

Jingzhang Merge Belt

Zigzag Forward, Open-Source Far · One railway merges into an open-source city · A0 board (conceptual / provisional)

Overall Scope and Three Zones
Jingzhang Merge Belt · Overall Scope and Three Zones (provisional / conceptual)

Data: geometry/*.geojson (EPSG:4326 display). Boundary is provisional_constraint, not an official redline. Area ~11.41 km² (conceptual).

Design principles: merge ≠ annex — tributaries stay available
Differentiators: Review Chamber (human final judgment) · Public Merge Review
Six tasks: naming / 6 cases / 12 scenario cards / 4 landmarks / narrative / long-term ops
Metrics: 20 known; FAR/height/density/setback stay null
Boundary: provisional_constraint; recalculate when official polygons arrive
Declaration: Conceptual Recommendation / for professional teams to deepen

Metrics & Evidence Chain
Core metric recalculation (known group; FAR/height/density/setback/parity stay unknown)
