

JCIB board 01 overall concept

one belt, three cores, two axes | 11.41 km2 | 294 blocks | 9.72 km spine

JingZhang Co-Intelligence Belt: one belt, three cores, two axes

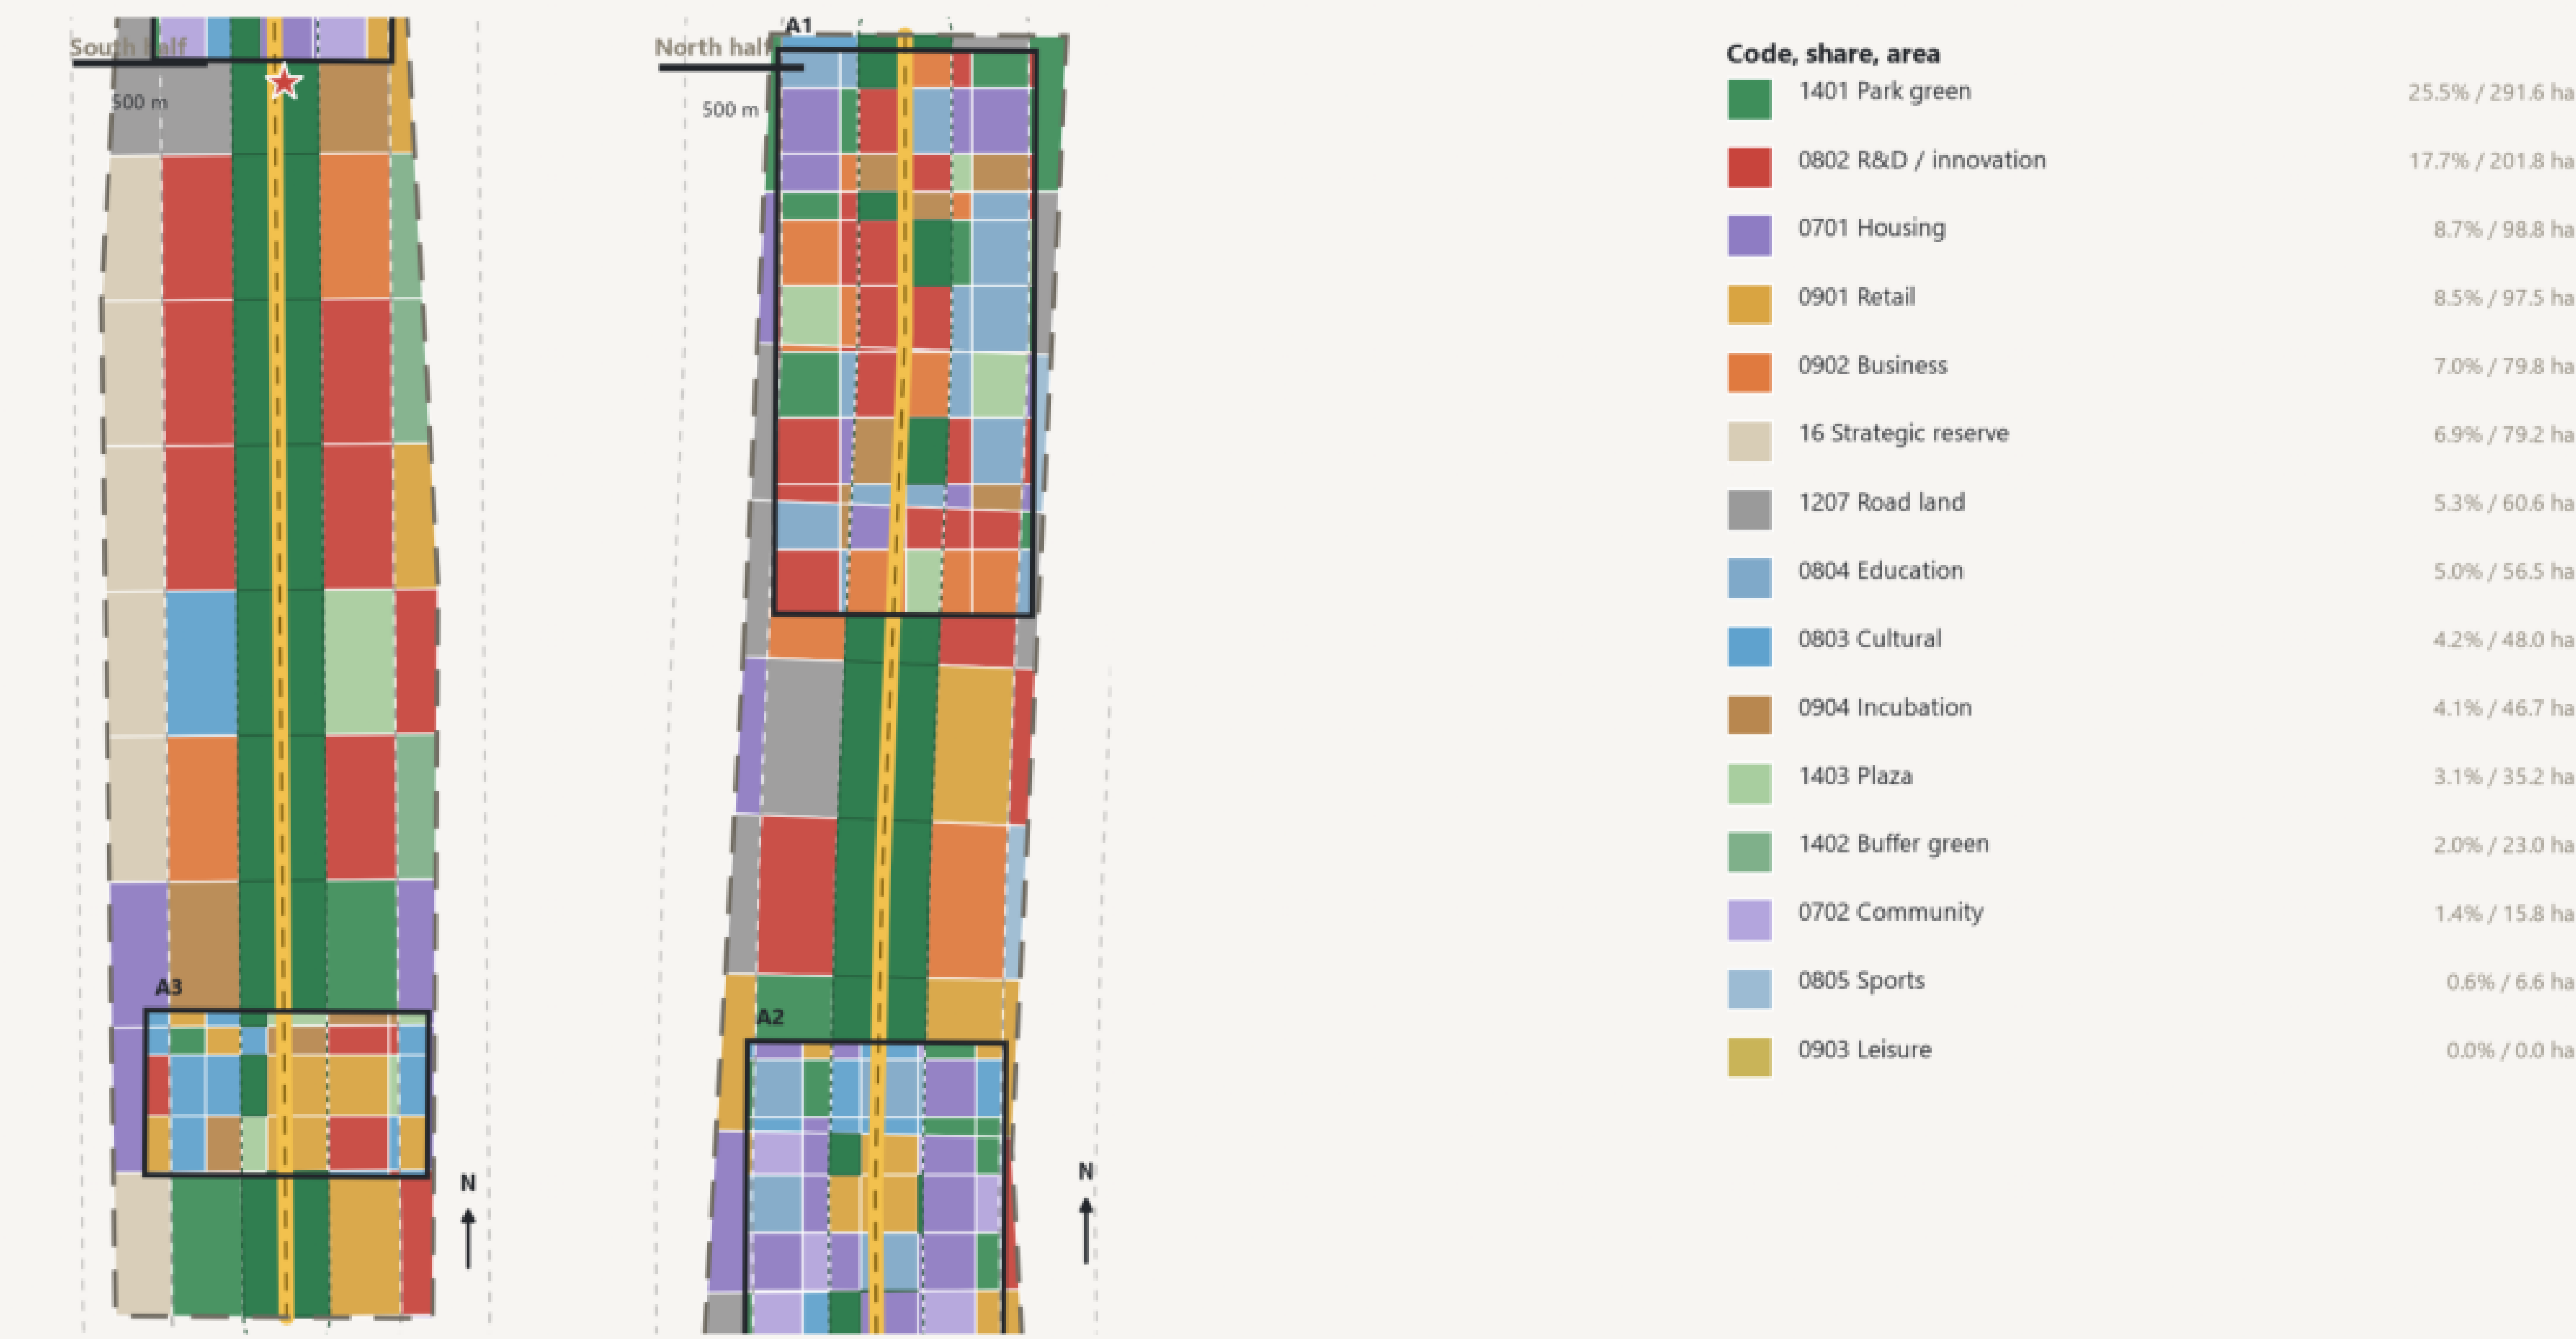

Design area 11.41 km2 | 294 blocks | green ratio 27.6% | public space 35.3% | key areas 192.9 + 104.3 + 72.0 ha

Land-use structure and layer transmission

Innovation plus green corridor: 294 blocks tile the boundary with zero measured gap

Layers: 0-170 m park band, 170-450 m frontage, 450-800 m live-work, beyond 800 m support and reserve

Boundary is the repository provisional rough boundary (not an official redline nor a precise-area basis) | data: geometry/*-geojson | tools: Python, shapely, pyproj (EPSG:4548), matplotlib

Layers

0-170 m park band | 170-450 m frontage
450-800 m live-work | beyond support and reserve
R&D 201.8 ha | park 291.6 ha
housing 98.8 ha | reserve 79.2 ha

Massing and renewal

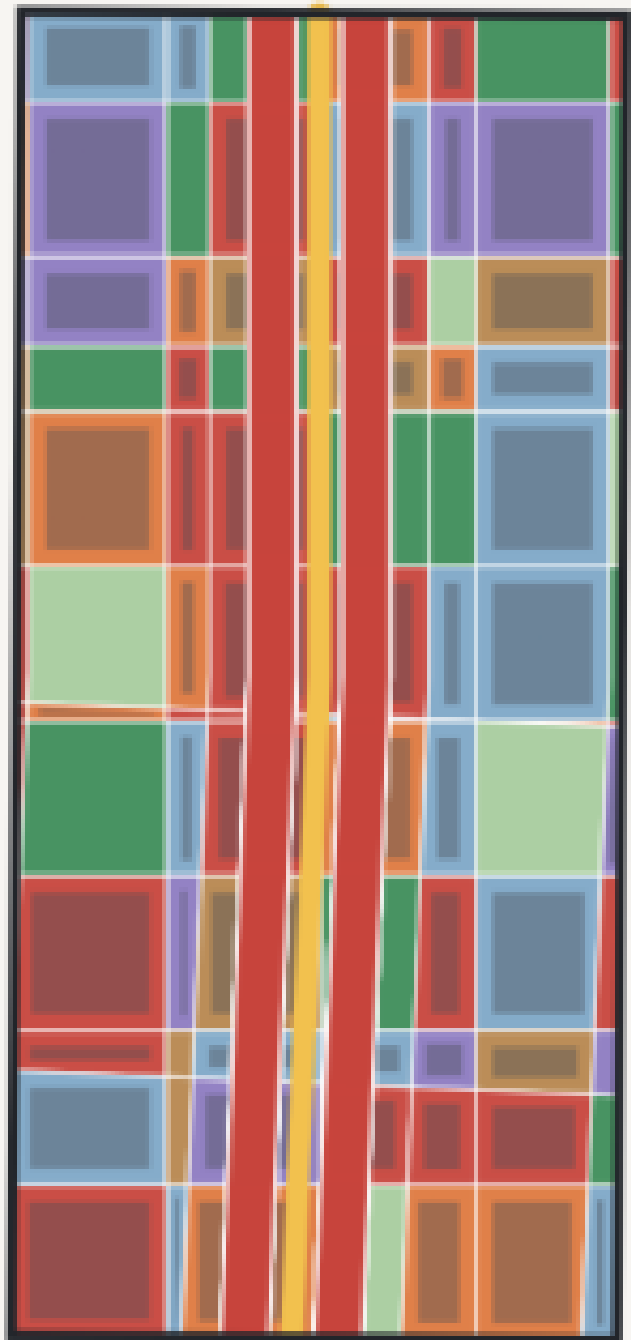

222 footprints | mean height 24.4 m
44% retained | 182.3 ha renovated | demolition limited
floorspace 2154 ten-thousand m2 (concept)
statutory intensity metrics unknown, see metrics.json

Key areas compared: engine, origin, living room

Origin Community produces talent and prototypes, Zhongzhiyuan completes pilot and production, Dazhongsi completes exhibition and communication

Provisional boundaries throughout; gray shading is conceptual building footprint

A1 Zhongzhiyuan acceleration
North: the engine

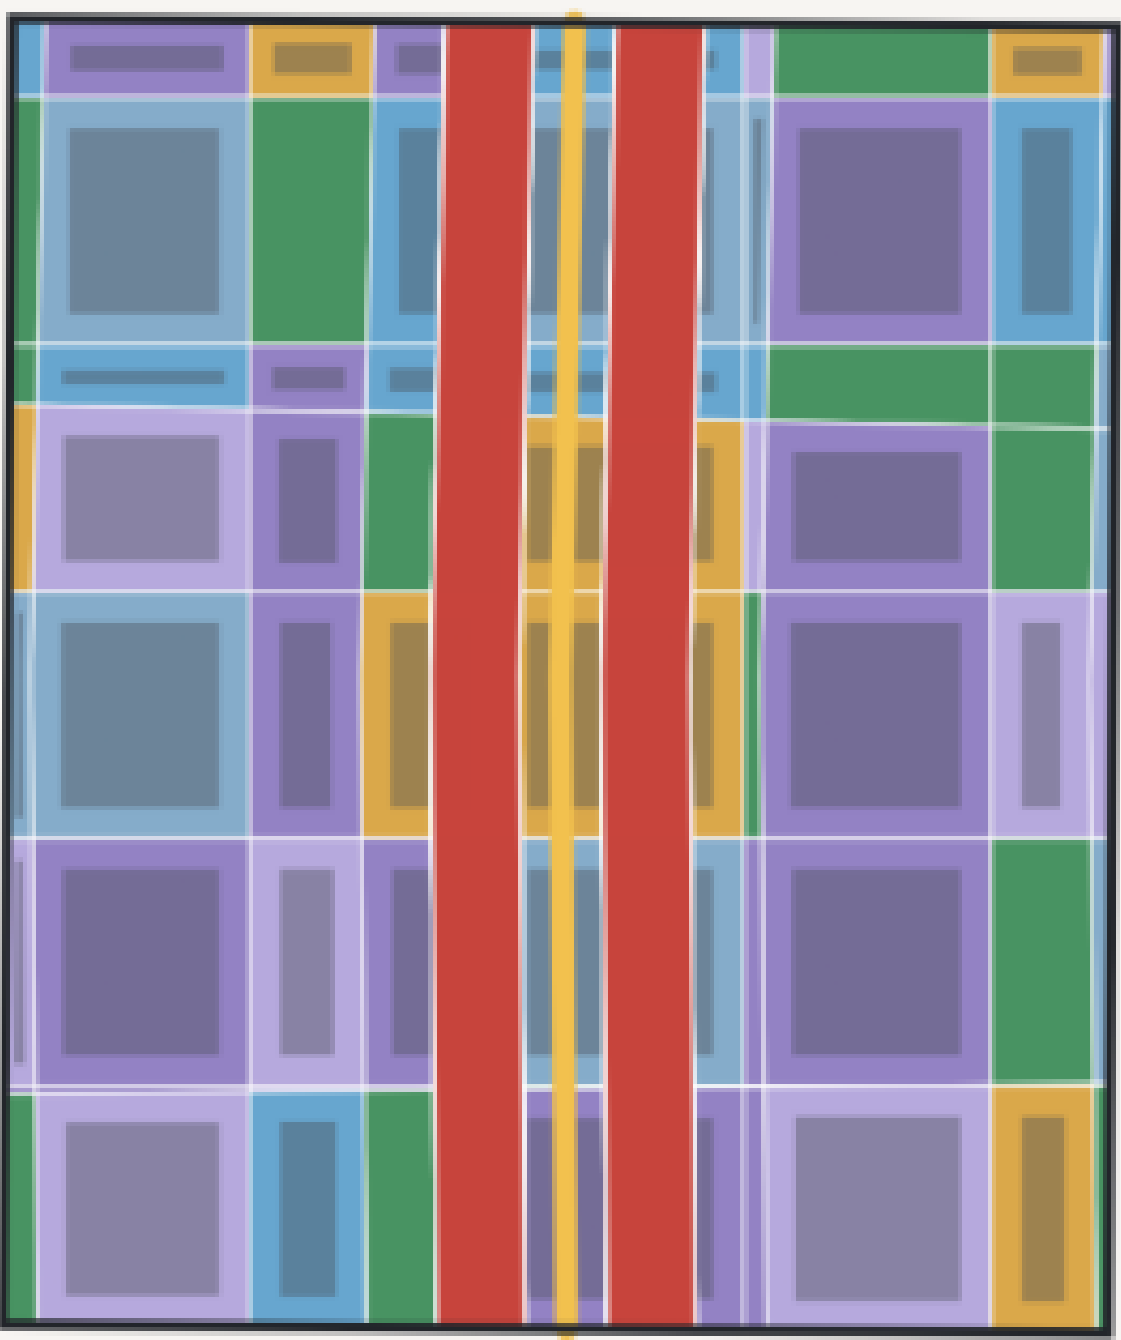

192.9 ha | 95 blocks | dominant 0802

three: 0802 25%, 0804 20%, 1401 14%
R&D Housing

Park green

A2 Beijing AI Origin
Middle: the origin

104.3 ha | 73 blocks | dominant 0701

ten three: 0701 31%, 0804 17%, 0702 15%
Culture/education

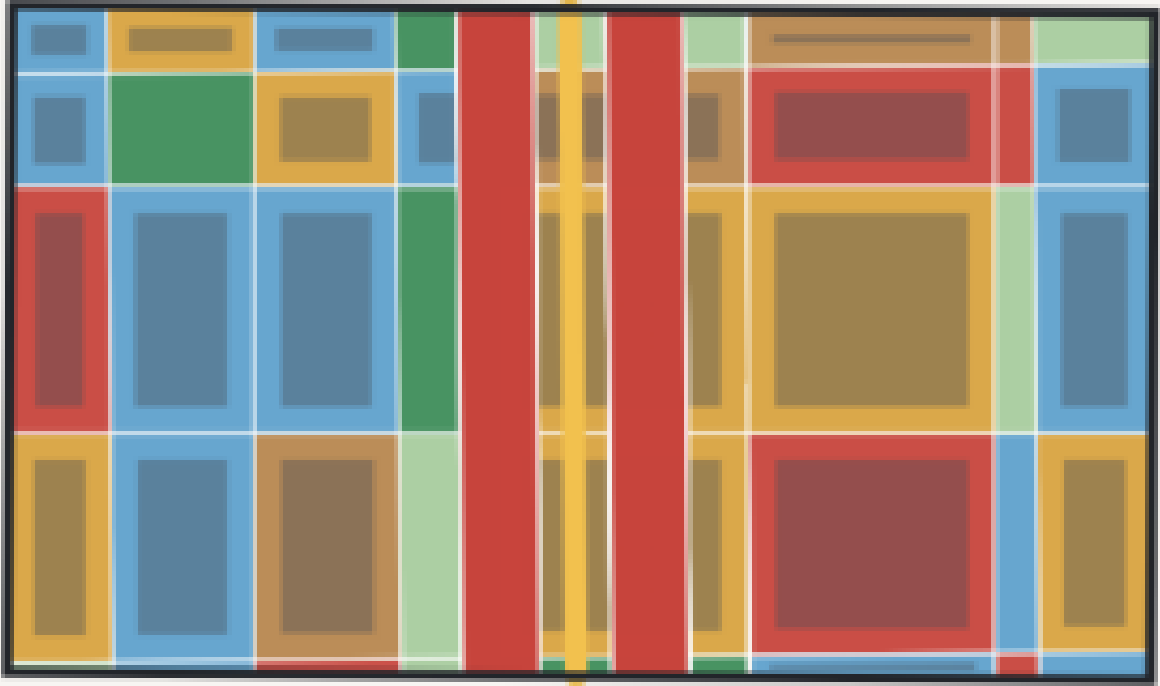

Reserve

Conceptual footprint

Spine

Landmark

A3 Dazhongsi cluster
South: the living room

72.0 ha | 46 blocks | dominant 0901
top three: 0901 33%, 0803 27%, 0802 15%

Boundary is the repository provisional rough boundary (not an official redline nor a precise-area basis) | data: geometry/*-geojson | tools: Python, shapely, pyproj (EPSG:4548), matplotlib

loop and risk conditions

Origin produces talent and prototypes, Zhongzhiyuan pilots and scales, Dazhongsi exhibits and communicates.

A1 192.9 ha (95 blocks) | A2 104.3 ha (73 blocks) | A3 72.0 ha (46 blocks)

risk: disposal, ownership and interchange approval unknown; spatial organisation only.

Mobility, blue-green continuity and scenario nodes

Continuity and transfers first | spine 9.72 km | 29,846 m of centreline | 91.0% of area within 300 m of public space

Roads commit to micro-circulation and section reservation only, never to redlines (see A-CONTROLS-001)

Boundary is the repository provisional rough boundary (not an official redline nor a precise-area basis) | data: geometry/*-geojson | tools: Python, shapely, pyproj (EPSG:4548), matplotlib

Phase-one break removal

- at-grade crossings on the spine
- quadrant connectivity at three stations
- static transit moved out at Dazhongsi
- continuous step-free and lit routes

Municipal and data

utility trench reserved along the spine (indicative)
compute and storage staged by station
city data hub in Zhongzhiyuan, district interface
sponge: sunken greenery and permeable paving

JCIB board 05 scenarios and operations

twelve cards with three tests | five personas | annual programme

Scenario cards, extract

- SC-01 greenway continuity
- SC-03 autonomous shuttle (test)
- SC-04 delivery and night freight (test)
- SC-07 embodied pilot factory (test)
- SC-09 digital heritage guiding
- SC-10 co-governance assembly

Personas and operations

scientists, builders, robotics, founders, residents and elders
annual assembly, quarterly open days, monthly workshops
plaques: dataset, model card, evaluation, review record
three half-day routes and a bilingual international kit

Three data boundaries

no biometric, health, residence or minors data
automation only proposes; humans decide and are logged
synthetic results cannot be presented as measured
aligned with generative-AI measures and barrier-free law

Evidence chain: recomputable, honestly blank, never invented

Four gates recorded in self_check.json | green 314.6 ha | public space 402.5 ha

Statutory controls stay unknown with the required source named

Boundary is the repository provisional rough boundary (not an official redline nor a precise-area basis) | data: geometry/" .geojson | tools: Python, shapely, pyproj (EPSG:4548), matplotlib

Phasing

- Phase 1 386.8 ha (34%) park and pilots
- Phase 2 308.4 ha (27%) network
- Phase 3 446.1 ha (39%) renewal and reserve
- twelve projects plus four policy mechanisms

Statements

- conceptual proposal, not an official conclusion or commitment
- all geometry and metrics recomputable; statutory controls unknown
- generated by an AI agent with human direction and review
- license COMMUNITY-DISPLAY-ONLY; no commercial basemap or licensed fonts
