

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

From centennial track trace to a traceable AI public-return belt

CONCEPT / PROVISIONAL GEOMETRY: not a redline, engineering drawing, or approval basis.

J· Z COMMONS / 京张公地

One heritage line, three civic commons

Track trace, commons, and public receipts organize the three areas and two wings; the provisional boundary stays secondary.

Spatial grammar

01 轨痕 / Track trace

A continuous walkable public frame carries the railway's temporal memory.

02 三处公地 / Three commons

Verification, translation, and return are spatially distinct—not one generic AI campus.

03 五张凭据 / Five receipts

Source, test, release, review, return: each names a steward, review date, and stop condition.

两翼 / Two wings

Zhongguancun service wing: make IP, capital, compute, and conversion approachable. Xiaoyuehe scenario wing: test ecology and everyday service with low data and a clear exit path.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何 · 非红线、非施工图、非审批依据

01 总体关系 / OVERALL RELATION

One heritage slow-mobility, climate, and service spine joins verification, translation, and return into a readable, questionable, pausable daily civic interface.

03 公共界面 / PUBLIC INTERFACE

Shade, rainwater, inclusive pause, low-glare information, and human help share one section. AI is an explainable, pausable, cared-for service.

04 场景—证据—回报 / SCENARIO—EVIDENCE—RETURN

Provisional area 11,412.825 m²; rerun spatial values when official geometry arrives.

J· Z COMMONS / 京张公地

Three commons, three civic relationships

Verification, translation, and return each receive a walkable, bookable, maintainable public interface.

02 三处公地 / THREE COMMONS

Zhongzhiyuan: Verifiable Window | AI Origin: Translation Arcade | Dazhongsi: Return Station. Landmarks are service interfaces, not isolated sculpture.

J· Z COMMONS / 京张公地

J· Z COMMONS: not a logo, but a civic promise

Test & time, guide the 5-compatibility, and of opening to a new system that can be questioned, corrected, and returned.
