

Place-Grown Intelligence

Centennial Jing-Zhang Nighttime AI Growth Belt

Nighttime public services, scenario validation and urban renewal grow together.

Wisdom Hub

Technology validation and governance access

AI Origin Community

Real-world problems and youth co-creation

Dazhongsi

Product commercialization and operational scaling

Night Operation Logic

The Jing-Zhang heritage line and Xiaoyue River link the three nodes through night safety, public service, scenario validation and continuing operations.

Figure Boundary

Conceptual night aerial only; not lighting engineering scope, implementation boundary or approved construction content.

Overall Aerial View

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

The Jing-Zhang corridor connects communities, parks and urban gateways into a city validation corridor for mobility, open R&D, public AI services and commercial return.

Rail / Transit Axis

Metro, bus and cycling interchange

Blue-Green Slow Mobility Belt

Walking, cycling and waterfront open space

AI Origin Community

Community-level public AI service entry

Zhongzhiyuan

AI technology validation and governance

Dazhongsi Renewal Gateway

Industry display, consumption and urban living room

Figure Note

Concept-stage aerial view showing the Jing-Zhang corridor, three AI node types, transit access and public open-space organization. Specific boundaries, metrics and implementation scopes must follow the formal data ledger and later design development.

Sources And Evidence Chain

SOURCE GOVERNANCE

Public sources, provisional geometry, explanatory figures and recomputable metrics

EVIDENCE FLOW

Source Tiers

- formal-ready**
Official, public and cleared sources.
- background-only**
Narrative context only; not for metrics.
- provisional-only**
Temporary assumptions; disclose and recalculate.

Current Project Use		
Official taskbook	scope / tracks / format	formal basis
Temp geometry	spatial expression	concept stage
AI aerial images	vision / diagram	visual layer
Route scripts	area / length / nodes	recomputable
Economics estimate	CAPEX / revenue	order estimate

Submission Boundary

This figure explains evidence governance. It does not replace statutory drawings. Authoritative files: sources.json, GeoJSON, metrics.json, matrices and self-check outputs.

formal-ready / background-only / provisional-only

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Support Figure S02 | Existing Resources and Problem Logic v2

From land, resources, mobility, and spatial conditions to a public framework and AI scenario value chain.

Existing Conditions and Problem Logic

The site is not short of resources. It lacks an operating interface.

Narrative

The area already concentrates universities, labs, AI firms, communities, rail access, Jing-Zhang Heritage Park, and the Xiaoyue River. These assets remain scattered and weakly connected. The proposal reorganizes them into a working interface that links real demand, technical capacity, public validation, governance, and operational transformation.

Problem Summary

- 01

Dense resources, weak integration
Universities, labs, firms, communities, and parks are present, but there is no shared demand gateway, capacity matching, or accountable operating mechanism.
- 02

Linear potential, insufficient stitching
The Jing-Zhang corridor and Xiaoyue River provide a linear base, while stations, communities, parks, and enterprise edges still need walkable and service-oriented stitching.
- 03

AI needs real city scenarios, not boundaryless deployment
Public-space testing needs scenario passports, entry review, human takeover, data boundaries, and exit rules.
- 04

Public value and commercial return are misaligned
Accessibility, environment, heritage, and community service should not be screened out by single-ROI logic or pure branding demands.

Missing-Link Logic and Design Response

Therefore, the proposal is not a new isolated plot or a single exhibition belt

It is a dual system: a public-space framework plus an AI scenario value chain.

Evidence boundary: public data supports problem diagnosis only; provisional scopes, routes, and nodes are not statutory boundaries, approvals, or engineering designs.

Heritage Assets Jing-Zhang Park + Xiaoyue River

Innovation Resources Universities + research institutions

Industrial Resources AI firms and renewal districts

Living Resources Communities, offices, public services

Mobility Resources Rail stations + cycling/walking links

Integrated Resource Basemap

Land, open space, innovation resources, everyday services, industrial edges, mobility breaks, public corridors, and three key nodes are overlaid on one base

Site-Specific Intelligence: The Century-Long Jingzhang Urban AI Growth System

Site Overview and Overall Concept Diagram v3

Growing AI from macro to micro through the micro-accumulation, validation, transformation, and continuous renewal of watershed urban space

Three-Tier Scope Diagram

One Continuous Public Spine • Two Parallel Waterside Experiences • Three Differentiated Nodes • Multiple East-West Connections

Conceptual Framework

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Map 02 | Functional Zoning + Overall Spatial Structure v2

A continuous public framework links the two riverside communities, three differentiated nodes and multiple east-west linkages.

Continuous Public Framework

North-south + river-park corridor + three nodes + east-west linkage

- F1 Continuous Public Spine
- F2 Riverfront Public Slow-Mobility Corridor
- F3 Community / Business / Industry Ring

Three Key Areas | Scenario + Carrier Selection

Choose nodes by spatial potential rather than visual balance alone.

Dazhong Temple

Scenario + carrier candidate

Temporary transit triage, traffic-side service extension and productized operations.

Related cards: SC series, OSM reference only.

AI Origin Community

Scenario + carrier candidate

Real residential-community data, problem collection and low-disturbance AI service prototypes.

Related cards: SC series, OSM reference only.

Crowd Intelligence Garden

Scenario + carrier candidate

R&D, governance, exhibition, ecology and public-space testing can be colocated.

Related cards: SC series, OSM reference only.

Scope Guidance + System Strategy

Use scope hierarchy and five functional systems to control implementation.

43.6 km²

Integrated research scope

Industrial ecology and linear corridor control

11.4 km²

Overall design scope

Station + function organization

368.4 ha

Key-node total

Crowd Intelligence Garden + AI Origin + Dazhong Temple

F1

Continuous Public Spine

Shared route linking transport, slow mobility and public AI.

F2

Riverfront Slow-Mobility Corridor

Low-disturbance ecological corridor and neighborhood walking loop.

F3

Community / Business / Industry Ring

Daily life, consumption, IP and R&D link into one operational belt.

F4

Three AI Key Areas

Clear differentiated tasks for north, middle and south nodes.

F5

Tech-Service Network

Data, review, IP, legal, talent and service support.

Retain and Intensify

Keep culture and site memory while improving usability.

Reduce Internal Friction

Use low-impact and modular facilities.

Activate Existing Scenarios

Use station-front and corridor scenes first.

Flexible Control

Allow small tests before larger deployment.

PLACE-GROWN INTELLIGENCE · v1.0

Regional Synergy and Beijing Innovation Network

Five interfaces: problems, capabilities, scenarios, evaluation, conversion

All synergies are concept recommendations: no authorization, contracts, funding, attraction, procurement, approval, or confirmed regional policy is claimed.

Auditable Interfaces

Annual Operations and International Attraction-Conversion

A continuous funnel from public problem release to public AI return

Operating rhythm

Weekly / Monthly	Open days · community clinics · developer groups · public feedback
Quarterly	Scenario challenge · testing week · cross-district review · public-value review
Annual	Open Week · global urban AI forum · next-cycle problem call

Activities, attraction, funding, procurement, and cooperation are proposed mechanisms, not confirmed.

Developer community

International conversion path

Technical & Investment Indicators

Technical metrics stay measurable; economic ledgers remain formula-only until inputs are validated.

Deliverable Board 01

Place-Grown Intelligence
Jing-Zhang Urban AI Growth System

Overall Design Area

11.4 km²

Official text basis; final boundary review

Key Area Total

368.4 ha

Zhongzhiyuan / AI Origin / Dazhongsi

Concept Route Coverage

~51.9 km

Coverage length, not construction length

First-Wave AI Scenarios

12

Including 4 industry validation scenarios

1. Technical Indicators

A spatial framework, measurable scenarios, admission rules and operational review.

Spatial Nodes

Zhongzhiyuan / AI Origin / Dazhongsi

Scenario Belts

Xiaoyue River + Jing-Zhang heritage exchange

Service Points

Required and conditional mobile AI service points

Technical Admission

Scene passport coverage for first-wave scenarios

Governance O&M

Data minimization, testing and annual review

Mobility Framework

North-south systems + continuous walk

East-West Stitches

5 cross links, approx. 9.3 km

Scenario Validation

12 scenarios, including 4 industry pilots

Public Safeguard

Human takeover + offline access

Exit Mechanism

Pause or exit weak, risky or low-acceptance scenes

2. Economic Model Inputs

No budgets, revenue, return ratios or public reinvestment amounts are published.

One-Time CAPEX

Quantity x unit cost + contingency; formal scopes and quotations pending.

Pending validated inputs

Three-Stage Revenue

0-18, 18-36 and 36+ month ledgers; contracts and receipts pending.

Pending validated inputs

Annual OPEX

Personnel, platform, maintenance, activities and audit; contracts pending.

Pending validated inputs

Public Reinvestment

Audited eligible revenue x approved rate plus fixed contributions; legal mechanism pending.

Pending validated inputs

Boundary note: economic figures are parameter models only. Recalculate after formal quantities, market quotations, service contracts, revenue contracts, audit basis and legal return mechanism are validated.

JZ-AI / INDICATORS / S01

Commercial AI Revenue Ledger + Public AI Feedback Loop

Deliverable 02

Formula-only economic logic; no revenue, return amount or fixed ratio is committed.

1. Spatial Loop: Problem Entry - Tech Validation - Public Test - Product Conversion - Public Renewal

Qualified incremental income can enter a public return mechanism only after contract and audit confirmation.

2. Five Commercial AI Revenue Items

Categories are formulas only; final ratios, unit prices and contract accounts must be validated during implementation.

No numeric commitment: no signed contracts, established funds, realized income or fixed return ratios are represented.

Suggested wording: commercial revenue is a supplementary potential pool for public AI renewal, not a replacement for required public operating funding.

Zhongzhiyuan

AI Technology Validation And Governance Admission

Node R&D, controlled testing, public test galleries and human takeover mechanisms are embedded in the existing park fabric.

Public Test Gallery

Public experience, third-party tests

Bus And Cycling Access

Interchange, stops and slow entry

Key Legend

Transit access

Walking access

Controlled testing

Human takeover

Figure Note

Zhongzhiyuan is not a closed lab. It acts as the northern technology gateway where shared R&D, governance review, controlled yards and public test galleries form an open but controlled admission node.

North-South Fast Access

Connects to Origin and Dazhongsi

Human Takeover Point

On-duty support and incident review

Continuous Walking Line

Wayfinding, shade and accessibility

Recommended Caption

Zhongzhiyuan brings enterprise testing, third-party review and public experience into one scenario-passport system.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

AI Origin Community

Real Problem Entry And Youth Co-Creation Node

Community living rooms, problem walls, prototype workshops and staffed service windows let urban demand enter the AI scenario-passport system.

Community Problem Wall

Mobility, lighting, accessibility

Youth Co-Creation Workshop

Students, residents and companies

Public AI Service Window

Consultation, feedback, takeover

Figure Note

The AI Origin Community gathers real problems, supports youth co-creation, offers low-threshold prototype trials and keeps offline staffed access for equitable participation.

Prototype Trial Loop

Wayfinding and feedback terminals

Bus And Cycling Access

Station transfer and slow entry

Age-Friendly Crossing

Rest, shade and accessibility

Key Legend

● Problem entry

● Youth prototypes

● Staffed access

● Community review

Recommended Caption

AI Origin Community is the civic living room where real urban problems enter the AI system and residents can review the results.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Dazhongsi

AI Productization And Operational Scaling Node

Station-city stitching, stock commercial renewal and shared enterprise services turn validated AI scenarios into purchasable, subscribable and operable services.

Station-City Gateway

Metro, bus and walking access

AI Product Validation Hall

Trials, demos and public review

2+1 Mobile Service Points

Route validation and product use

Figure Note

Dazhongsi handles product validation, enterprise services, launch exchange and public/commercial classification through station interfaces and stock commercial renewal.

Enterprise Service Desk

Investment, API and compliance

Public / Commercial Sorting

Scale only validated value

Launch And Exchange Window

Release, methods and partners

Key Legend

Station-city stitching

Product validation

Enterprise services

Return loop

Recommended Caption

Dazhongsi is not an ordinary commercial endpoint; it is the productization, operations and classification outlet for validated scenarios.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Topic S02 | Personas + Scenario Positioning v1

Six non-statistical personas define renovation tasks, spatial entrances, chain cards and human-operation boundaries.

Six Personas, Not Population Labels

Each persona answers: demand, why they exist, AI role, human response and failure boundary.

P-01 Nearby Daily Residents Role Daily life, public services and facility feedback. Links SC-01 / SC-04 / SC-06 / SC-12 Space AI Origin Community + Xiaoyue River + public space Boundary Design assumptions only; not personal-data profiling.	P-02 Commuting / Cycling Youth Role Continuous walking, night safety and station arrival. Links SC-01 / SC-04 / SC-09 Space Transit corridor + Crowd Garden + Dazhong Temple Boundary Design assumptions only; not personal-data profiling.
P-03 University / Open Co-Creators Role Real problems, low-cost prototypes and controlled testing. Links SC-02 / SC-07 / SC-08 Space AI Origin Community + Crowd Intelligence Garden Boundary Design assumptions only; not personal-data profiling.	P-04 Cultural Slow-Travel Public Users Role Jing-Zhang memory, Xiaoyue River content and rights boundary. Links SC-05 / SC-11 Space River-park heritage line + Dazhong Temple Boundary Design assumptions only; not personal-data profiling.
P-05 AI Enterprise Product Validators Role Technical review, limited validation and productization. Links SC-07 / SC-08 / SC-09 / SC-10 / SC-11 Space Crowd Garden + Xiaoyue test area + Dazhong Temple Boundary Design assumptions only; not personal-data profiling.	P-06 Public Operators + Human Takeover Staff Role Access, review, complaints, pause and exit. Links SC-01 / SC-04 / SC-05 / SC-10 / SC-12 Space Full operations platform + service entrances Boundary Design assumptions only; not personal-data profiling.

Scenario - Space - Operation Positioning

Scenario chain and spatial response are positioned twice: by spatial place and by action path.

	AI Origin Community SC-01	Crowd Garden	Xiaoyue River + Heritage Park SC-05	Dazhong Temple	Full Operation Platform
P-01 Nearby Daily Residents	SC-01,12		SC-04,06		feedback
P-02 Commuting / Cycling Youth		SC-04,06		SC-09	help
P-03 Co-Creators	SC-02	SC-07,08			passport
P-04 Cultural Public Users			SC-05	SC-11	rights
P-05 Enterprise Validators		SC-07,08	trial	SC-09,10,11	audit
P-06 Operators + Human Takeover	SC-01,12	SC-08	SC-06	SC-10	owner

Formal Expression Boundary

1. This is an operation-index and route diagram, not a policy boundary or face-recognition boundary.
2. Xiaoyue River is not closed by IP or enclosure; its inner belt remains open and co-built.
3. Personas only constrain AI-side permissions and data minimization; no unauthorized manual profiling.
4. Enterprise testing and system validation represent staged ecosystem cooperation, not the whole AI growth system.

Note: P-codes are derived from route stories and user-position assumptions, not on-site visitor statistics or personal privacy data.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Persona-Scene Matching Map v1

Use six personas to explain the real users, spatial entrances and human-operation boundary of 12 scenario cards.

Six Persona Entries Into One Urban AI Growth Chain

Personas are not labels; they connect real problems, innovation capacity, public experience, industry validation and human operations into one loop.

12 Scenario Coverage

Each scenario is connected to at least one persona.

- 01 Urban Issue Collection Desk
- 02 Youth One-Day Prototype Workshop
- 03 Walking Navigation Support
- 04 Xiaoyue River Eco Co-Governance
- 05 Jing-Zhang Memory Co-Creation Station
- 06 Night Safety + Help
- 07 Embodied Device Test Courtyard
- 08 Trustworthy Agent Governance Sandbox
- 09 Smart Terminal Public Test Cabin
- 10 Enterprise Deployment Service Desk
- 11 Content + Rights Exchange Hub
- 12 Public AI Operation Feedback Room

Formal Expression Boundary

1. Design assumptions, not on-site visitor statistics.
2. Public space remains rejectable and may request human assistance.
3. Industry validation must pass Crowd Garden review.
4. Dazhong Temple only accepts projects with clear commercial potential after corridor validation.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Urban Problem Collection Desk | AI Origin Community

Real problems are heard and human-confirmed before entering the AI co-creation and validation chain

SCENARIO TASK

Urban Problem Collection Desk

A human window, co-creation table, and public terminal turn a vague concern into a reviewable, traceable scenario passport.

NODE K2 AI Origin Community CHAIN STAGE The first entry of real needs into the system

POSITION IN THE FULL PROCESS

LOCATION INDEX

SCENE NOTE

At an open ground floor, residents raise everyday issues through a human window. AI only assists sorting: a human confirms the scenario passport before prototyping and review.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

One-Day Youth Prototype Workshop | AI Origin Community

Turn scenario passports into discussable, testable and reversible low-cost prototypes.

Scene Task

One-Day Youth Prototype Workshop

Open desks, light tools and review areas convert scenario passports into service flows, low-fidelity models and test plans.

Node	Stage	Adjacent
K2 AI Origin	Demand Translation	SC-01 -> Zhongzhiyuan

Scene Note

Youth co-creators use scenario passports as input, prepare service flows, low-fidelity models and test plans, and submit them for community review before real deployment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Walking Companion And Accessible Detour | Continuous Walking Line

Provide explainable, rejectable and staff-supported mobility assistance.

Scene Note

Users can anonymously receive route explanation, detour and rest information. Manual help remains available; face recognition and continuous tracking are not default functions.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Xiaoyue River Ecological Co-Management | Xiaoyue River Line

Convert environmental anomalies into traceable, reviewable and closed-loop maintenance tickets.

Scene Note

Residents and maintenance staff review anomalies together. AI supports traceable tickets and does not turn public-space monitoring into crowd profiling.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Jing-Zhang Memory Co-Creation Station | Heritage Park Line

Keep railway memory co-created with clear sources, authorization and update rules.

Scene Note

Community stories and railway archives enter guidance only with source and authorization records. Projection and labels remain removable and updatable.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Night Safety And Staffed Help | Station Loops And River-Park

Route nighttime help to staffed response first, without equating safety with identity tracking.

Scene Note

Facility faults and help events are routed to staffed response. The route and help service can be used anonymously; face recognition is not a default capability.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Embodied Device Shared-Path Test Yard | Zhongzhiyuan

Let devices learn yielding, stopping and human takeover inside a limited test yard first.

Scene Note

Devices are tested only in clearly marked limited yards. Pedestrians have priority; staff can stop and take over. Failed tests return to R&D or leave the site.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Trusted Agent Governance Sandbox | Zhongzhiyuan

Review permissions, logs and safety before agents enter real scenarios.

Scene Task

Trusted Agent Governance Sandbox

Isolated data spaces, review rooms and consoles check permissions, tool calls, logs, bias, safety and human takeover.

Node	Stage	Adjacent
K1 Zhongzhiyuan	Permission And Safety Review	Prototype -> Real Test

Scene Note

Permissions, tool calls, logs, bias and safety are reviewed before field testing. Responsible humans confirm key decisions; failed agents lose tool access and return for repair.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Public Smart-Terminal Test Street | Dazhongsi

Test usability, accessibility and maintenance cost in real pedestrian flows.

Scene Task

Public Smart-Terminal Test Street

Mobile booths, test positions and staffed service counters test usability, accessibility, stability and maintenance cost.

Node	Stage	Adjacent
K3 Dazhongsi	Public Terminal Test	River-Park -> SC-10

System Process

Location

Scene Note

Real flows are used to test usability, accessibility and stability. Staffed service and maintenance interfaces stay on site; failed terminals are adjusted or removed.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Enterprise Agent Deployment And Service Desk | Dazhongsi

Connect validated products to enterprise service while keeping scale-down and exit paths.

Scene Task

Enterprise Agent Deployment And Service Desk

Shared test rooms, service desks and operations back offices support deployment, API integration, compliance review, user testing and O&M handover.

Node	Stage	Adjacent
K3 Dazhongsi	Enterprise Deployment	SC-09 -> Commercial Scaling

System Process

Location

Scene Note

The service desk supports deployment, integration, compliance and O&M handover. Critical permissions and launch decisions remain human-confirmed.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

AI Content Consumption And Copyright Test Field | Dazhongsi

Make content consumption pass source, copyright and youth-protection checks.

Scene Note

Interactive content is checked for source, authorization and copyright. Manual registration and youth protection are required; consumption tests cannot bypass public review.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Public AI Operations And Feedback Room | Belt-Wide Platform

Use public review and responsible sign-off to decide continue, adjust or exit.

Scene Note

Public value, acceptance, technology and O&M data are reviewed together. The public and responsible owners decide whether each scenario continues, adjusts or exits.
