

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

MICROLOOP — Site Overview & Three-Loop Network

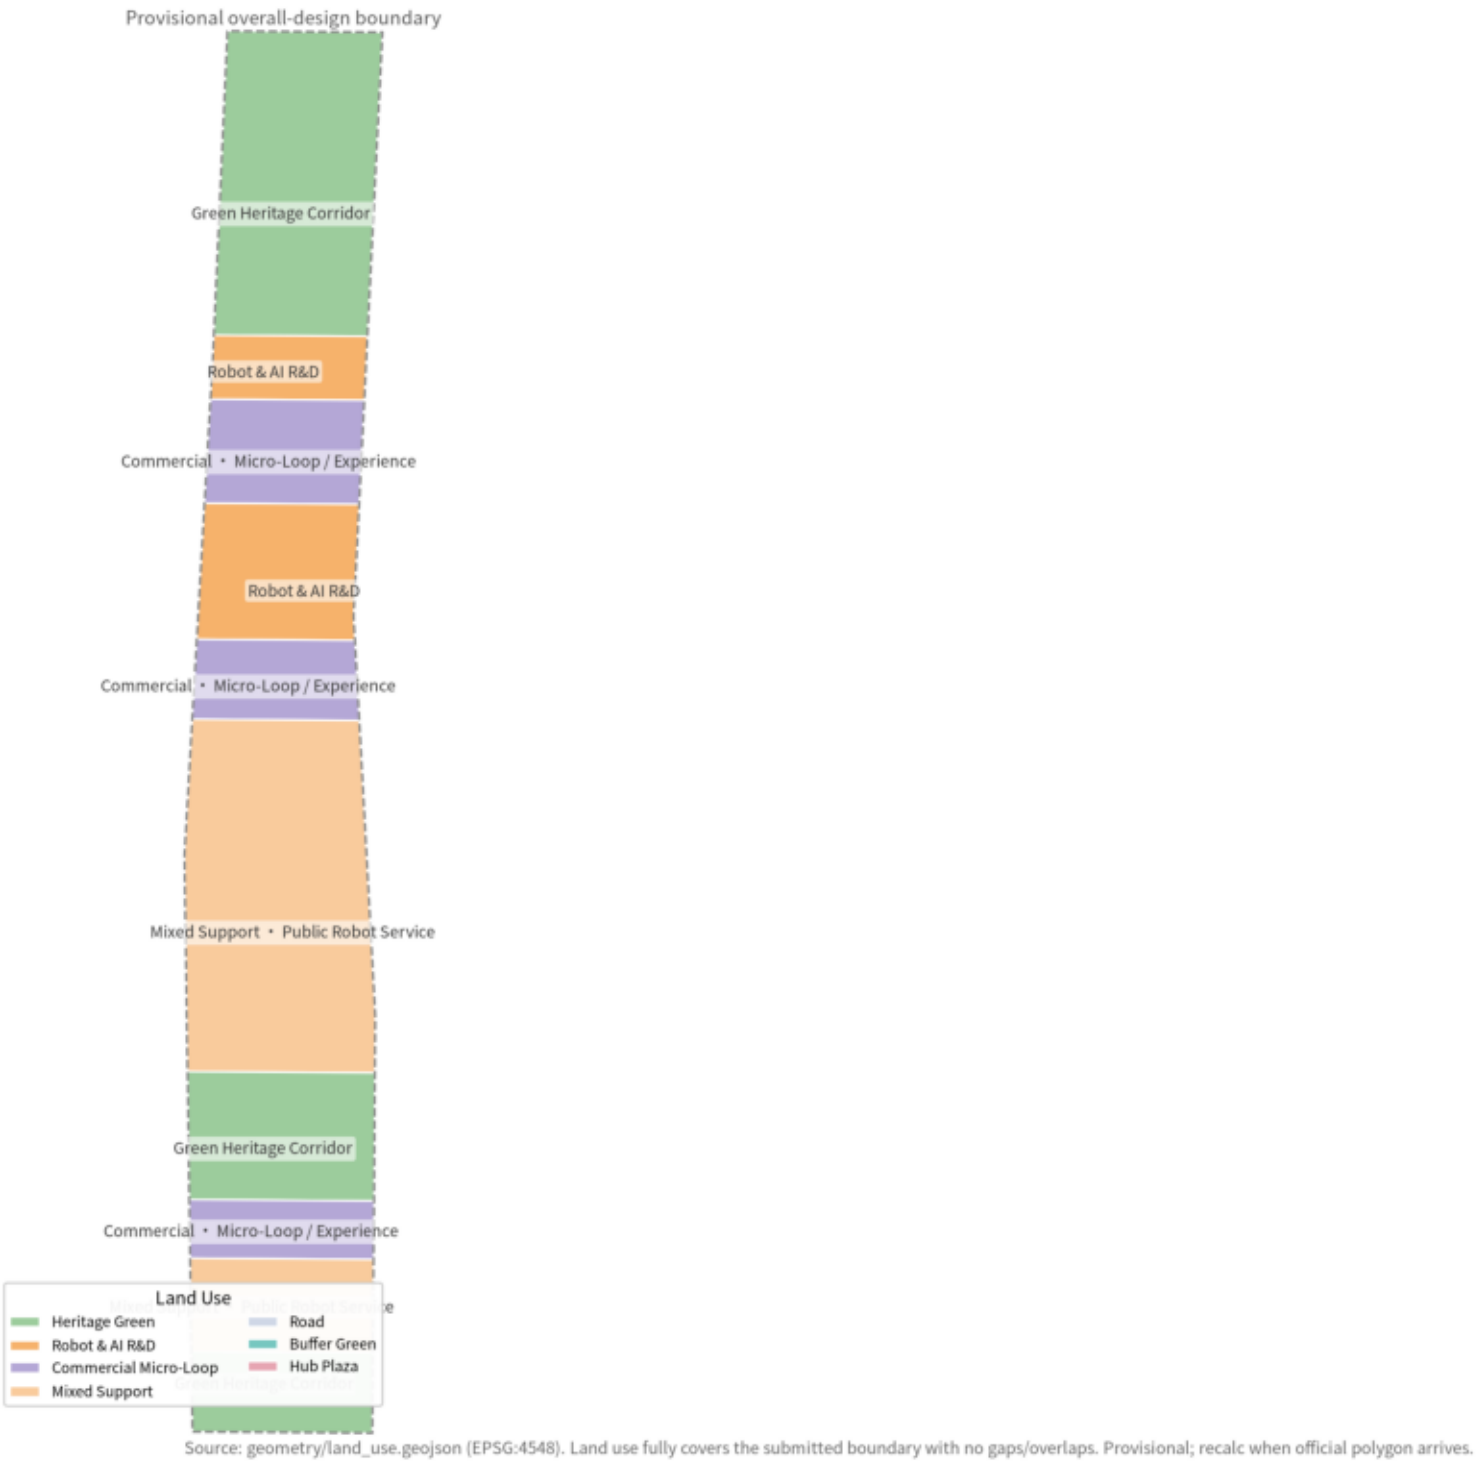

Site overview & spatial structure: three loops, east-west stitching

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

Three Scopes • Robot-Service & Green Corridor Zones

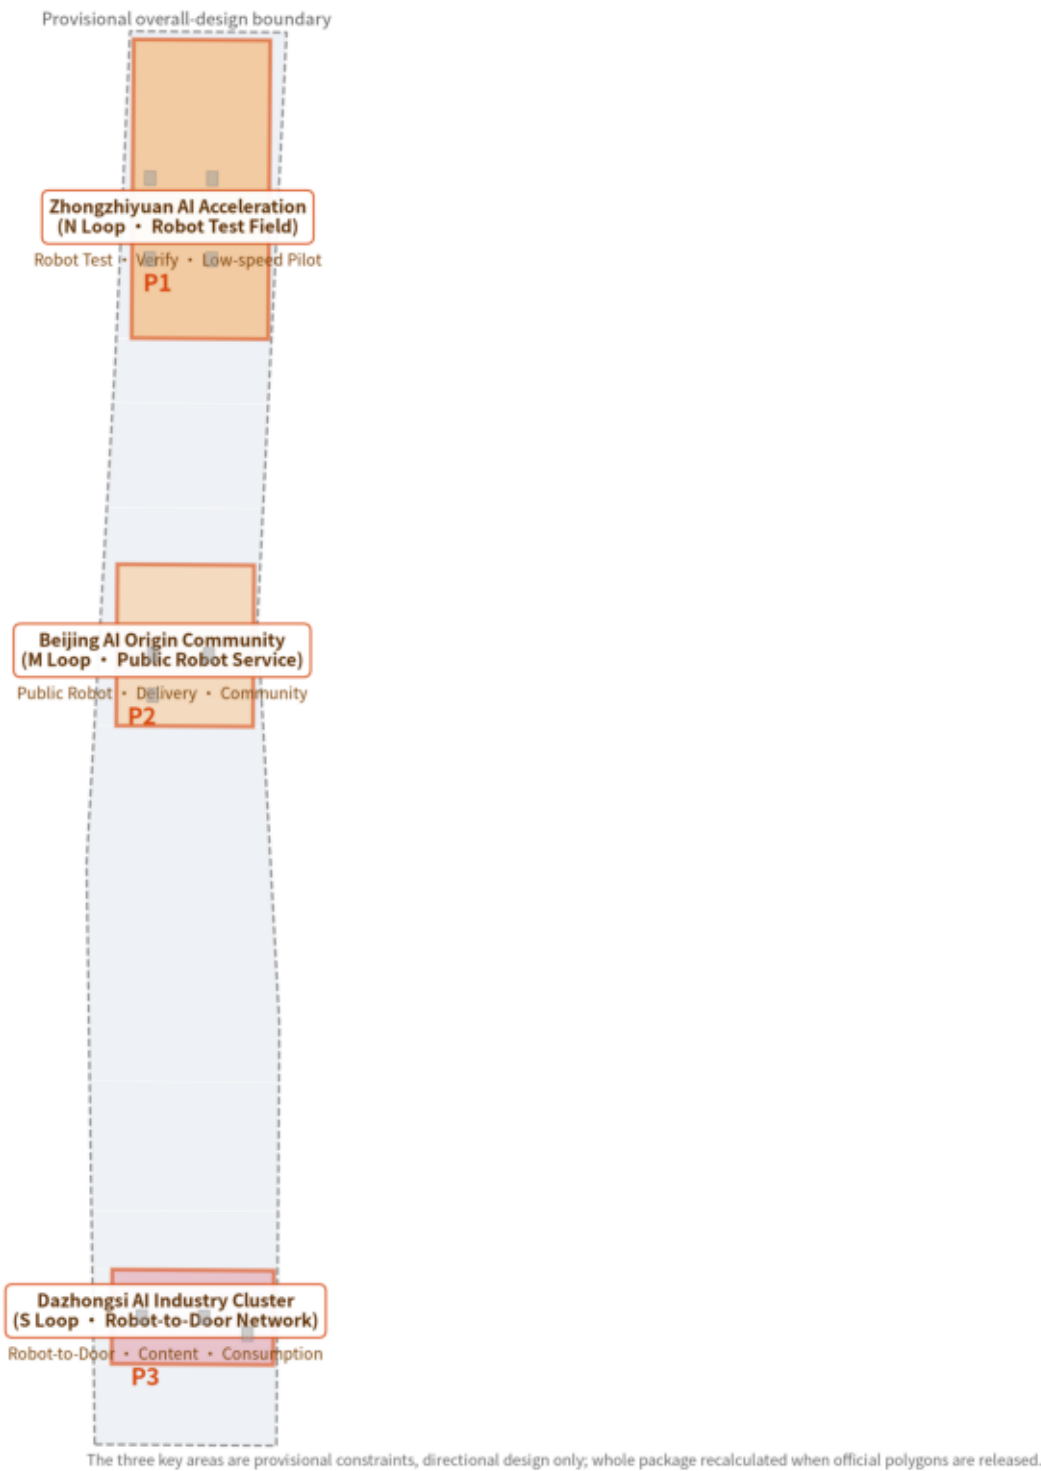

Three scopes & land-use structure: 43.6 / 11.4 km² / 368.4 ha

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

Three Key Areas • Robot Micro-Loop Detail (provisional)

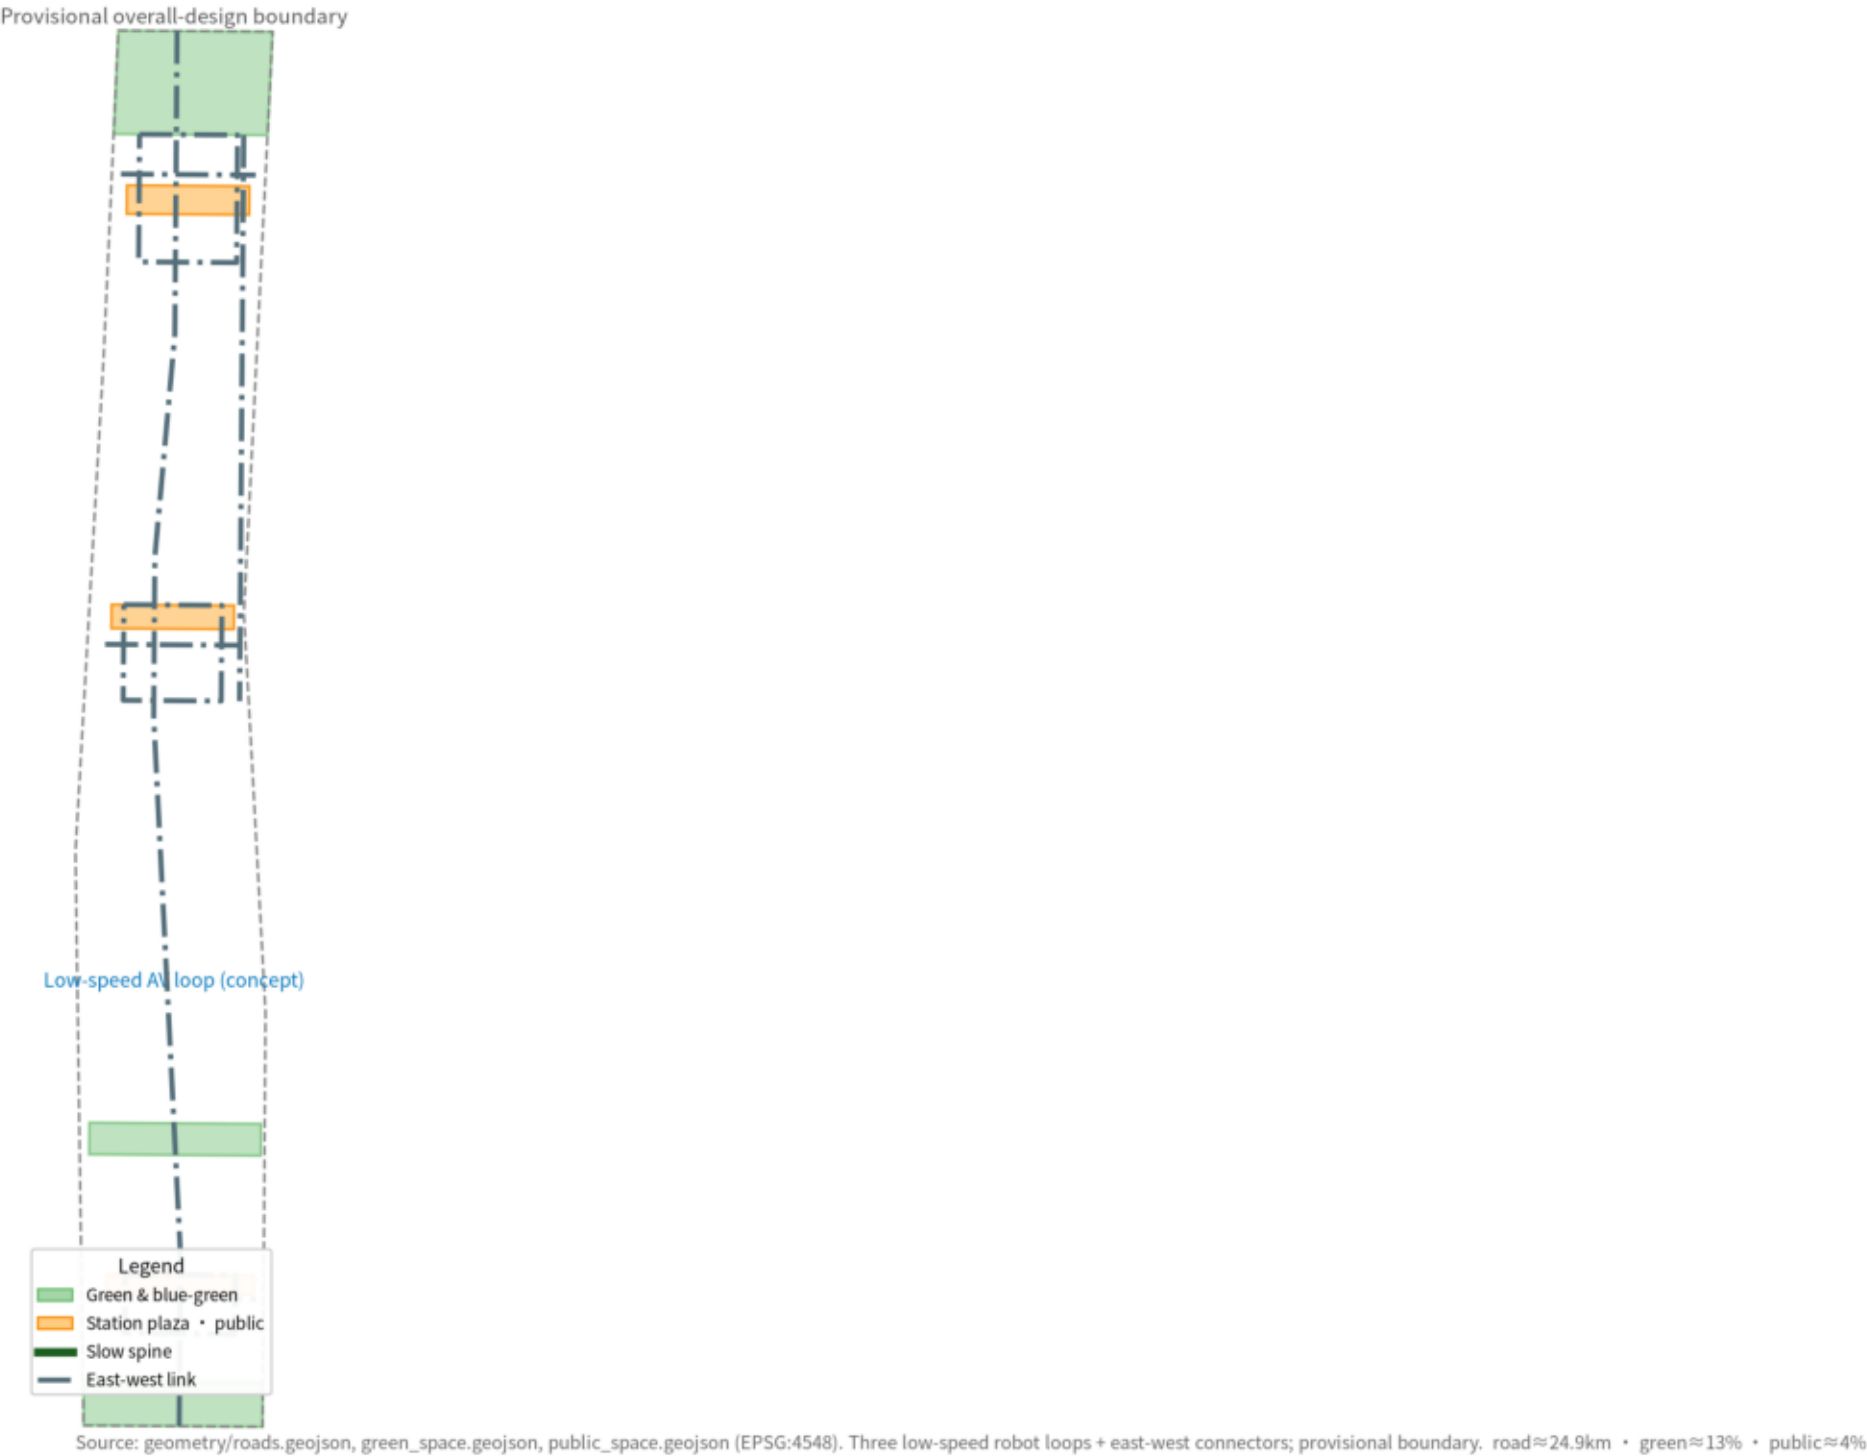

Three key areas • robot micro-loop detail (provisional)

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

Mobility • Blue-Green Network & Robot Hubs

Mobility & blue-green network with robot hubs

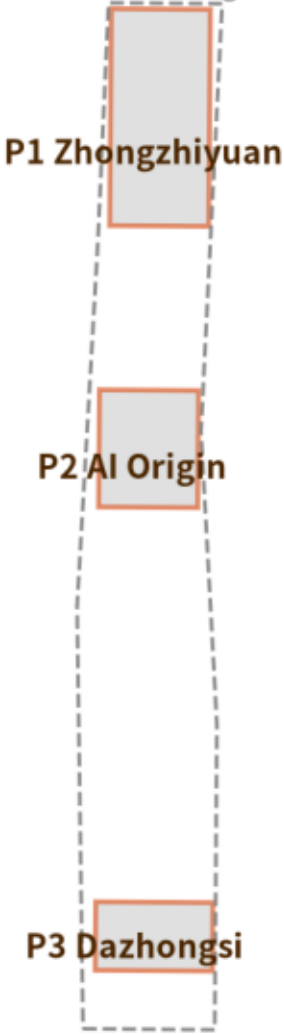

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

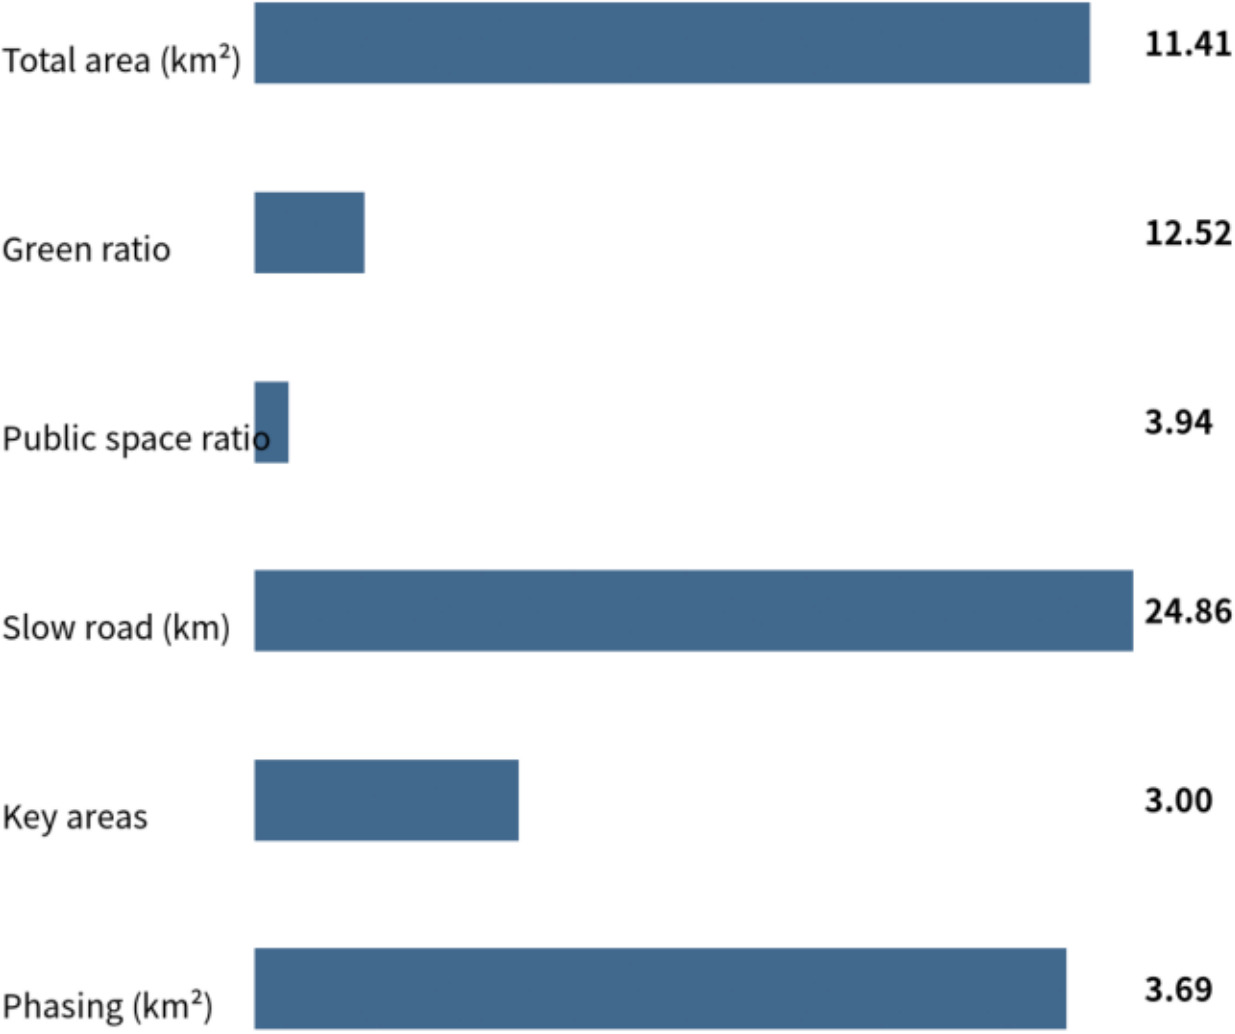

Metrics Evidence Chain & Phasing MICROLOOP

Phasing (three-loop order)

Provisional overall-design boundary

Core Metrics • Task Coverage

Coverage: 3 positioning / 5 functions / 6 tasks / 24 end-scenario cards / 5 personas / 3 hub landmarks / 3 phases (agent.1–6 fully covered)

Metrics evidence chain & three-phase implementation

MICROLOOP Jing-Zhang

Beijing • Haidian • Jing-Zhang Heritage Park Belt — Low-speed robot • AV end-network (conceptual / provisional)

MICROLOOP Proposal Booklet

Conceptual suggestion / reference / for professional deepening

Overall concept: organize the Jing-Zhang AI belt as a low-speed robot + AV end micro-loop network, complementing the trunk corridor.

Three positioning: Cultural Belt • Urban AI Life Experience Belt • AI Fusion Innovation Belt.

Five functions: end delivery autonomy • public robot service • low-speed AV pilot • end governance voice • smart vibrant city.

Three loops: Zhongzhiyuan (test) • AI Origin (public service) • Dazhongsi (experience-to-door) + east-west low-speed stitching corridors.

Outputs: 24 end-scenario cards • 5 personas • 3 robot hub landmarks • three phases.

Boundary: provisional boundary, does not replace formal planning; whole package recalculated when official polygons are released.
