

AUTONOMOUS COMMONS AFTER AUTONOMY

Design the curb, accessibility, human take-over and data boundary before deciding when vehicles ente
r.

01 / AUTONOMY FIELD MAP

Jing-Zhang · Three test yards

A continuous public route for people comes first; only then can low-speed, supervised automation enter. The line is an
audit route, not a new road.

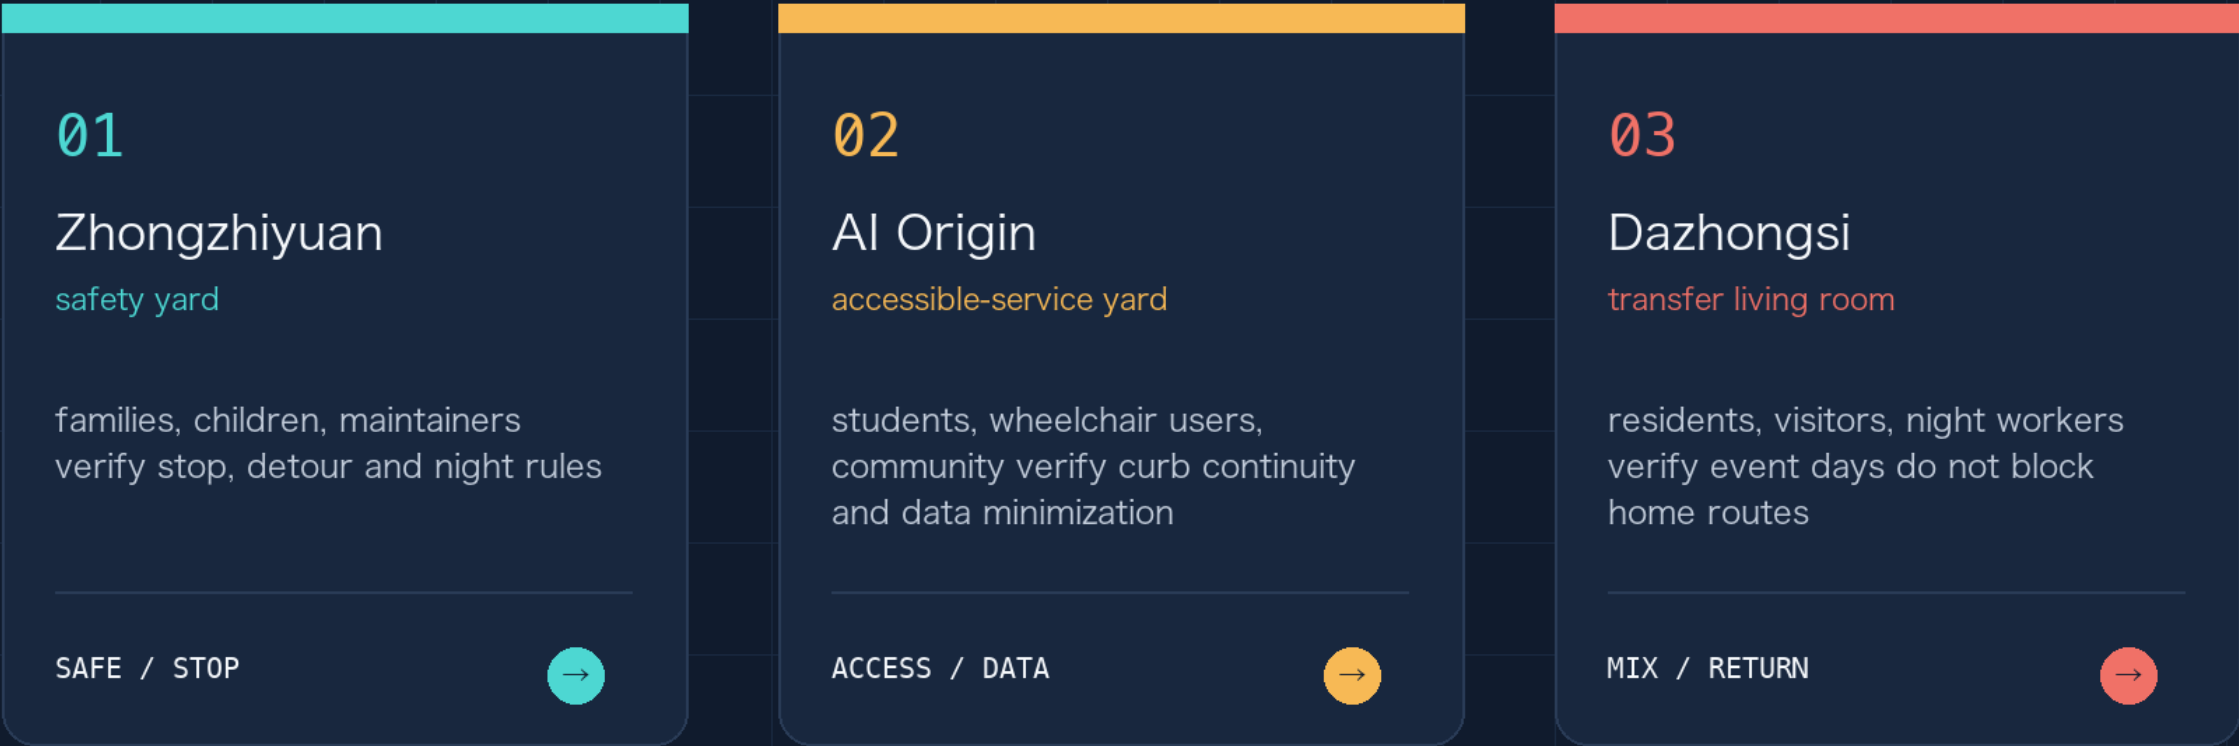

DESIGN TARGETS ≠ PERMITS / ROUTE AUDIT ≠ VEHICLE ROUTE

147228 / 2026.08 / V2.2

03 / THREE TEST YARDS

Three yards, three duties

Autonomy is not a device procurement. It is a public-service question that residents can understand and operators can
take over.

RULE 00 Human-chain continuity outranks autonomy coverage

NODE DUTY = TESTABLE ACCEPTANCE / NOT A DEPLOYMENT CLAIM

147228 / 2026.08 / V2.2

04 / CURB & ROUTE SECTION

The curb is the autonomy interface

Vehicles are not the first layer. Let people, wheelchairs and cycles pass first; make stopping, loading, charging and take-over visible at the curb.

PEOPLE FIRST

human-first chain

continuous, audible, tactile, detour

cycle buffer

no conflict with stopping

autonomy curb

open only within time/capacity

safety clear zone

fire / sightline / take-over

A

cross first, stop second

B

stop within sight

C

close to roll back

CURB STATUS

open / guarded / closed

NO CURB CAPACITY / NO AUTONOMY ENTRY / EVERY TEST HAS A MANUAL FALLBACK

147228 / 2026.08 / V2.2

P0 readable curb / audit first

P1 limited trials / approved, supervised

P2 conditional expansion or stop

05 / EVIDENCE GATES

Turn futurism into a continuation test

Every metric carries a state: known, design target or unknown. Unknown is not a blank; it is the next field-test entrance.

01

continuity

0 irreplaceable breaks

accessible route

TARGET / UNKNOWN

02

safety

100% stop / take-over

remote stop

TARGET / UNKNOWN

03

governance

anonymous aggregate + human review

data minimum

TARGET / UNKNOWN

DECISION RULE

Expansion requires all three: human continuity / event safety / data minimization

KNOWN ≠ TARGET / UNKNOWN ≠ PASS / STOP CONDITIONS ARE PART OF THE DESIGN

147228 / 2026.08 / V2.2

Boundary: a concept test framework, not a planning approval, road opening, operating permit, health claim or construction commitment.

JING-ZHANG / CONCEPT TEST FRAMEWORK
