

Jing-Zhang Child-First Rail

THE CHILD-FIRST RAIL

Child-Friendly × AI-Literacy Urban Design for the
Centennial Jing-Zhang AI Innovation Belt

The starting point was a boy — from 'a boy building the railway' to 'a boy building AI'

Naming: Childhood Corridor · Three Enlightenment Stations · EdTech/Nature Education Wings

Signal colors: safe green / explore yellow / help red (railway signal language)

Jing-Zhang Child-First Rail — Overall Layout

One corridor (Childhood Corridor) · three stations (Zhongzhiyuan · AI Origin · Dazhongsi) · two wings · multiple nodes; boundary is provisional, recalculate after official redline

Source: derived from geometry/*.geojson · Boundary: provisional constraint · All spatial conclusions are conceptual

Overall concept

From Zhan Tianyou's teenage starting point to the AI-era starting point for every child today.

Three scope levels

Coordinated research area 43.6 km² · AI ecosystem & belt strategy

Overall design area 11.4 km² · renewal at regulatory depth

Key detailed-design area 368.4 ha · three stations

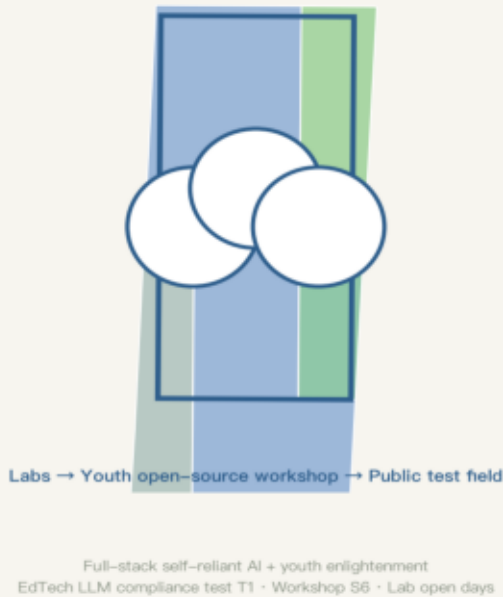

Spatial structure

One corridor (Childhood Corridor)
Three stations (enlightenment stations)
Two wings (EdTech / Nature Education)
Multi-node (10 community AI-literacy stations)

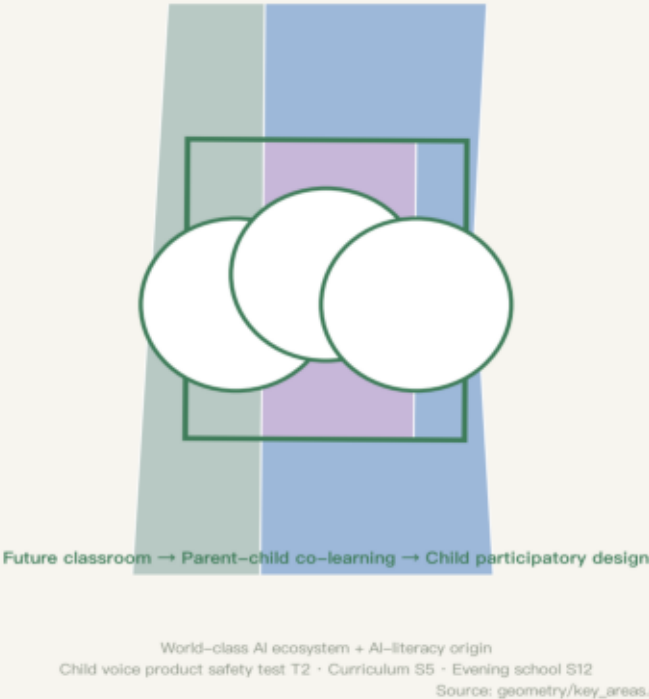

Boundary status: provisional constraint
Full recalculation when official redline is published

Three Enlightenment Stations — Key-Area Detailed Design

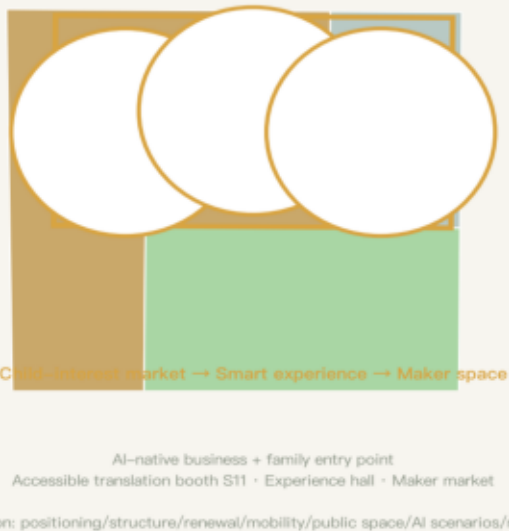

Zhongzhiyuan · Autonomy Enlightenment Station

AI Origin · Origin Future Classroom

Dazhongsi · Smart Life Enlightenment Station

S1/S2/S3

Industrial test scenarios: EdTech LLM compliance T1 · child voice/companion safety T2 · commute low-speed shuttle T3

S4—S12

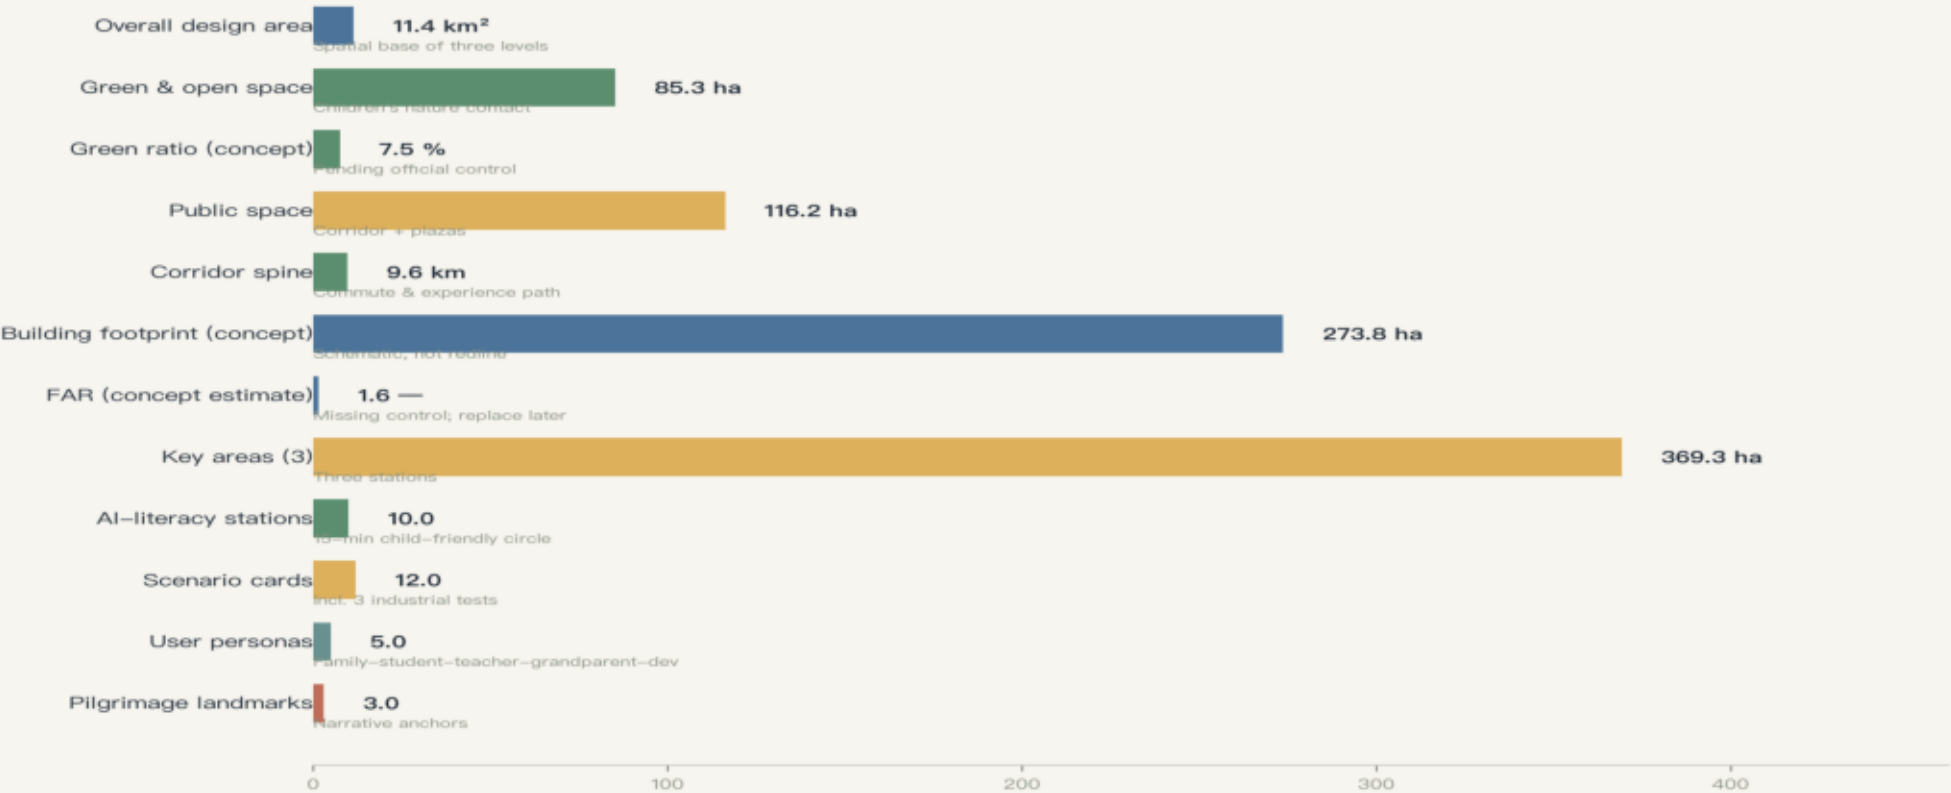

Commute safety alert · future classroom curricula · youth open-source workshop · nature perception · AI museum · smart sports · tree-hole · accessible translation · parent evening school

Privacy boundary

No individual-privacy collection · human-review interfaces · local processing · guardian consent · not presented as approved operations

Core Indicators and Evidence Chain — INDICATOR EVIDENCE

All indicators recomputed from geometry/*.geojson and metrics.json (EPSG:4548); provisional boundary and conceptual floor assumptions noted in assumptions.json (A-PROVISIONAL-002 / A-FLOORS-003)

Source: metrics.json · FAR/building scale are conceptual estimates; replace when official regulatory conditions arrive

Phase 1 · 2026–2028	Southern corridor completion · Dazhongsi market · commute safety (public first)
Phase 2 · 2028–2030	Origin Future Classroom · community AI-literacy stations · Xiaoyuehe nature classroom (facilities)
Phase 3 · 2030–2035	Zhongzhiyuan youth workshop & test field · full operations (industry)

Evidence chain: geometry/*.geojson → metrics.json → matrices → proposal → figures → visual/index.html; all metrics recomputable (EPSG:4548)
