

FIGURE 01 OVERALL URBAN STRUCTURE

V4 / CONCEPT

Jing-Zhang Noonline SLA
43.6 km² research relation → c. 11.4 km² design area → three zones, two wings

COORDINATED RELATION, NOT AN OFFICIAL REDLINE

Jing-Zhang c. 9 km linear corridor
Publicly supported strategic context
Not drawn as an exact boundary or existing track

PHYSICAL CONNECTION

INTELLIGENT CONNECTION | CONCEPT

RESILIENT CONNECTION | AI-OFF

EVIDENCE LANGUAGE

- Solid | publicly supported context
- - Coral dash | conceptual intervention
- - Grey dash | provisional relation
- Gold point | field verification required
- ▨ Purple hatch | professional study required

ZHONGGUANCUN SERVICE WING

professional services, translation and governance

does not duplicate the three prototypes

CONCEPT

XIAOYUE RIVER SCENARIO WING

ecology, daily scenarios and public feedback

requires ecology and engineering studies

CONCEPT

REVERSIBLE RESEARCH-TO-CITY LOOP

Zhongzhiyuan | research and validation
AI Origin | explanation and feedback
Dazhongsi | use and daily observation
Governance | returns to iteration

LEVEL 1 | key areas + direct access

LEVEL 2 | inter-zone wayfinding, not continuous SLA

FIGURE 02 ZHONGZHIYUAN | VALIDATION INTERFACE

V4 / CONCEPT

Research → Prototype → Test → Validate
N01–N04, F01 and ROAD-004/005/011 | conceptual spatial relation

RESEARCH-TEST INTERFACE: PUBLIC ROUTE PRECEDES ACTIVATION

SECTION-02 | A TEST EDGE THAT CAN STOP

RELATIVE PROPORTIONS ONLY | NOT A CONSTRUCTION SECTION

FAILURE STATE

Any buffer, permission or responsible-role failure: stop the test; public walking remains usable.

EVIDENCE LANGUAGE

- Solid | publicly supported context
- - Coral dash | conceptual intervention
- - Grey dash | provisional relation
- Gold point | field verification required
- ▨ Purple hatch | professional study required

FIGURE 03 AI ORIGIN | CIVIC KNOWLEDGE ROOM

V4 / CONCEPT

Understand → Question → Co-create
N05–N08, F02/F03 and ROAD-006/008/009 | conceptual civic space

CIVIC KNOWLEDGE ROOM: CHOICE PRECEDES INTERFACE

ENTER / OPT **AI-OFF**

fixed signs provide entry
no personal tracking
opt out of AI, not public space

N06 | JING-ZH **INTERPRETIVE**

connection, readable information, maintenance
public responsibility as spatial grammar
heritage location pending verification

F02 / F03 | HUMA **PROVISIONAL**

enquiry, direction and incident handover
duty periods and access still to be confirmed

SECTION-03 | KNOWLEDGE, STAYING, CHOICE

RELATIVE SPATIAL RELATION, NOT EXISTING CONDITION OR BUILD DETAIL

AI-OFF STATE

Physical knowledge line, seating reservation, fixed signs and human help remain usable.

EVIDENCE LANGUAGE

- Solid | publicly supported context
- - Coral dash | conceptual intervention
- - Grey dash | provisional relation
- Gold point | field verification required
- ▨ Purple hatch | professional study required

N06 is a heritage interpretation point, not an existing relic; entry, staying, lateral links and service periods require field or responsible-party verification.

FIGURE 04 DAZHONGSI | CONCEPT STATION-ARRIVAL INTERFACE

V4 / CONCEPT

Arrive → Decide → Pause → Enter Daily Life
N09–N12, F04/F05 and ROAD-007/010 | explicitly distinct from verified station context

RAIL-TO-CITY: THE FIRST MINUTE AFTER ARRIVAL MUST BE READABLE, STAYABLE, HELPABLE

WHEN CONDITIONS FAIL, THE SYSTEM DOES NOT PRETEND TO BE COMPLETE

SECTION-04 | RAIL-TO-MARKET TRANSITION

CONCEPT ARRIVAL INTERFACE, NOT AN APPROVED STATION-CITY PROJECT

KEY BOUNDARY

External crossing, entry and accessible continuity require field verification; they are never drawn as

EVIDENCE LANGUAGE

- Solid | publicly supported context
- - Coral dash | conceptual intervention
- - Grey dash | provisional relation
- Gold point | field verification required
- ▨ Purple hatch | professional study required

Verified context is limited to Dazhongsi Station and published in-station service information; external links, crossings, access and frontage remain concept / pending verification.

FIGURE 05 SECTION-01-04 | SPACE BEFORE AI

V4 / CONCEPT

Four relative transverse relationships
No invented dimensions; every physical condition is expressed by its evidence level

RELATIVE RELATION IS THE DESIGN COMMITMENT; DIMENSIONS ARE NOT EXISTING OR CONSTRUCTION FACTS.

Shade, seating, entry, crossing, accessibility and human service are shown only as reservations or verification-dependent conditions; AI availability never converts them into facts.

EVIDENCE LANGUAGE

- Solid | publicly supported context
- Coral dash | conceptual intervention
- Grey dash | provisional relation
- Gold point | field verification required
- Purple hatch | professional study required

Relative proportions only explain urban-design relations among public clearway, staying, information, buffer and controlled zones.

FIGURE 06 AI-ON / AI-OFF | URBAN RESILIENCE

V4 / CONCEPT

Physical space → human responsibility → digital service → AI assistance
When AI withdraws, fixed space and human responsibility retain minimum public service

AI ENHANCES THE CITY. THE CITY MUST STILL WORK WHEN AI DOES NOT.

From AI on to off, service degrades through evidence and responsibility rather than pretending to remain complete.

LAYER	SPATIALLY ANCHORED IN THE CITY	AI ON	AI DEGRADED	AI OFF
PHYSICAL	route, clearway, stay reservation, fixed signs	retain	retain	retain
HUMAN	F01–F05, verification and handover	retain	priority	core
DIGITAL	ordinary information and updates	retain	partly unavailable	not prerequisite
AI	prediction, explanation, prompts, maintenance assist	available	disable unreliable item	off

AI-OFF IN THREE SPATIAL PROTOTYPES

ZHONGZHIYUAN
test stops; public clearway, fixed wayfinding and F01 handover remain.

AI ORIGIN
physical knowledge line, staying and human enquiry keep phone-free use complete.

DAZHONGSI
unverified external conditions lead to reroute / downgrade / suspend.

AI_OFF_TEST = PASS_WITH_PROVISIONAL_PHYSICAL_NETWORK

PASS means the concept network retains fixed signs, physical-route logic, stay reservations, public-entry logic and human-service roles when AI is off; it does not confirm those conditions exist or operate

EVIDENCE LANGUAGE

- Solid | publicly supported context
- Coral dash | conceptual intervention
- Grey dash | provisional relation
- Gold point | field verification required
- Purple hatch | professional study required

The AI-OFF result is a pass for the concept physical network, still limited by field verification of facilities, entry, crossings and duty periods.

FIGURE 07 RESEARCH → CITY → FEEDBACK → ITERATE

V4 / CONCEPT

A spatial loop from research and validation to public feedback
Every step has space, human responsibility and failure triggers; innovation does not end at display.

EMBED THE AI INNOVATION CHAIN IN A CITY THAT CAN QUESTION, USE AND CORRECT IT.

The three areas are not interchangeable parks: they hold different spatial responsibilities in one loop.

Jing-Zhang translation: connection is not an icon; it makes orientation, maintenance, responsibility and recoverability public-space rules.

HOW WORK PACKAGES MAKE THE LOOP REVERSIBLE

WP-02 PILOT

Zhongzhiyuan test porch
test stays out of clearway
failure stops it

WP-03 PILOT

AI Origin civic room
enter, read and ask without AI

WP-04 VERIFY

Dazhongsi arrival edge
survey actual crossing and access before deeper

WP-06 GOVERN

field verification + recalculation
no automatic SLA promotion

NOT A GENERIC AI PARK: PUBLIC FEEDBACK CAN CHANGE THE NEXT TEST.

Research does not bypass the public; use does not bypass human responsibility; algorithms do not bypass evidence gate:

- EVIDENCE LANGUAGE**
- Solid | publicly supported context
 - - Coral dash | conceptual intervention
 - - Grey dash | provisional relation
 - Gold point | field verification required
 - ▨ Purple hatch | professional study required

SUPPORT 04 METRICS + EVIDENCE CHAIN

V4 / CONCEPT

Target is not Verified
A traceable boundary from concept geometry and service network to human field verification

METRICS EXPLAIN THE SCHEME; THEY DO NOT HIDE EVIDENCE GAPS.

11

CONCEPT ROUTE SEGMENTS

12

PRIMARY SERVICE NODES

8

SECONDARY SUPPORTS

5

MANUAL FALLBACKS

SLA EVIDENCE CEILING

Target SLA = A

Verified SLA = B

No field verification, no promotion

GATES BETWEEN DESIGN TARGET AND VERIFIED STATE

shade continuity | continuous exposure | water and seat status | public-entry availability |
critical crossing | real summer detour | human-service responsibility and hours
Any missing critical evidence: remain B / C / UNKNOWN, never auto-promote.

AI_OFF_TEST = PASS_WITH_PROVISIONAL_PHYSICAL_NETWORK

FIELD-VERIFICATION WORKFLOW

1

location—

2

shade—

3

entry—

4

crossing—

5

facility—

6

duty

Only authorized human verification records can change the ledger; AI, models or visualizations cannot turn unknown into verified.

AUDITABLE, WITHOUT CROSSING THE EVIDENCE CEILING.
