

From AI showcase to a human city | spatial evidence atlas

The same provisional geometry is read as human arrival, staffed explanation, bounded interface and reversible exit.

v1.7

CONCEPT / PROVISIONAL

01 / shared spatial base

Reading rule

Green = blue-green / screen-free retreat · amber = public-space concepts · blue/orange = human-priority design proposals · circles = scenario nodes.

The map is a display transform from local GeoJSON; EPSG:4548 figures are recomputed metrics, not legal area or route length.

02 / four-stage public interface

Zhongzhiyuan PROV-KEY-001 question → How are machine tests bounded and taken over? same provisional anchor	01 · arrival Ordinary arrival and observation forecourt open / human-priority	02 · staffed Human explanation and takeover desk open / fallback	03 · bounded Bounded API simulation and test boundary gated / simulated	04 · exit / replay Freeze, replay and safe retreat stop / review
AI Origin Community PROV-KEY-002 question → How can people learn and exit without AI? same provisional anchor	01 · arrival Daily arrival and low-stimulation dwell open / ordinary-route	02 · staffed Paper, phone and staff service open / equivalent	03 · bounded Reskilling and intergenerational learning gated / voluntary	04 · exit / replay Screen-free recovery and exit open / quiet
Dazhongsi PROV-KEY-003 question → How does innovation become contestable service? same provisional anchor	01 · arrival Cultural arrival and ordinary movement open / ordinary-route	02 · staffed Multilingual human explanation and console desk open / explainable	03 · bounded Withdrawable display bounded service gated / review	04 · exit / replay Redress, freeze and night fallback stop / fallback

Evidence boundary

Every row binds existing geometry, functional bands, scenario references and stop rules. It is a concept interface, not a route, section, capacity, service result, permit, operation or official score.

Recompute trigger: official geometry, rights, safety, accessibility, climate, energy, and public-baseline evidence.

FIG. 02 | Shared-cut concept land use: reversible space and services

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Seven layers / shared coordinates

- Community resilience
- Small teams
- Innovation + skills
- Blue-green buffer
- Reversible blank
- Data + culture
- Night service

Shared cuts provide gap-free, non-overlapping coverage; categories are conceptual, not statutory.

Data: package geometry / metrics / matrices · concept reference only · no external maps, photos, or logos

Three focus areas | spatial anchors and scenario cards

Zooms return to the same provisional polygons; each focus area gets a visible question, node sequence, and human fallback.

v1.7

CONCEPT / PROVISIONAL

01 / shared spatial reading

Same GeoJSON input · focus polygons are provisional · display transform only

display transform · provisional
GeoJSON

Zhongzhiyuan

PROV-KEY-001

Bound the machine test before it reaches ordinary walking.

Ordinary arrival and observation forecourt → Human explanation and takeover desk → Bounded API simulation and test boundary → Freeze, replay and safe retreat
human fallback and stop rule remain G0

display transform · provisional
GeoJSON

AI Origin Community

PROV-KEY-002

Keep staffed, paper, phone, and screen-free options visible.

Daily arrival and low-stimulation dwell → Paper, phone and staffed service → Reskilling and intergenerational learning → Screen-free recovery and exit
human fallback and stop rule remain G0

display transform · provisional
GeoJSON

Dazhongsi

PROV-KEY-003

Make public data, explanation, and withdrawal legible.

Cultural arrival and ordinary movement → Multilingual human explanation and consent desk → Withdrawable display and bounded service → Redress, freeze and night fallback
human fallback and stop rule remain G0

What this plate adds

The same provisional polygons are shown at overview and focus scale; scenario nodes, green-blue buffers, public-space concepts and human fallback are read together. No line is an official redline or engineering alignment.

Official geometry and field baselines trigger a full geometry / metrics / figure / HTML / PDF / self-check recalculation.

official_boundary=false · geometry_role=provisional_constraint · conceptual suggestion for professional deepening

FIG. 04 | People-first mobility rules and Xiaoyuehe resilience

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

- People first**
Walking, access, human service
- G0 observation**
Robot, air, flood begin as rules
- Blue-green gate**
No engineering conclusion before evidence
- Night care**
Auditable service and screen-free space

Data: package geometry / metrics / matrices · concept reference only · no external maps, photos, or logos

FIG. 05 | Metrics—evidence—versions: every claim passes a concept gate

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Spatial recomputation

- Provisional scope
11,412,825.386 sqm
- Green layer 879,519.159 sqm
- Public-space layer
123,473.537 sqm

G0 scenario gate

- 10 scenario cards
- 6 personas
- 100% human fallback

Versioned governance

- Problem release
- Public/professional review
- Release note and exit

One algorithm, one rounding rule, one provisional-boundary warning: recomputable metrics are not legal or scoring areas.

Figure 07 | Ordinary-person task chain and stop loop

5 journey steps · 5 rollback steps · 6 acceptance checks · 4/4 routes · G0 concept replay, result_status=not_run

Step	What a person does	Evidence to retain	Rollback if it fails
J-01	enter and choose an ordinary or AI-assisted route	AC-01 · AC-02 · 4 fixture(s)	freeze the AI-assisted route and keep ordinary service available
J-02	request one bounded public service with purpose and data scope	AC-01 · AC-03 · AC-06 · 3 fixture(s)	remove the temporary data request and retain only the decision record
J-03	trigger human takeover or freeze before an unsafe continuation	AC-02 · AC-03 · 4 fixture(s)	offer paper, voice, staffed, or physical-wayfinding alternatives
J-04	appeal, delete, withdraw, or return to a paper route	AC-04 · AC-06 · 4 fixture(s)	publish the hold, complaint, and next review state
J-05	independently replay evidence before expand, repair, or exit	AC-05 · AC-06 · 1 fixture(s)	return to G0 and reopen only after independent replay
Replay evidence: 4/4 routes, 6/6 checks, 5/5 negative cases; remains not_authorized_not_run, not field service results.			

Figure 08 | Ten scenario cards: taskbook, space and replay coverage

Every row resolves to a scenario card, space/operation matrix and taskbook; green has ordinary-person replay, amber remains G0 structure evidence

ID / scenario	Taskbook	Spatial refs	Ordinary replay	Boundary
SCN-01 Community-retention desk	agent.4 · agent.5 · agent.6	PUBLIC-01 · LAND-01	G0 structure	G0 · not authorized
SCN-02 Reskilling corridor	agent.5 · agent.6	PUBLIC-02 · LAND-03 · MOBILITY-04	replayed · ROUTE-04	G0 · not authorized
SCN-03 Intergenerational learning navigation	agent.4 · agent.5	PUBLIC-03 · LAND-01	replayed · ROUTE-01	G0 · not authorized
SCN-04 Night human service	agent.4 · agent.6	PUBLIC-04 · LAND-07 · MOBILITY-01	replayed · ROUTE-03	G0 · not authorized
SCN-05 International service assistant	agent.5 · agent.6	PUBLIC-05 · LAND-07	G0 structure	G0 · not authorized
SCN-06 Municipal API governance	agent.4 · agent.6	SCN-06 · SERVICE-ZONE-02	replayed · ROUTE-02	G0 · not authorized
SCN-07 Low-speed robot public test	agent.4 · agent.6	SCN-07 · SERVICE-ZONE-01 · MOBILITY-05	G0 structure	G0 · not authorized
SCN-08 Low-air logistics rule sandbox	agent.4 · agent.6	SCN-08 · GREEN-02	G0 structure	G0 · not authorized
SCN-09 Flooding simulation observatory	agent.4 · agent.6	SCN-09 · GREEN-01 · GREEN-03	G0 structure	G0 · not authorized
SCN-10 Energy-compute-heat ledger	agent.4 · agent.6	SCN-10 · LAND-05 · SERVICE-ZONE-02	G0 structure	G0 · not authorized
Coverage: 4/10 cards have ordinary-person replay; the rest need field, professional and authorization evidence; not_an_official_score=true.				

Figure 09 | Five project families: G0/G1 gates and exit actions

Project families express responsibility, evidence and exit order only; no institution, budget, permit, procurement or implementation commitment

Project family	G0 / G1 gate	Acceptance focus	Exit action
PF-01 Human buffer and community retention	G0: 规则公开与共创样本；G1: 专业复核	人工服务可达、退出协议、社区席位	投诉/不平等风险即暂停并公开修订
PF-02 Reskilling and night wellbeing	G0: 导航原型；G1: 无障碍与夜间安全复核	人工咨询、可解释路径、夜间反馈	无人工兜底或风险无法解释即退出
PF-03 City API and data governance	G0: 纸面协议；G1: 授权与安全审查	目的限定、撤销按钮、审计日志	授权失效/偏差投诉即冻结
PF-04 Xiaoyue River blue-green and human-machine test	G0: 图上规则；G1: 专项安全复核	人优先、停机、事件记录、生态边界	无许可/安全阈值/水文资料即不进入现场
PF-05 Culture, landmarks and global co-creation loop	G0: 叙事与活动原型；G1: 权利和场地复核	来源可追溯、文化审校、活动后 release note	来源无法证明或误导风险出现即撤展/修订

Public-service order: publish the problem and human route first, then authorize and review professionally; any missing responsibility, evidence, rights or safety gate keeps G0, freezes or exits.

Figure 10 | Taskbook, public space and annual operation

agent.4 public space · agent.5 cultural narrative · agent.6 global events/long-term operation; all remain G0 concept evidence

agent.4 Public space

Three landmarks bring problems, human override and exit rules into daily space.

L-01 Open Problem Mile Marker · L-02 Calibration Court · L-03 Human Override Beacon

agent.5 Cultural narrative

Timeline + problem line + human-service line; heritage review remains pending.

Centennial Jing-Zhang / Zhongguancun / AI culture

agent.6 Annual operation

Spring publish, summer walk, autumn protocol camp, winter v0.x check; release notes retain the trail.

Public Problem Week · Xiaoyue River walk · Protocol Camp · City check

Four-season rhythm: make version governance visible in public time

Spring | Public Problem Week

Problem, data boundary, human Q&A

Summer | Xiaoyue River Walk

Older people, workers, accessibility seats

Autumn | Developer Protocol Camp
Authorization, exit and explainable G0 protocol

Winter | City v0.x Check

Keep, pause, revise and data gaps

Five conceptual families: spatial carrier → G0 gate → professional review → reversible release

PF-01
Human buffer and community retention

PF-02
Reskilling and night wellbeing

PF-03
City API and data governance

PF-04
Xiaoyue River blue-green and human-machine test

PF-05
Culture, landmarks and global co-creation loop

This board resolves only package JSON and taskbook relations; it is not an official score, confirmed event, operator, heritage permit, partnership or field result.

Seven-dimension professional review evidence map

REVIEW MAP

28 evidence refs · 7 questions

not an official score

01 · Brief alignment

Does the brief become a traceable chain?

taskbook · scenarios · spatial anchors
compliance matrix · GeoJSON

Next gate: official boundary and annexes

Structural evidence, not an official score

02 · Differentiation

More than an AI label on a plan?

ordinary arrival → staffed takeover
bounded simulation → freeze/exit

Next gate: entry conditions and observers

Counterfactual option, not a site result

03 · AI-native innovation

Can machine interfaces stop and be liable?

authorization · logs · human takeover · G0
ordinary movement stays protected

Next gate: data and safety rehearsal

Rule prototype, not deployment or permit

04 · Deepening path

What is the G0-to-review order?

roles · acceptance · freeze · exit
no construction or funding promise

Next gate: rights, fire, accessibility

Process evidence, not engineering commitment

05 · Public interest

Who stays outside an automated gate?

residents/older people · at-risk workers
paper/voice · staff · appeal · exit

Next gate: community and access walk-through

Design lens, not demographic or jobs data

06 · Risk and compliance

Are formal, background and provisional layers clear?

source registry · rights ledger
no authorization/responsibility/safety → G0

Next gate: official annexes and responsibility

Boundary disclosure, not compliance approval

07 · Expression and traceability

Can maps, HTML and PDF return to one evidence set?

GeoJSON · metrics · bilingual · 28 refs
deterministic runner · full-recompute trigger

Next gate: professional visual and text review

Traceable expression, not merge or publication

Review order

Brief → differentiation → spatial rules → G0 gates → public interest → risk layers → visual readback; any official-data change triggers geometry / metrics / figures / HTML / PDF / self-check together.

official_boundary=false · geometry_role=provisional_constraint · operational_status=not_authorized_not_run · performance_results=null · not_an_official_score=true

Human City in the AI Era · G0 Ordinary-Person Journey Receipt

enter · choose · bounded service · human takeover · appeal and withdrawal · independent replay

G0 concept

HOLD not open

0 authorisations · 0 field observations

Four routes keep ordinary service visible

Route cards reuse the existing ordinary journey contract and its conceptual spatial references

ROUTE-01 · SCN-03

Intergenerational learning and human entry

P-01 · P-06 · PUBLIC-03

ordinary route · paper / voice / staffed

no human takeover means return to G0

ROUTE-02 · SCN-06

Civic service and data boundary

P-05 · SCN-06 · SERVICE-ZONE-02

staffed service with no data call

unclear purpose means pause the request

ROUTE-03 · SCN-04

Night service and safety review

P-03 · PUBLIC-04 · LAND-07

staff confirm the ordinary route first

no safety review means no time expansion

ROUTE-04 · SCN-02

Reskilling and autonomous choice

P-02 · PUBLIC-02 · LAND-03

human consultation beside choice

unclear exit means no automated routing

Five receipt steps keep handoffs actionable

Enter and choose

01

ordinary route stays visible

Request bounded service

02

purpose and data scope first

Take over or freeze

03

stop before unsafe continuation

Appeal, withdraw and leave

04

paper, voice or staffed fallback

Independent replay

05

expand, repair or exit

Offline replay readout

negative 5 / 5 · controls 3 / 3 · acceptance 6 / 6

rollback 5 / 5 · routes 4 / 4 · network calls 0

result not_run · field observations 0 · performance null

structural replay makes the contract readable, not field evidence

Current boundary and write-back

authorisations 0 · baseline unknown · operational not_authorized_not_run

choice, purpose, takeover, appeal, withdrawal and replay fields remain

missing ordinary route, human role or independent replay keeps HOLD

no resident experience, service performance, permit or implementation claim

AI Is Optional and the City Keeps Running

AI ERA · OFF CITY ON · G0 / HOLD · 0 AUTHORIZATION · 0 FIELD DATA

HOLD
not run · baseline unknown

ROUTE-01 · Intergenerational learning
Human explanation and screen-free learning → bounded prompts
Freeze if takeover is missing and retain human learning and wayfinding

ROUTE-02 · Civic API
Staffed service without a data call → bounded public retrieval
HOLD on unclear rights or accountability and retain paper and redress

ROUTE-03 · Night service
Staffing and paper rules → bounded safety prompt
Stop without night review and retain ordinary passage and human return

ROUTE-04 · Reskilling
Human consultation → choice-led information matching
HOLD when exit is unclear and retain human advice and the withdrawal record

Reading order
First ask whether ordinary service can complete the task, then ask whether AI is only a bounded gain
Freeze on takeover, rights, night-safety or exit failure, remove the digital layer and retain public service
4 negative HOLD · 3 positive controls · performance_results null · not an official score

Source contract: visual/assets/ai-era-off-city-on-contract.json · Concept contract only · provisional geometry · no field claim

Human continuity and maintenance receipt

Ordinary routes come first. AI stays reversible. Public service and responsibility survive shutdown.

G0 · HOLD · NOT RUN

Four states for a reviewer to replay

Three key areas, one continuity receipt

7 MAINTENANCE ROLES

Public-service desk · accessibility and fairness review · data and consent owner

Night safety and incident handoff · space and facility maintenance

Culture and rights review · independent public replay

Roles are proposed responsibility interfaces, not confirmed institutions or operating commitments.

W01 → W12 conceptual review windows

Sources and entry · paper replay · screen-free check · consent review · AI boundary · stop replay

Maintenance handoff · appeal and exit · spatial replay · public replay · withdrawal note · stage decision

Every window is a design target. Without authorization, field data, or professional sign-off, the result stays at G0.

Concept contract · 0 authorizations · 0 field observations · baseline unknown · performance not_run · provisional boundary · not an official score

A City for People in the AI Era | Spatial Decision Receipt

Protect ordinary routes first, then decide how AI enters space · HOLD / synthetic tabletop

Three spatial organizations

One node, three drawings that can be challenged

ALT-C pilot: ordinary route, takeover, blackout and maintenance precede the removable AI island

EVIDENCE BOUNDARY

Participant-authored concept dimensions only—not surveyed, statutory, engineering, tender or as-built dimensions; 0 authorisations, 0 field observations, HOLD.

One pilot delivery receipt keeps “who does it” behind a release gate

Conditional 18-week path · transparent cost formula · unconfirmed RACI · SLA and retirement triggers

SIX-STEP CONDITIONAL DELIVERY PATH

DESIGN COST ESTIMATE · NOT A TENDER PRICE

CAPEX ¥655,500–1,000,500

C01	survey, design and professional reviews	¥80k–120k
C02	reversible fit-out and staffed desk	¥180k–260k
C03	ordinary route, wayfinding and accessible interfaces	¥90k–150k
C04	removable AI and offline service hardware	¥140k–220k
C05	testing, training, closeout and reinstatement	¥80k–120k

Formula: line-item sum × 1.15 contingency

OPEX / MONTH ¥32,780–54,340

Staffing, maintenance, paper/translation/accessibility and data audit × 1.10 reserve

RACI ASSET HANDOFF · ORGANISATIONS UNCONFIRMED

ASSET	RESPONSIBLE	ACCOUNTABLE	CONSULTED
public route and floor	site works contractor	public-asset owner	accessibility and fire reviewers
staffed service and paper route	public-service operator	service commissioning body	community and accessibility reviewers
removable AI island	prototype supplier	pilot operator	data, safety and accessibility
data, logs and complaint record	data-protection role	service commissioning body	independent reviewer
decommissioning and reinstatement	maintainer and site works contractor	public-asset owner	operator and community observer seat

Every accountable role must be named and sign before procurement; current status=role_unconfirmed.

FIVE SLA TARGETS · NONE OBSERVED

- 1 ordinary route and staffed or paper completion remain available throughout every public service
- 2 a stop trigger isolates the AI island within 2 minutes without closing the ordinary route
- 3 a complaint receives acknowledgment within 1 working day and a status within 5 working days
- 4 opening and closeout checks are signed for route, desk, paper stock, power isolation and maintenance
- 5 a critical accessibility, fire, privacy or consent failure reduces AI service capacity to zero

Retirement: isolate and remove the island, cap interfaces, restore floor, retain ordinary service, notify, close

PROCUREMENT + RELEASE BOUNDARY

Open only after a named owner, verified geometry, professional sign-offs, consented anonymised walkthrough evidence, confirmed cost and an independent decision. No organisation, budget, supplier, insurance or field result is confirmed.
