Design Basis

This proposal is based on the official qualification pre-announcement and the agent open call taskbook, using the provisional rough boundary from brief/site-package. All layers and metrics must be recalculated once official polygons are provided. All spatial suggestions are concepts for professional teams to deepen.

Three-Level Scope

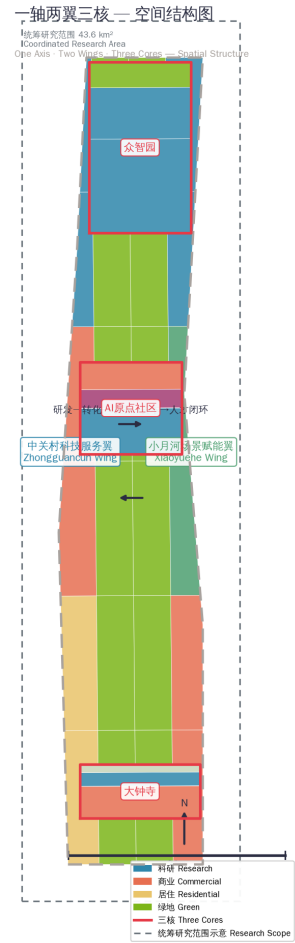

Coordinated Research Area 43.6 km²: AI ecosystem and future city form.
Overall Design Area 11.4 km²: urban renewal, land use, transport/municipal, character .
Key Detailed Design Area 368.4 ha: Zhongzhiyuan (192.1ha), AI Origin (104.3ha), Dazhongsi (72.0ha).

铁轨·算法·文明 — 总体概念图

One Axis · Two Wings · Three Cores

One axis: Jing-Zhang Heritage Park vitality axis. Two wings: Zhongguancun technology service wing (west), Xiaoyuehe scenario empowerment wing (east). Three cores: Zhongzhizhuan, AI Origin, Dazhongsi.

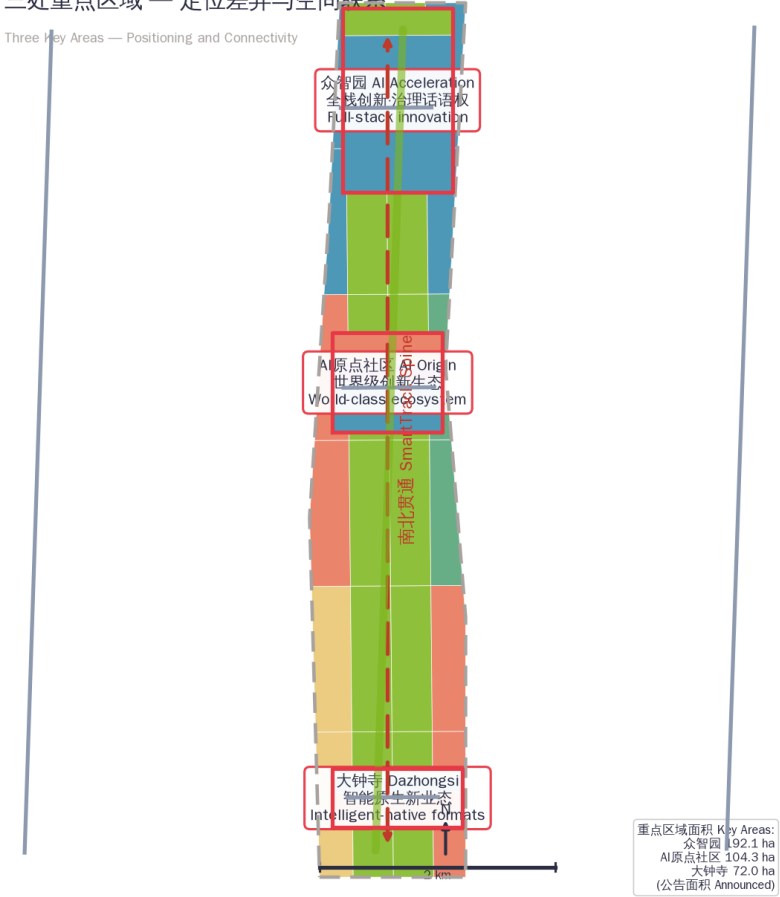

33 Land-Use Zones, 100% Coverage

Research, commercial, residential, cultural, educational, green and plaza zones fully cover the design boundary without gaps or overlaps.

三处重点区域 — 定位差异与空间联系

Three Key Areas — Positioning and Connectivity

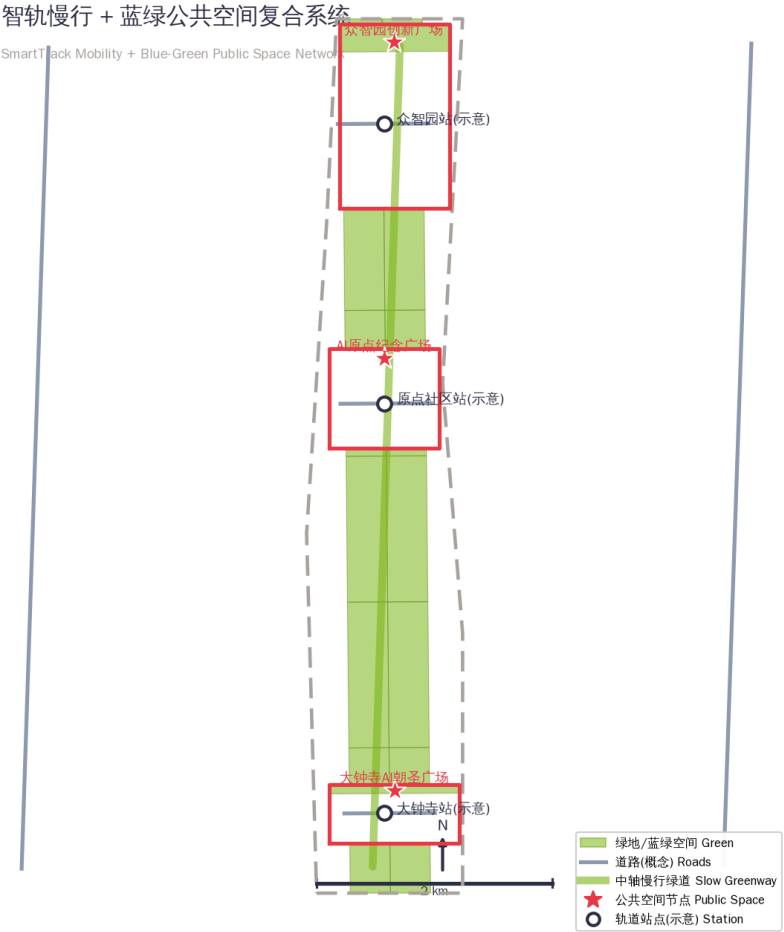

Positioning and Connectivity

Zhongzhiyuan (192.1ha): full-stack self-reliant innovation. AI Origin (104.3ha): near-campus transformation and talent zone. Dazhongsi (72.0ha): intelligent-native economy and international exchange.

智轨慢行 + 蓝绿公共空间复合系统

SmartTrack Mobility + Blue-Green Public Space Network

SmartTrack Mobility

Central slow-traffic greenway links three cores; two north-south arterials and three east-west connectors stitch gaps; station-city integration around three stations; green ratio ~39%, public space ratio ~2.6%.
