

Jingzhang Track Pulse - Overall Scheme Boards (A1 landscape composite)

Fig. 1 - Overall Concept Overview (one spine, three pearls, two wings)

Jingzhang Track Pulse - Overall Concept Overview

One spine, three pearls, two wings | Agent Growth Trail (generation > first steps > schooling > employment > legacy) | Concept suggestion

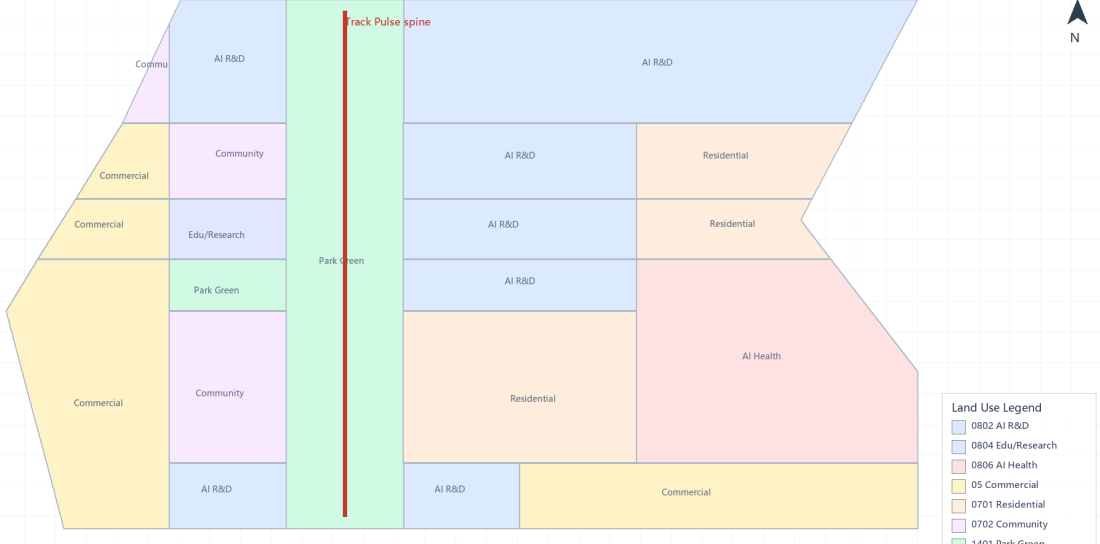

Source: provisional_boundaries.geojson (provisional, not an official redline) | Concept suggestion for professional deepening

Fig. 2 - Land Use Structure (11 zones, full coverage, no overlaps or

Land Use Structure of the Overall Design Scope

21 land use zones | full coverage, no overlaps, no gaps | Concept suggestion

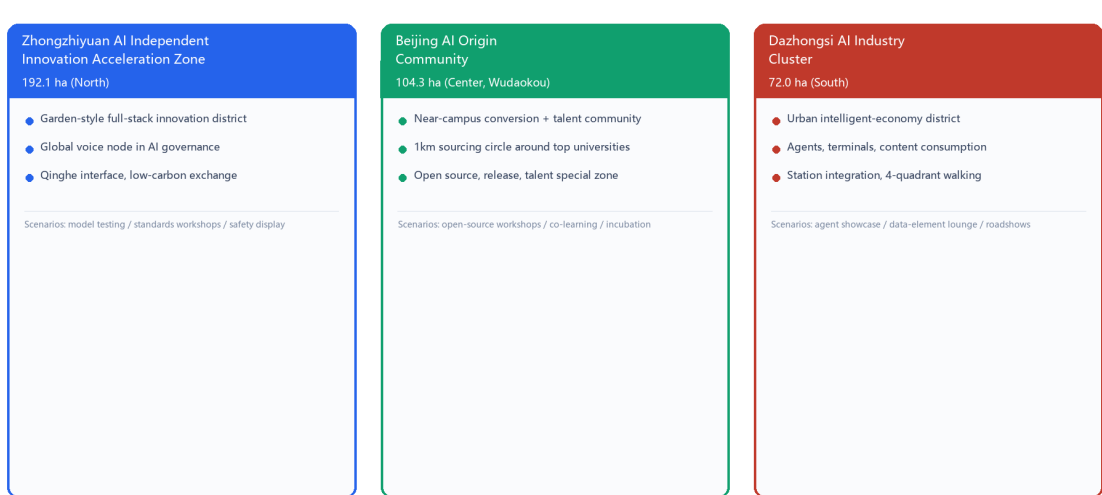

Land use classification per the national land use classification guide | Concept suggestion

Fig. 3 - Detailed Design Index of the Three Key Areas

Detailed Design Index of the Three Key Areas

Zhongyuan 192.7ha | AI Origin Community 104.3ha | Dahegong 72.0ha | provisional boundaries

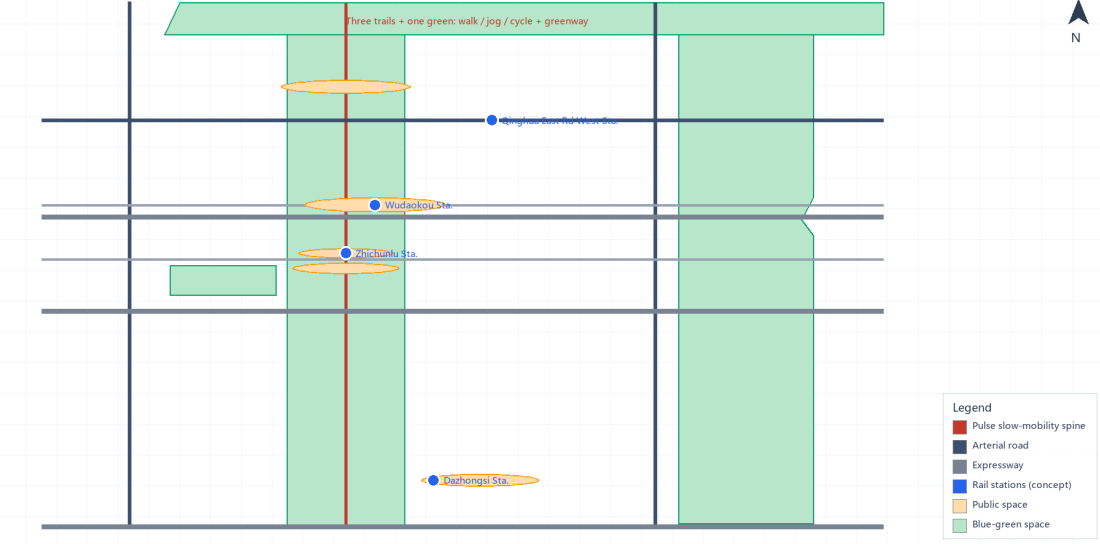

Areas from the official announcement programs are provisional constraints | (data: geometry, key, area, polygon)

Fig. 4 - Composite System of Slow Mobility and Blue-Green Public Space

Composite System of Slow Mobility and Blue-Green Public Space

One spine, three tracks plus one green | station-city integration | break-point stitching (concept)

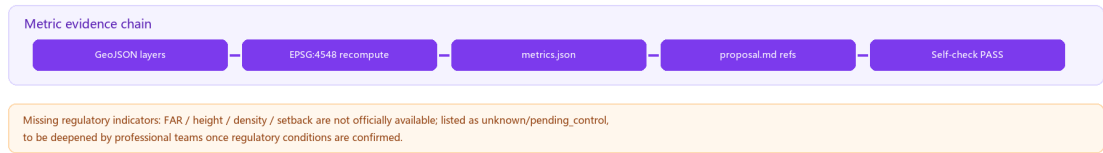

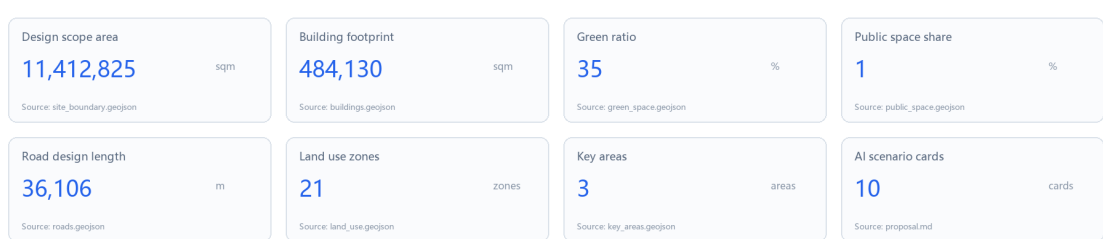

Roads are designed centerline; conceptual stations are conceptual locations; break points and 100m integration scale; traffic network | Concept suggestion

Fig. 5 - Core Metrics Recalculation and Evidence Chain

Core Metrics Recalculation and Evidence Chain

All metrics recalculated from GeoJSON (EPSG:4546) | provisional areas for display only

Missing regulatory indicators: FAD / height / density are not officially available listed as unknown/pending control. To be determined by professional teams once regulatory conditions are confirmed.

Metric can be recalculated item by item from geometry | geometry | evidence chain complete
