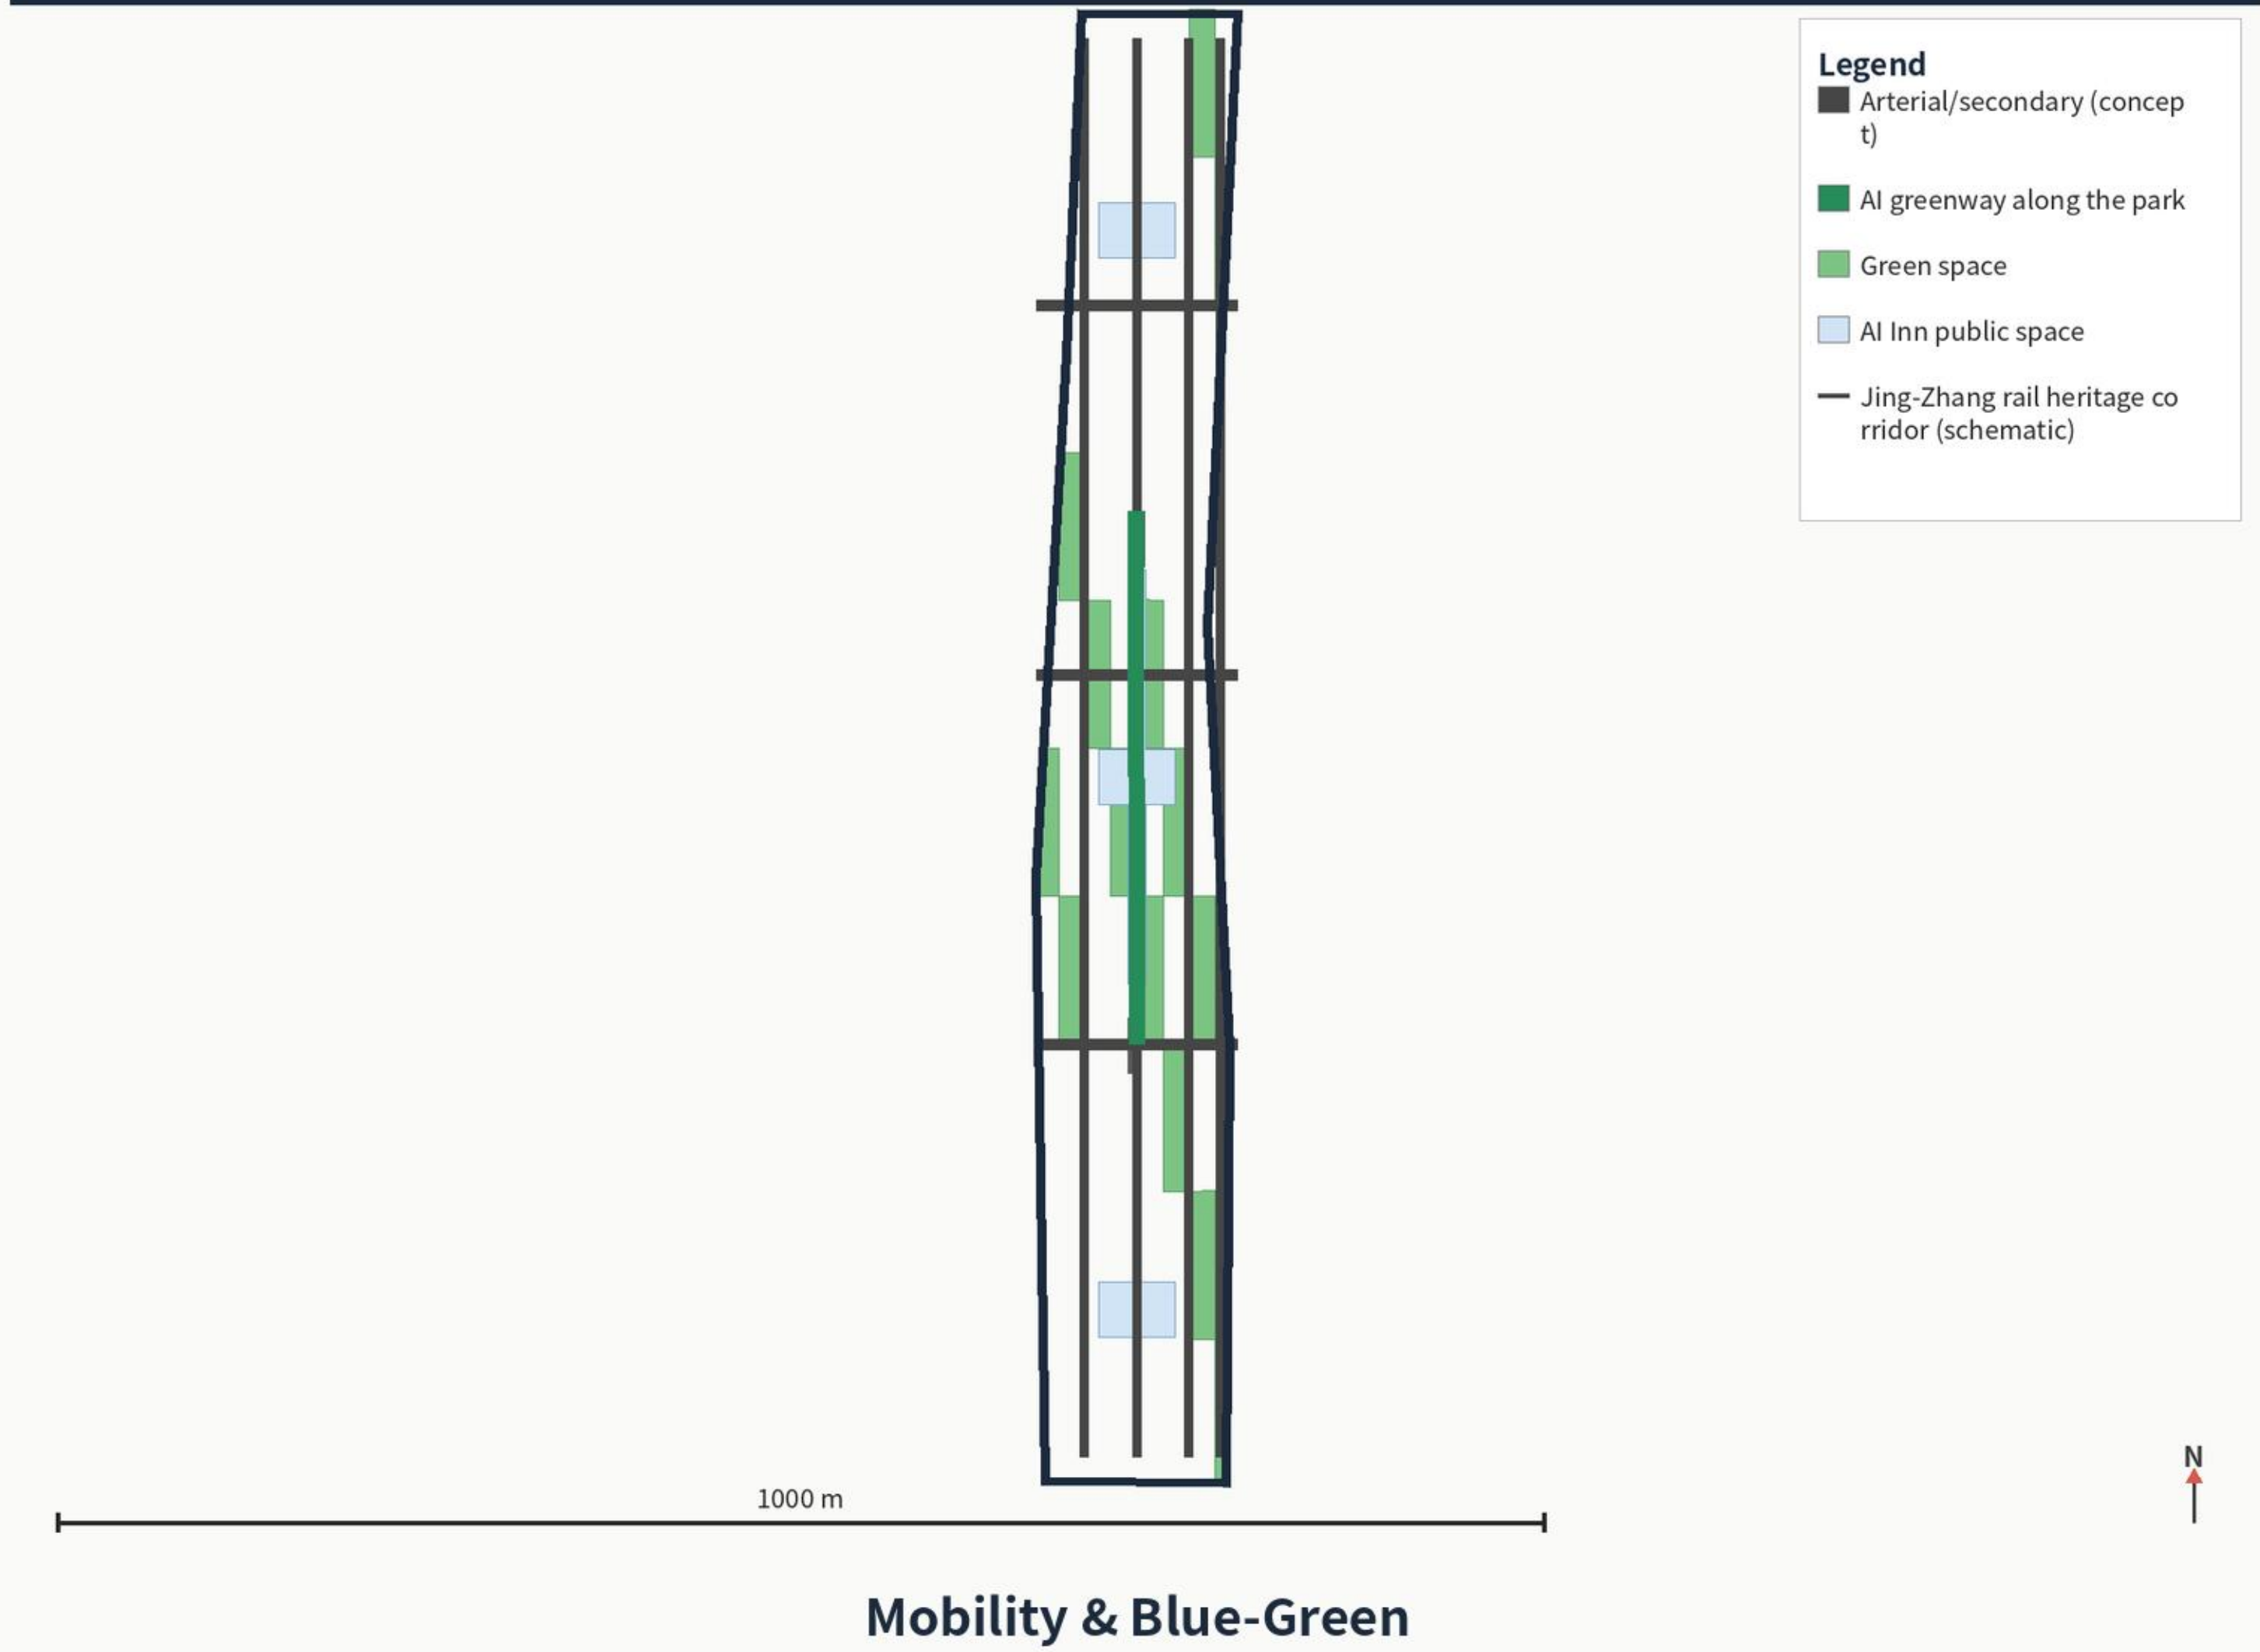

Jing-Zhang AI Inn Belt • Land-Use Structure (Concept)

Jing-Zhang AI Inn Belt • Three Key Areas (Provisional)

Jing-Zhang AI Inn Belt • Mobility & Blue-Green Network (Concept)

Jing-Zhang AI Inn Belt • Key Metrics Evidence

Metrics		
Metric	Value (from geometry)	Evidence layer
Site area	11412825 m ²	geometry/site_boundary.geojson
Building footprint area (concept)	250071 m ²	geometry/buildings.geojson
Green space area (concept)	2181458 m ²	geometry/green_space.geojson
Green ratio (concept)	19.1%	geometry/green_space.geojson
Public space area (concept)	799695 m ²	geometry/public_space.geojson
Public space ratio (concept)	7.0%	geometry/public_space.geojson
Road centerline length (concept)	44796 m	geometry/roads.geojson
Building count (concept)	90	geometry/buildings.geojson
Key area count	3	geometry/key_areas.geojson
Phase count	3	geometry/phasing.geojson

Note: areas are recomputed from submitted geometry in EPSG:4548; recalculate when official boundaries replace the provisional ones.

Concept: an AI Inn network prototyped on the line-and-station heritage of the Jing-Zhang Railway. All spatial conclusions are open co-creation suggestions, not statutory planning, approval or engineering conclusions. Boundaries and key areas are provisional; official polygons replace them when published.
