

Overview map • north rail-art belt concept context

STEELSTRING BELT

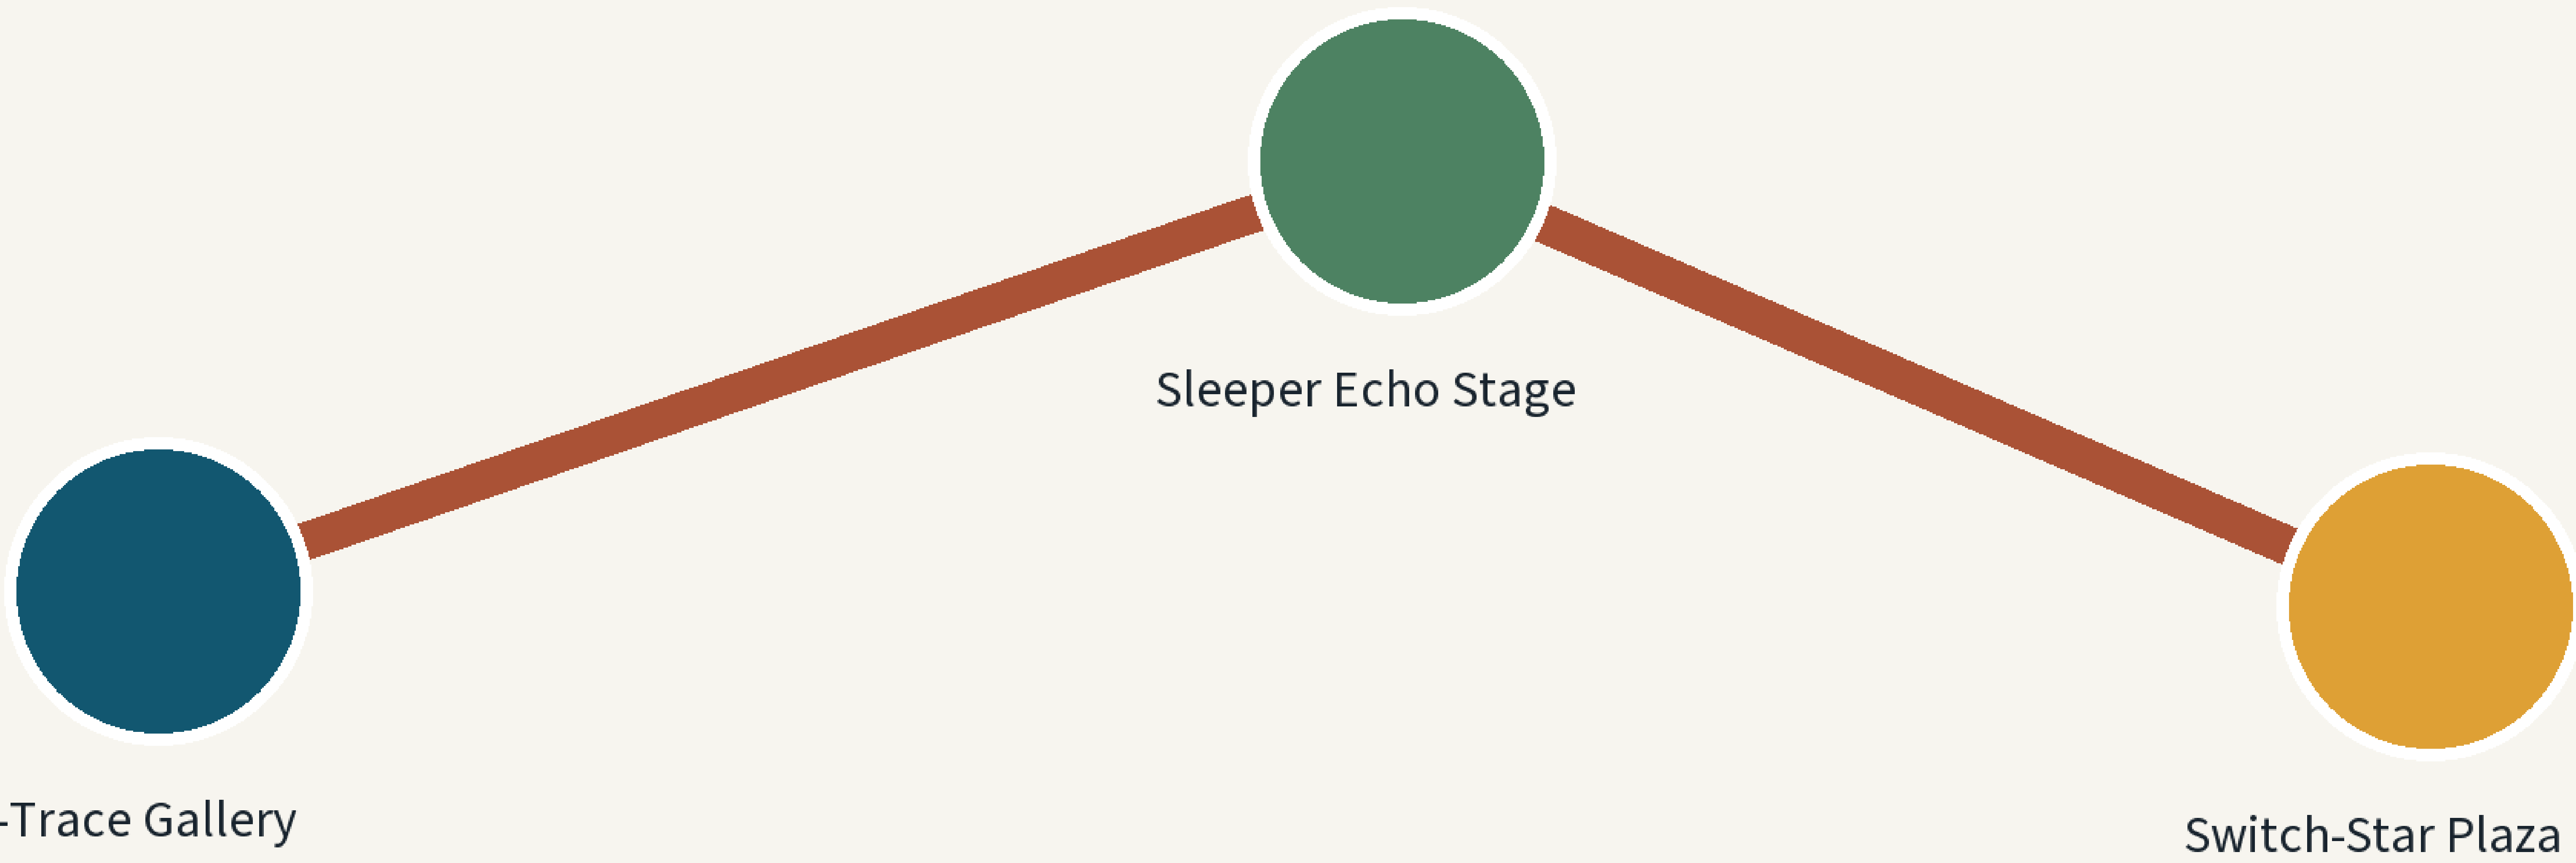

Concept context; no official redline.

N ↑ 100 m*

重点区域 / 一轨三节点

One rail, three nodes • focus-area constraints

STEELSTRING BELT

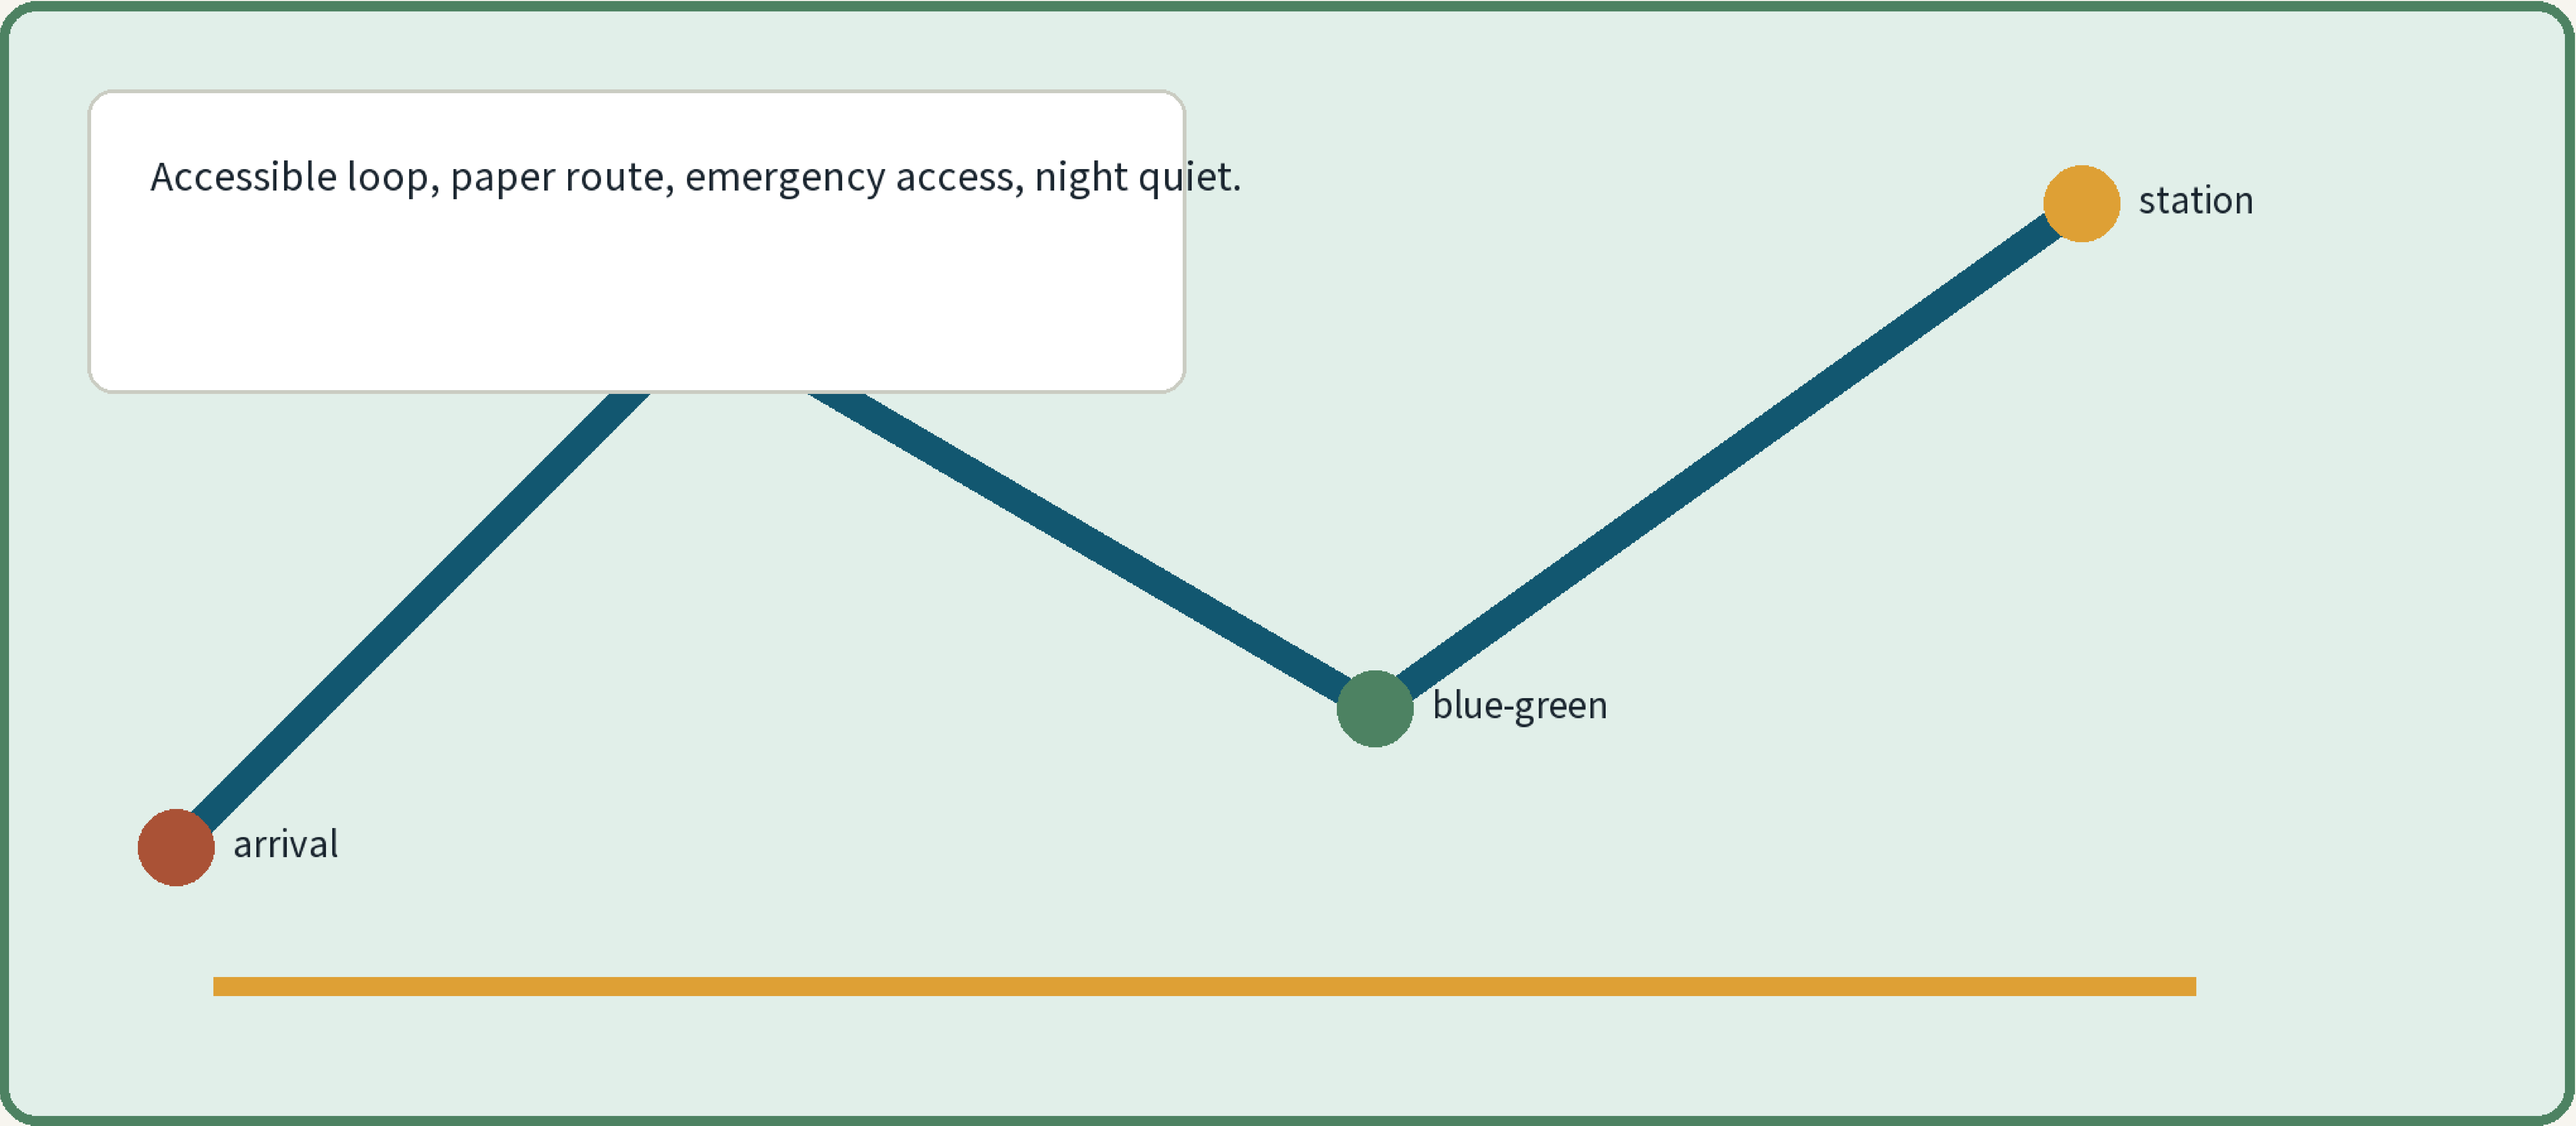

Node radius, egress, slope, device clearance, fire route and rail/heritage conflict are survey gates.

One Rail–Three Nodes; pending evidence retained.

N ↑ 100 m*

Mobility, walking and blue-green space

STEELSTRING BELT

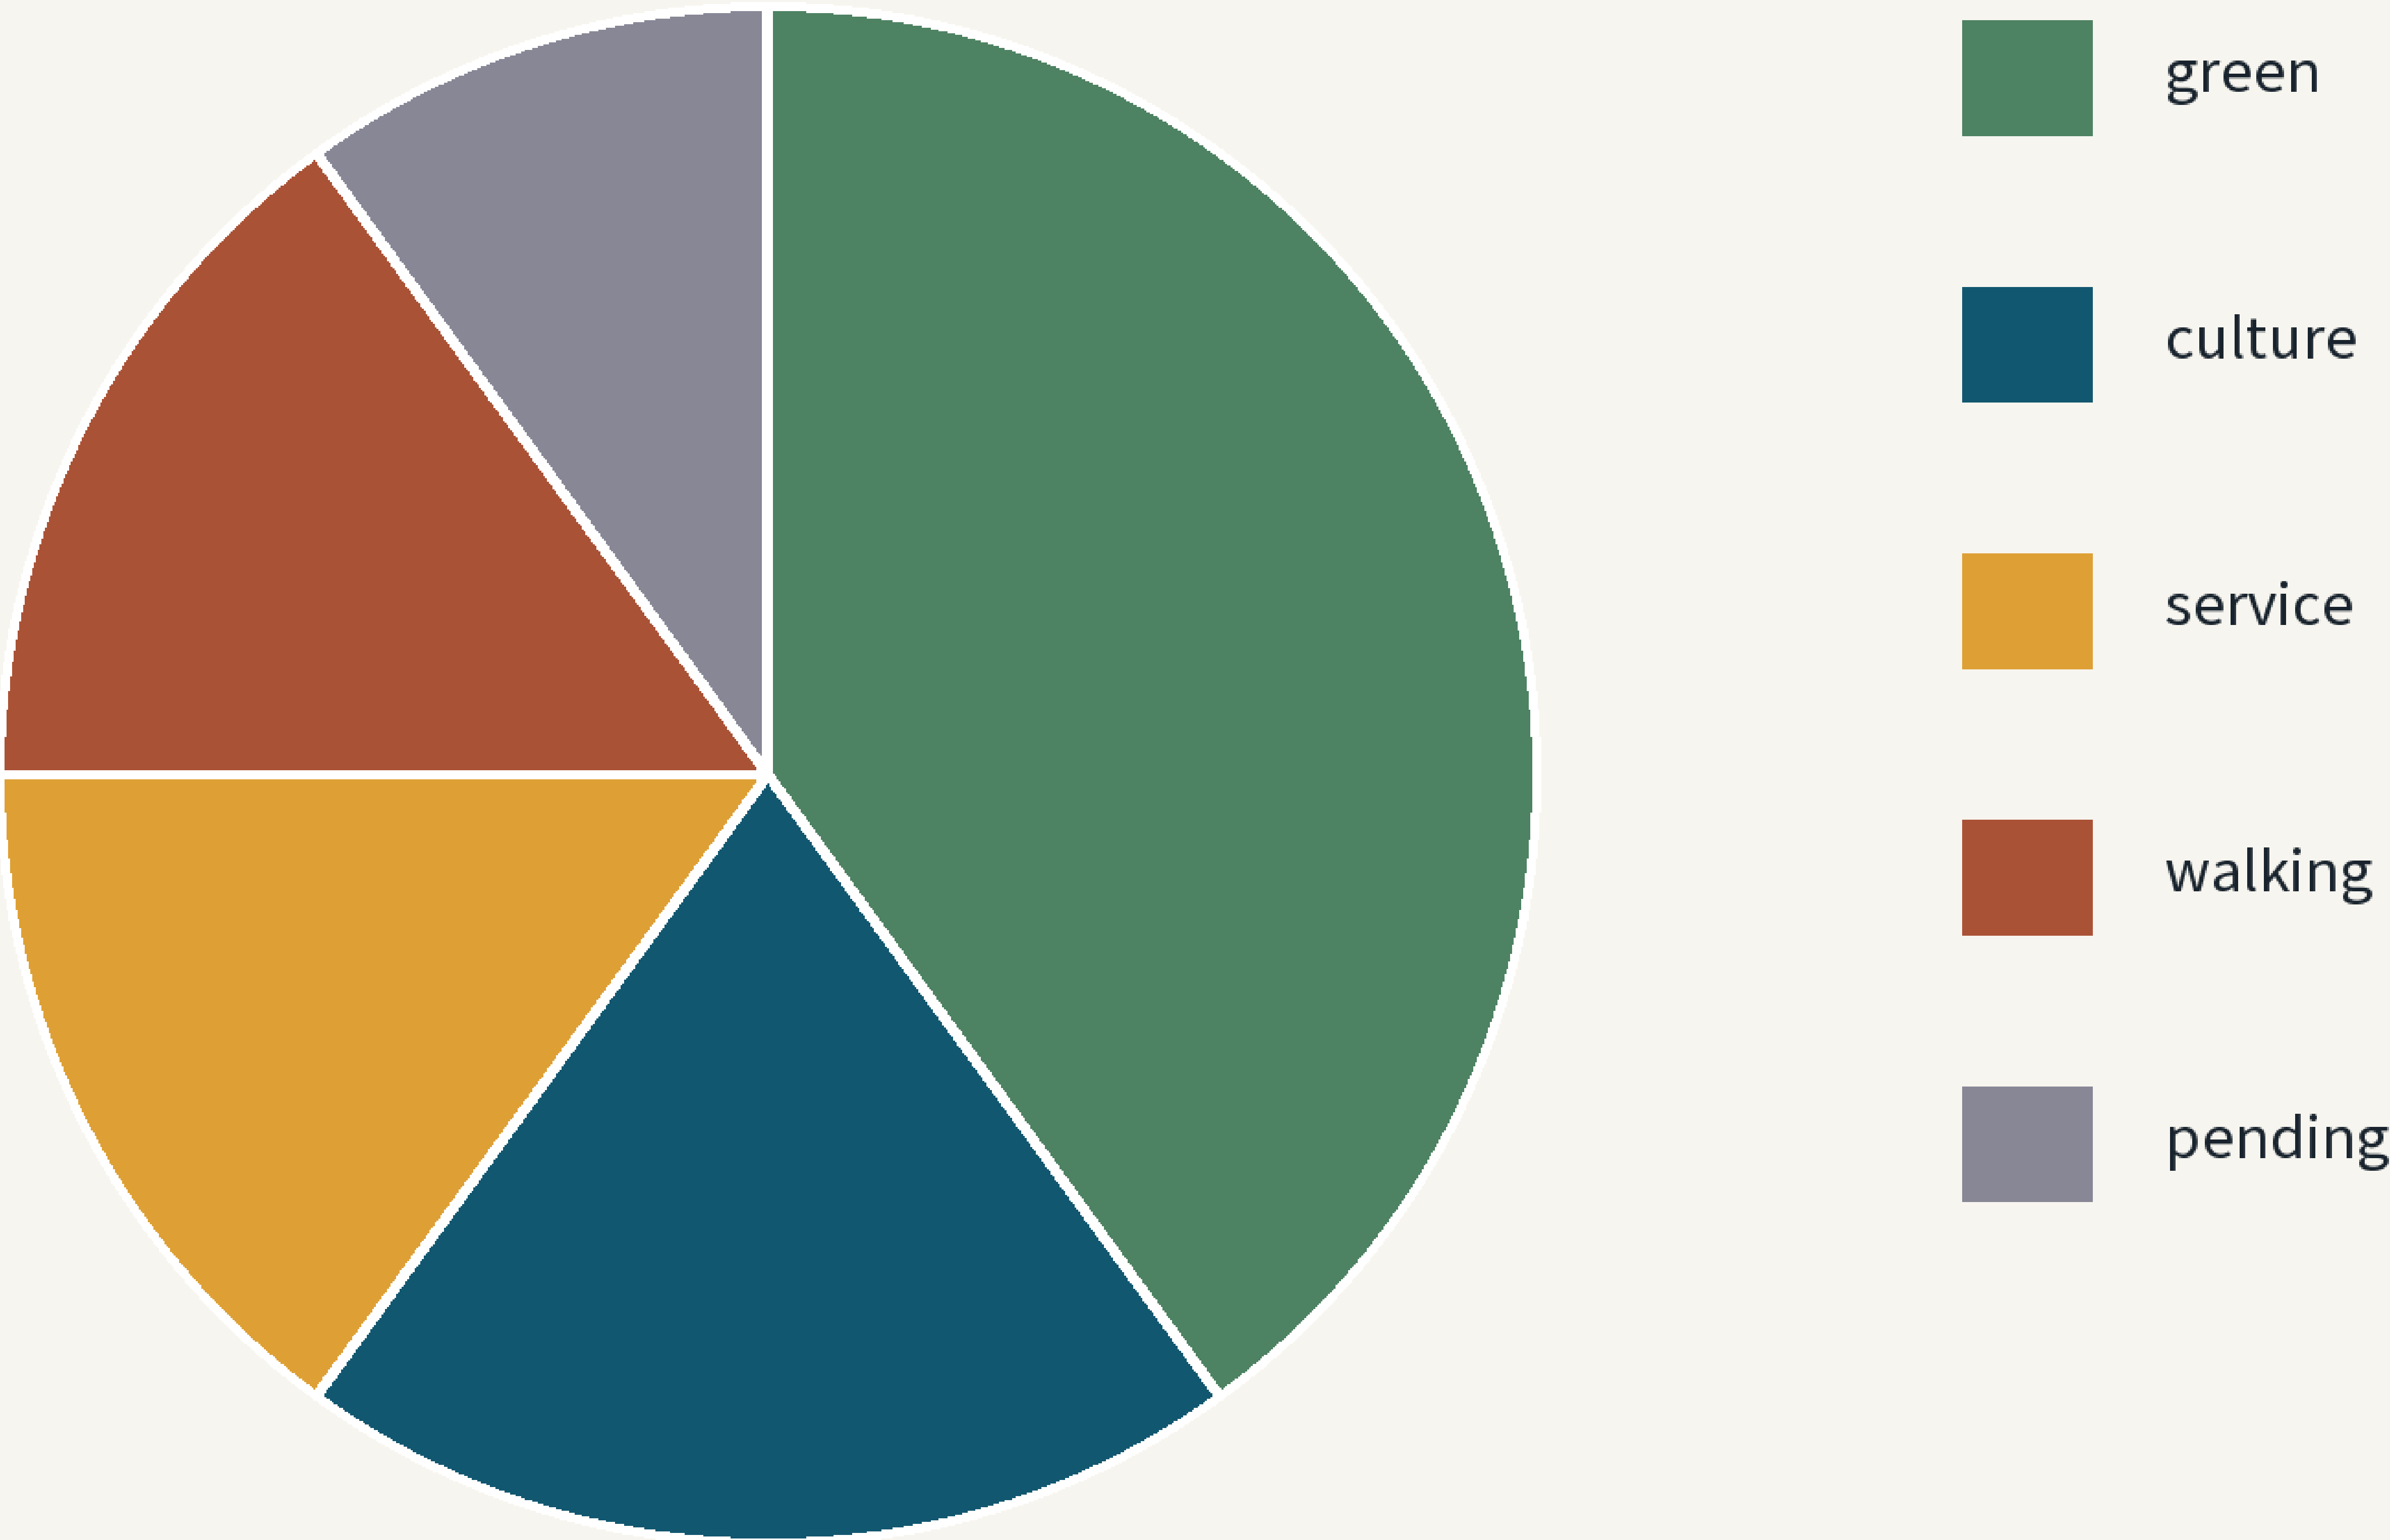

Routes are conceptual until surveyed.

N ↑ 100 m*

Land-use structure • conditional retain/renew

STEELSTRING BELT

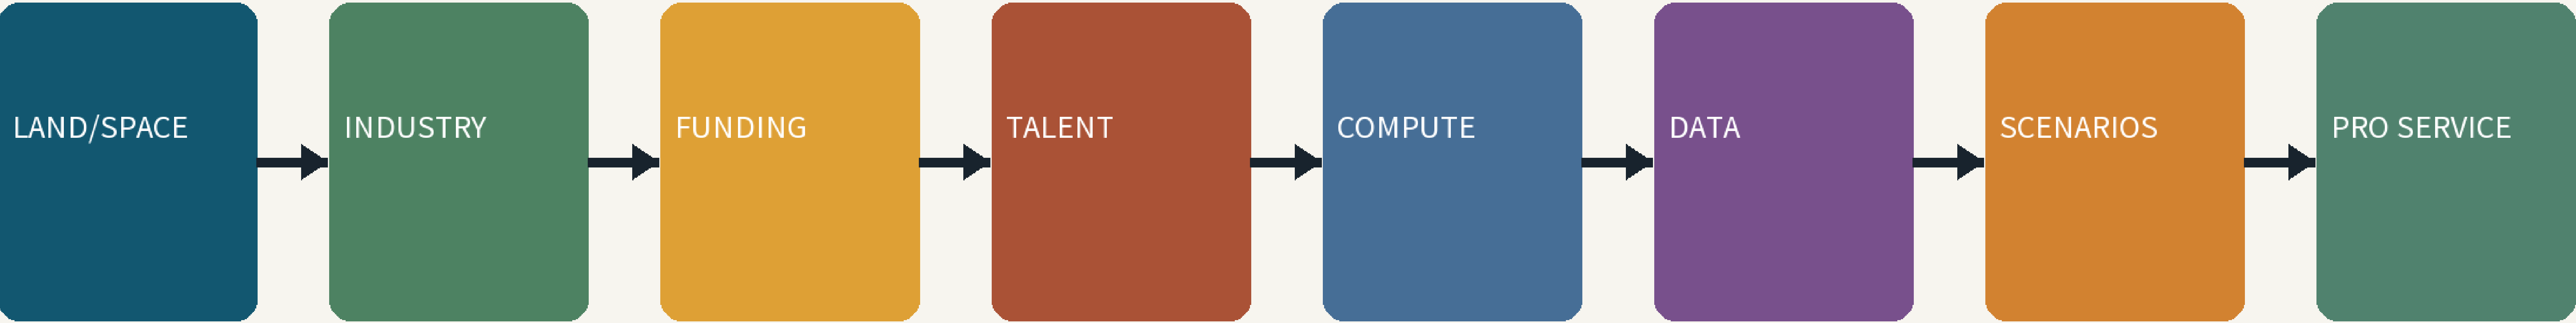

Class geometry / model area; low confidence, non-statutory. Survey before retain/repair/adapt/rebuild.

Qualified model allocation; no false precision.

N ↑ 100 m*

AI ecosystem • eight resource mechanisms

STEELSTRING BELT

APPLICATION → PILOT → REVIEW → CONVERSION / EXIT

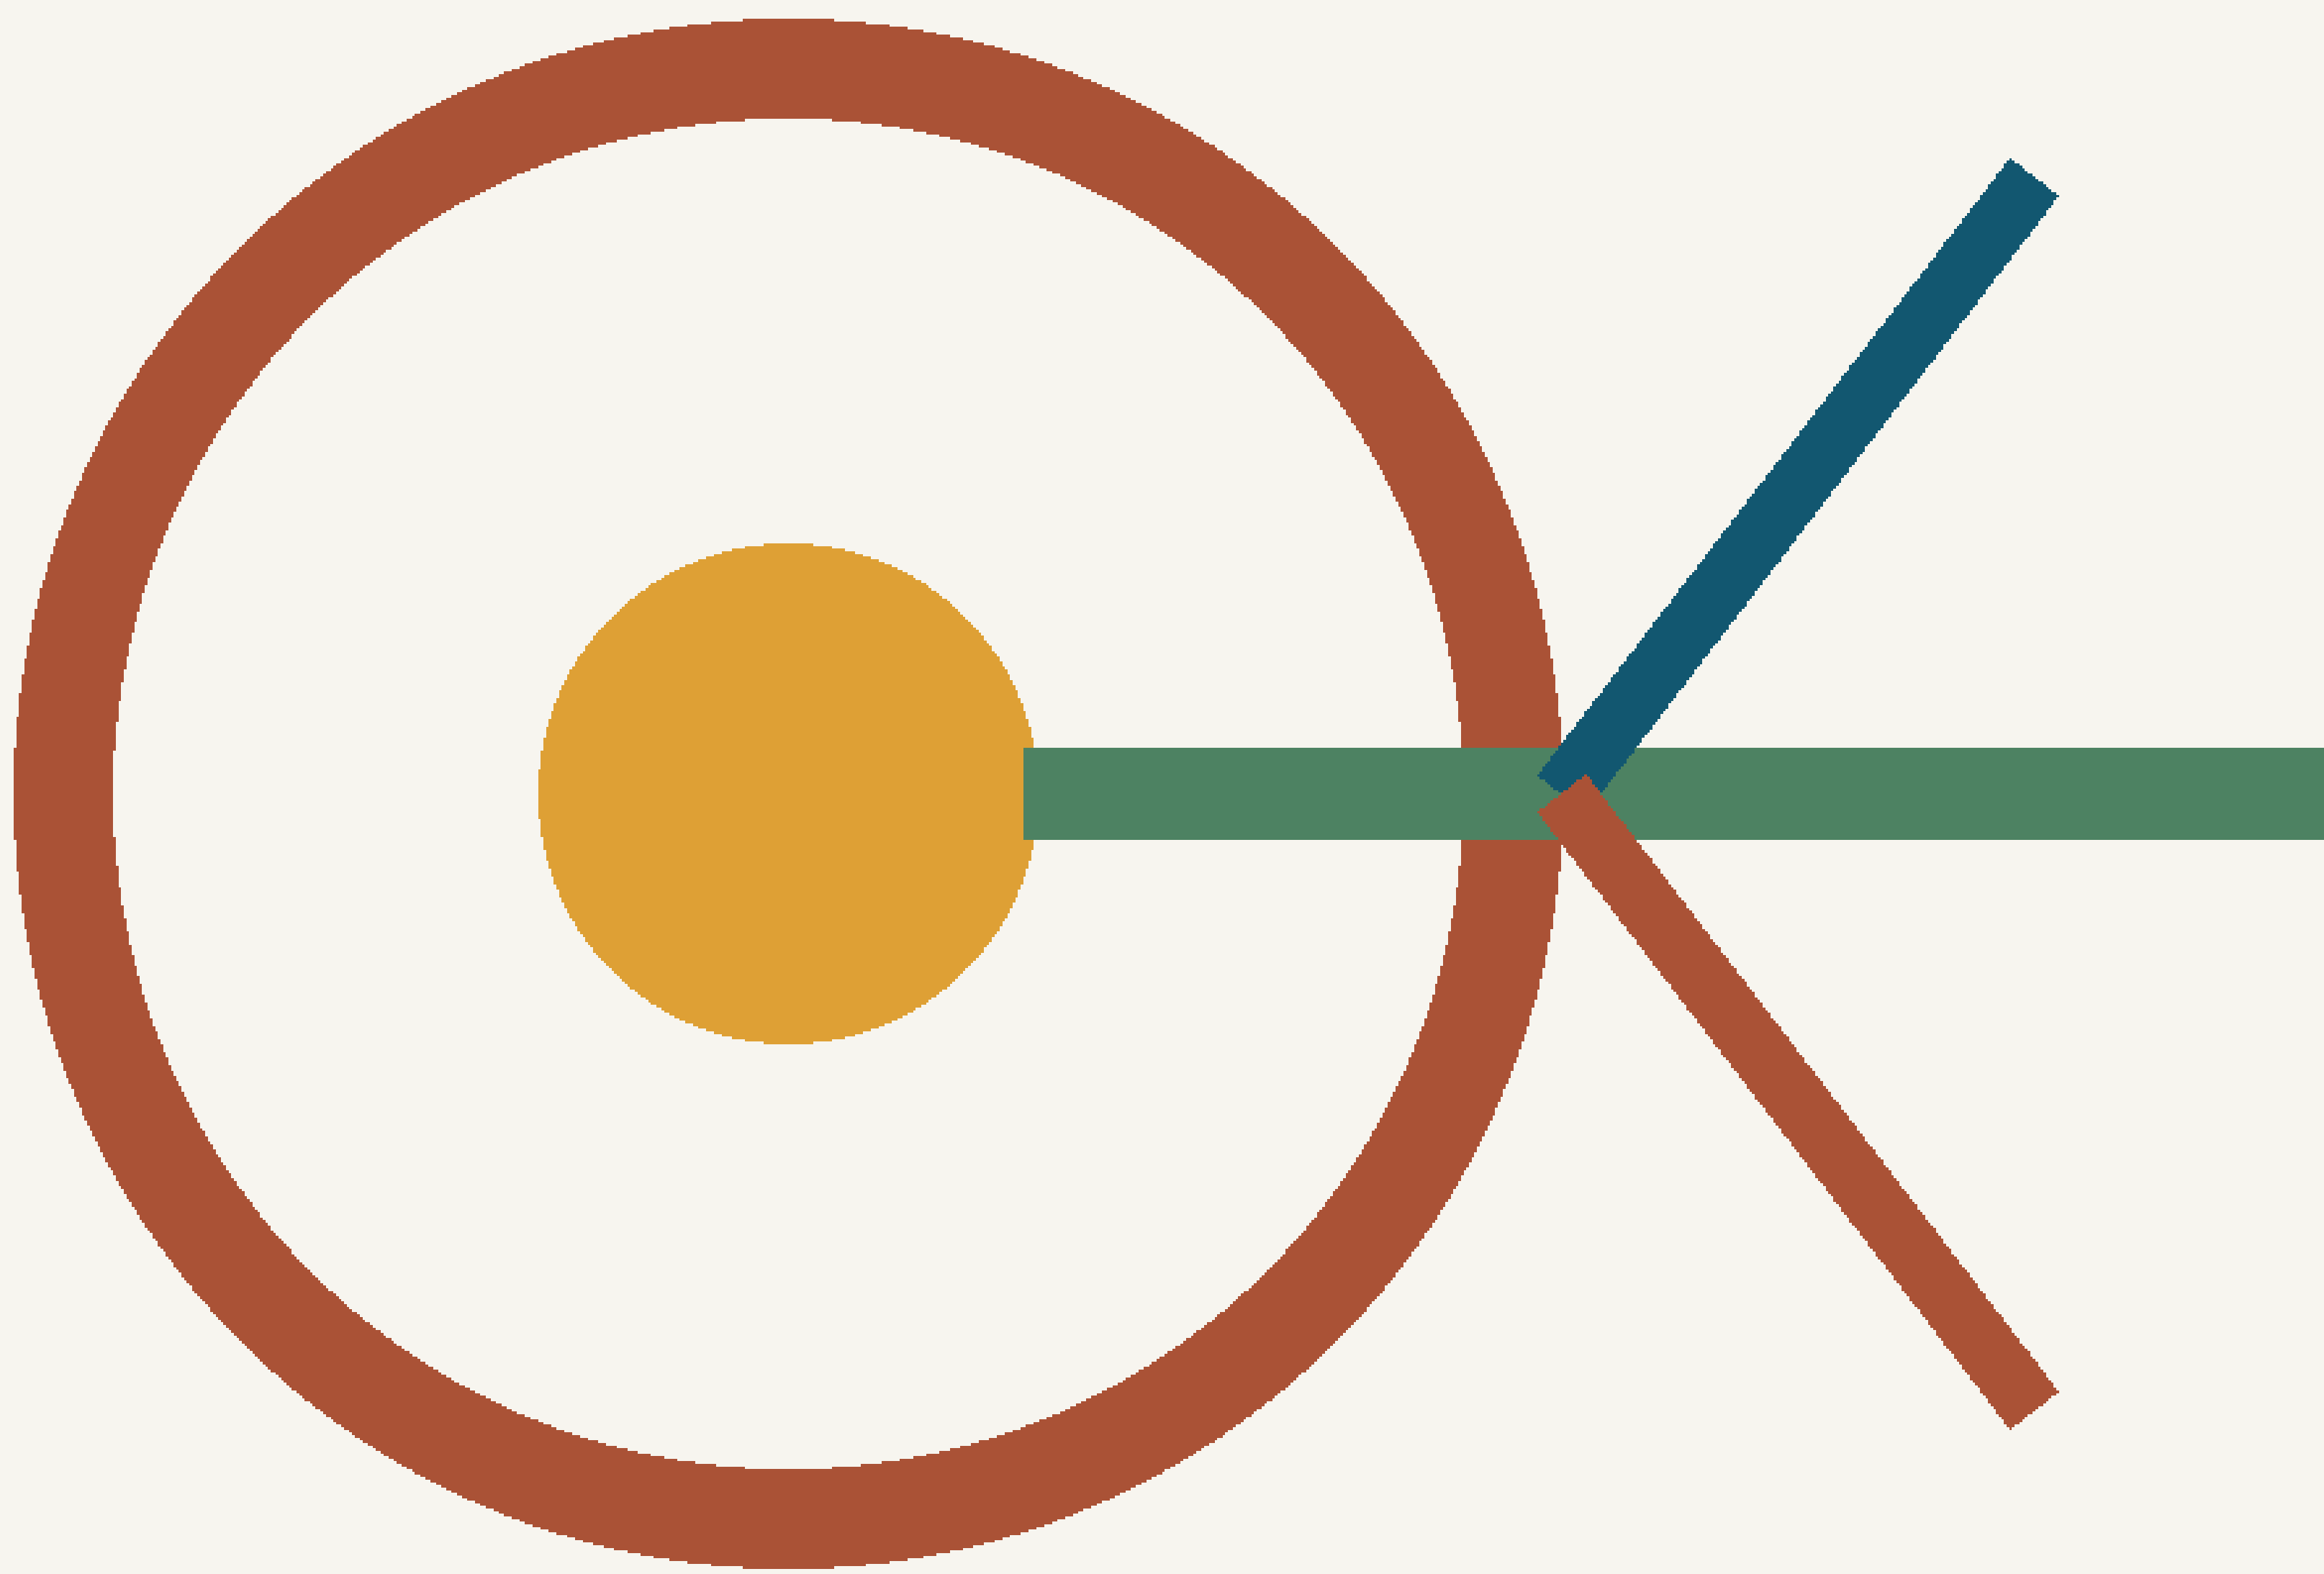

Source, permission, cost, owner, threshold and stop action are recorded.

Cases are citation-only mechanism references.

N ↑ 100 m*

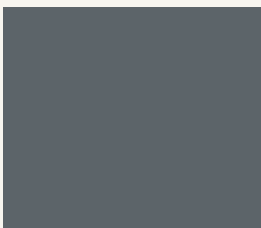

Steelstring Belt • original identity and wayfinding

STEELSTRING BELT

STEELSTRING BELT

钢弦之带

-  rust rail
-  sleeper grey
-  warm light
-  park green
-  signal blue

Original mark; node → activity → information hierarchy. No overall project logo or third-party mark.

Three AI landmarks • honour and component library

STEELSTRING BELT

A

A Rail Sound Archive Tower

B

B Track-Light Walk

C

C Junction Knowledge Kiosk

Verified contributor record + source + permission + year. Component kit: clue panel, tactile marker, paper desk, demountable wall, sound box, low-glare sign, movable seat

Non-surveillant landmarks; humans remain responsible.

N ↑ 100 m*

AI scenario cards and validation metrics

STEELSTRING BELT

12

scenario cards

3

validation protocols

10

user-role groups

7

mechanism cases
