

01 / Jing-Zhang Profile | Overall concept + spatial structure

One public spine, three proof stations, six civic handoffs: ordinary routes first, models second.

02 / Land-use structure | designed mix, not residual space

Four bands translate a public spine into buildable, reversible spatial packages.

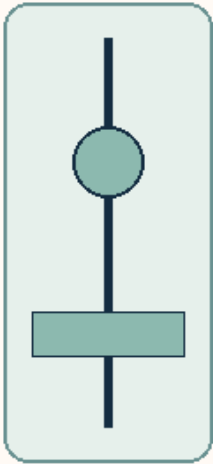

03 / Three proof stations | one spine, three civic capabilities

Each station has a spatial anchor, ordinary route and specialist gate.

04 / Walk, water, people and robots | one shared public seam

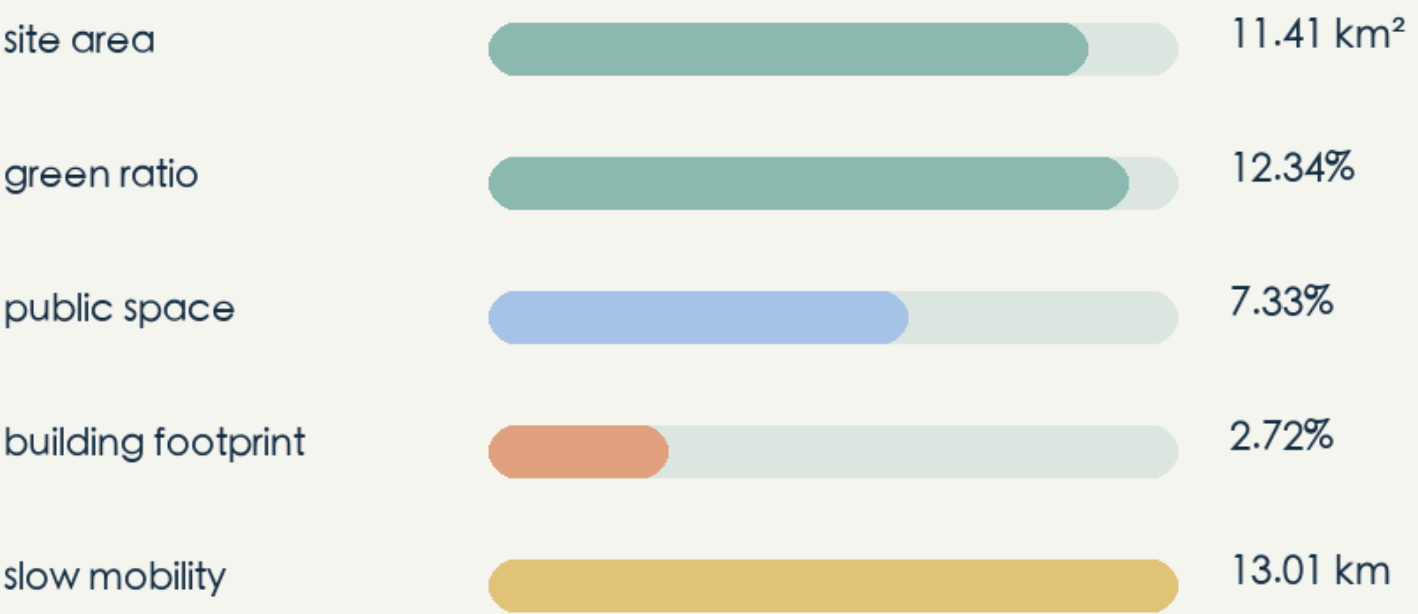

Six operating checks keep the model offline-safe and the city usable when the model is absent.

05 / Metrics first ask: can we recompute?

Three states, six components, one auditable delivery contract.
