

JINGZHANG KERNEL

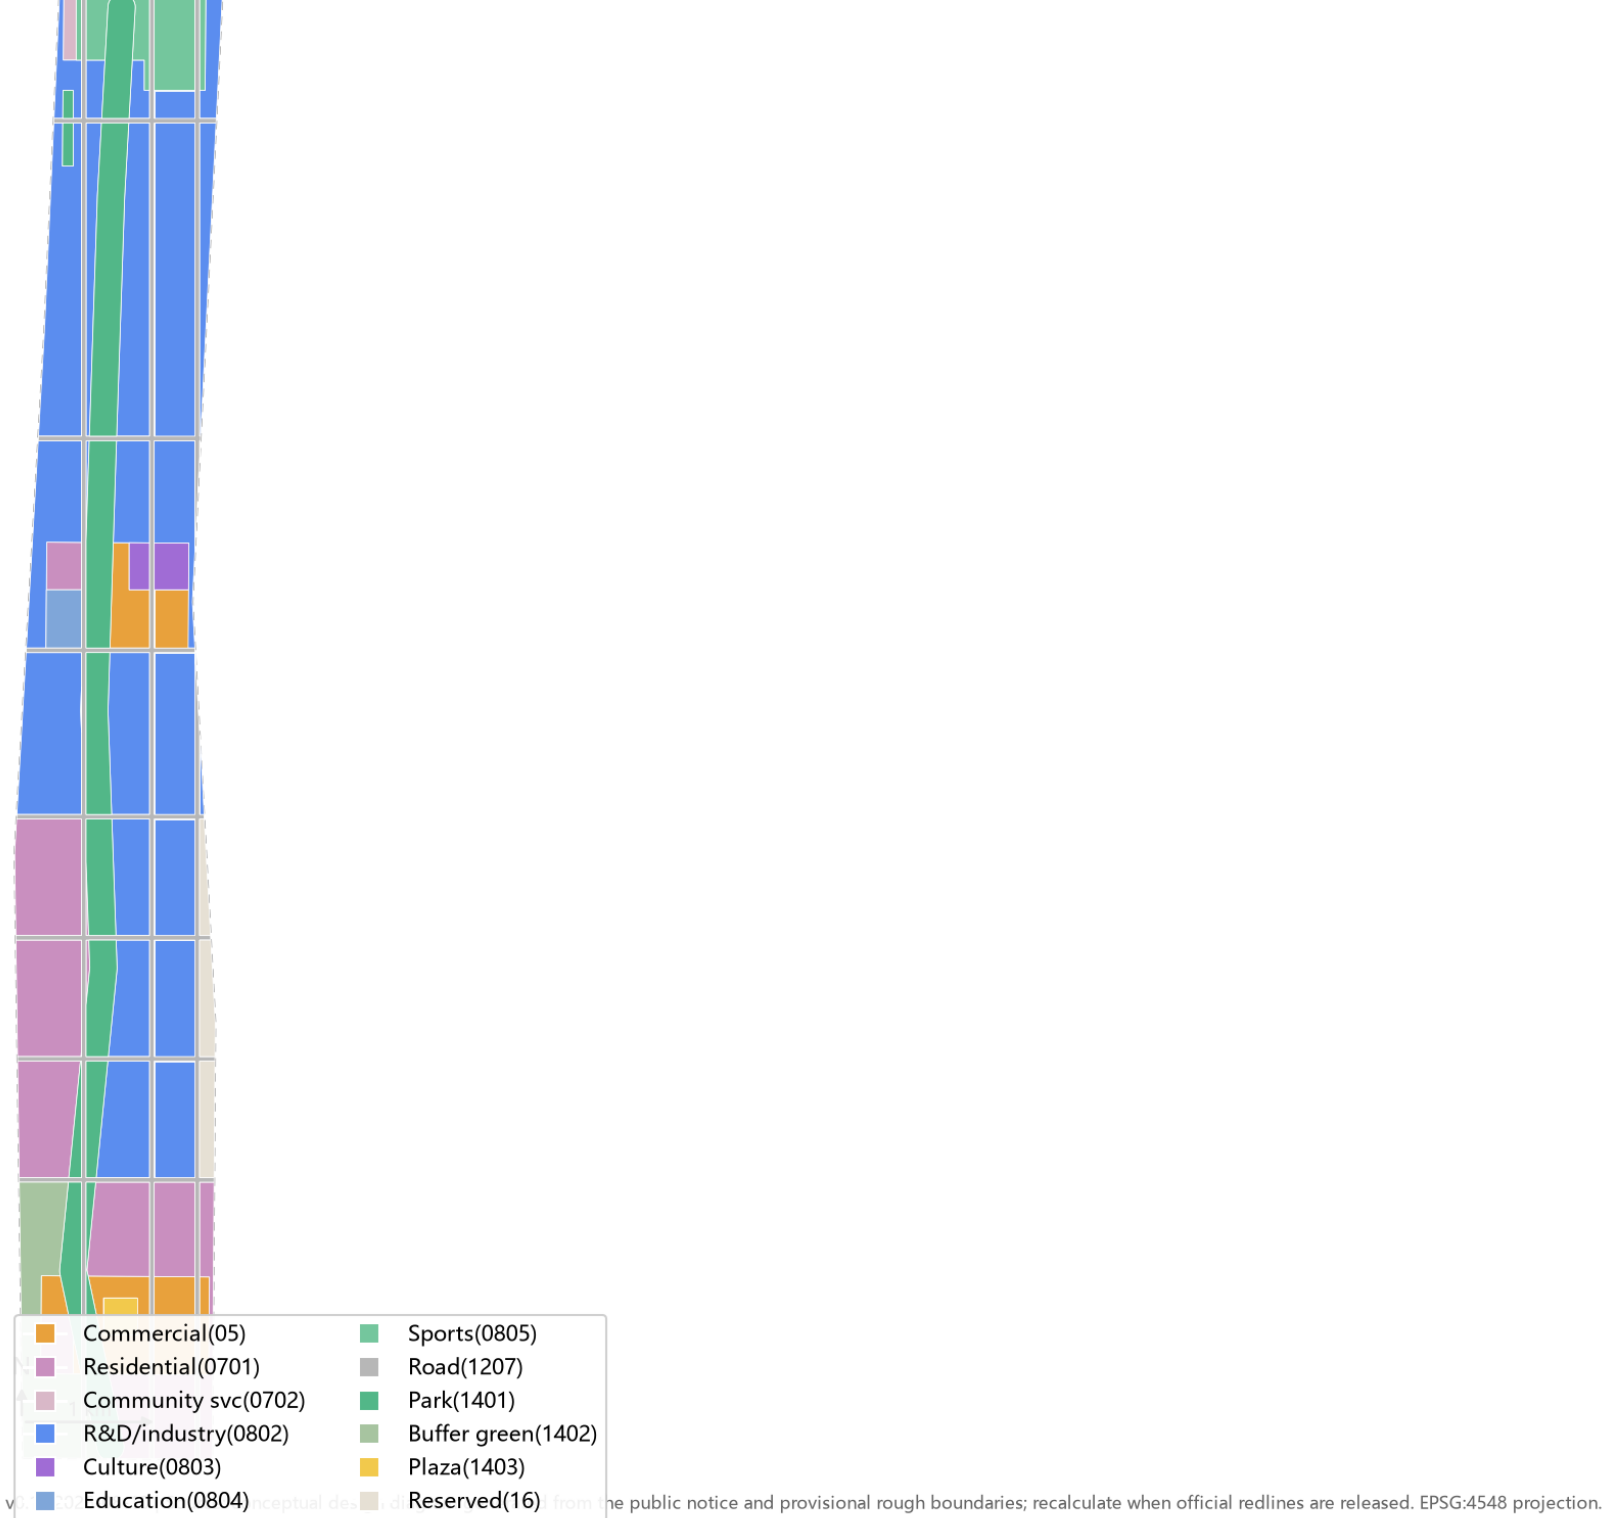

One Kernel Bus · three core modules · two wings · node network

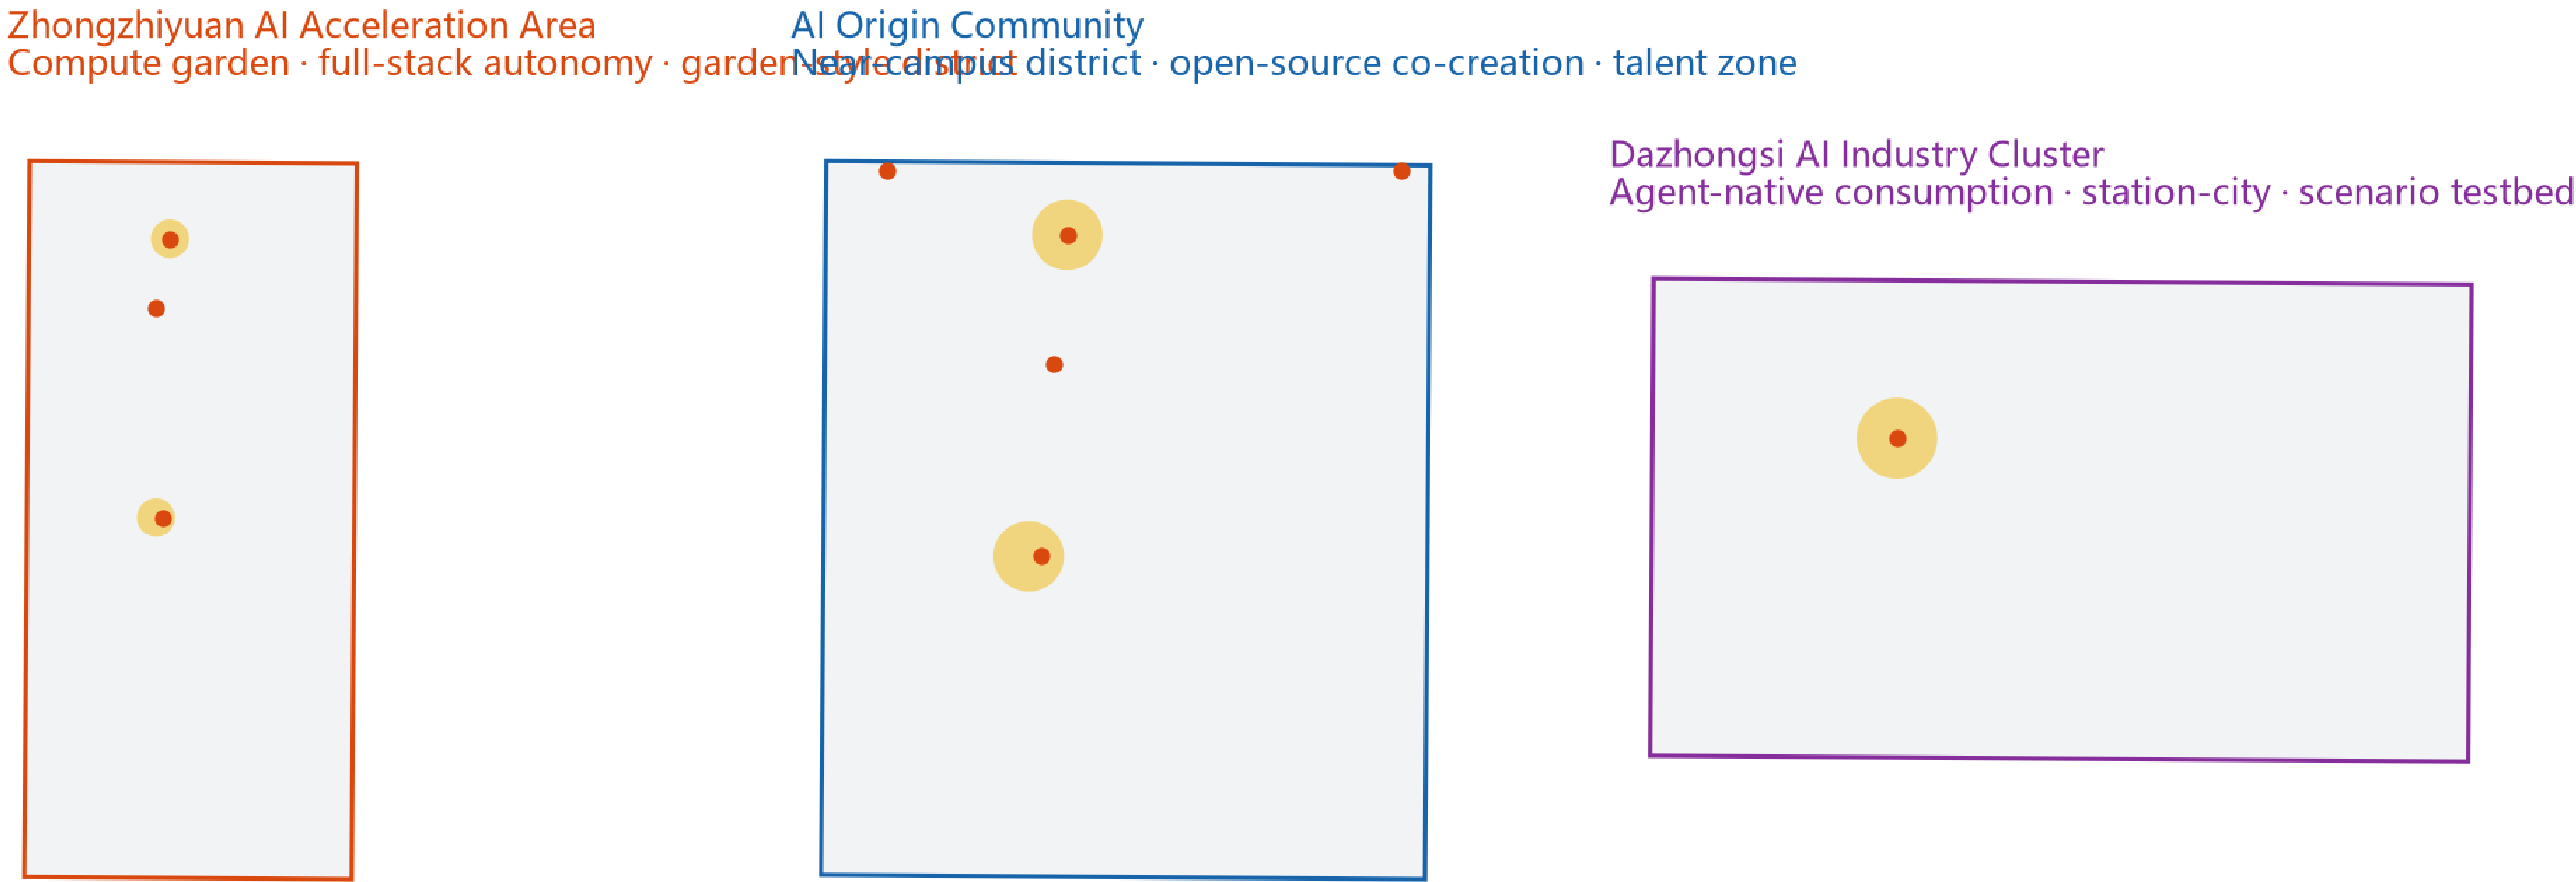

Version: 2022.02.28. This is a conceptual design diagram generated from the public notice and provisional rough boundaries; recalculate when official redlines are released. EPSG:4548 projection.

LAND-USE STRUCTURE

One-axis, three-module, two-wing zoning: R&D at the kernel, parks as the pulse, communities and commerce around

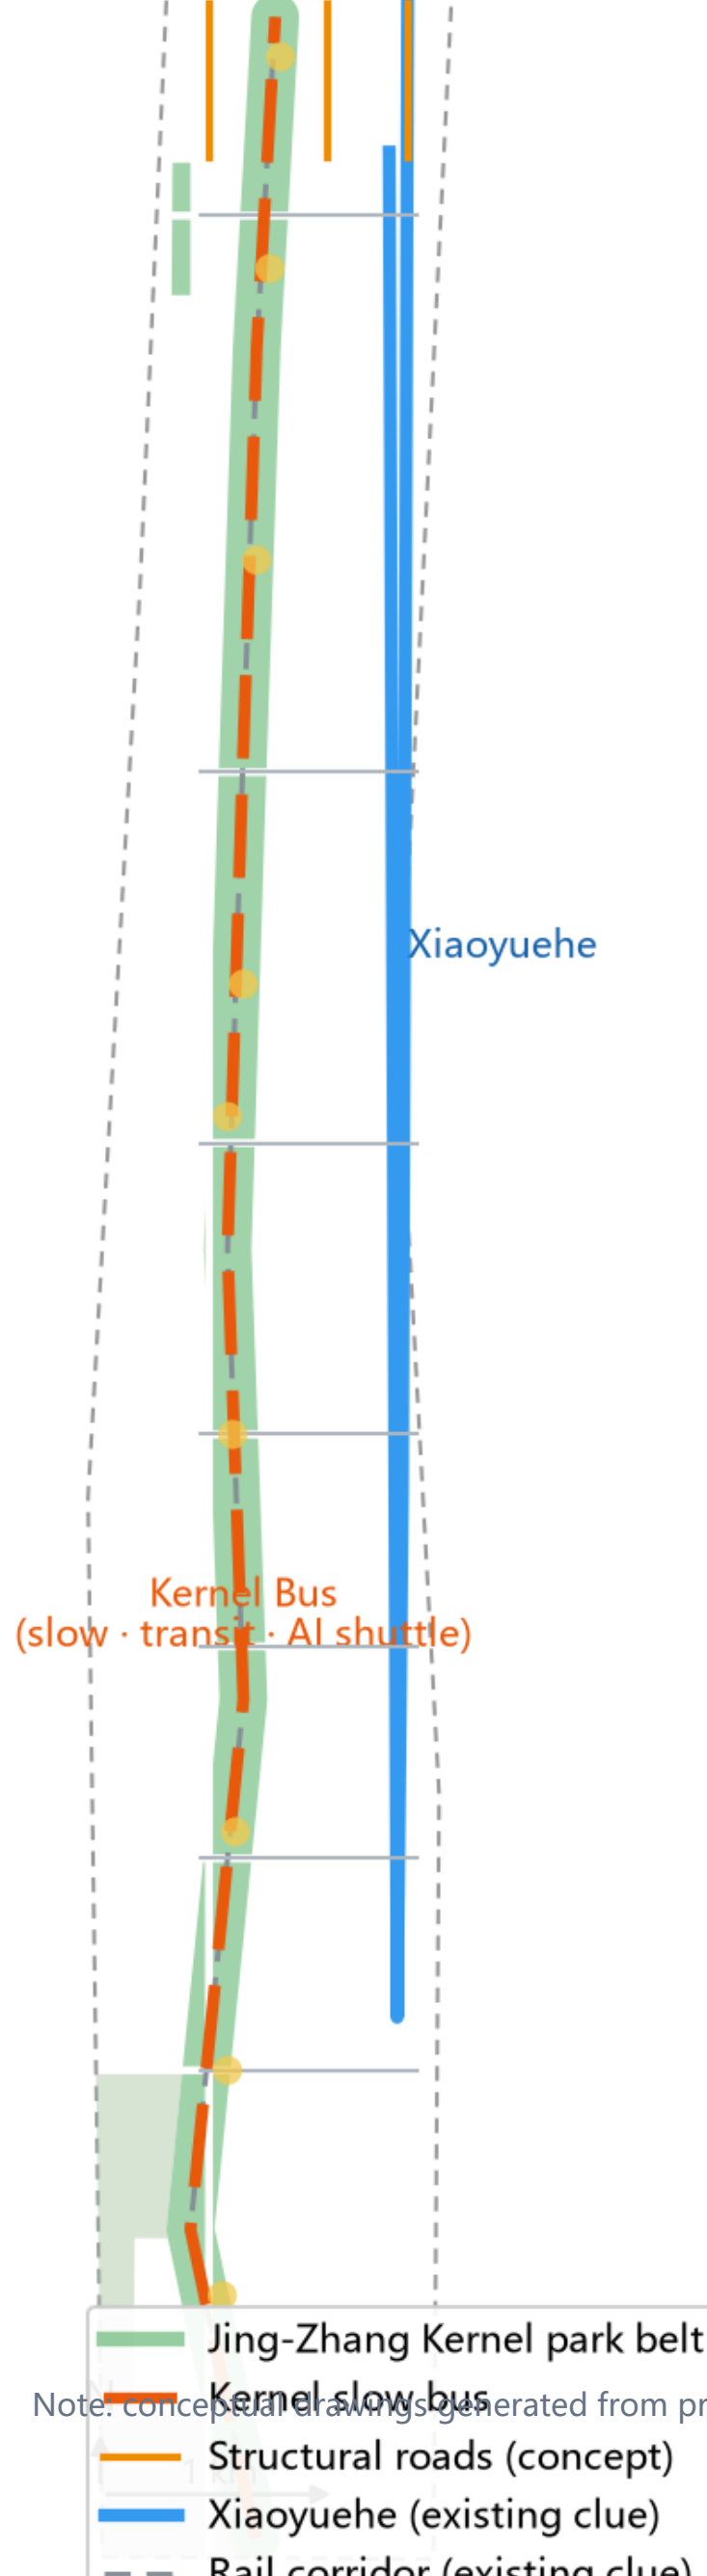

DETAILED DESIGN INDEX OF KEY AREAS

v0.1 · 2026-08-10 | Source: conceptual diagrams from provisional boundaries; recalculate when official KEY_AREA polygons are released.

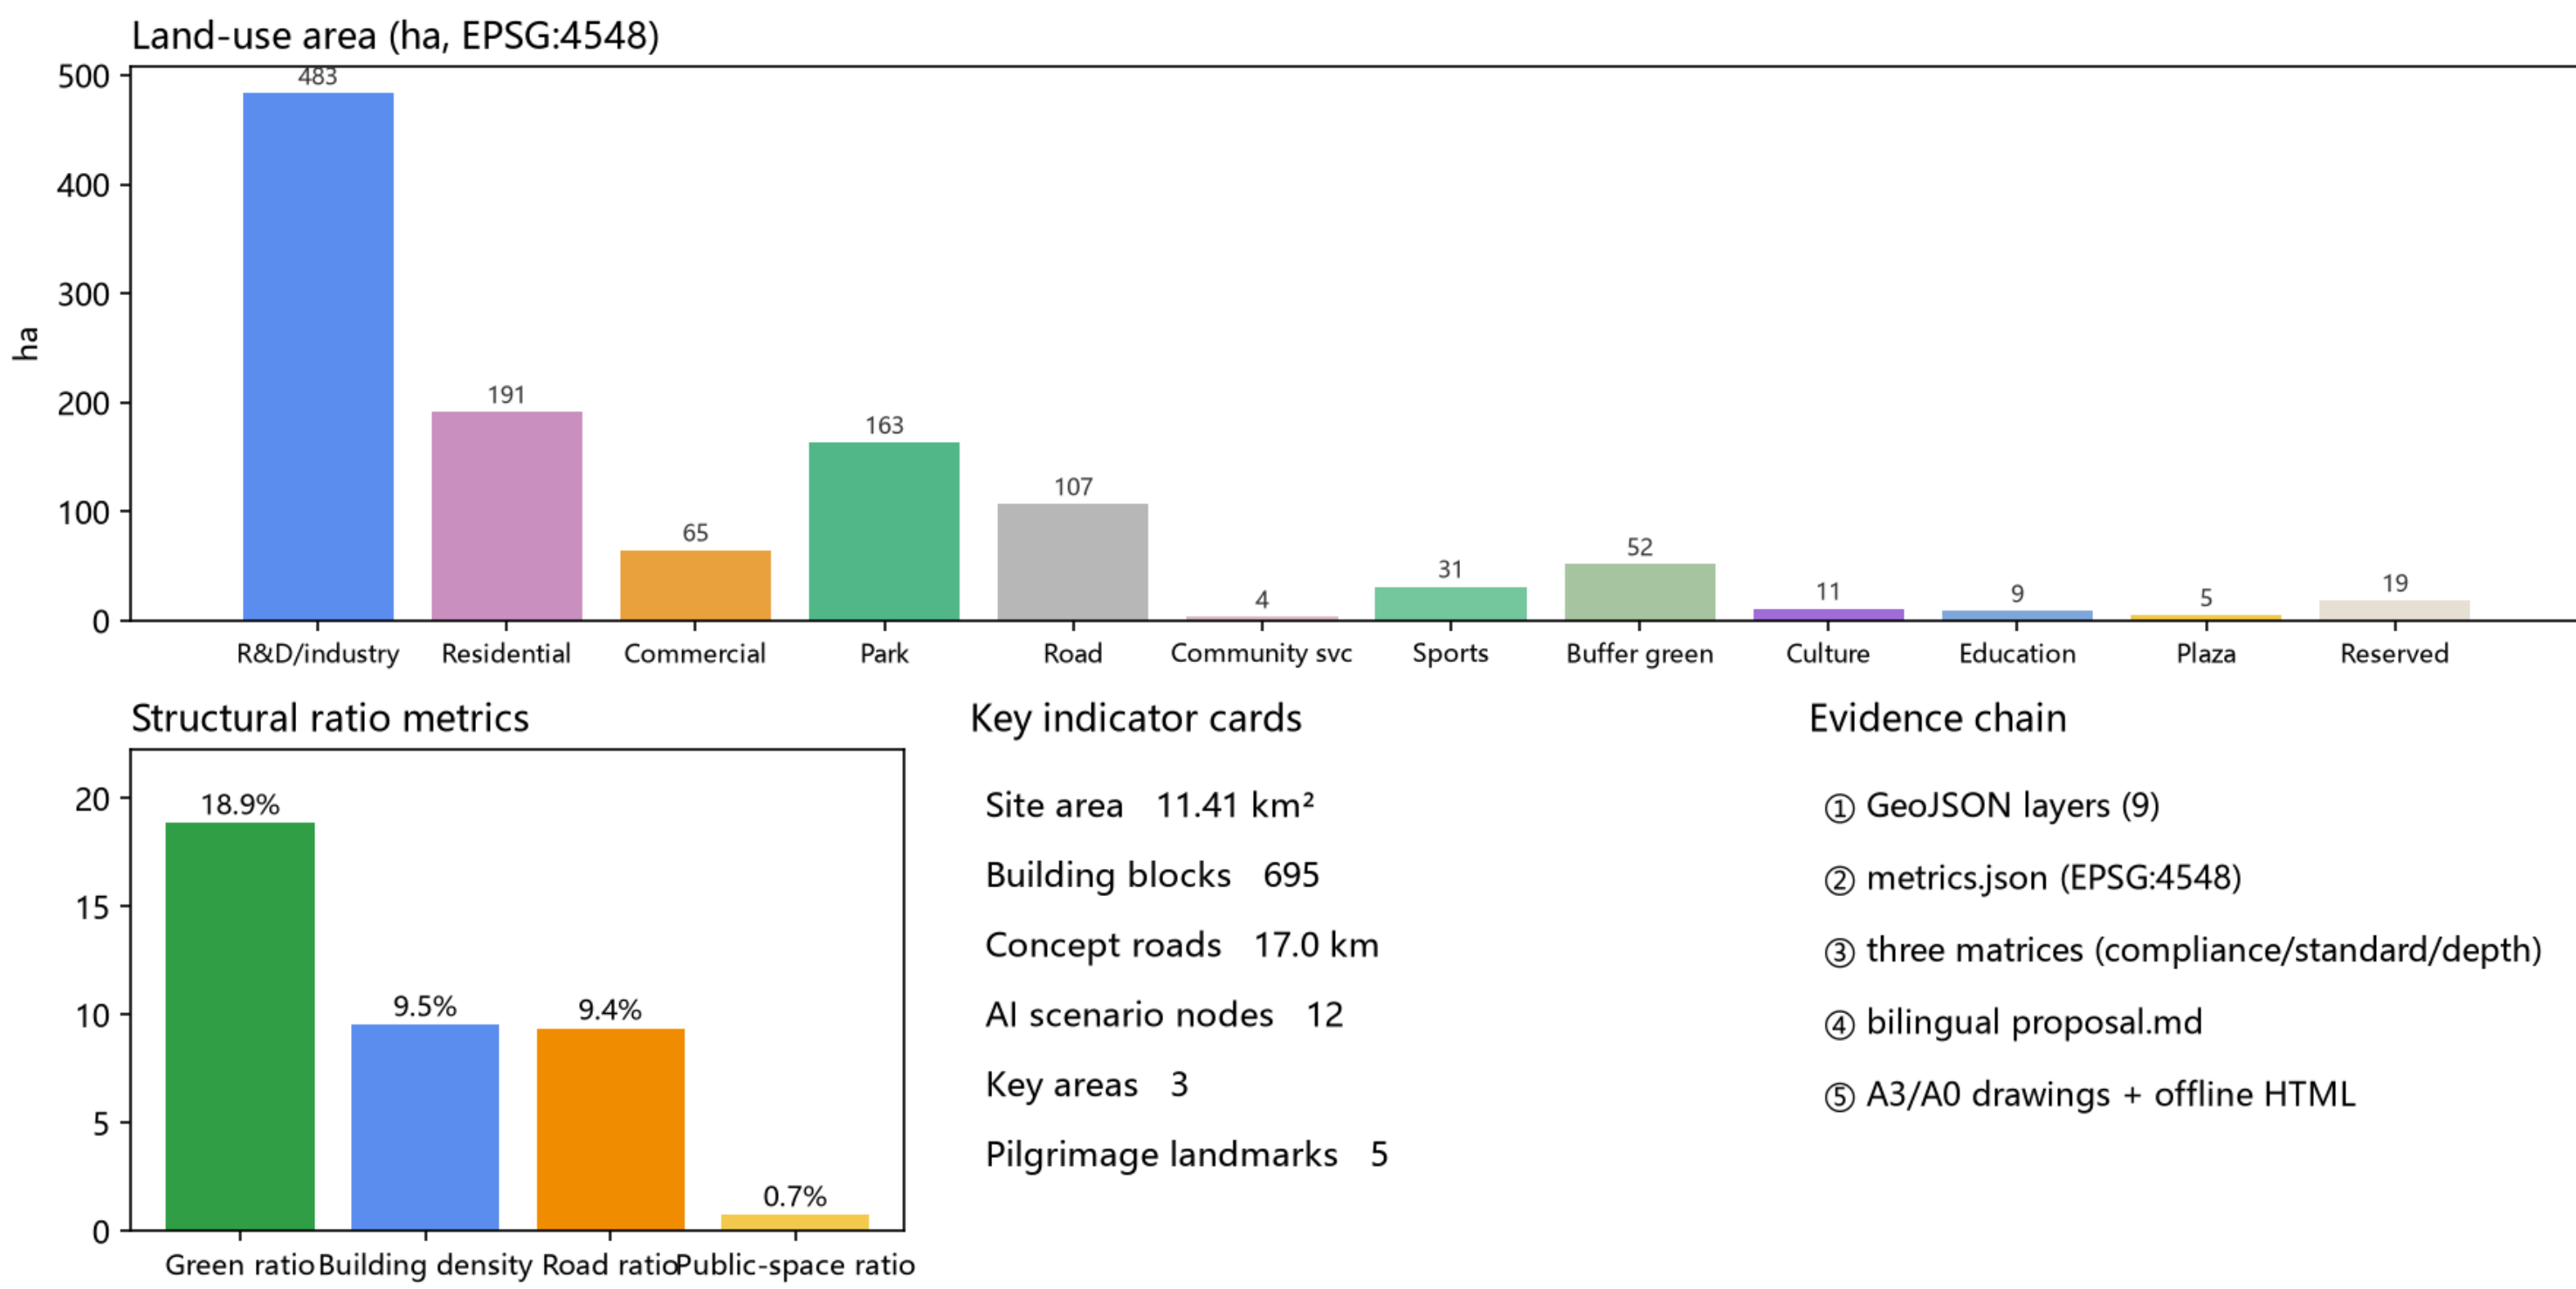

MOBILITY & BLUE-GREEN

Kernel Bus slow spine + structural road loops + Xiaoyuehe blue-green network

Note: conceptual diagram generated from provisional boundaries; recalculate when official redlines and regulatory data are released.

CORE METRICS & EVIDENCE CHAIN

v0.1 · 2026-08-10 | All metrics are reproducible from geometry/*.geojson and metrics.json; recalculate when provisional boundaries become official. Sources: sources.json.
