

Jingzhang AI Pulse – Centennial Jing-Zhang AI Innovation Belt

One corridor, three cores, two wings | Zhizhiyuan / AI Origin / Dazhongsi

A3 booklet – conceptual suggestion, not an official redline; boundary is provisional, recompute after official p

2026-08 · jonhate / jingzhang-ai-pulse

Zhizhiyuan AI Acceleration Area

Positioning: Garden-type full-stack innovation district
Spatial moves: Qinghe frontage, industry exhibition, low-carbon exchange, open testing
AI scenarios: Autonomous model testbed / standards workshop / safety-governance showcase / low-carbon compute experience

Beijing AI Origin Community

Positioning: Near-campus transformation and talent community
Spatial moves: Campus-park-street slow stitching, output release, talent zone
AI scenarios: Open-source release hall / transformation street / AI education / honor display system

Dazhongsi AI Industry Cluster

Positioning: Urban intelligent-economy and international-exchange district
Spatial moves: Station integration, four-quadrant pedestrian connectivity, commercial services
AI scenarios: Agent & terminal exhibition / content consumption / data-element living room / international roadshow

The three key areas reach implementation-plan urban design depth; key-area boundaries are provisional, conclusions are directional concept suggestions to be deepened after official polygons and regulatory conditions are released.

Overall design area

11.41 km2

recomputed on provisional boundary

Green ratio

18.4 %

green_space / site_area

Public-space ratio

0.83 %

public_space / site_area

Road density

22.2 m/ha

road_length / site_area

Building footprint

17.5 10k m2

24 conceptual buildings

Key areas total

368.4 ha

three key areas (provisional)

Six agent-open-call tasks covered (compliance_matrix.json)

agent.1 Concept/naming/Logo

agent.2 Ecosystem cases x6

agent.3 Cards x10 / personas x5

agent.4 Pilgrimage landmarks x4

agent.5 Cultural narrative

agent.6 Long-term operations

All areas recomputed in EPSG:4548; FAR/height/regulatory conditions are missing and marked pending confirmation, never disguised as approved values. Evidence chain: geometry/*.geojson - metrics.json - compliance/standard/design-depth matrices - this figure.
