

THE JING-ZHANG TRAIN STAFF

ONE STAFF, ONE SECTION — NO TOKEN, NO ENTRY

Every AI service entering public space must first hold a named, human-issued "city staff"; one staff per section, no token no entry, graceful degradation, fully auditable. The belt is organized as ONE MAIN LINE, THREE YARDS, SIX EXCHANGE POINTS, TWELVE BLOCK SECTIONS.

THE JING-ZHANG TRAIN STAFF: ONE STAFF, ONE SECTION

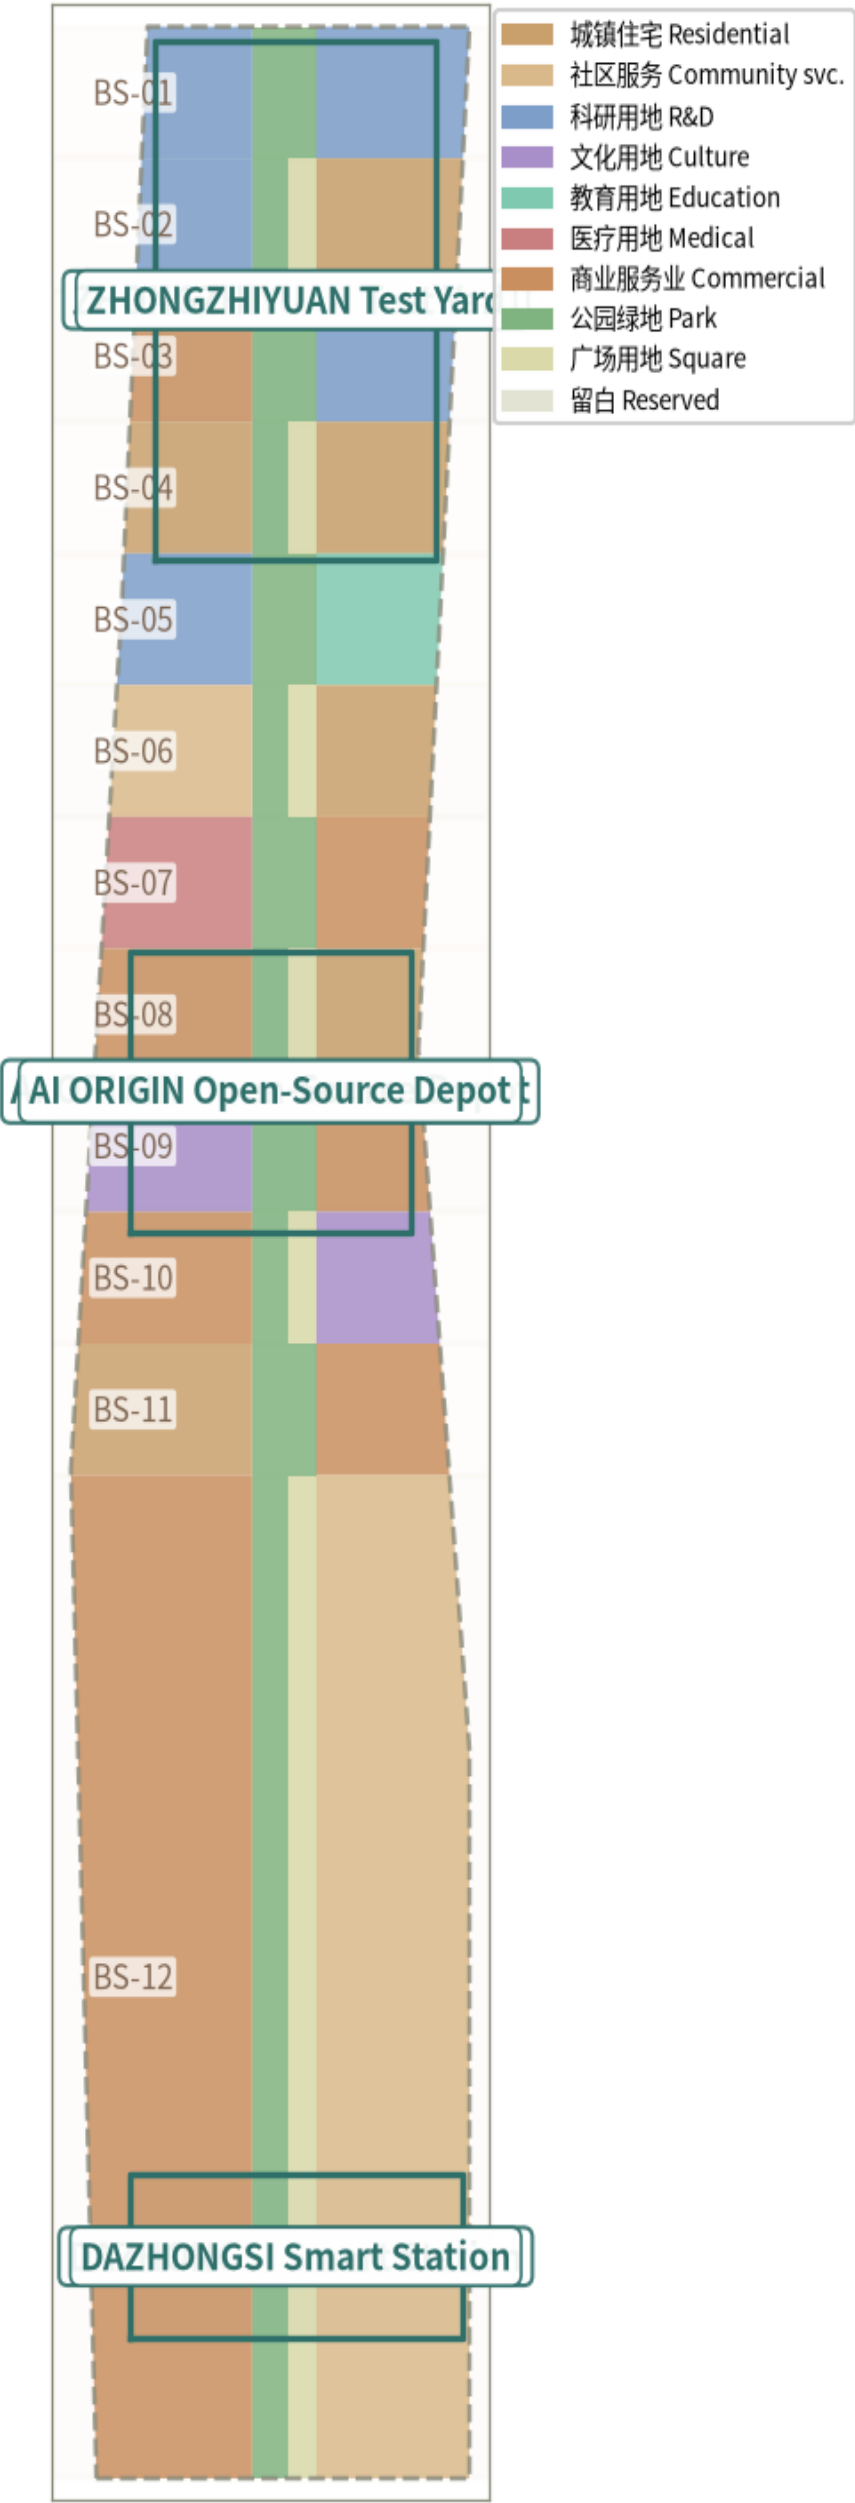

12 block sections • 6 exchange points • 3 yards • provisional boundary

Source: in-package GeoJSON; areas recomputed in EPSG:4548; not an official redline

Overview: main line, yards, exchange points, twelve sections

LAND USE: three yards, service wings, public main line

Source: geometry/land_use.geojson; 42 conceptual units fully cover the provisional boundary; operational labels do not change land use

Land use and three-yard structure

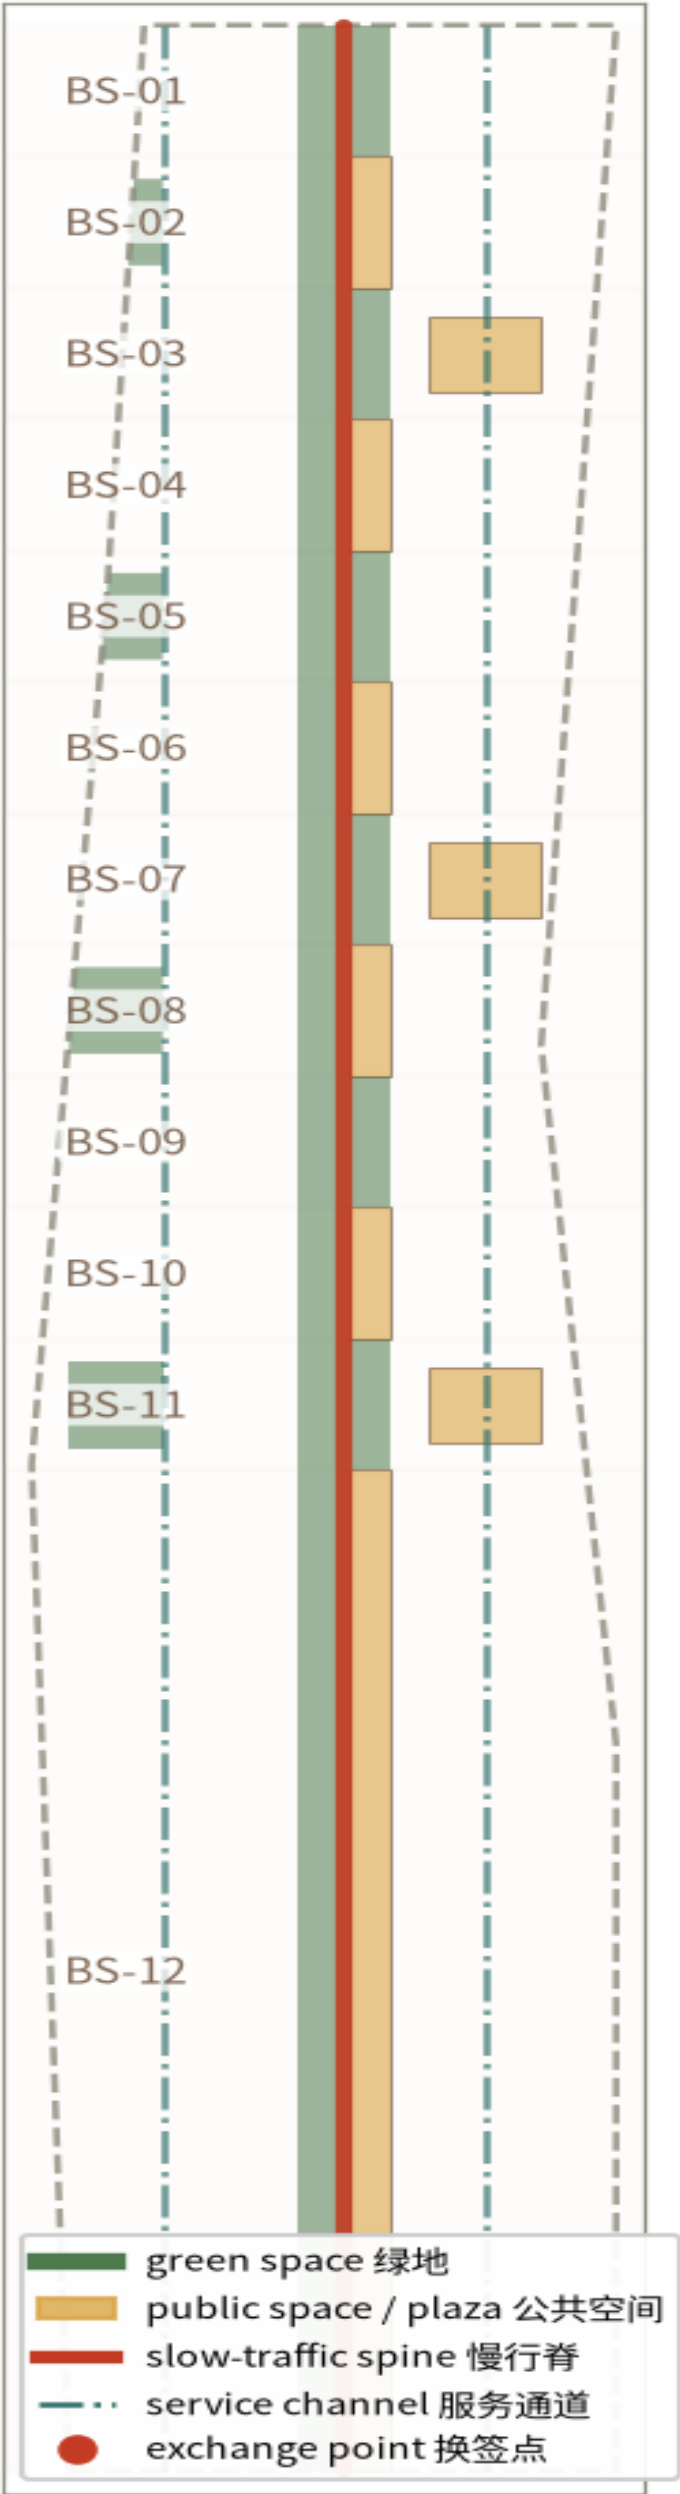

THREE YARD SECTIONS AND FIRST SCENARIOS

Source: in-package conceptual sections; key areas are provisional rectangles, not redlines or ownership

Three yard sections and first scenarios

MOBILITY, BLUE-GREEN AND PUBLIC SPACE

One spine • six east-west seams • exchange plaza network

Source: geometry/{green_space,public_space,roads}.geojson; EPSG:4548; conceptual

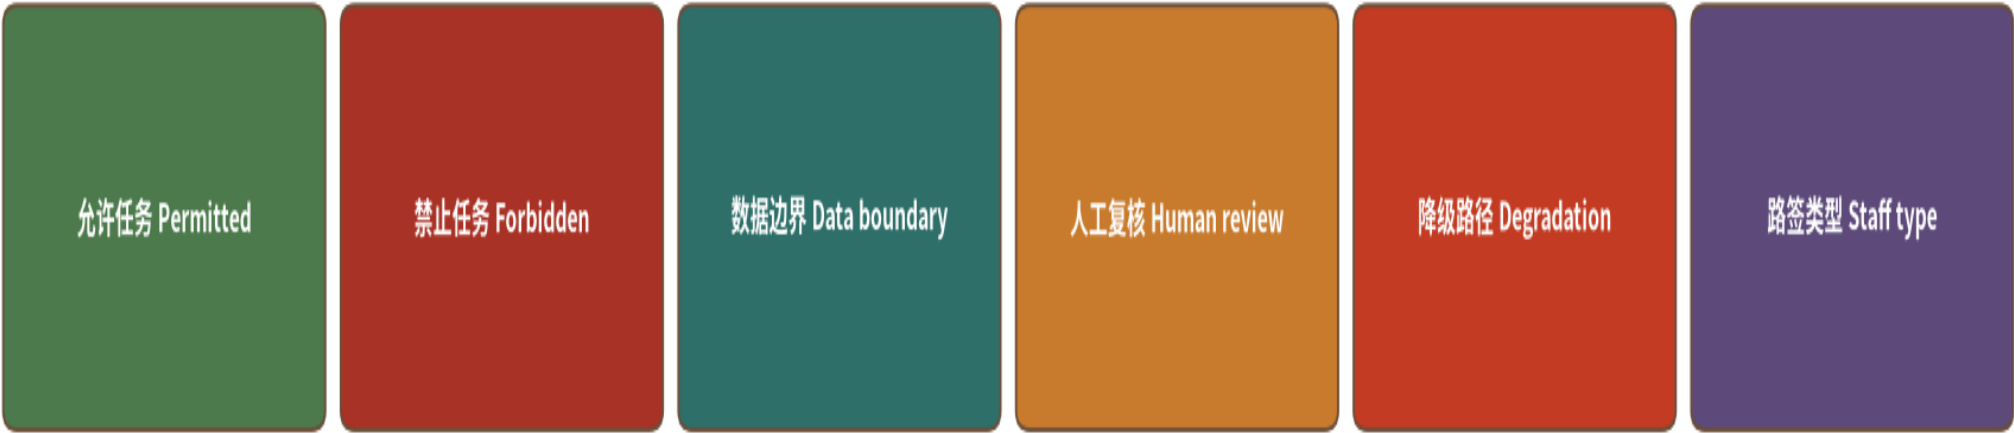

Mobility and blue-green public space

METRICS EVIDENCE CHAIN AND ROUTE-TABLE MECHANISM

Three indicator layers: formulas without overclaim; on-site unknown stays null

MANDATORY SCENARIO CARD FIELD: ROUTE TABLE

路签生命周期:缺任何一环即不发签 / Staff lifecycle: missing any link means no staff issued

Source: metrics.json and scenario cards; on-site metrics stay null

THREE YARDS AND SCENARIOS		
ZHONGZHIYUAN Test Yard	Test staff • closed block	Embodied exit test / offline resilience / red-team / rain sensing
AI ORIGIN Open-Source Depot	Open-source staff • semi-open	OSS clinic / bilingual docs / interop sandbox / youth mentoring
DAZHONGSI Smart Station	Operation staff • open block	Accessible nav / triage / memory reading / consumer unplug

Provisional boundary only; areas recomputed in EPSG:4548; official polygons trigger full recalculation. All spatial suggestions are conceptual.
