

CENTENNIAL JING-ZHANG AI INNOVATION BELT

THE COMMONS LINE

An AI innovation urban commons on a century-old railway heritage corridor

RETAIN THE RAIL · OPEN THE SOURCE · STITCH THE CITY · NURTURE WATER · CO-GOVERN

Design Basis and Planning Diagnosis

FOUR PLANNING DIAGNOSES

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Public visibility of innovation
- East-west urban discontinuities
- Governance lag in rapid trials
- Complementary roles for three cores

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Four hypotheses structure the next field investigation. Provisional geometry supports intake and discussion only; official polygons, ownership, RDP, utilities, transport, and heritage evidence remain required.

DESIGN TESTS

01 Public visibility of innovation / 02 East-west urban discontinuities / 03 Governance lag in rapid trials / 04 Complementary roles for three cores

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Public visibility of innovation

PUBLIC VALUE

East-west urban discontinuities

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Haidian Humanism and Better Living

THE COMMONS LINE

JING-ZHANG INTELLIGENCE VEIN

PLANNING PROPOSITION

A century of engineering, research, community life, and public governance becomes a shared civic framework. Technology is valuable only when it supports dignity, care, affordability, and ecological health.

DESIGN TESTS

01 Retain the Rail / 02 Open the Source / 03 Stitch the City / 04 Nurture Water / Co-govern

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

SPATIAL MOVE

Retain the Rail

PUBLIC VALUE

Open the Source

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

Three-Level Scope Framework

ONE SPINE / TWO CHAINS / THREE CORES / SIX GARDENS

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Railway heritage as civic spine
- Open-knowledge and all-age chains
- Validation, translation, application
- Everyday life is the success metric

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

The Coordinated Research Area organizes ecosystem and culture; the Overall Design Area organizes renewal and continuity; three Key-Area Detailed Design Areas test distinctive urban types.

DESIGN TESTS

01 Railway heritage as civic spine / 02 Open-knowledge and all-age chains / 03 Validation, translation, application / 04 Everyday life is the success metric

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Railway heritage as civic spine

PUBLIC VALUE

Open-knowledge and all-age chains

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Overall Spatial Structure

OVERALL SPATIAL STRUCTURE

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Continuous public-innovation spine
- Two active-travel loops
- Five east-west interfaces
- Provisional geometry, not an official boundary

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

The railway heritage park becomes public-innovation infrastructure. Two active-travel loops and five east-west interfaces stitch the city; six garden types give the strategy daily-life form.

DESIGN TESTS

01 Continuous public-innovation spine / 02 Two active-travel loops / 03 Five east-west interfaces / 04 Provisional geometry, not an official boundary

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Continuous public-innovation spine

PUBLIC VALUE

Two active-travel loops

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

Land Use and Urban Form

FIVE LAYERS / EIGHT PROGRAM SEGMENTS

JING-ZHANG INTELLIGENCE VEIN

03 / INTEGRATED MASTERPLAN

综合总平面：五层叠合的空间操作系统

用地、建筑、公共空间、蓝绿与慢行网络在同一底图上校验

- 01 生态遗产底板
连续生态过程与历史可读性
- 02 公共空间骨架
三网公共客厅与开放空间
- 03 慢行轨道缝合
两环五桥与轨道优先
- 04 创新生活混合
八层居住化功能
- 05 更新治理实施
可逆性与分期评估

图例说明
目前规划为城市设计类型示范，
不代表实际建设或政策判定。

ENGLISH READING KEY

- Ecology and heritage base
- Public-space armature
- Mobility stitching
- Innovation programs / governance

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Land-use zones are conceptual and topology-safe. Frontage, ground floor, scale, connectivity, and openness guide form while FAR, height, BCR, and setbacks remain unknown.

DESIGN TESTS

01 Ecology and heritage base / 02 Public-space armature / 03 Mobility stitching / 04 Innovation programs / governance

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Ecology and heritage base

PUBLIC VALUE

Public-space armature

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Three Complementary Key Areas

THREE COMPLEMENTARY URBAN TYPES

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

● Zhongzhiyuan: validation campus

● AI Origin: knowledge district

● Dazhongsi: application district

● One shared public-value baseline

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Zhongzhiyuan is an open validation campus, AI Origin a compact knowledge district, and Dazhongsi a transit-oriented application district. All share staffed, accessible, non-AI public-service baselines.

DESIGN TESTS

01 Zhongzhiyuan: validation campus / 02 AI Origin: knowledge district / 03 Dazhongsi: application district / 04 One shared public-value baseline

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

SPATIAL MOVE

Zhongzhiyuan: validation campus

PUBLIC VALUE

AI Origin: knowledge district

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

Zhongzhiyuan Validation Campus

ZHONGZHIYUAN VALIDATION CAMPUS

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Experiment inside, explain at the front
- Qinghe ecological learning edge
- Public observation and Human Review
- Reversible first-phase foyer

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Validation courts, standards workshops, a public observation gallery, and the Qinghe ecological learning edge turn technical scrutiny into a civic interface.

DESIGN TESTS

01 Experiment inside, explain at the front / 02 Qinghe ecological learning edge / 03 Public observation and Human Review / 04 Reversible first-phase foyer

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

SPATIAL MOVE

Experiment inside, explain at the front

PUBLIC VALUE

Qinghe ecological learning edge

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

Source-language diagram retained as the shared spatial evidence base

AI Origin Knowledge District

AI ORIGIN KNOWLEDGE DISTRICT

JING-ZHANG INTELLIGENCE VEIN

11 / COMPACT KNOWLEDGE DISTRICT

AI原点 · 紧凑知识街区

重点片区独立总平：空间结构、功能、开放界面、慢行入口与运营节点同步表达

COMPACT KNOWLEDGE DISTRICT
AI原点 · 紧凑知识街区
约104.3 ha
8个
24h
1街2院
设计控制
01 本街区与周边
02 街道与公共界面
03 新建—一体化生活圈
04 新建作为运营节点

CONCEPTUAL DETAILED DESIGN · 概念详细设计，不作为规划红线、规划图则、法定规划或施工图

ENGLISH READING KEY

- Research leaves the campus
- Open-source street and translation courts
- Talent services meet community life
- Continuous walkable ground floor

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

An open-source street, translation courts, talent-service lane, and community living room connect universities, start-ups, housing, and public learning.

DESIGN TESTS

01 Research leaves the campus / 02 Open-source street and translation courts / 03 Talent services meet community life / 04 Continuous walkable ground floor

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Research leaves the campus

PUBLIC VALUE

Open-source street and translation courts

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Dazhongsi Application District

DAZHONGSI APPLICATION DISTRICT

JING-ZHANG INTELLIGENCE VEIN

12 / TRANSIT APPLICATION QUARTER

大钟寺·轨道应用城区

重点片区独立总平：空间结构、功能、开放界面、慢行入口与运营节点同步表达

TRANSIT APPLICATION QUARTER
大钟寺·轨道应用城区

约72.0 ha

4象限

5min

1厅1街

设计控制
01 站城步行网络节点
02 四象限步行网络节点
03 步行网络公共节点
04 步行网络节点步行网络

CONCEPTUAL DETAILED DESIGN · 概念性详细设计，不作为规划红线、规划控制、法定规划或施工图

ENGLISH READING KEY

- Station-city integration
- Four-quadrant walking grid
- Application street and civic room
- Public service before technology display

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Walking continuity, rail interchange, active ground floors, and staffed appeals come before large-scale technology deployment or iconic construction.

DESIGN TESTS

01 Station-city integration / 02 Four-quadrant walking grid / 03 Application street and civic room / 04 Public service before technology display

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Station-city integration

PUBLIC VALUE

Four-quadrant walking grid

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

AI Ecosystem and Scenario Governance

SIX MISSIONS / ONE PUBLIC-VALUE LOOP

JING-ZHANG INTELLIGENCE VEIN

六项任务，一条公共价值循环

IDENTITY → ECOSYSTEM → SCENARIO → SPACE → CULTURE → OPERATION

评审可追问：为什么做？落在哪里？谁来使用？谁来负责？如何验证？何时退出？

ENGLISH READING KEY

- Identity and ecosystem
- Testing and public space
- Culture and communication
- Long-term operation

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Every scenario names an urban problem, user, carrier, minimum data, human takeover, and exit condition. Scenario Access is earned through evidence and public review.

DESIGN TESTS

01 Identity and ecosystem / 02 Testing and public space / 03 Culture and communication / 04 Long-term operation

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Identity and ecosystem

PUBLIC VALUE

Testing and public space

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

Building and Public-Realm Prototypes

BUILDING AND PUBLIC-FRONTAGE PROTOTYPES

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Retain and adapt before rebuilding
- Porous ground floors
- Visible stairs and shared foyers
- Durable, replaceable materials

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Three urban-form types use porous ground floors, courtyards, passages, pocket plazas, and visible stairs. Durable and replaceable components support incremental renewal.

DESIGN TESTS

01 Retain and adapt before rebuilding / 02 Porous ground floors / 03 Visible stairs and shared foyers / 04 Durable, replaceable materials

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Retain and adapt before rebuilding

PUBLIC VALUE

Porous ground floors

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Mobility and Station Integration

MOBILITY / BLUE-GREEN / PUBLIC SPACE

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Rail first and active travel as a network
- Two loops and five interfaces
- Qinghe edge and railway green spine
- Conceptual relations, not engineering lines

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

A continuous heritage spine, two local loops, five east-west interfaces, and station catchments make accessibility and daily service the primary mobility performance.

DESIGN TESTS

01 Rail first and active travel as a network / 02 Two loops and five interfaces / 03 Qinghe edge and railway green spine / 04 Conceptual relations, not engineering lines

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Rail first and active travel as a network

PUBLIC VALUE

Two loops and five interfaces

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Blue-Green Space and Urban Character

FIVE SPATIAL MOVES IN SECTION

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Retain the rail
- Open the source
- Stitch the city
- Nurture water / Co-govern

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

The Qinghe edge, railway green spine, and community gardens provide habitat, stormwater management, shade, and active-travel continuity. Nightscape stays low-impact and heritage remains legible.

DESIGN TESTS

01 Retain the rail / 02 Open the source / 03 Stitch the city / 04 Nurture water / Co-govern

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Retain the rail

PUBLIC VALUE

Open the source

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Better Living and Public Services

BETTER LIVING / 15-MINUTE SERVICES

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- 5-minute daily support
- 10-minute care network
- 15-minute cultural access
- Talent attraction begins with dignified life

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Daily services, care, culture, accessible rest, public toilets, multilingual support, and non-AI equivalents turn talent attraction into a complete living-environment proposition.

DESIGN TESTS

01 5-minute daily support / 02 10-minute care network / 03 15-minute cultural access / 04 Talent attraction begins with dignified life

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

5-minute daily support

PUBLIC VALUE

10-minute care network

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.

Project Packages and Phasing

EIGHT PROJECT PACKAGES / THREE PHASES

JING-ZHANG INTELLIGENCE VEIN

Metrics and Evidence Chain

REPRODUCIBLE METRICS / AUDITABLE EVIDENCE

JING-ZHANG INTELLIGENCE VEIN

ENGLISH READING KEY

- Geometry is authoritative
- Metrics recalculate from the same layers
- Display artifacts explain, not legislate
- Provisional status remains visible

STATUS

Conceptual recommendation using provisional rough geometry. Not an official planning boundary, statutory control, approval, or engineering alignment.

EVIDENCE PRINCIPLE

The translated figure preserves the same design evidence. GeoJSON and metrics remain authoritative; this diagram is the human-readable interpretation layer.

PLANNING PROPOSITION

Geometry, metrics, matrices, diagrams, and Human Review form one auditable chain. The present 11.41 km², 18.4% green ratio, and 7.3% public-space ratio are provisional internal comparisons.

DESIGN TESTS

01 Geometry is authoritative / 02 Metrics recalculate from the same layers / 03 Display artifacts explain, not legislate / 04 Provisional status remains visible

THE COMMONS LINE / COMPLETE ENGLISH COMPANION

Source-language diagram retained as the shared spatial evidence base

SPATIAL MOVE

Geometry is authoritative

PUBLIC VALUE

Metrics recalculate from the same layers

NEXT VERIFICATION

Replace official polygons and recalculate every dependent layer and metric.

STATUS BOUNDARY

Conceptual recommendation based on provisional rough geometry. It is not an official boundary, statutory control, development approval, engineering alignment, or government commitment.
