

THE TRANSLATION LINE

THE TRANSLATION LINE

TRANSLATING MODEL CAPABILITY INTO PUBLIC VALUE

FOUR TRANSLATIONS

- TECH → PUBLIC VALUE**
Validate, explain, review and design an exit before deployment.
- PAPER → PROTOTYPE**
Turn research into small, testable and publicly reviewable services.
- HERITAGE → FUTURE**
Use railway mileage, platform and timetable grammar without pastiche.
- DATA → PUBLIC DECISION**
Minimise data, disclose purpose, allow challenge, keep humans final.

1 + 3 + 8 + 12

1 green spine • 3 translation campuses •
8 cross-links • 12 scenario rooms

JZ TRANSLATION LINE - v0.1

Translating model capability into public value

The framework combines one translation green spine, three key-area campuses, eight east-west links and twelve scenario rooms. Any AI service must pass capability validation, public explanation, human review and exit design before entering daily life.

Design Basis and Provisional Boundary

EVERY METRIC RETURNS TO GEOMETRY AND ASSUMPTIONS

RECOMPUTABLE KNOWN VALUES • HONEST UNKNOWNNS • TRIGGERED RECALCULATION

EVIDENCE CHAIN

FAR, height and total floor area: pending official controls and building survey

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Official tasks + public evidence + replaceable boundary

The official announcement establishes tasks, textual extents and approximate areas. Street-aligned geometry from Issue #846 is used only as a provisional generation boundary. Official polygons, controls, parcels, roads, buildings, heritage and utility data remain missing; the whole package must be recomputed.

Three-Level Scope Framework

43.6 km² strategy / 11.4 km² design / three key areas

The coordinated research layer organises the Three Zones and Two Wings; the overall design layer maps functions, green space, public space, walking and renewal; the key-area layer tests how industrial strategy enters everyday life through three prototypes.

TRANSLATING MODEL CAPABILITY INTO PUBLIC VALUE

FOUR TRANSLATIONS

- TECH → PUBLIC VALUE**
Validate, explain, review and design an exit before deployment.
- PAPER → PROTOTYPE**
Turn research into small, testable and publicly reviewable services.
- HERITAGE → FUTURE**
Use railway mileage, platform and timetable grammar without pastiche.
- DATA → PUBLIC DECISION**
Minimise data, disclose purpose, allow challenge, keep humans final.

1 + 3 + 8 + 12

1 green spine • 3 translation campuses • 8 cross-links • 12 scenario rooms

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Land Use and Urban Renewal

Topology-safe partition; intensity pending official controls

The topology-safe land-use plan covers the submitted boundary once. Concept green ratio is 14.1% and public-space ratio is 2.4%. These are design calculations on provisional geometry, not approved controls.

LAND USE AS TRANSLATION RELATIONSHIPS

TOPOLOGY-SAFE PARTITION + PUBLIC SPINE + TWO-SIDED EXCHANGE

LAND-USE CODES

- Park green
- R&D + validation
- Education + research
- Talent housing
- Community services
- Industry + commerce

SPATIAL GRAMMAR

- The green spine hosts public explanation, walking and
- Cross-links exchange research, daily life and services
- Every cell covers the boundary once and is recomputable
- FAR, height and parcel uses await official controls

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Three Key Areas

THREE TRANSLATION CAMPUSES, THREE DISTINCT CONVERSIONS

VALIDATE → TRANSLATE → ENTER DAILY LIFE

ZHONGZHIYUAN: CAPABILITY → PROTOCOL

SPATIAL MOVES

- Model-safety theatre
- Standards co-creation table
- Qinghe validation garden

Provisional extent; directional design only

AI ORIGIN: PAPER → PROTOTYPE

SPATIAL MOVES

- Open-source translation court
- Near-campus prototype street
- Talent service stop

Provisional extent; directional design only

DAZHONGSI: PROTOTYPE → DAILY LIFE

SPATIAL MOVES

- Public-promise bell
- Four-quadrant walking court
- AI daily-life interpretation room

Provisional extent; directional design only

Capability → protocol / paper → prototype / prototype → daily life

Zhongzhiyuan translates model capability into public protocol; AI Origin translates papers into small prototypes; Dazhongsi translates prototypes into understandable, challengeable and reversible daily services. All three extents remain provisional.

Twelve Scenario Rooms

ONE NETWORK FOR MOBILITY, BLUE-GREEN SPACE AND PUBLIC REVIEW

ONE SPINE • EIGHT CROSS-LINKS • TWELVE PUBLIC ROOMS

- NORTH-SOUTH SPINE**
heritage walk + scenario route + accessible continuity
- EIGHT CROSS-LINKS**
east-west repair + station access + campus-neighbourhood links
- FIVE GREEN COURTS**
reversible tests + water awareness + rest and explanation
- TWELVE PUBLIC ROOMS**
human review, exit and responsibility for every scenario

ALL ALIGNMENTS ARE CONCEPTUAL

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Minimum data, human review, public responsibility and exit

Twelve scenarios cover industrial validation, accessibility, legal services, daily life, open-source release, talent support and cultural narration. Each states data minimisation, human review, operating responsibility, pause and exit conditions.

Mobility and Blue-Green Network

ONE NETWORK FOR MOBILITY, BLUE-GREEN SPACE AND PUBLIC REVIEW

ONE SPINE • EIGHT CROSS-LINKS • TWELVE PUBLIC ROOMS

- NORTH-SOUTH SPINE**
heritage walk + scenario route + accessible continuity
- EIGHT CROSS-LINKS**
east-west repair + station access + campus-neighbourhood links
- FIVE GREEN COURTS**
reversible tests + water awareness + rest and explanation
- TWELVE PUBLIC ROOMS**
human review, exit and responsibility for every scenario

ALL ALIGNMENTS ARE CONCEPTUAL

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

One spine + eight cross-links + five green courts

The conceptual walking network totals about 19.0 km through one spine and eight cross-links. Alignments do not replace road, rail, bridge, tunnel or engineering plans and require transport and accessibility review.

Building Prototypes and DRR Method

Survey before classification; reversible before permanent

Building geometries are translation-space prototypes, not surveyed or approved buildings. Professional development follows survey, value assessment, retain-first review, reversible retrofit and only then necessary renewal, recording ownership, structure, carbon and public value.

LAND USE AS TRANSLATION RELATIONSHIPS

TOPOLOGY-SAFE PARTITION + PUBLIC SPINE + TWO-SIDED EXCHANGE

LAND-USE CODES

- Park green
- R&D + validation
- Education + research
- Talent housing
- Community services
- Industry + commerce

SPATIAL GRAMMAR

- The green spine hosts public explanation, walking and
- Cross-links exchange research, daily life and services
- Every cell covers the boundary once and is recomputable
- FAR, height and parcel uses await official controls

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Renewal Projects and Three Phases

Light pilots → key-area renewal → corridor operations

Near term: lightweight public translation stops and event trials. Medium term: key-area renewal and cross-links after official data. Long term: an annual open-source season, scenario reviews, public-value ledger and an international translation network.

THREE TRANSLATION CAMPUSES, THREE DISTINCT CONVERSIONS

VALIDATE → TRANSLATE → ENTER DAILY LIFE

ZHONGZHIYUAN: CAPABILITY → PROTOCOL

SPATIAL MOVES

- Model-safety theatre
- Standards co-creation table
- Qinghe validation garden

Provisional extent; directional design only

AI ORIGIN: PAPER → PROTOTYPE

SPATIAL MOVES

- Open-source translation court
- Near-campus prototype street
- Talent service stop

Provisional extent; directional design only

DAZHONGSI: PROTOTYPE → DAILY LIFE

SPATIAL MOVES

- Public-promise bell
- Four-quadrant walking court
- AI daily-life interpretation room

Provisional extent; directional design only

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Metrics and Evidence Chain

EVERY METRIC RETURNS TO GEOMETRY AND ASSUMPTIONS

RECOMPUTABLE KNOWN VALUES • HONEST UNKNOWNNS • TRIGGERED RECALCULATION

EVIDENCE CHAIN

FAR, height and total floor area: pending official controls and building survey

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

Known values recompute; unknowns stay unknown

Metrics are recomputed from GeoJSON in EPSG:4548; FAR, height and total floor area remain unknown. Figures, HTML and PDFs use the same metrics. A passing self-check means reviewable, never approved.

Risk, Copyright and Professional Review

EVERY METRIC RETURNS TO GEOMETRY AND ASSUMPTIONS

RECOMPUTABLE KNOWN VALUES • HONEST UNKNOWNNS • TRIGGERED RECALCULATION

EVIDENCE CHAIN

FAR, height and total floor area: pending official controls and building survey

PROVISIONAL BOUNDARY • OPEN CO-CREATION ONLY • RECOMPUTE WHEN OFFICIAL POLYGONS ARRIVE

JZ TRANSLATION LINE - v0.1

No invented boundary, controls, engineering or public commitments

No commercial map tiles, unauthorised images, marks, likenesses, private material or personal data are used. Engineering, policy, investment, recruitment and event moves are conceptual recommendations for professional development, not government commitments.
