

Jing-Zhang Authenticity Commons

A bidirectional evidence spine that sends errors back to their source

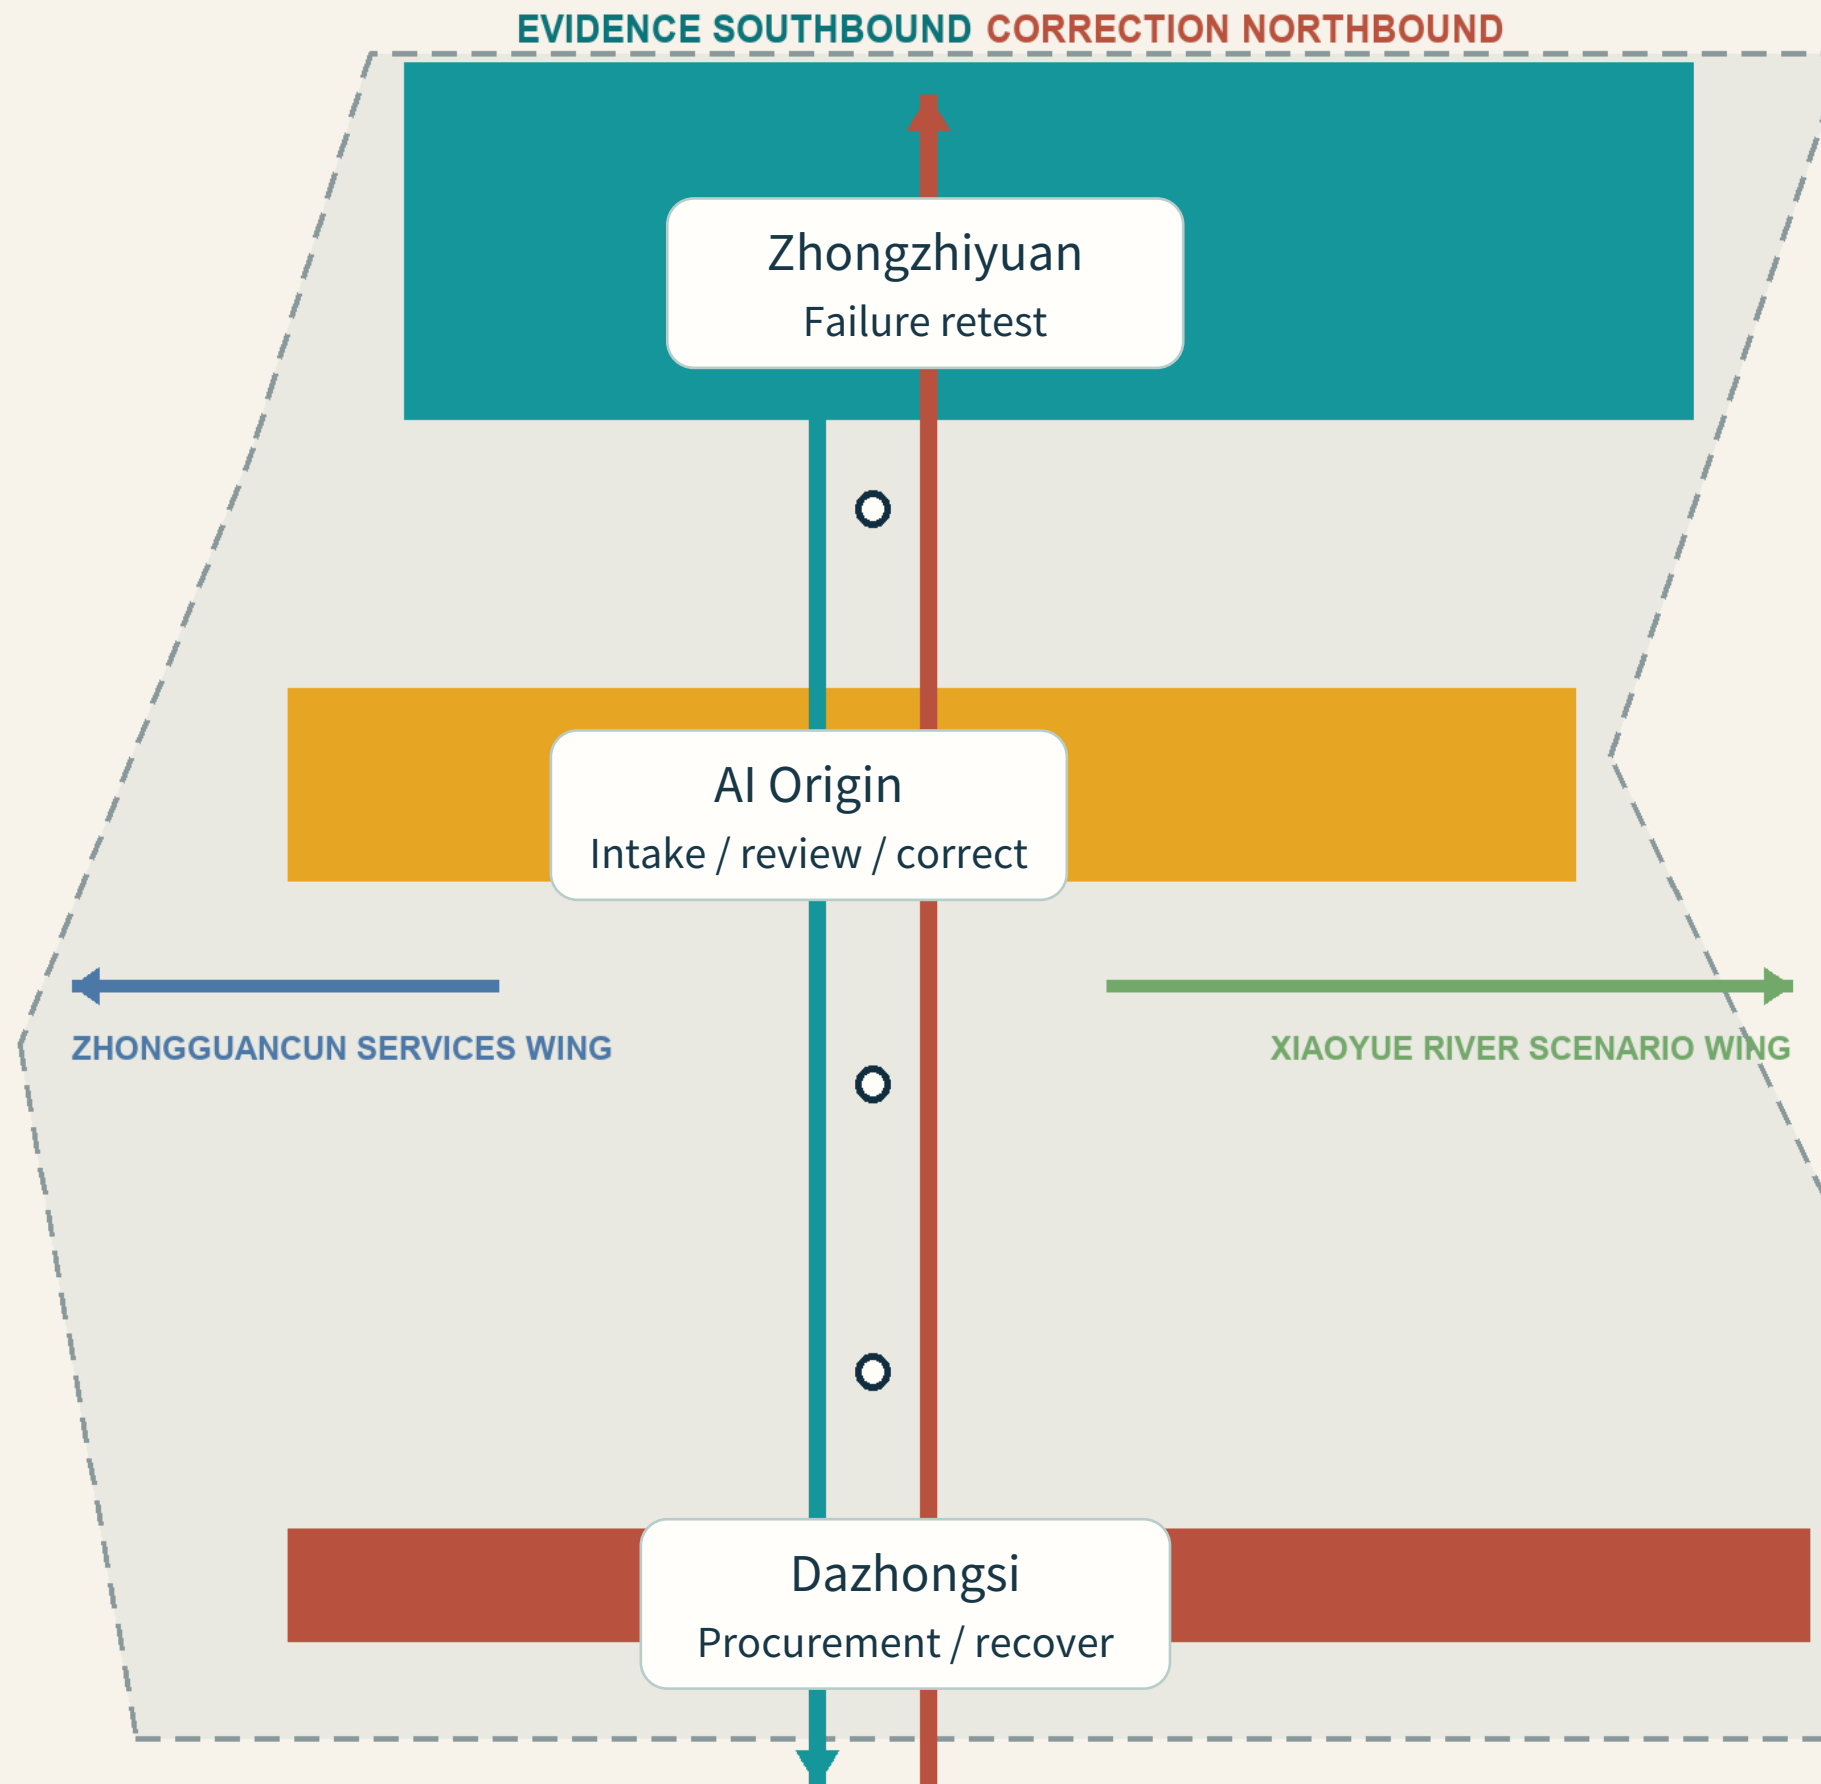

P0 REFERENCE | 96 sqm / 2 cases per hour / 5 seats / 780 seat-hours

6 procurement packages / 10 gates, none open. Not measured operating performance.

30 s: public test + P0 | 3 min: diagrams + acceptance | 15 min: narrative + evidence

Bidirectional Evidence Spine

Start with one person, one error and a path that can return

PUBLIC TEST

IF AN ERROR CANNOT BE CORRECTED THROUGH EVERY CHANNEL THAT CARRIED IT, THE AI SERVICE MUST NOT REMAIN IN JING-ZHANG.

THE VISITOR ASKS ONLY:
DID CORRECTION RETURN
TO EVERY PLACE WHERE I SAW THE ERROR?

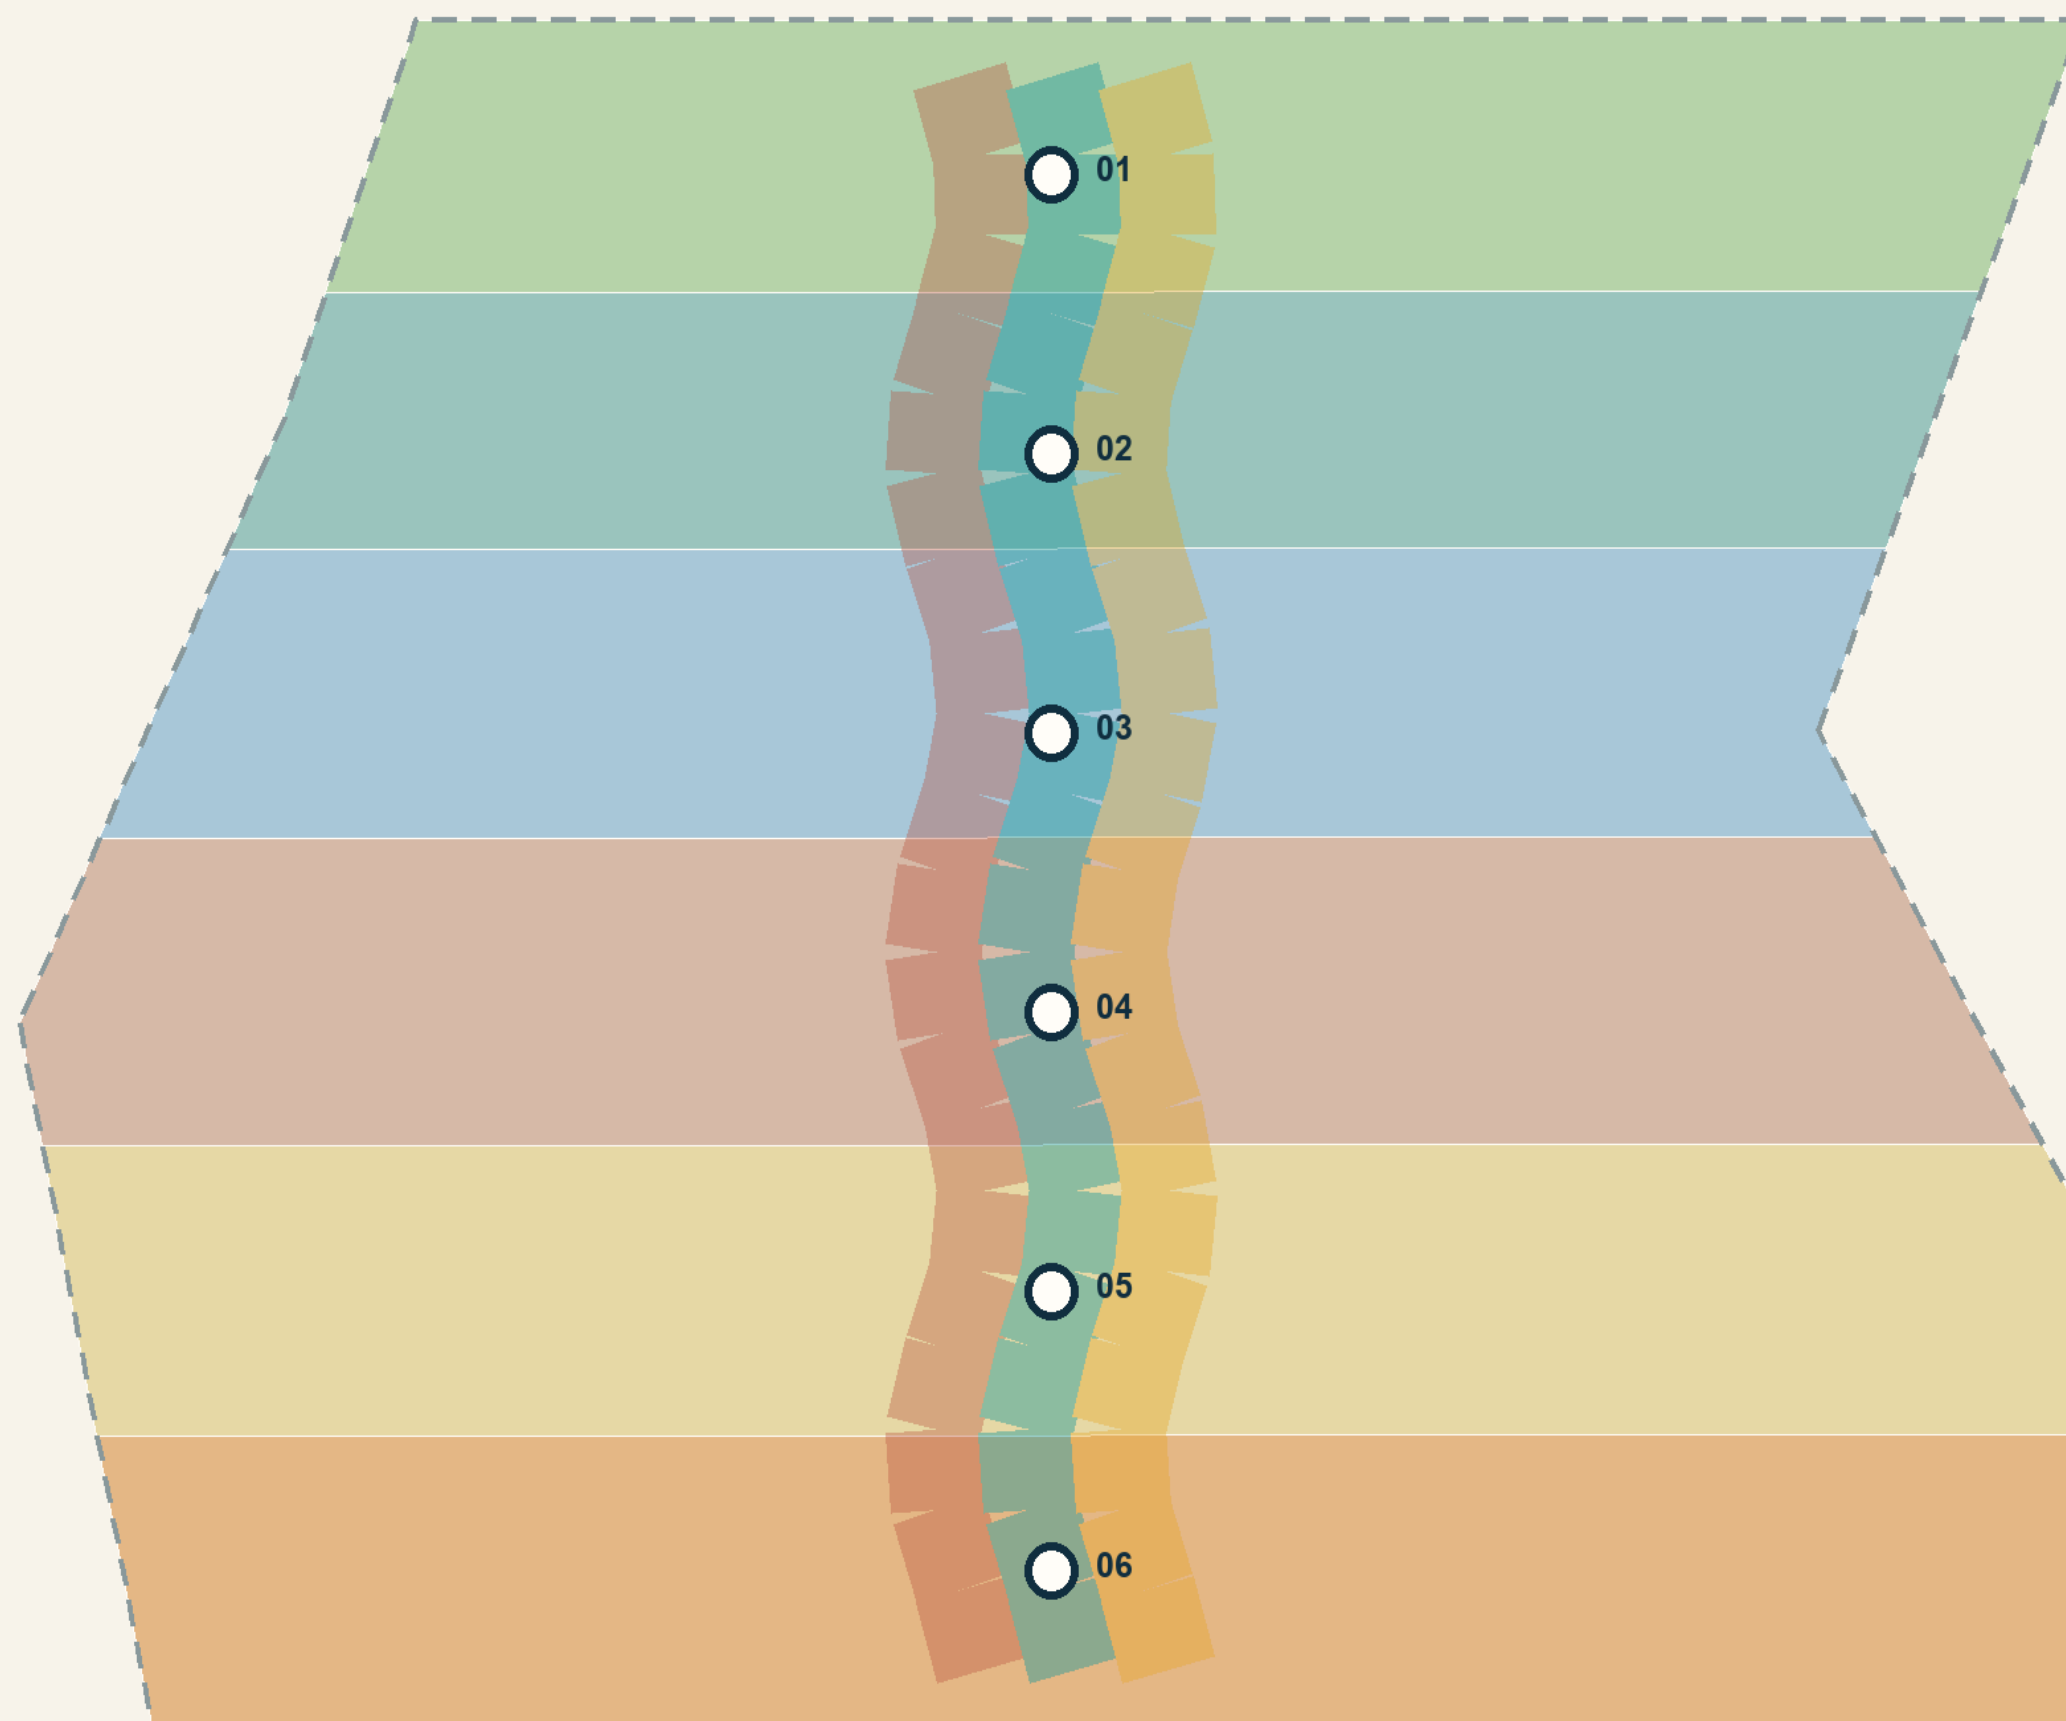

V1 TRACE SOURCE + CHANNELS

V2 INDEPENDENT FACT REVIEW

V3 PAUSE · CORRECT · RETEST · RECOVER

Corridor Skeleton + Concept Land Use

The three belts overlap as working interfaces, not abstract parallel strips

CONCEPT LAND-USE CODES

- 09 Commercial services
- 0702 Community services
- 0803 Culture
- 0804 Education
- 0802 R&D
- 1401 Park green

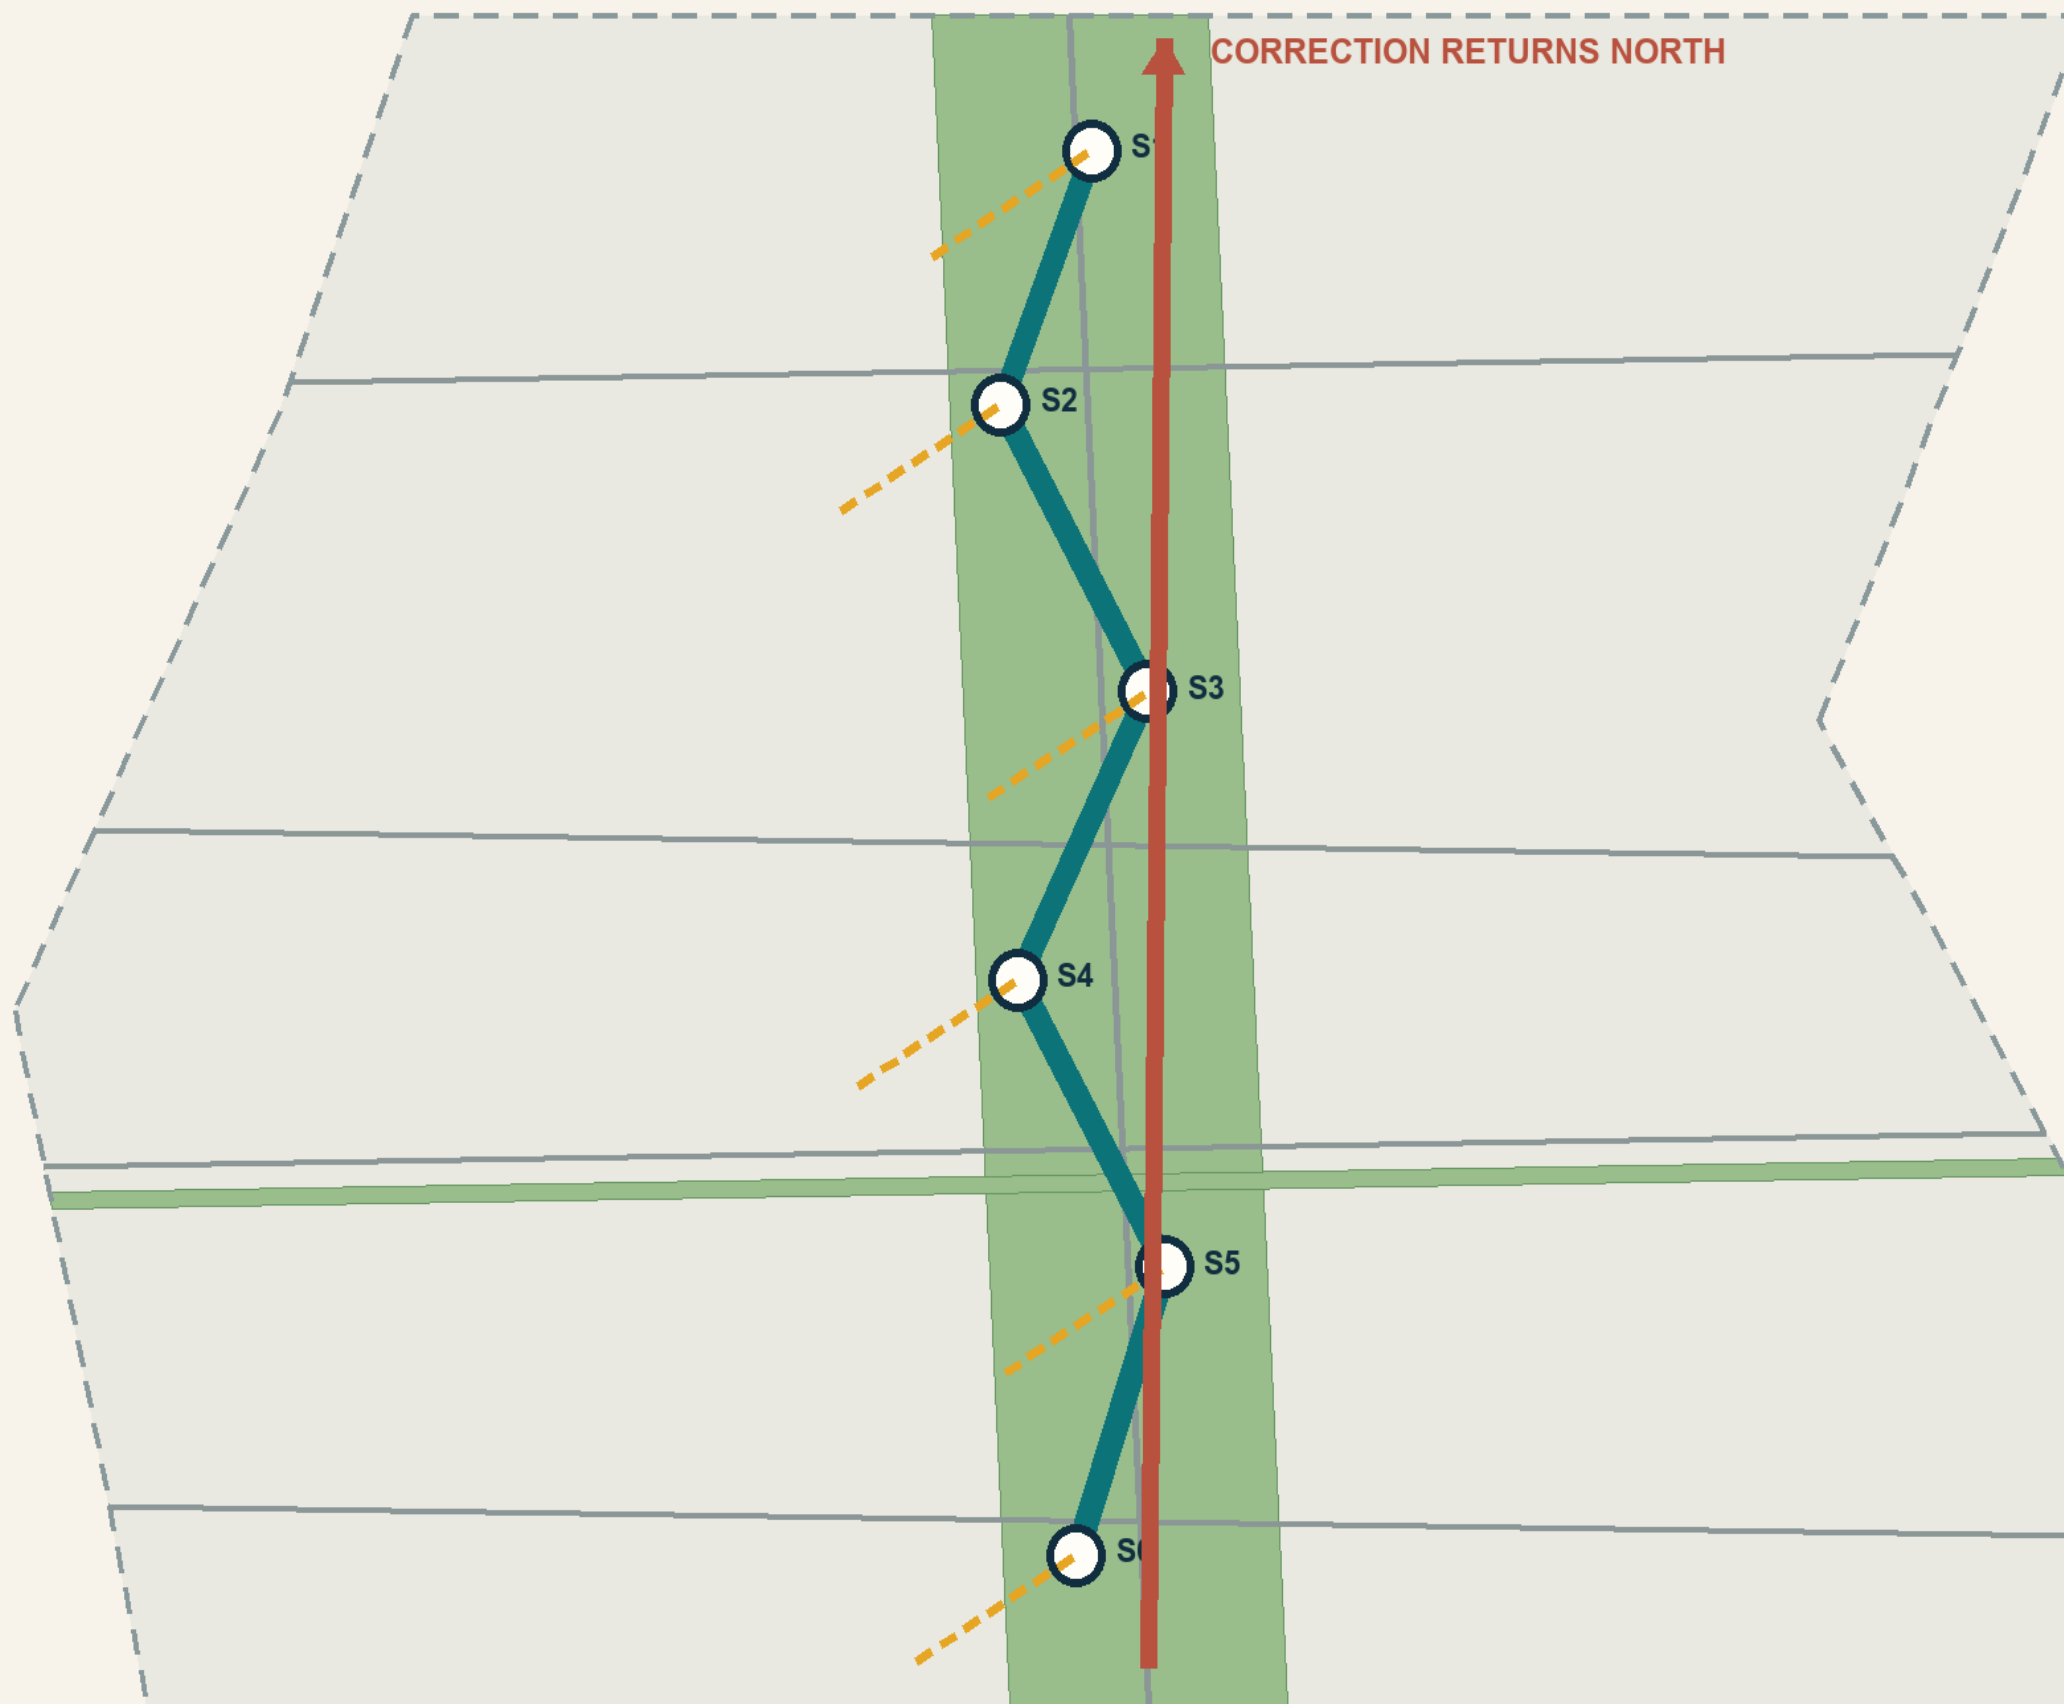

THREE OVERLAPPING BELTS

- JING-ZHANG CULTURE
- URBAN AI LIFE
- AI CONVERGENCE

The gap-free partition comes from submitted GeoJSON. Code 09 follows the latest official enum. Recompute after official geometry, controls and ownership arrive.

04 Public Arrival + Blue-green Access

Access serves people; correction serves information; both meet at six staffed stations

A COMPLETABLE ACCESS CHAIN

- 01 PUBLIC TRANSIT
- 02 GREEN SLOW-MOBILITY SPINE
- 03 ACCESSIBLE LAST 50 M
- 04 SCREENLESS + HUMAN HANDOVER
- 05 SAME-CHANNEL RETURN

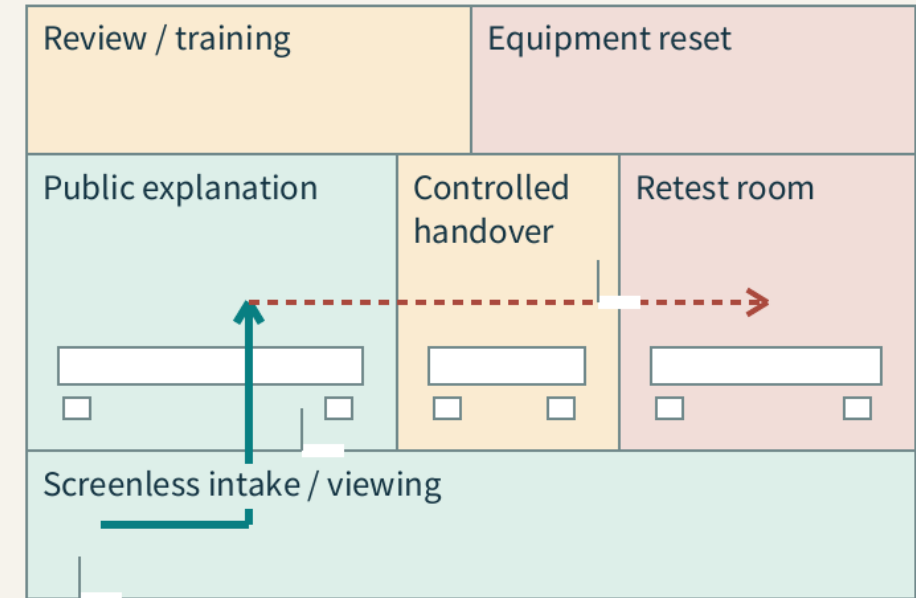

CENTERLINES AND STATIONS ARE CONCEPTS, NOT ROAD REDLINES, TRANSIT COMMITMENTS OR MEASURED WALK TIMES. SCREENLESS AND DIGITAL ROUTES CARRY EQUAL DECISION, APPEAL AND CORRECTION RIGHTS.

THREE SPACES, THREE DIFFERENT RESPONSIBILITIES

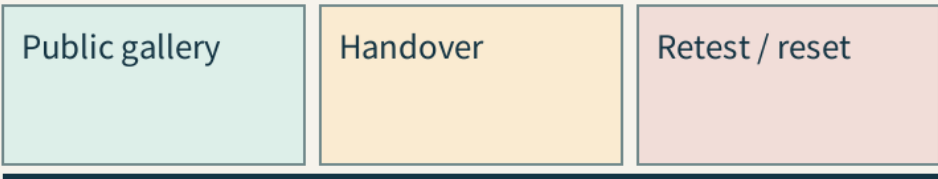

Shared 12x8 relational grids are non-metric. Only AI Origin P0 has a separate 96 sqm participant reference fit; neither is a site survey.

Zhongzhiyuan • Retest

PLAN • LOCAL GRID 12 × 8

SECTION • PUBLIC / CONTROLLED

Daily: gallery open

Drill: isolated retest

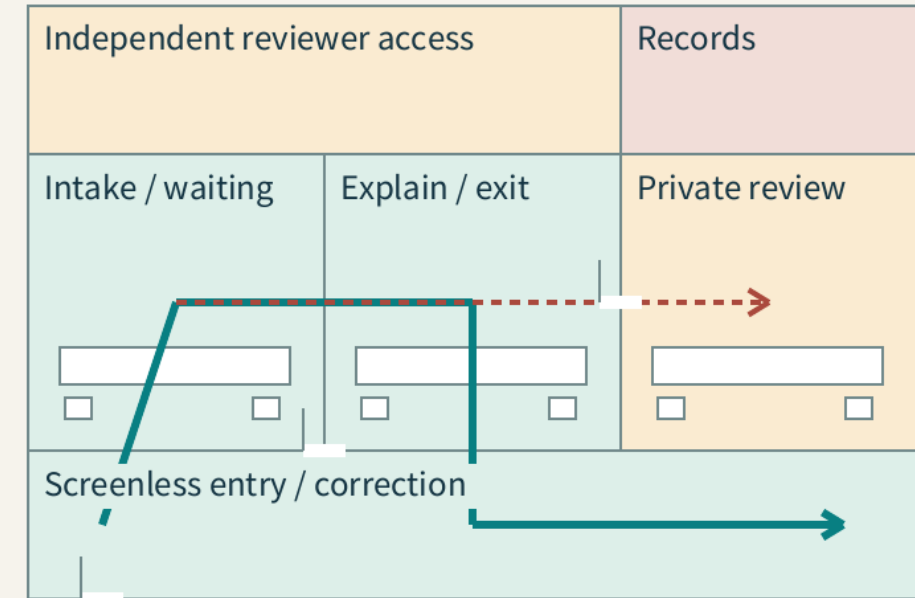

Reset: remove equipment, log

TEAL = public / screenless route • RED DASH = controlled evidence handover • Door / furniture symbols are illustrative

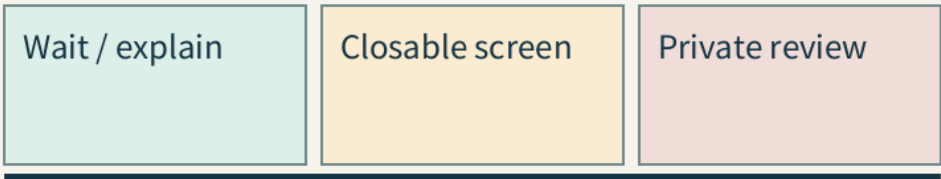

AI Origin • Review

P0: 12 m x 8 m = 96 sqm reference fit

PLAN • LOCAL GRID 12 × 8

SECTION • PUBLIC / CONTROLLED

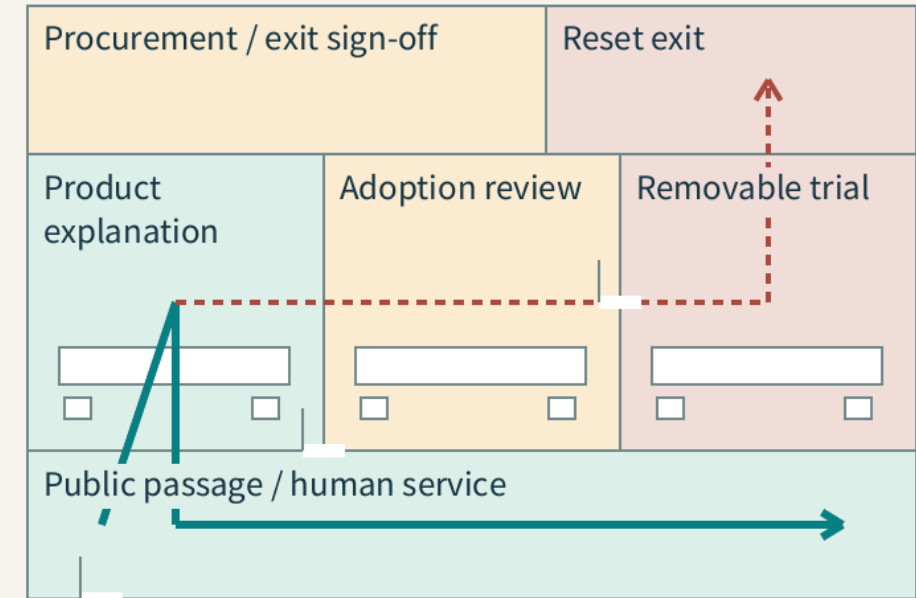

Daily: counter and path open

Drill: pause, independent review

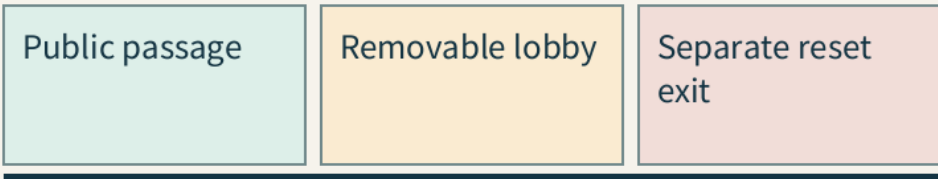

Reset: 2 channels corrected

Dazhongsi • Reversible use

PLAN • LOCAL GRID 12 × 8

SECTION • PUBLIC / CONTROLLED

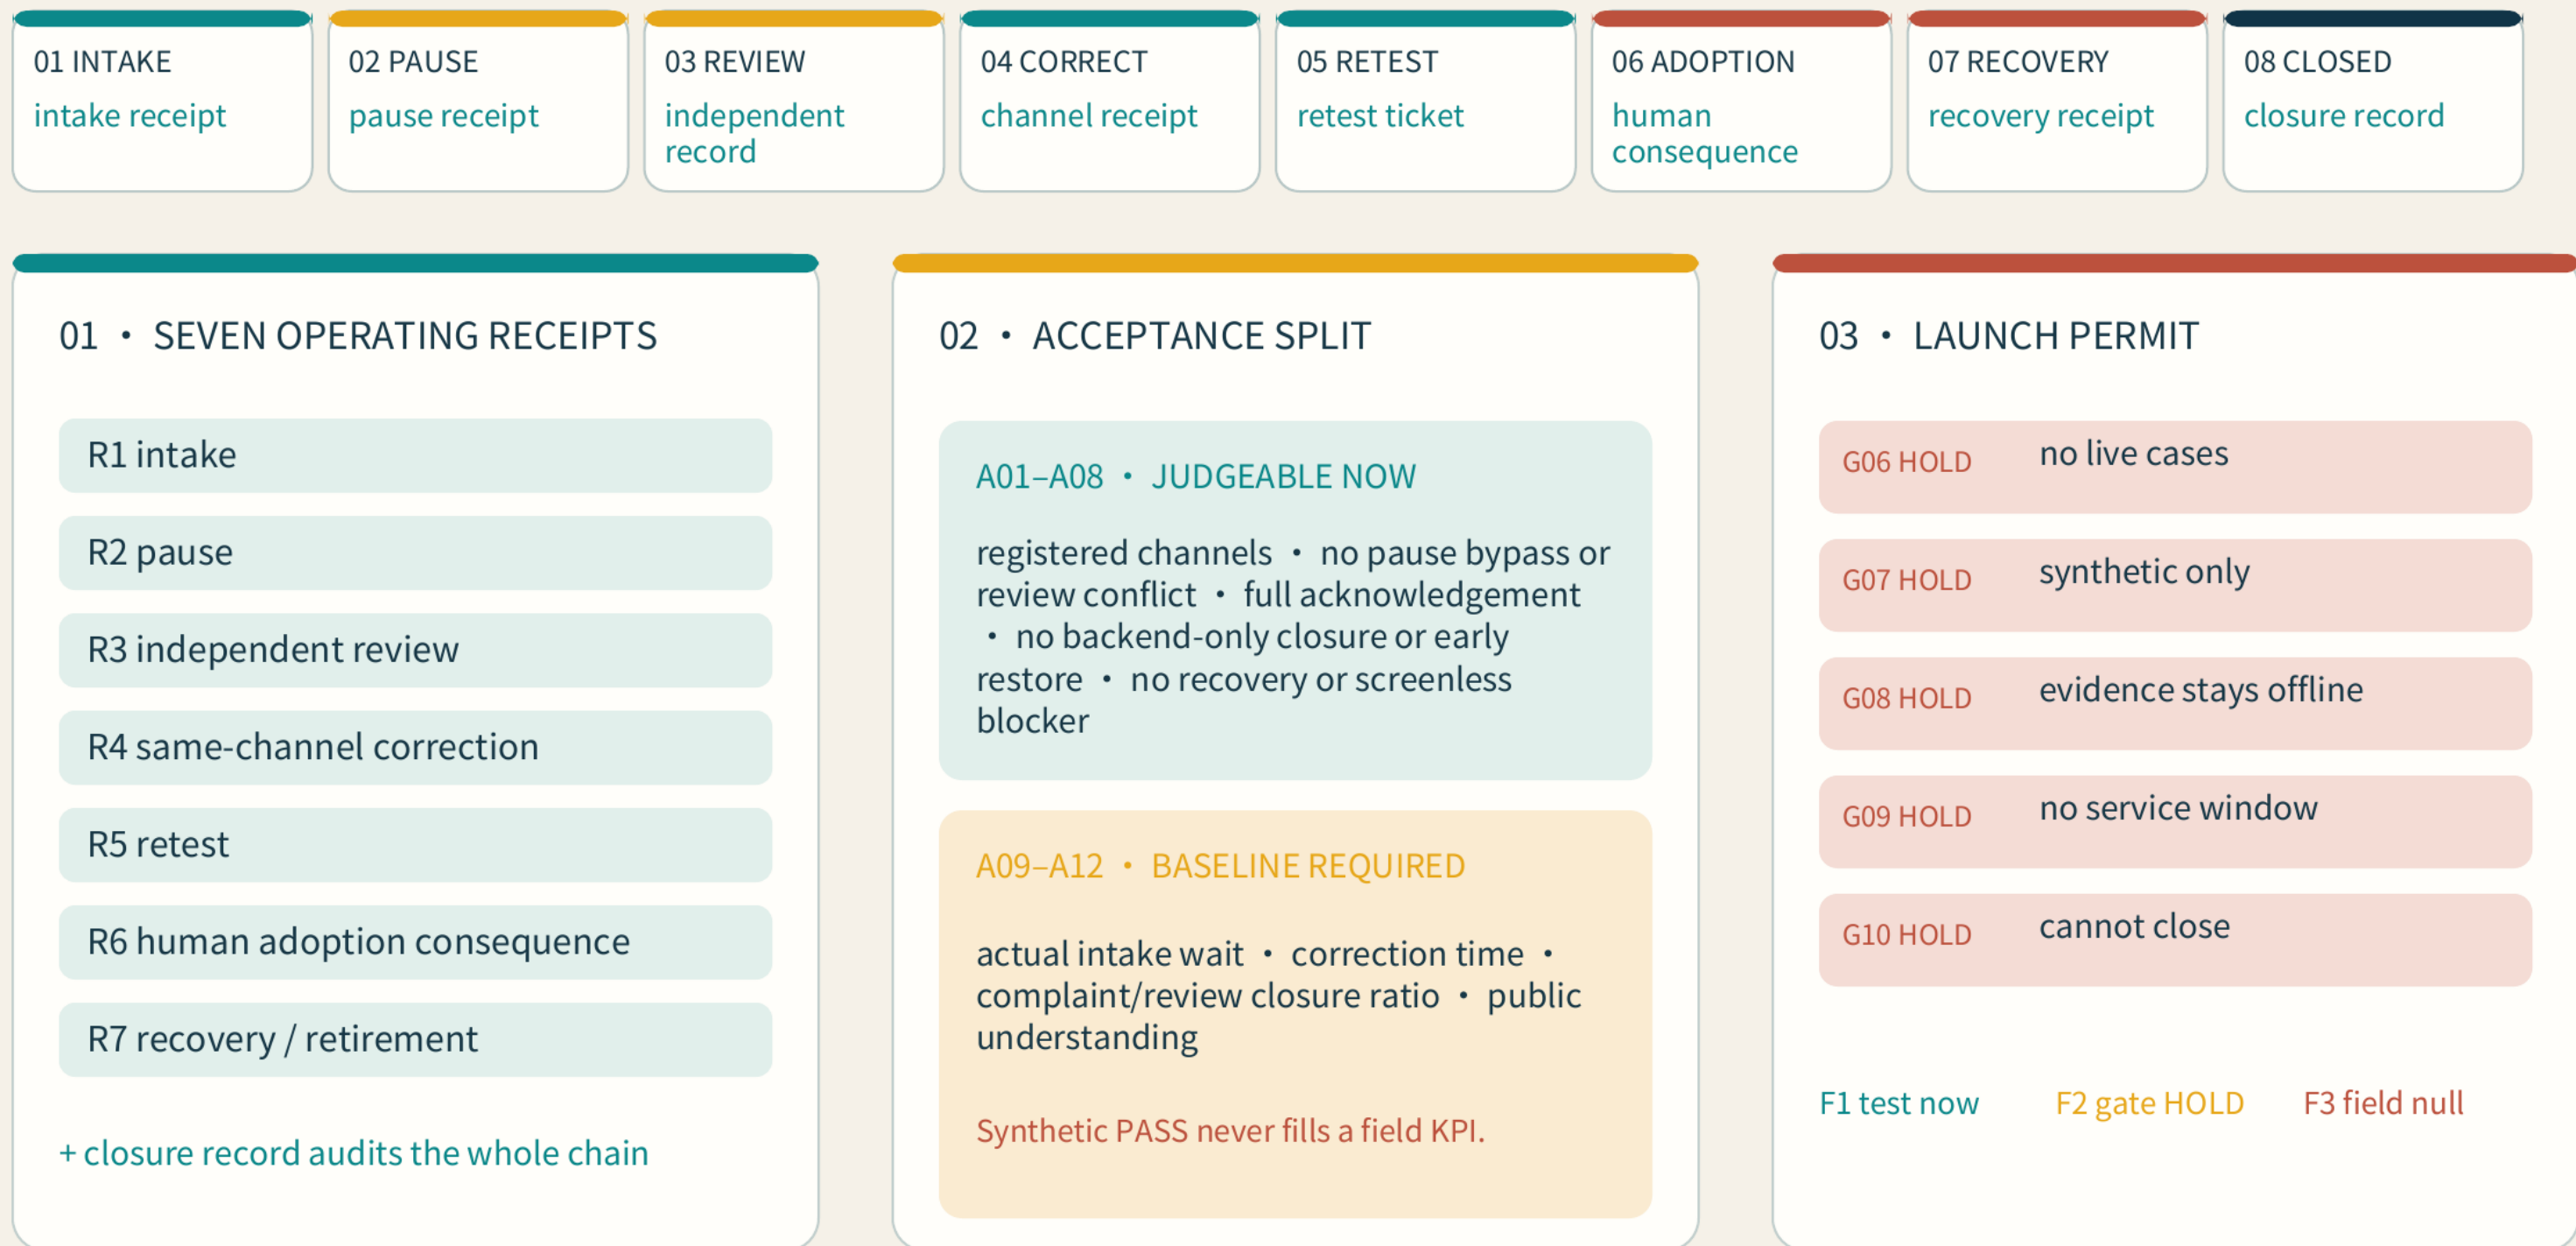

Daily: public service stays

Drill: fit-out / procurement

Reset: remove, clear, sign

INSTITUTIONAL FEASIBILITY: ONE ERROR, ONE AUDITABLE CLOSURE

Participant-controlled evidence is separated from gate-dependent evidence and field outcomes.

CLOSED = all channels + independent review + retest + human consequence + recovery zero

JZAC v1.6 | FIG 05 / 05

11 CASES: TRANSFER METHODS, NOT CLAIMS

Each row connects a method, a Jing-Zhang landing and a clear red line.

CASE	TRANSFERABLE METHOD	JING-ZHANG LANDING	DO NOT COPY
C2PA Content Credentials	Signed provenance, edit history, revocation	Heritage and creator receipts	Valid provenance is not truth or safety
DARPA Semantic Forensics	Multiple forensic signals; visible uncertainty	Controlled forensic testing	No pervasive civic surveillance
NIST OpenMFC	Blind tests, versioned data, multiple metrics	Open Benchmark Season	No universal certificate from one score
NIST AI RMF and AIRC	Owners, monitoring, response, human oversight	Six contracts and release gate	Alignment is not regulatory approval
Helsinki AI Register	Purpose, data, operator and feedback disclosure	Staffed and paper register	Transparency is not web-only
Amsterdam Algorithm Lifecycle Approach	Register, procurement and lifecycle tools	Dossiers and expiry wall	Chinese legal/procurement review required
AI Singapore 100 Experiments	Scope, PoC, production readiness, handover	90-day relay pilot	No identical funding or eligibility promise
Munich Re aiSure	Reproducible evidence for risk engineering	Technology Wing risk clinic	No pricing or coverage guarantees
Finnish media literacy framework	Teacher-led and lifelong media literacy	Civic translation and classes	Do not copy education systems intact
Zollverein industrial heritage reuse	Retained heritage as working civic infrastructure	Jing-Zhang service infrastructure	Branding is not conservation approval
EU Verifiable Credentials	Minimal disclosure, revocation, offline checks	Optional credential interface	No mandatory smartphone wallet

Method transfer only. Public sources do not establish site conditions, approval or current partnership.

15 RECOVERABLE SERVICE CONTRACTS

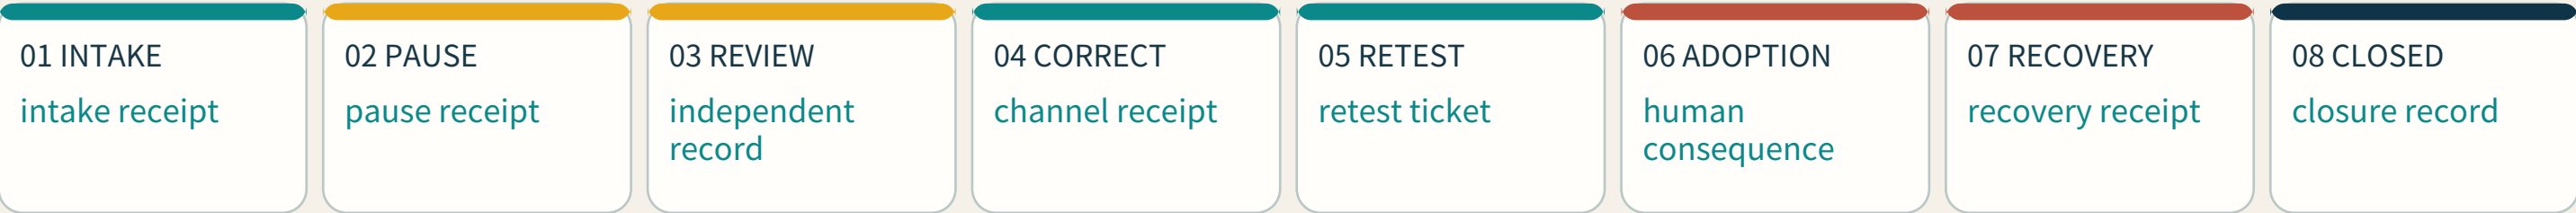

Shared rule: accountable owner - evidence - human route - gate - recovery.

S01 Multimodal Provenance Intake	S02 Image and Video Deepfake Benchmark	S03 Pre-release Information Integrity Gate
S04 Trusted Procurement for SMEs	S05 AI Insurance and Reproducibility Desk	S06 Health Message Verification and Pre-visit Clarification
S07 Education Material and Credential Verification	S08 Contract, Invoice and Promotion Verification	S09 Community Rumour Triage
S10 Screenless Anti-scam Verification for Older Adults	S11 Accessible Audio-visual Explanation Verification	S12 Creator Rights and Content History Registration
S13 Transit and Public Notice Version Check	S14 Victim Correction and Reputation Recovery	S15 Jing-Zhang Industrial Heritage Archive Verification

12 complete journeys include screenless users, disabled visitors, residents, clinicians, educators, creators, firms, evaluators, procurers and counter staff.

HOW ONE ERROR ACTUALLY CLOSES

Eight ordered states bind role, receipt, space, gate, entry and exit; no shortcut can count as correction.

STATE	ACCOUNTABLE / RESPONSIBLE	REQUIRED RECEIPT	FORBIDDEN SHORTCUT
INTAKE	pilot steward / case steward	case ID, owner, complete channel inventory	no owner or inventory: no PAUSE
PAUSE	channel owner / case steward	receipt for every original channel	one unpaused channel blocks REVIEW
REVIEW	independent reviewer / same	basis, dissent, conflict and expiry	publisher/supplier/author/channel cannot self-review
CORRECT	channel owner / case steward	before/after, front end and acknowledgement	backend-only or missed channel blocks RETEST
RETEST	retest lead / retest lead	failure fixture, result and restore advice	retest lead cannot self-authorize restore
ADOPTION	adoption owner / pilot steward	human adopt/modify/retire consequence	model output cannot make the decision
RECOVERY	adoption owner / data custodian	asset, material, cache, backup and space	one open item blocks CLOSED
CLOSED	pilot steward / case steward	closure record linking seven receipts	CLOSED_SYNTHETIC_ONLY only

CLOSED REQUIRES ALL FIVE

all-channel front-end acknowledgement • independent review • passed retest • human adoption consequence • zero open recovery item

INSTITUTIONAL LAUNCH PERMITS + ACCEPTANCE

All ten gates remain HOLD. A01–A08 are synthetic/design checks; A09–A12 require authorized field baselines.

G01 site | HOLD

Blocks: no fixed cell

Safe: mobile/offline

G02 engineering | HOLD

Blocks: no physical fit-out

Safe: tabletop drill

G03 accessibility | HOLD

Blocks: no compliance claim

Safe: co-test plan

G04 material rights | HOLD

Blocks: no live material

Safe: synthetic only

G05 privacy | HOLD

Blocks: no personal cases

Safe: minimal offline

G06 channels | HOLD

Blocks: no live cases

Safe: human ledger

G07 reviewer | HOLD

Blocks: no factual finding

Safe: synthetic drill

G08 cyber/rollback | HOLD

Blocks: no connected launch

Safe: offline evidence

G09 staff/funds | HOLD

Blocks: no service window

Safe: booked drill

G10 recovery | HOLD

Blocks: cannot close

Safe: pause/retire

A01–A08 • JUDGEABLE NOW

No unregistered channels, pause bypasses or review conflicts; full channel acknowledgement; no backend-only closure or early restoration; zero recovery items or screenless blockers.

A09–A12 • BASELINE REQUIRED

Actual intake wait; same-channel correction time; complaint/review closure ratio; public understanding. Synthetic PASS cannot fill these fields.

2 cases/hour = duty-separation screen, not SLA

Queue pressure cannot merge channel ownership, independent review, retesting and adoption authority.

F1 testable now • F2 gate-dependent HOLD • F3 field outcomes null

THREE OPERATING SCENARIOS

90-day synthetic	full chain / participant envelope
limited continuing	only after relevant gates + measured roster
expanded / replicated	unsized until site, staff, permission and demand
