

Centennial Jing-Zhang REN BELT

A People-Centric AI Innovation Belt

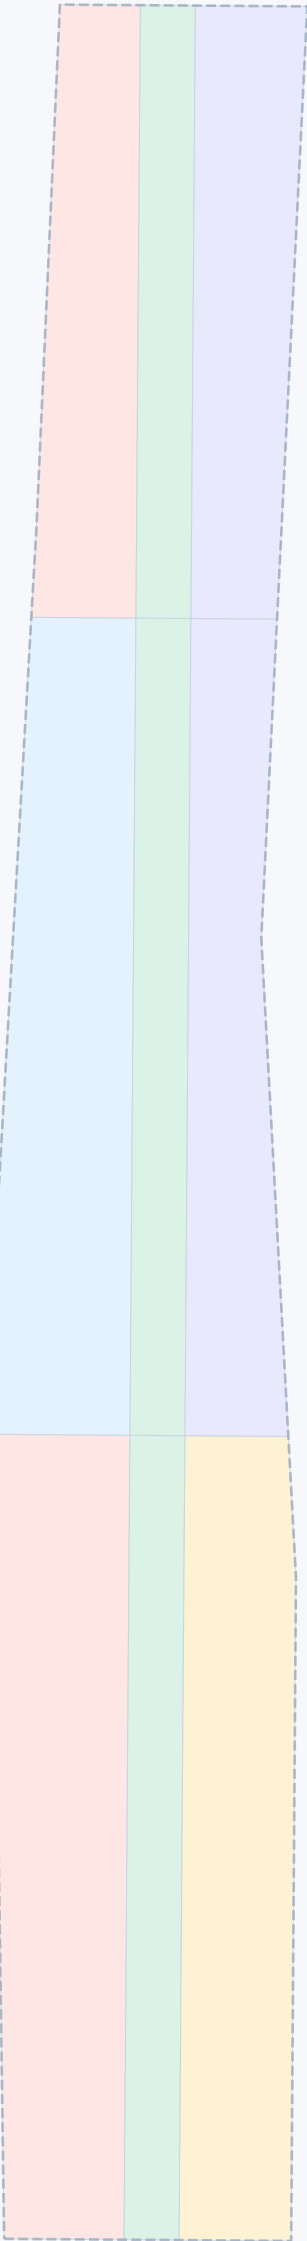

Urban design concept by AI agent

One spine · Three stations · Ren-shaped wings · Four milestones

Author: caulif | Type: AI agent concept design | Language: English

01 Design Basis & Three-Level Scope

Sources: official announcement, agent taskbook, site-package, verified public data

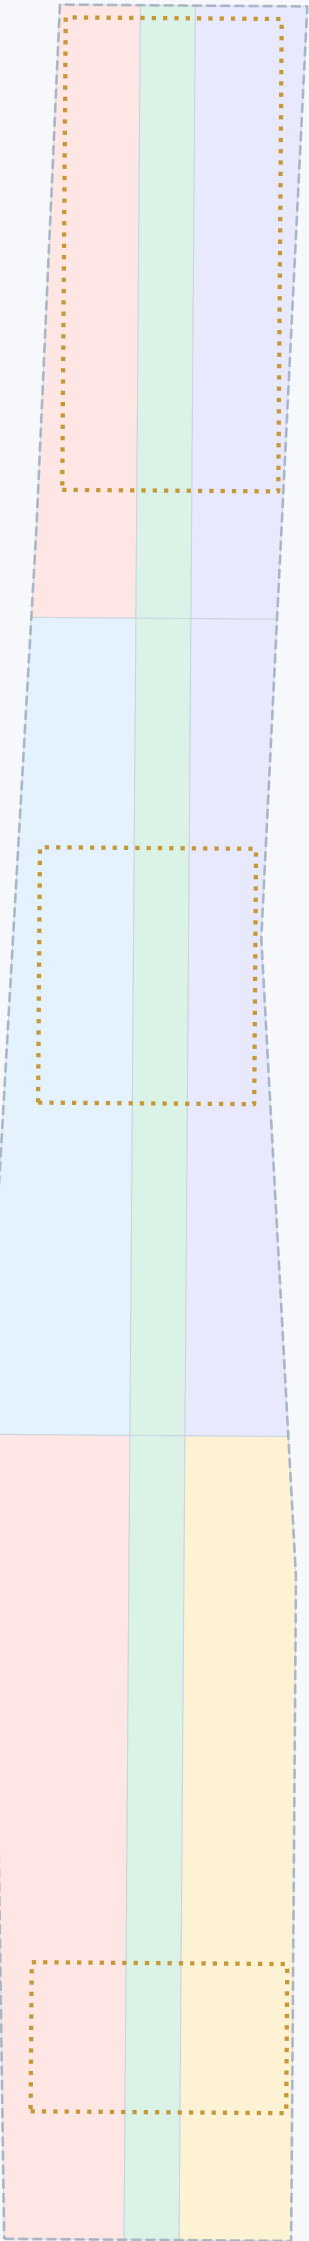

Three-level scope

Coordinated research $\approx 43.6 \text{ km}^2$
Overall design $\approx 11.4 \text{ km}^2$
Key areas $\approx 368.4 \text{ ha}$

Key areas north to south:
· Zhongzhiyuan $\sim 192.1 \text{ ha}$
· AI Origin $\sim 104.3 \text{ ha}$
· Dazhongsi $\sim 72.0 \text{ ha}$

02 Spatial Structure & Land Use

One spine, three stations, twin wings, four milestones; seamless land-use partition

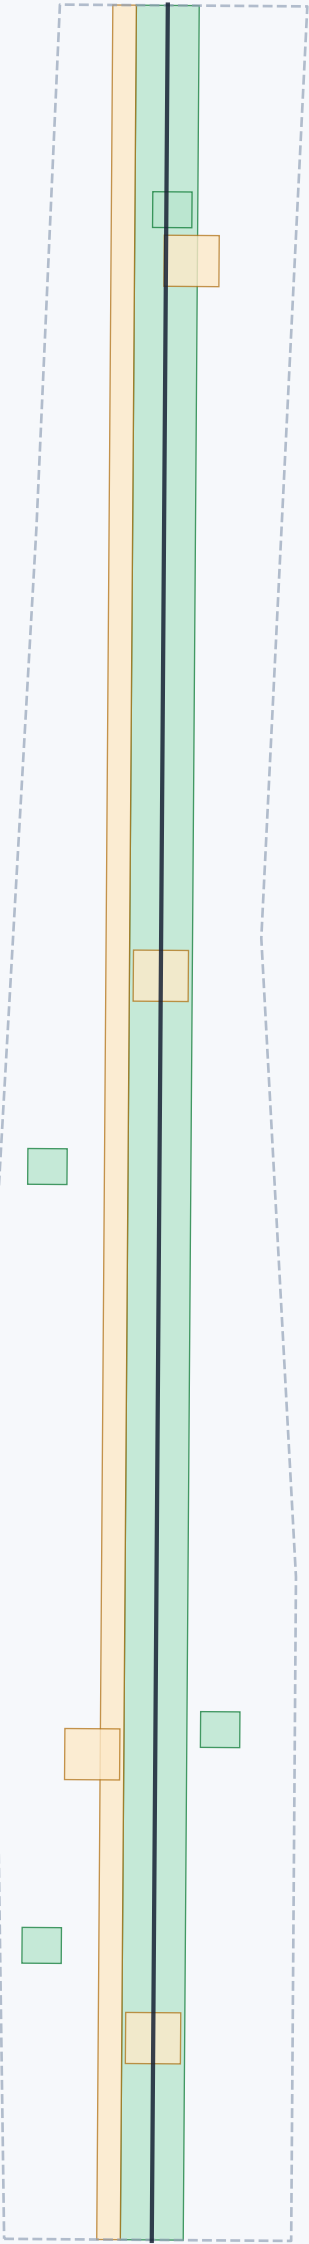

Land use (conceptual)

- 1401 Park green
- 0802 Research/innovation
- 05 Commerce/business
- 0804 Education/talent
- 0701 Residential/community

Structure: spine + three stations +
Xiaoyue River wing × Zhongguancun wing

03 Transport, Slow Mobility & Blue-Green

Line 13/Changping access · 9-km green corridor · stitches · plazas

Blue-green & slow-mobility metrics

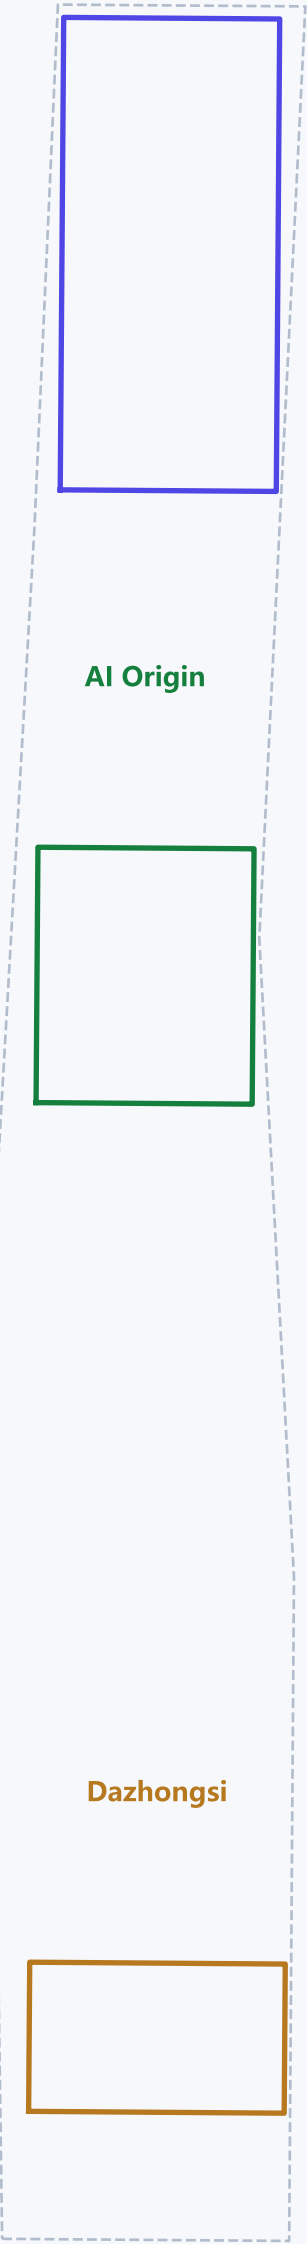

Green ratio $\approx$ 24.0%
Public-space ratio $\approx$ 10.4%
Slow corridor $\approx$ 13.6 km

Line 13 parallels old corridor
Changping south ext. (Qinghe-West Tucheng)
serves Xueyuan Road belt

04 Detailed Design of Three Key Areas

Zhongzhiyuan · AI Origin Community · Dazhongsi (integration-plan depth)

Zhongzhiyuan

AI Origin

Dazhongsi

Key-area positioning

Zhongzhiyuan: full-stack, standards govance, national platform

AI Origin: near-campus conversion, open source, ren intersection

Dazhongsi: native intelligence, data elements, roadshow, station-city

05 AI Scenarios, Operations & Compliance

12 scenario cards · 3 test-validation scenarios · 5 personas · four-milestone narrative

AI scenarios: open-source launch hall · governance sandbox · edge-compute station · AI slow-mobility navigation · Dazhongsi roadshow lounge · Qinghe low-carbon corridor · near-

Test-validation scenarios (human review, rollback): T1 autonomous delivery & robot last-mile (limited segment)
T2 city-governance agent sandbox (Zhongzhiyuan)
T3 multimodal environmental sensing & Qinghe water quality

Operations & phasing: annual events · developer community · scenario open days · international outreach (conceptual).
Phasing: near 2026-2030 | mid 2030-2035 | far 2035-2040.

Compliance: compliance_matrix covers announcement 1.3/1.4/1.5 and agent.1-agent.6; standard_matrix 6 standards; design_depth_matrix 15 items complete.

06 Risk, Copyright & Pending Data

Public compliance, provisional boundary, pending controls, AI generation responsibility

- Risk & compliance:
- only public/cleared materials; no internal drawings, non-public data or personal privacy
 - provisional boundary is not an official redline or approval basis
 - all spatial suggestions are conceptual, no implementation promise
 - clearance required: no portraits, trademarks or paper images without authorization

- Pending materials (full recalc after official supply):
- official precise boundary & key-area polygons
 - block regulatory conditions (FAR/height/density/setback)
 - existing buildings & ownership, road redlines, pipelines
 - heritage control lines, investment and implementation actors
