

Place-Grown Intelligence

Centennial Jing Zhang Nighttime AI Growth Belt

Overall Aerial View

Clean daytime corridor view without cropping or image mask

Start from site problems, then align the three-level scope, key areas, and AI growth chain.

Top: existing conditions, known problems, resources, and missing official data define the proposal boundary.

Support Figure S02 | Existing Resources and Problem Logic v2

From land, resources, mobility, and spatial conditions to a public framework and AI scenario value chain.

The site is not short of resources. It lacks an operating interface.

The area already concentrates universities, labs, AI firms, communities, rail access, Jing-Zhang Heritage Park, and the Xiaoyue River. These assets remain scattered and weakly connected. The proposal reorganizes them into a working interface that links real demand, technical capacity, public validation, governance, and operational transformation.

m Dense resources, weak integration

- 01 Universities, labs, firms, communities, and parks are present, but there is no shared demand gateway, capacity matching, or accountable operating mechanisms.
- 02 **Linear potential, insufficient stitching**
The Jing-Zhang corridor and Xiyaohe River provide a linear base, while stations, communities, parks, and enterprise edges still need walkable and service-oriented stitching.
- 03 **All needs real city scenarios, not boundaryless deployment**
Public-space testing needs scenario passports, entry rules, human takeovers, data boundaries, and exit rules.
- 04 **Public value and commercial return are misaligned**
Accessibility, environment, heritage, and community service should not be squeezed out by single-ROI logic or pure branding demands.

Therefore, the proposal is not a new isolated plot or a single exhibition belt

It is a dual system: a public-space framework plus an AI scenario value chain.

The design connects functional zones, public routes, and governance interfaces so shared space can carry testing, iteration, operation, and phased implementation.

Land, open space, innovation resources, everyday services, industrial edges, mobility breaks, public corridors, and three key nodes are overlaid on one bus

Land, open space, knowledge resources, everyday services, industrial edges, mobility breaks, public corridors, and three key nodes are overlaid on one bus

Heritage Assets Innovation Resources Industrial Resources Living Resources Mobility Resources

Sources: OSM basemap, project ledgers and concept routes. This figure supports analysis only, not statutory planning, approval, engineering, or investment commitment.

JZ.A1 / EXISTING CONDITIONS - PROBLEM LOGIC / 502

Site Overview + Overall Concept v3

Growing AI from macro observation to micro public-space validation, transfer and continuous renewal

Park management scope + merged polygon

One continuous public framework: two river-side slow-life experiences, three difference nodes a

At Origin Community: public scenario validation + commercial feedback loop

ISSN 0950-0804 / DOI: 10.1002/jbm.b

03 | Mobility, Blue-Green Network, And Land Use

Translate the concept into walking, blue-green space, public framework, functions, and key-area links.

Page Logic

Top: how people arrive, walk, pause, and use blue-green public space for AI scenario validation on.

Bottom: how five functional systems, three key areas, the river-park validation band, and Zhongguancun-services form the spatial framework.

04 | Key Areas And Crowd Intelligence Garden

First summarize the three key-area roles, then expand the technology validation and governance-access node.

Page Logic

Top: Crowd Intelligence Garden, Ai Origin Community, and Dazhong Temple take different responsibilities in one chain.

Bottom: Crowd Intelligence Garden is a reliability node for R&D, controlled testing, public observation, governance review, and maintenance.

06 | Twelve AI Scenario Validation Views

From problem intake and public services to cultural co-creation, industry testing, and long-term operation.

Topic S02 | Personas + Scenario Positioning v1

Six key statistical personas define renovation tasks, spatial entrances, chair cards and human-operation boundaries.

Six Personas, Not Population Labels

Each persona answers: demands, why they exist, AI role, human response and failure boundary.

P-01 Nearby Daily Residents

Role: Daily life, public services and facility feedback.

Links: SC-01 / SC-04 / SC-05 / SC-02

Space: AI Origin Community + Xiaoyue River + public space

Boundaries: assumptions only; not personal data profiling.

P-02 Commuting / Cycling Youth

Role: Continuous walking, night safety and station arrival.

Links: SC-01 / SC-04 / SC-09

Space: Transit corridor + Crowded Garden + Daxing Temple

Boundaries: assumptions only; not personal data profiling.

P-03 University / Open Co-Creators

Role: Real problems, live-test prototypes and controlled testing.

Links: SC-02 / SC-07 / SC-08

Space: AI Origin Community + Crowded Intelligence Garden

Boundaries: assumptions only; not personal data profiling.

P-04 Cultural Slow-Travel Public Users

Role: Jing-Zhang memory, Xiaoyue River context and rights memory.

Links: SC-03 / SC-11

Space: River park heritage line + Daxing Temple

Boundaries: assumptions only; not personal data profiling.

P-05 AI Enterprise Product Validators

Role: Technical review, limited validation and production.

Links: SC-07 / SC-08 / SC-09 / SC-03 / SC-12

Space: Crowded Garden + Xiaoyue test area + Daxing Temple

Boundaries: assumptions only; not personal data profiling.

P-06 Public Operators + Human Takeover S

Role: Access, review, compliance, peace and exit.

Links: SC-02 / SC-04 / SC-05 / SC-09 / SC-12

Space: Full operations platform + service entrances

Boundaries: assumptions only; not personal data profiling.

Scenario - Space - Operation Positioning

Scenario chain and spatial response are positioned twice: by spatial place and by action path.

	AI Origin Community SC-01	Crowded Garden SC-02	Xiaoyue River + Heritage Park SC-03	Daxing Temple SC-04	Full Operation Platform SC-05
P-01 Nearby Daily Residents	SC-01,12		SC-04,06		Feedback
P-02 Commuting / Cycling Youth			SC-04,06	SC-09	help
P-03 Co-Creators	SC-02	SC-07,08			passport
P-04 Cultural Public Users			SC-03	SC-11	rights
P-05 Enterprise Validators		SC-07,08	0134	SC-09,10,11	audit
P-06 Operator's + Human Takeover	SC-01,12	SC-06	SC-06	SC-10	owner

Formal Expression Boundary

- This is an operation-index and route diagram, not a policy boundary or face-recognition boundary.
- Xiaoyue River is not closed by IP or enclosure; its inner belt remains open and co-built.
- Personas only constrain AI-side permissions and data minimization; no unauthorized manual profiling.
- Enterprise testing and system validation represent staged ecosystem cooperation, not the whole AI growth system.

Note: Profiles are derived from route stories and user-position assumptions; not on-site visitor statistics or personal privacy data.

Indicator Review And Compliance Response

Technical indicators remain measurable; economic ledgers stay formula-only, with no numeric commitment until validated inputs are supplied.

Technical & Investment Indicators

Technical metrics stay measurable; economic ledgers remain formula-only until inputs are validated.

Deliverable Board 01

Place-Grown Intelligence
Jing-Zhang Urban AI Growth System

Overall Design Area

11.4 km²

Official text basis; final boundary review

Key Area Total

368.4 ha

Zhongzhiyuan / AI Origin / Dazhongsi

Concept Route Coverage

~51.9 km

Coverage length, not construction length

First-Wave AI Scenarios

12

Including 4 industry validation scenarios

1. Technical Indicators

A spatial framework, measurable scenarios, admission rules and operational review.

Spatial Nodes

Zhongzhiyuan / AI Origin / Dazhongsi

Mobility Framework

North-south systems + continuous walk

Scenario Belts

Xiaoyue River + Jing-Zhang heritage exchange

East-West Stitches

5 cross links, approx. 9.3 km

Service Points

Required and conditional mobile AI service points

Scenario Validation

12 scenarios, including 4 industry pilots

Technical Admission

Scene passport coverage for first-wave scenarios

Public Safeguard

Human takeover + offline access

Governance O&M

Data minimization, testing and annual review

Exit Mechanism

Pause or exit weak, risky or low-acceptance scenes

2. Economic Model Inputs

No budgets, revenue, return ratios or public reinvestment amounts are published.

One-Time CAPEX

Quantity x unit cost + contingency; formal scopes and quotations pending.

Pending validated inputs

Annual OPEX

Personnel, platform, maintenance, activities and audit; contracts pending.

Pending validated inputs

Three-Stage Revenue

0-18, 18-36 and 36+ month ledgers; contracts and receipts pending.

Pending validated inputs

Public Reinvestment

Audited eligible revenue x approved rate plus fixed contributions; legal mechanism pending.

Pending validated inputs

Boundary note: economic figures are parameter models only. Recalculate after formal quantities, market quotations, service contracts, revenue contracts, audit basis and legal return mechanism are validated.

JZ-AI / INDICATORS / S01

01 Technical And Investment Indicators

Commercial AI Revenue Ledger + Public AI Feedback Loop

Deliverable 02

Formula-only economic logic; no revenue, return amount or fixed ratio is committed.

0-18 Months | Launch

Formula only - value unknown

Pending contracts and audit basis

18-36 Months | Network

Formula only - value unknown

Pending contracts and audit basis

After 3 Years | Stable Annualized

Formula only - value unknown

Pending contracts and audit basis

1. Spatial Loop: Problem Entry - Tech Validation - Public Test - Product Conversion - Public Renewal

Qualified incremental income can enter a public return mechanism only after contract and audit confirmation.

AI Origin

Real issues, co-creation, user tests

Zhongzhiyuan

Technical assessment, compliance testing

River + Park

Bounded tests, access and events

Dazhongsi

Licensing, operation and procurement

Public AI Renewal Account

terminals, accessibility, human service, maintenance, governance and audit

2. Five Commercial AI Revenue Items

Categories are formulas only; final ratios, unit prices and contract accounts must be validated during implementation.

Scenario Access

project count x approved fee

Compliance Testing

evaluation count x approved fee

Platform Access

access count x approved fee

User Test + Launch

event batches x approved fee

Licensing / Procurement

validated contracts x approved rules

No numeric commitment: no signed contracts, established funds, realized income or fixed return ratios are represented.

Suggested wording: commercial revenue is a supplementary potential pool for public AI renewal, not a replacement for required public operating funding.

02 Commercial AI Revenue And Public AI Return Loop

Response To The Official Brief

Responds to the three positions, five functions, three areas and two wings, Agent 2/3/6 tasks, and multimodal presentation requirements. Economic content is formulas and governance boundaries, not budgets or commitments.

Boundary Statement

Outputs are open co-creation recommendations. They do not replace statutory planning and do not constitute approved investment, operation, return flow, spatial renewal or carrier commitments.

Core Metric Recalculation

site_area_sqm, green_ratio and public_space_ratio must match submitted geometry and visual/index.html data-values. Provisional geometry keeps formulas, status and recalculation triggers.

Pre-Submission Gate

After syncing the latest main branch, rerun render, manifest refresh, self_check and participant_preflight. A passing self-check is not selection, approval or implementation.
