

Concept & Spatial Structure / A Century on the Smart Rail | v0.3 · 2026-08-08

1909 Zhan Tianyou built the Jing-Zhang Railway; 2026 the same corridor hosts an AI innovation belt. Railway semantics (station/track/corridor/crossing/timetable) are translated into spatial grammar: master name Jing-Zhang Smart Rail, 4-level naming (belt—station—corridor—node), logo as zigzag 'zhi' motif (ren-shaped track + letter Z + data pulse), JZ blue / smart-rail light palette.

Smart Rail belt north-south; Origin Station (ideas), Acceleration Station (Zhongzhiyuan), Bell Station (Dazhongsi); Zhongguancun service wing (factors), Xiaoyuehe scenario wing (validation). Five functions explicitly mapped to spatial carriers.

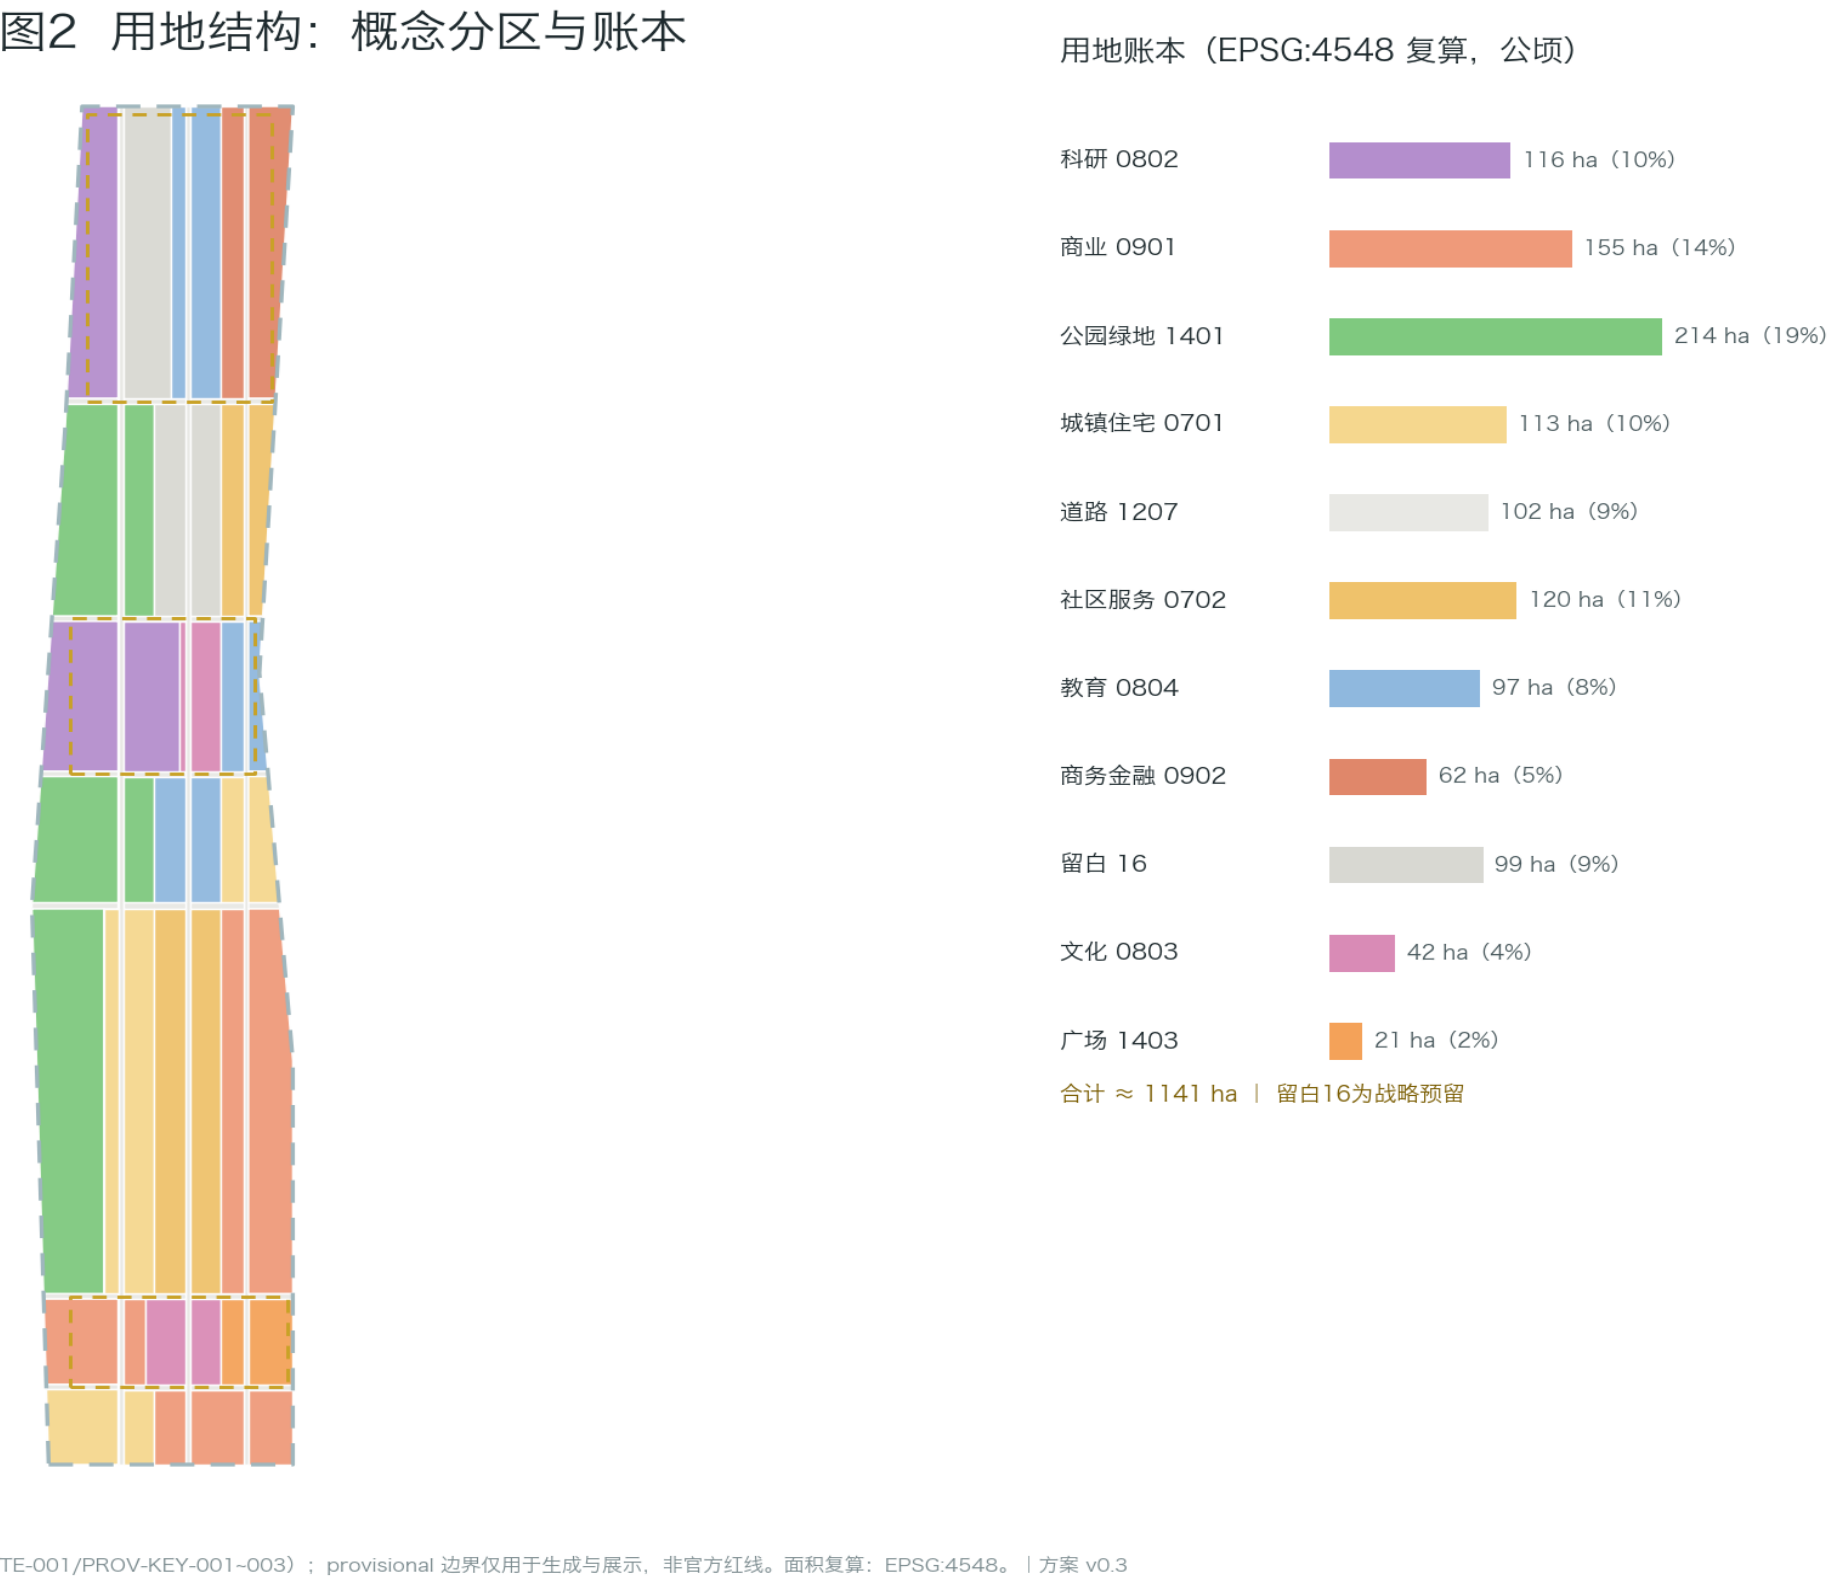

五大功能 / Five functions	空间载体 / Spatial carrier
AI full-stack innovation	Zhongzhiyuan: compute/eval clusters, marshalling yard, green compute
World-class AI ecosystem	Origin: mixed blocks, open-source market, collaboration stations
AI+ scenario paradigm	12 passports + Departure Protocol (3 industry-test cards)
Intelligent vibrant city	Smart Rail corridor, smart-native commerce, waterfront strip
Global governance voice	Governance plaza, Bell Witness, model-card registry, forum

卡	准入	RACI	KPI	停止/申诉/期限
S01 AI tutoring block	Institution-led + parental consent	School/district/teachers	Term satisfaction	停-Privacy incident → stop 申-Parent & school 删-Deleted end of term
S02 Open-source market	Open registration + OSS license	Committee + operator	Projects/conversions	停-Order risk → pause 申-Organizer 删-No personal data
S03 Researcher station	Inter-institutional agreement	University alliance + operator	Utilization/outputs	停-Data violation → stop 申-Institutional appeal 删-Destroyed per agreement
S04 LLM eval sandbox ★	3rd-party + red-team vetting	Evaluator/governance/safety officer	Reports/fix rates	停-Major safety event → stop 申-Public appeal + review 删-Isolated retention
S05 Robotics proving ground ★	Enclosed + safety assessment + insurance	Operator/regulator/emergency	Success/incident rates	停-Incident → stop + postmortem 申-On-site + witness 删-Anonymized sensors
S06 Autonomous shuttle ★	Limits + sandbox permit + attendant	Operator/traffic police/attendant	Ridership/takeover rate	停-Takeover over limit → stop 申-Passenger + public 删-Trip data deleted
S07 Dispatch center	Open application + review trail	Operator + 3rd-party review	Scenarios/graduation	停-Review violation → pause 申-Appel + review 期-Limited-term retention
S08 Smart-native district	Merchant compliance + consent	District operator + regulator	Experience/complaints	停-Data violation → stop 申-Consumer channel 期-Minimal consumption data
S09 Urban vital signs	Statistical caliber + anonymization	Data office + 3rd-party audit	Coverage/accuracy	停-Anonymization failure → stop 申-Data objection 期-Statistics only
S10 Cultural AI guide	Content review + expert check	Culture dept + operator	Usage/corrections	停-Factual error → freeze 申-Visitor feedback 删-No location stored
S11 Waterfront test strip	Ecological review + device disclosure	Water/subdistrict/operator	Pilots/eco impact	停-Ecological impact → stop 申-Resident feedback 删-Anonymized sensing
S12 Community health station	Licensed + voluntary	Medical/subdistrict/practitioners	Service comt/satisfaction	停-Medical incident → stop 申-Resident + patient 删-Minimal retention

Protocol, Regional Synergy, Phasing & Risk | v0.3 · 2026-08-08

Departure Protocol: 1. Issue → 2. Review → 3. Sandbox → 4. Bell Witness → 5. Depart → 6. Postmortem → 7. Rollback

- 1. Issue: public submission, full trail, appealable
- 2. Review: Origin Community — provenance/idea/public-interest gate
- 3. Sandbox: Zhongzhiyuan — controlled validation, admission & stop thresholds
- 4. Bell Witness: Dazhongsi — public witnessing & honor records
- 5. Depart: into real city scenarios, time/area limited
- 6. Postmortem: Xiaoyuehe back-testing, feedback returns
- 7. Rollback: pause, withdrawal & site restoration

P1-P7 项目闸门：进入=前置材料/主体/预算/许可齐备；退出=KPI未达/安全事件/公众否决/复盘结论发现即暂停或撤回。

协同对象	能力互补	接口	数据/边界
Beiwai community	Youth living & community trials	Xiaoyuehe wing north extension	No personal data sharing
Future Science City	Basic research & frontier facilities	Zhongzhiyuan eval/compute interface	Data stays in-domain
Huairou Science City	Big-science facilities & original innovation	Origin research corridor	Outputs by agreement
E-Town	Intelligent manufacturing & landing	Dazhongsi southbound uptake	Authorized use
Jing-Jin-Ji	Regional talent/scenarios/markets	Belt annual-event radiation	Public outputs reusable

- Phase 1 Ignite 2026-27 （2,370,155 m²）：Origin demo: stele, market, first scenario pilot
- Phase 2 Form 2028-29 （5,861,693 m²）：Full line + Zhongzhiyuan: sandbox/proving-ground operations
- Phase 3 Mature 2030-33 （3,180,994 m²）：Dazhongsi bell segment and belt-wide network

风险八维：Data privacy(Minimization, anonymized aggregation, licensed health review)；Implementation complexity(Lightweight reversible pilots first, phased)；Public acceptance(Disclosure, appeal channels, opt-out/detour)；Operations cost(Reuse existing operators, phased evaluation)；Policy uncertainty(All marked pending confirmation, no numeric promises)；Spatial dispute(Time/zone separation, reversible kit, heritage/blue-line buffers)；Technology maturity(Controlled test + regulatory sandbox, human takeover)；Equity & inclusion(Accessibility, equivalent human channels, non-digital alternatives)

Status: AI-generated conceptual design. All spatial ideas are conceptual suggestions / reference schemes for professional teams — not statutory planning, approval, engineering conclusions or investment commitments. Official precise redlines are missing; provisional repo boundary used; full recalculation upon official data release.
