

Jing-Zhang Child-First Rail — Overall Layout

One corridor (Childhood Corridor) · three stations (Zhongzhiyuan · AI Origin · Dazhongsi) · two wings · multiple nodes; boundary is provisional, recalculate after official redline

Zhongzhiyuan · Autonomy Station

AI Origin · Future Classroom

Childhood Corridor
CHILDHOOD CORRIDOR
(heritage park greenway · ~9.6km)

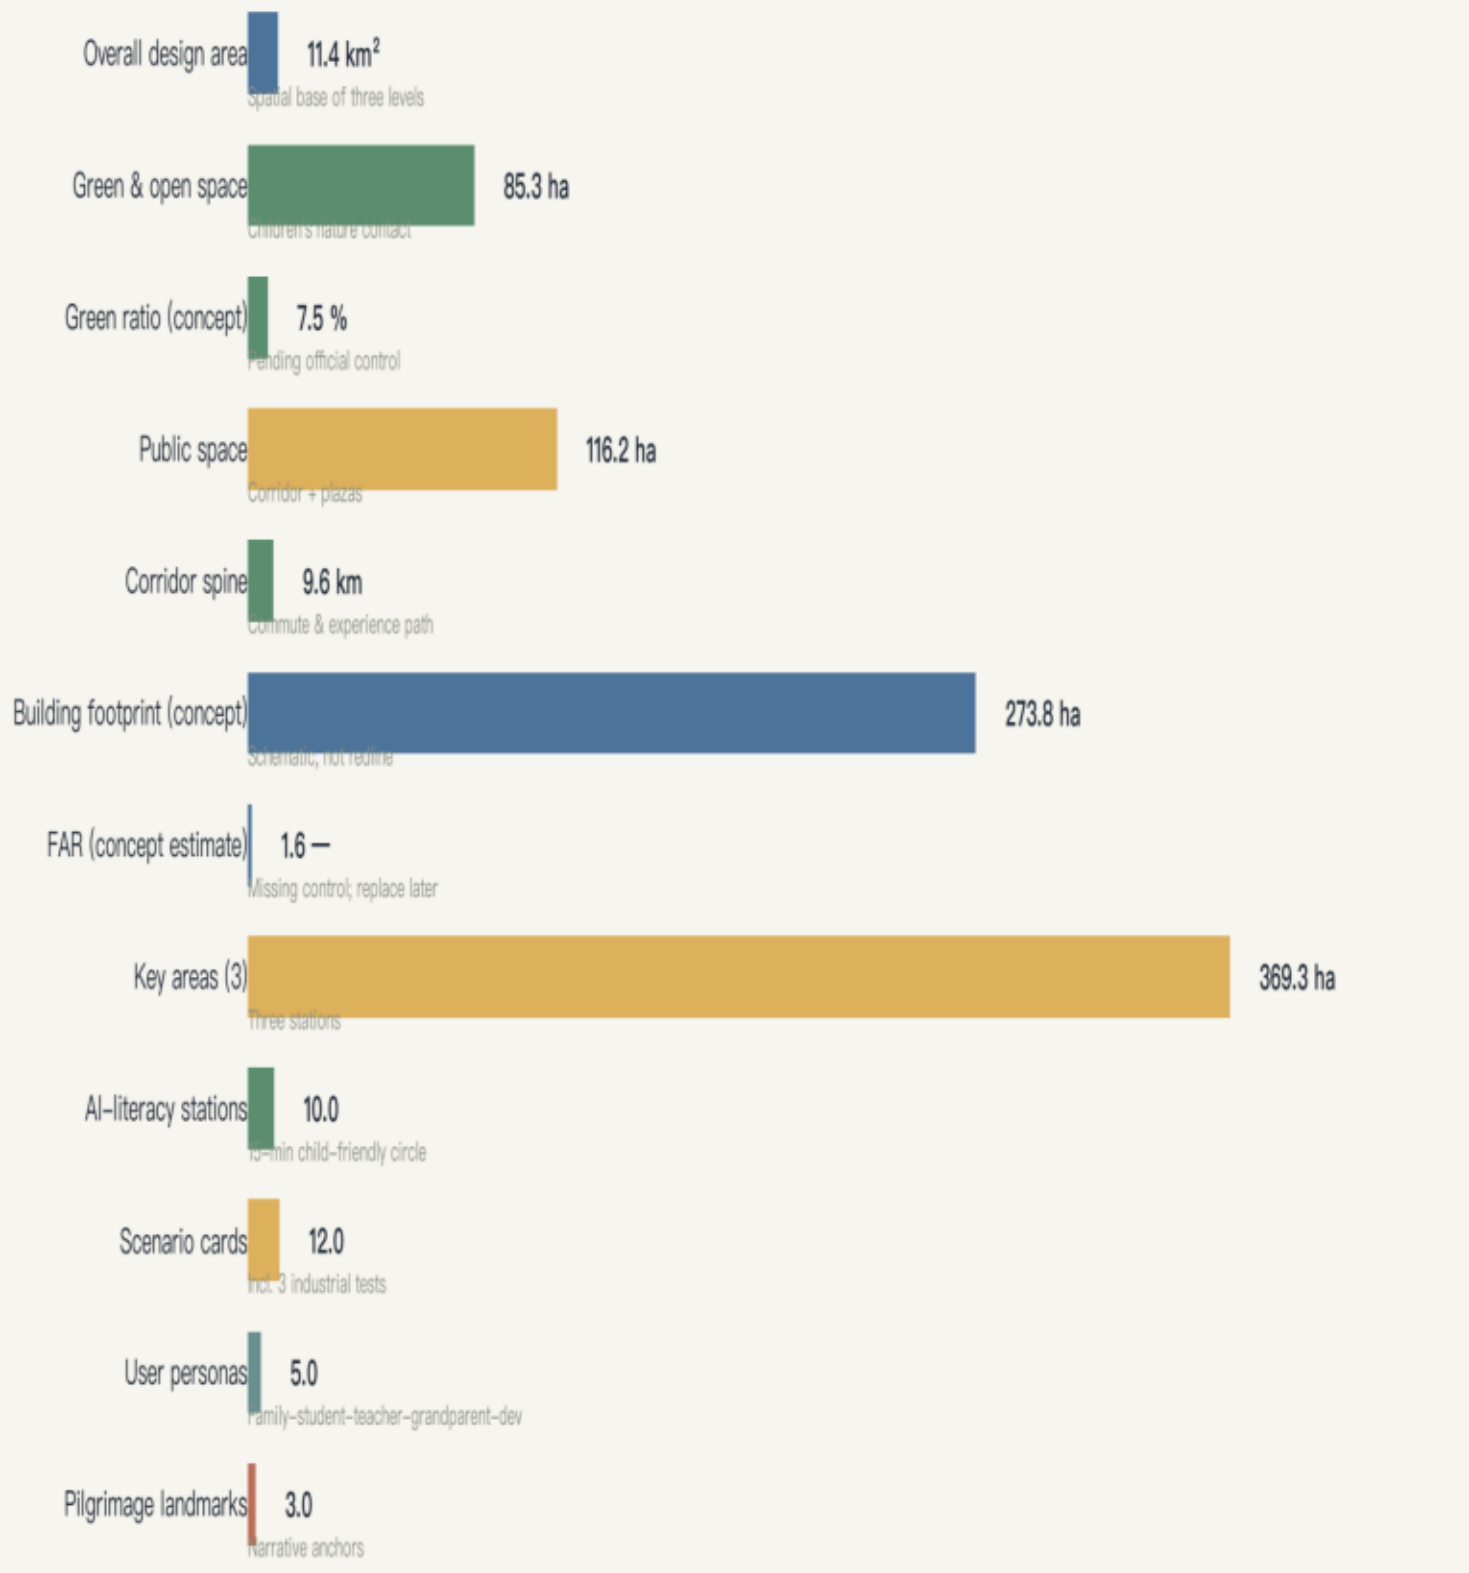

Dazhongsi · Smart Life Station

- Overall design area (provisional)
- Childhood Corridor spine
- Transverse stitched roads
- Park green space

Source: derived from geometry/*_geojson · Boundary: provisional constraint · All spatial conclusions are conceptual

Core Indicators and Evidence Chain — INDICATOR EVIDENCE

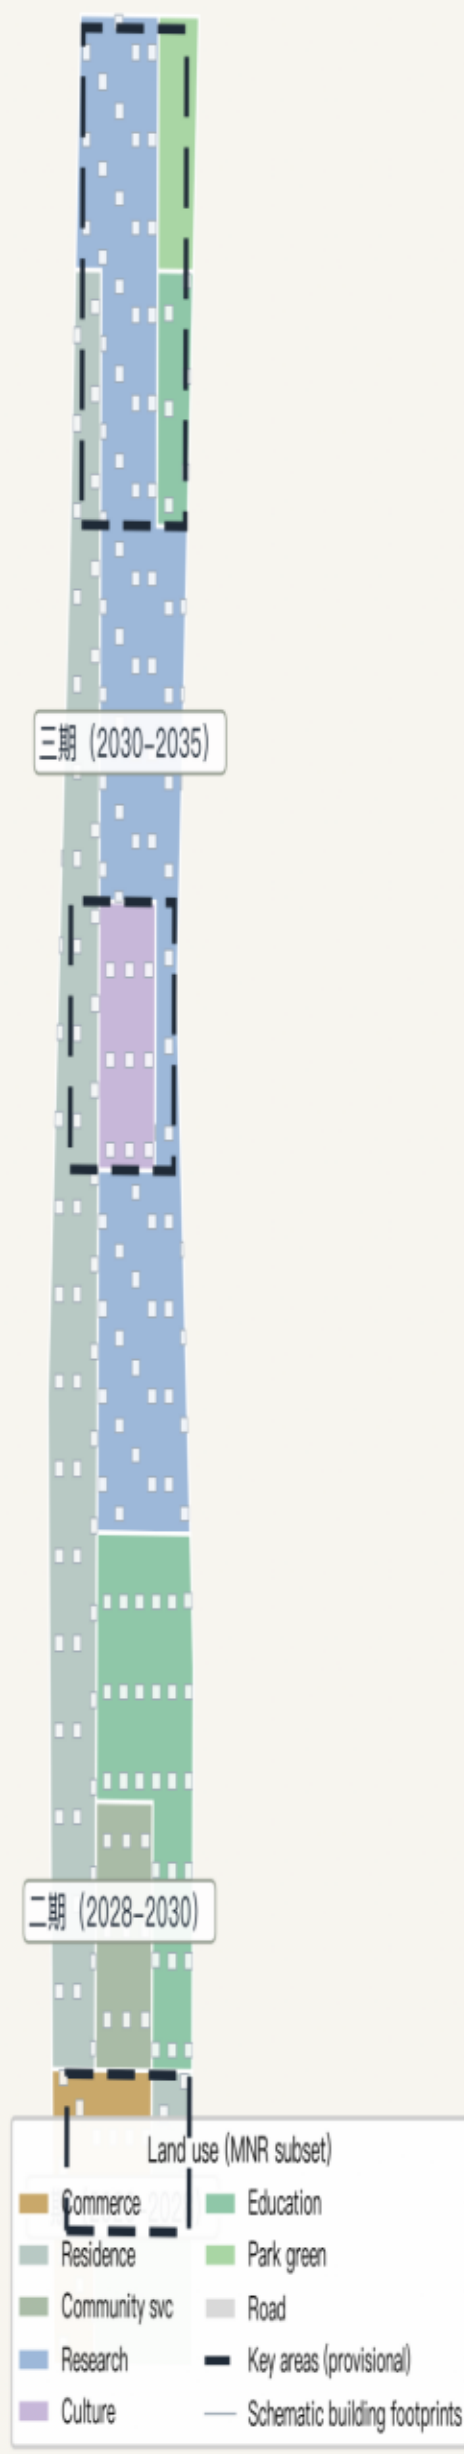

All indicators recomputed from geometry/*_geojson and metrics.json (EPSC-A046), provisional boundary and conceptual floor assumptions noted in assumptions.json (A-PROVISIONAL-002 / A-FLCORS-003)

Source: metrics.json · FAR/building scale are conceptual estimates, replace when official regulatory conditions arise

Land Use and Spatial Structure — Belt Zoning · Lateral Compounding

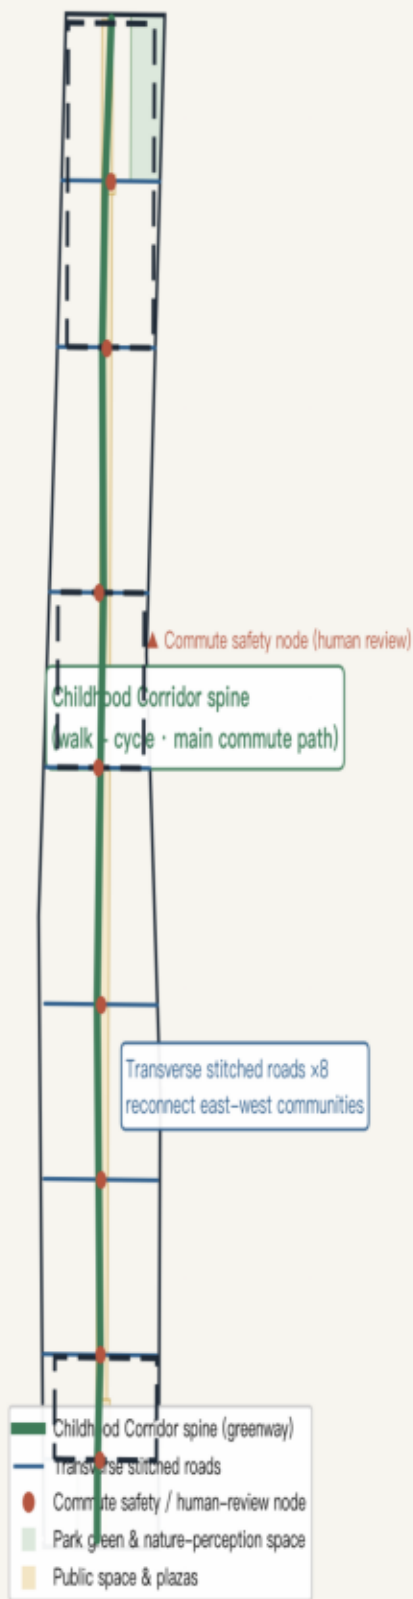

Research-education-culture along the innovation spine; residence & community services in west (east bands; zoning fully covers the boundary without gaps or overlaps (topology verified))

Source: geometry/land_use/geojson · Metrics: land_use_area_spm=11,432,847 m² · Conceptual

Slow Mobility and Blue-Green Composite System — Child First · Slow Network

Childhood Corridor runs north-south · 8 transverse stitched roads · blue-green wings support nature education (commute network is conceptual, redline pending)
