

Giving the Character 人 Back to Jing–Zhang

REN AXIS

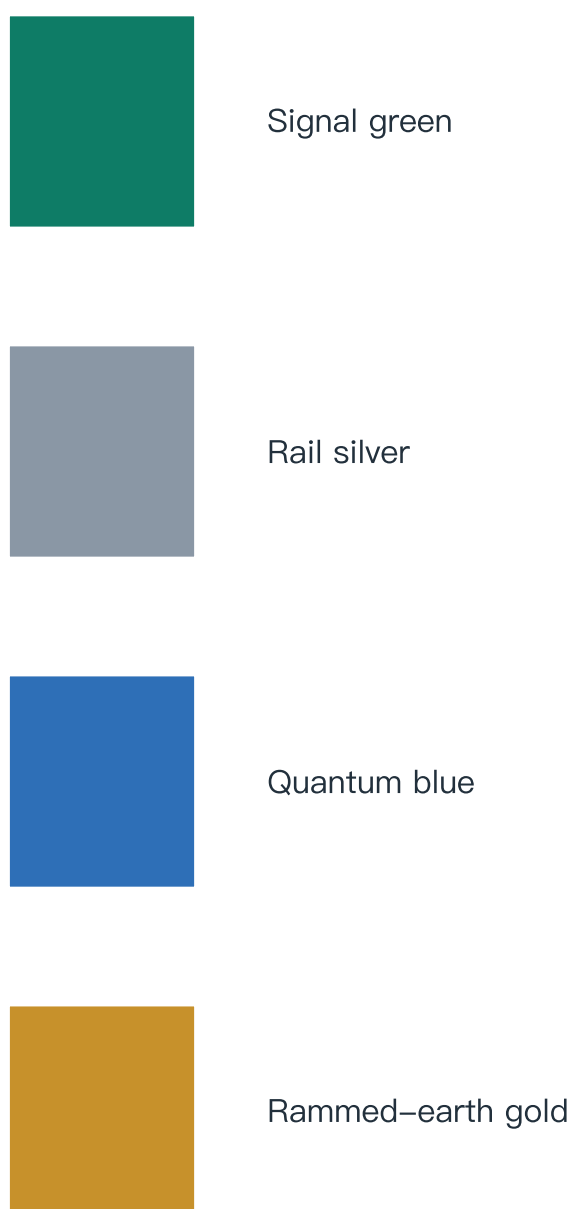

Centennial Jing–Zhang AI Innovation Belt · AI-generated concept proposal

One axis, two arms, three stations, two wings — the future and heritage arms fork at the REN Gate

Logo direction: two rails converge into 人
Isomorphic with the real fork x gradient ascent

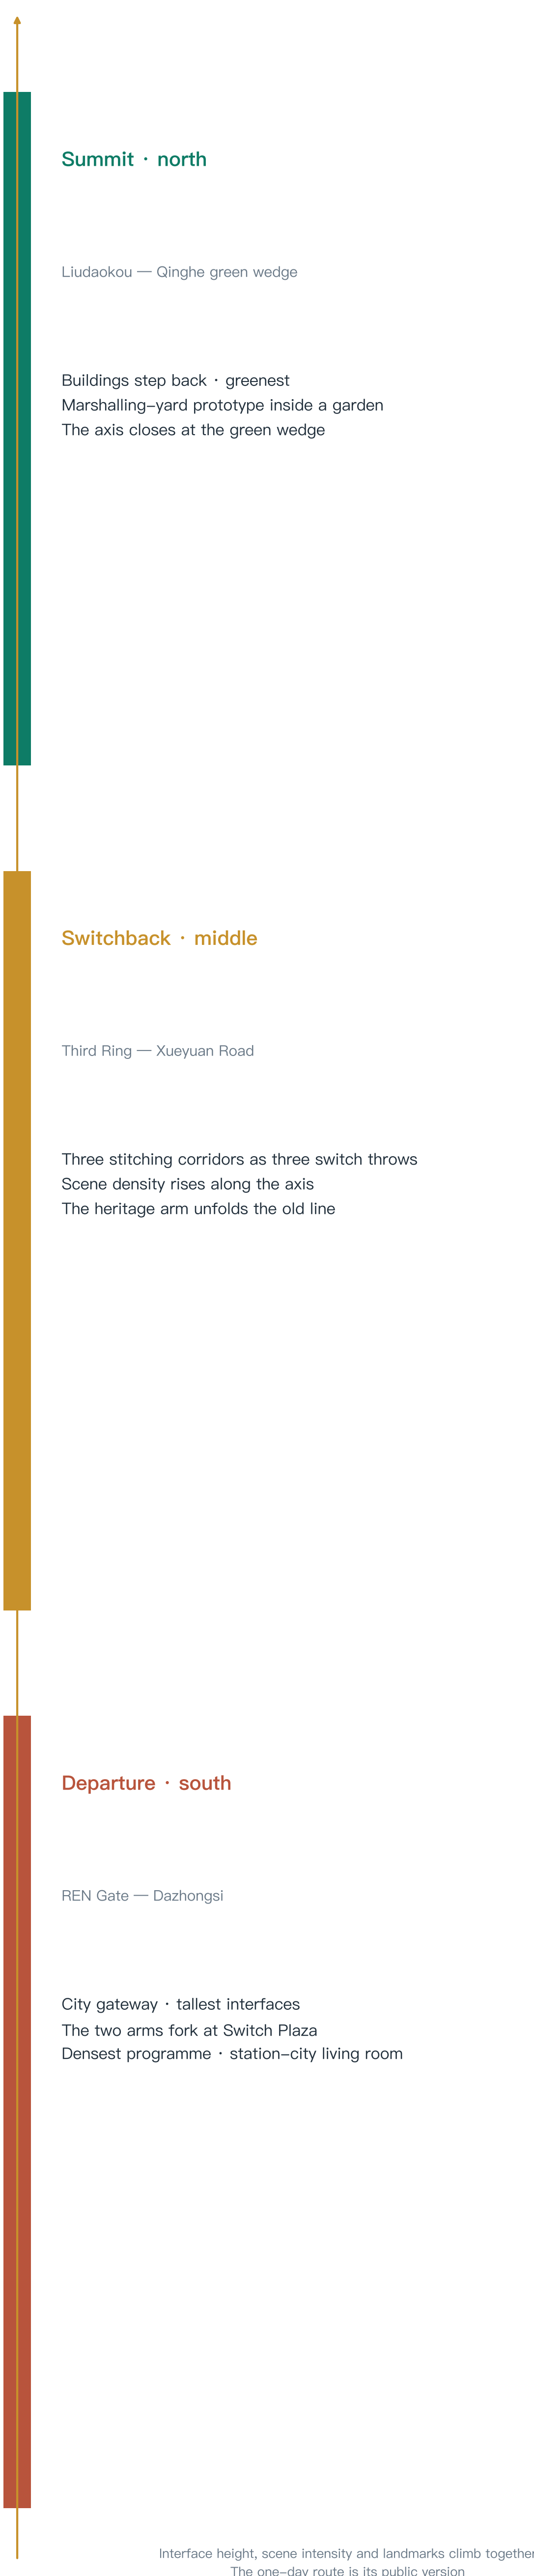

Visual identity (concept)

Wordmark: REN AXIS

*Trademark search and clearance required before formal use

Gradient narrative: a climb one century long

Naming system (concept)

Main name: REN AXIS · Centennial Jing–Zhang AI Innovation Belt
Sub-systems: three stations · switch nodes · signal honours · K-markers
*Trademark search required before formal use

Three positions x five functions

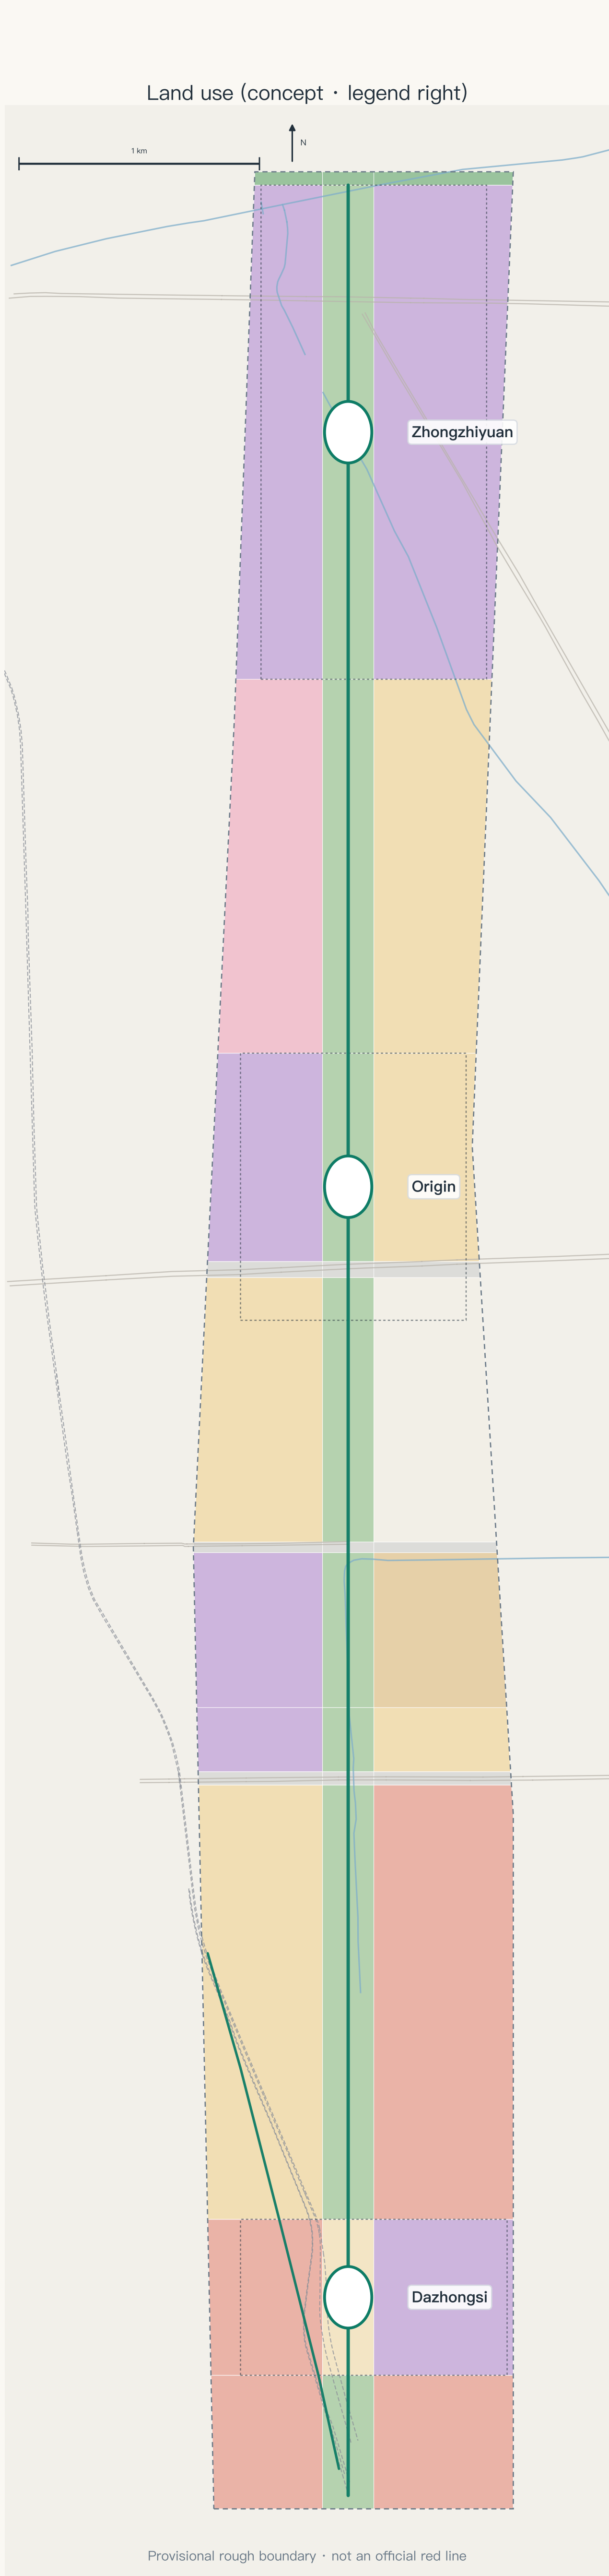

Century cultural belt → K-markers · landmarks · station memory
Urban AI life belt → Xiaoyuehe wing · 12 scenarios
AI convergence belt → three-station, two-wing ecosystem
Full-stack → Zhongzhiyuan · Ecosystem → Origin
AI-native business → Dazhongsi

Collaboration loop

Origin (research) → Zhongzhiyuan (engineering)
→ Dazhongsi (product) → Zhongguancun (capital)
→ Xiaoyuehe (validation) → back to research
Regional: Future Science City · Huairou · Economic Development Area · Jing–Jin–Ji

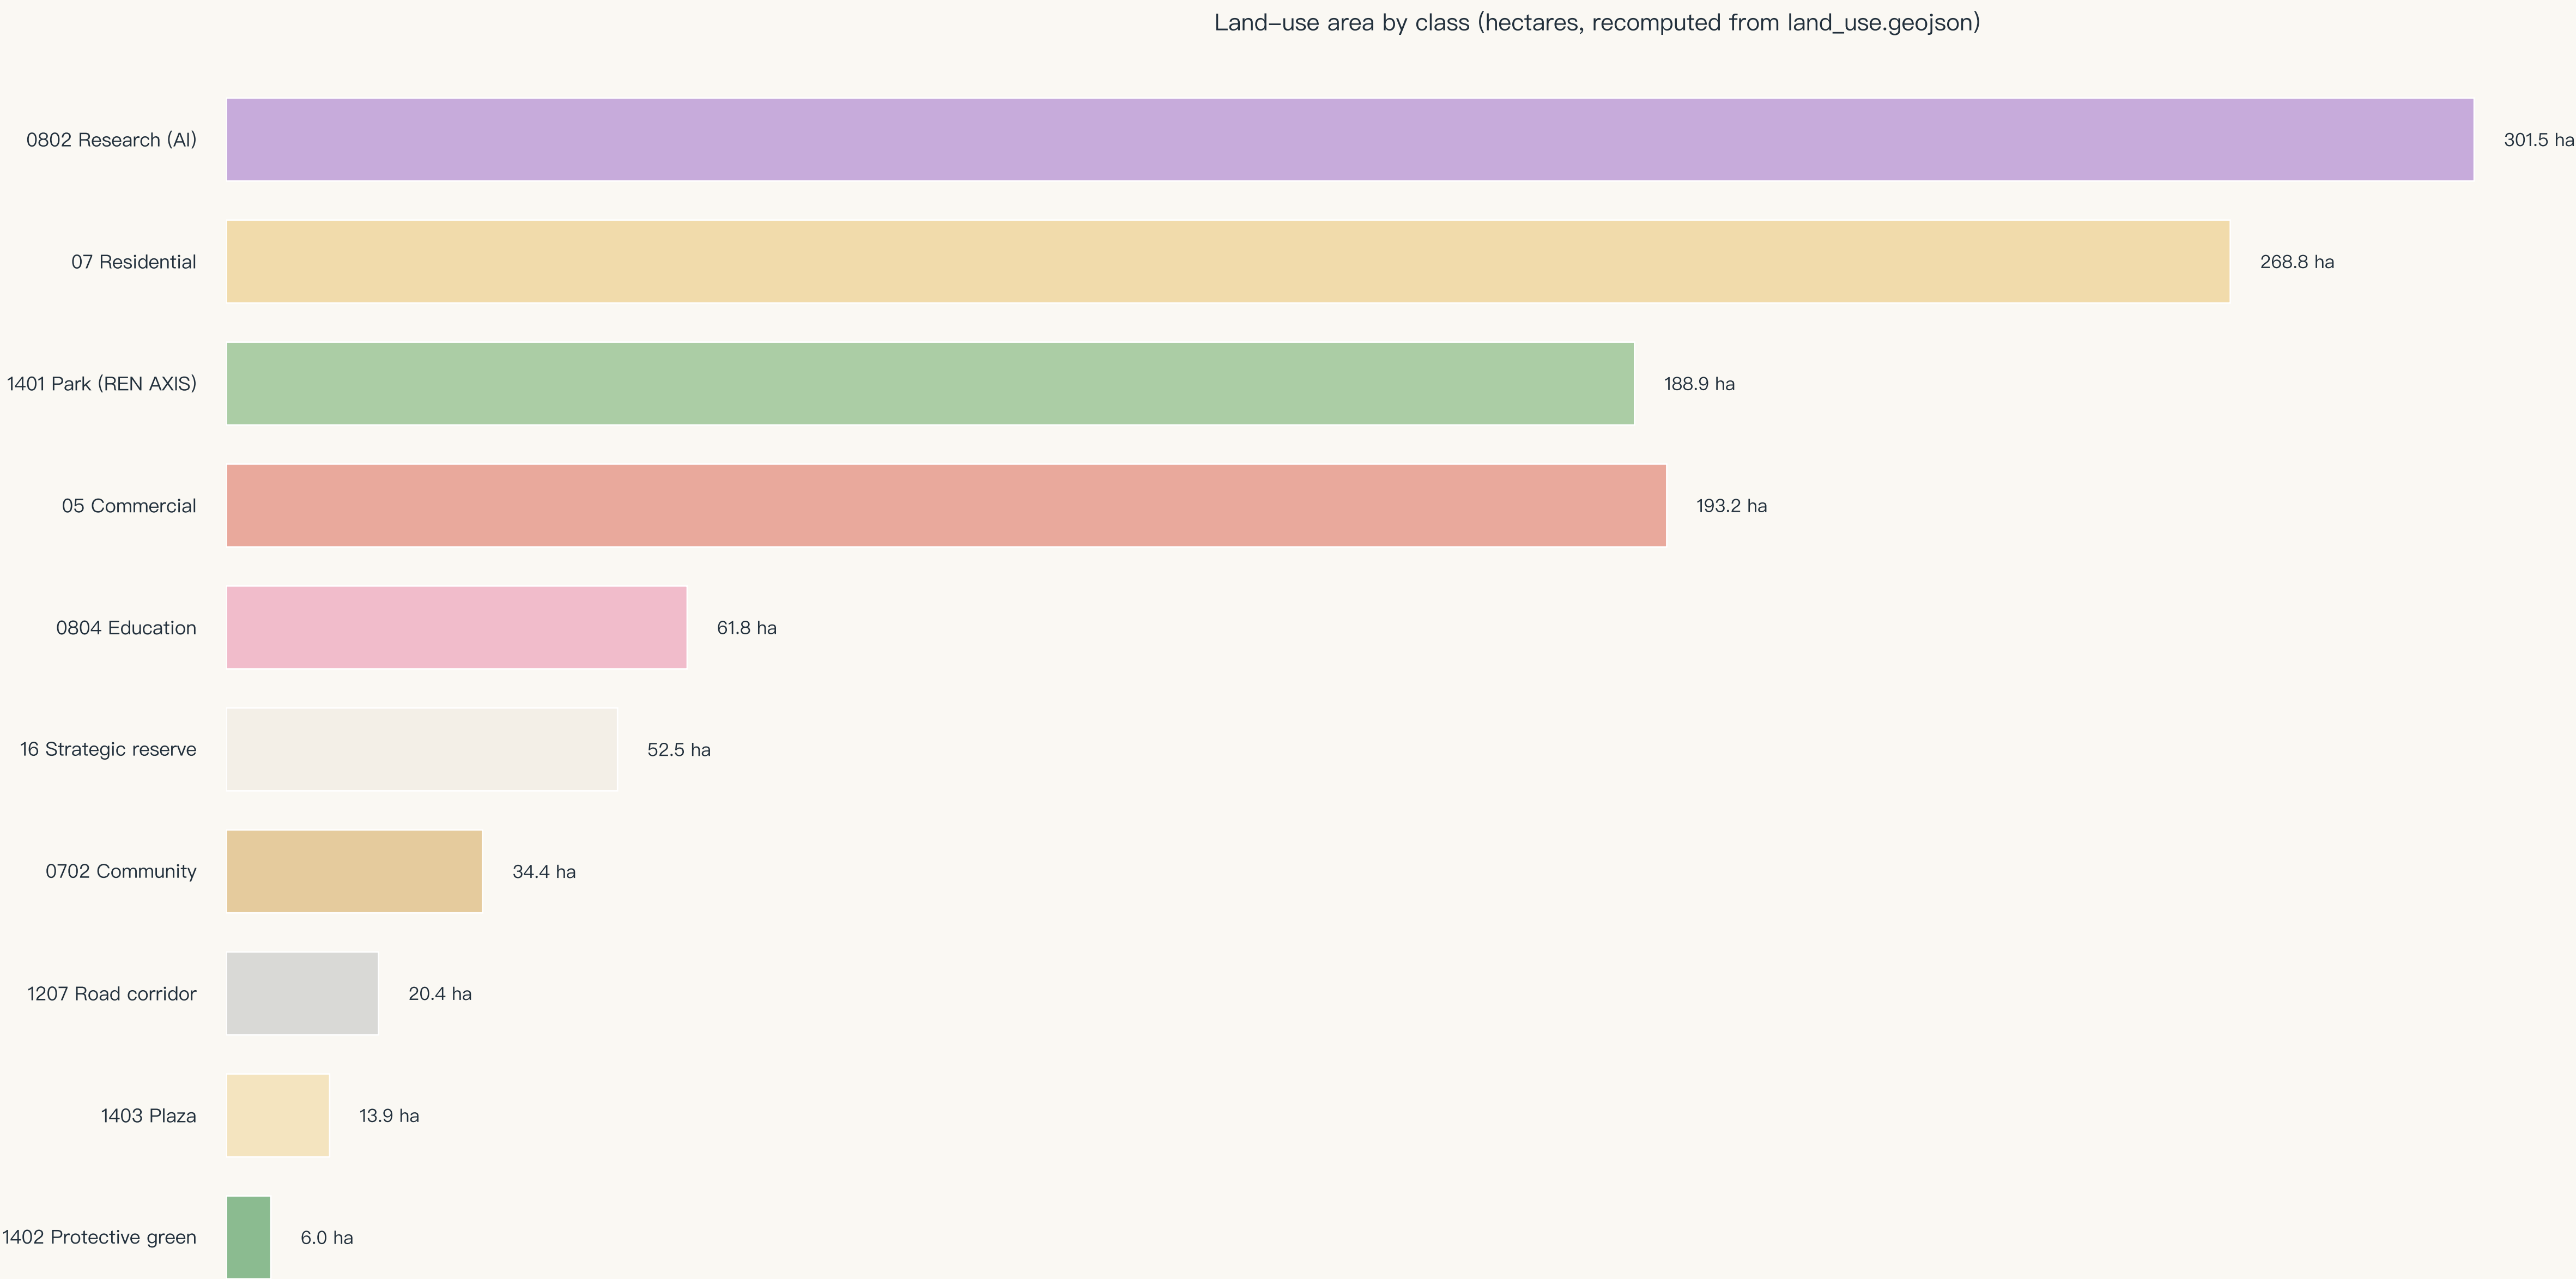

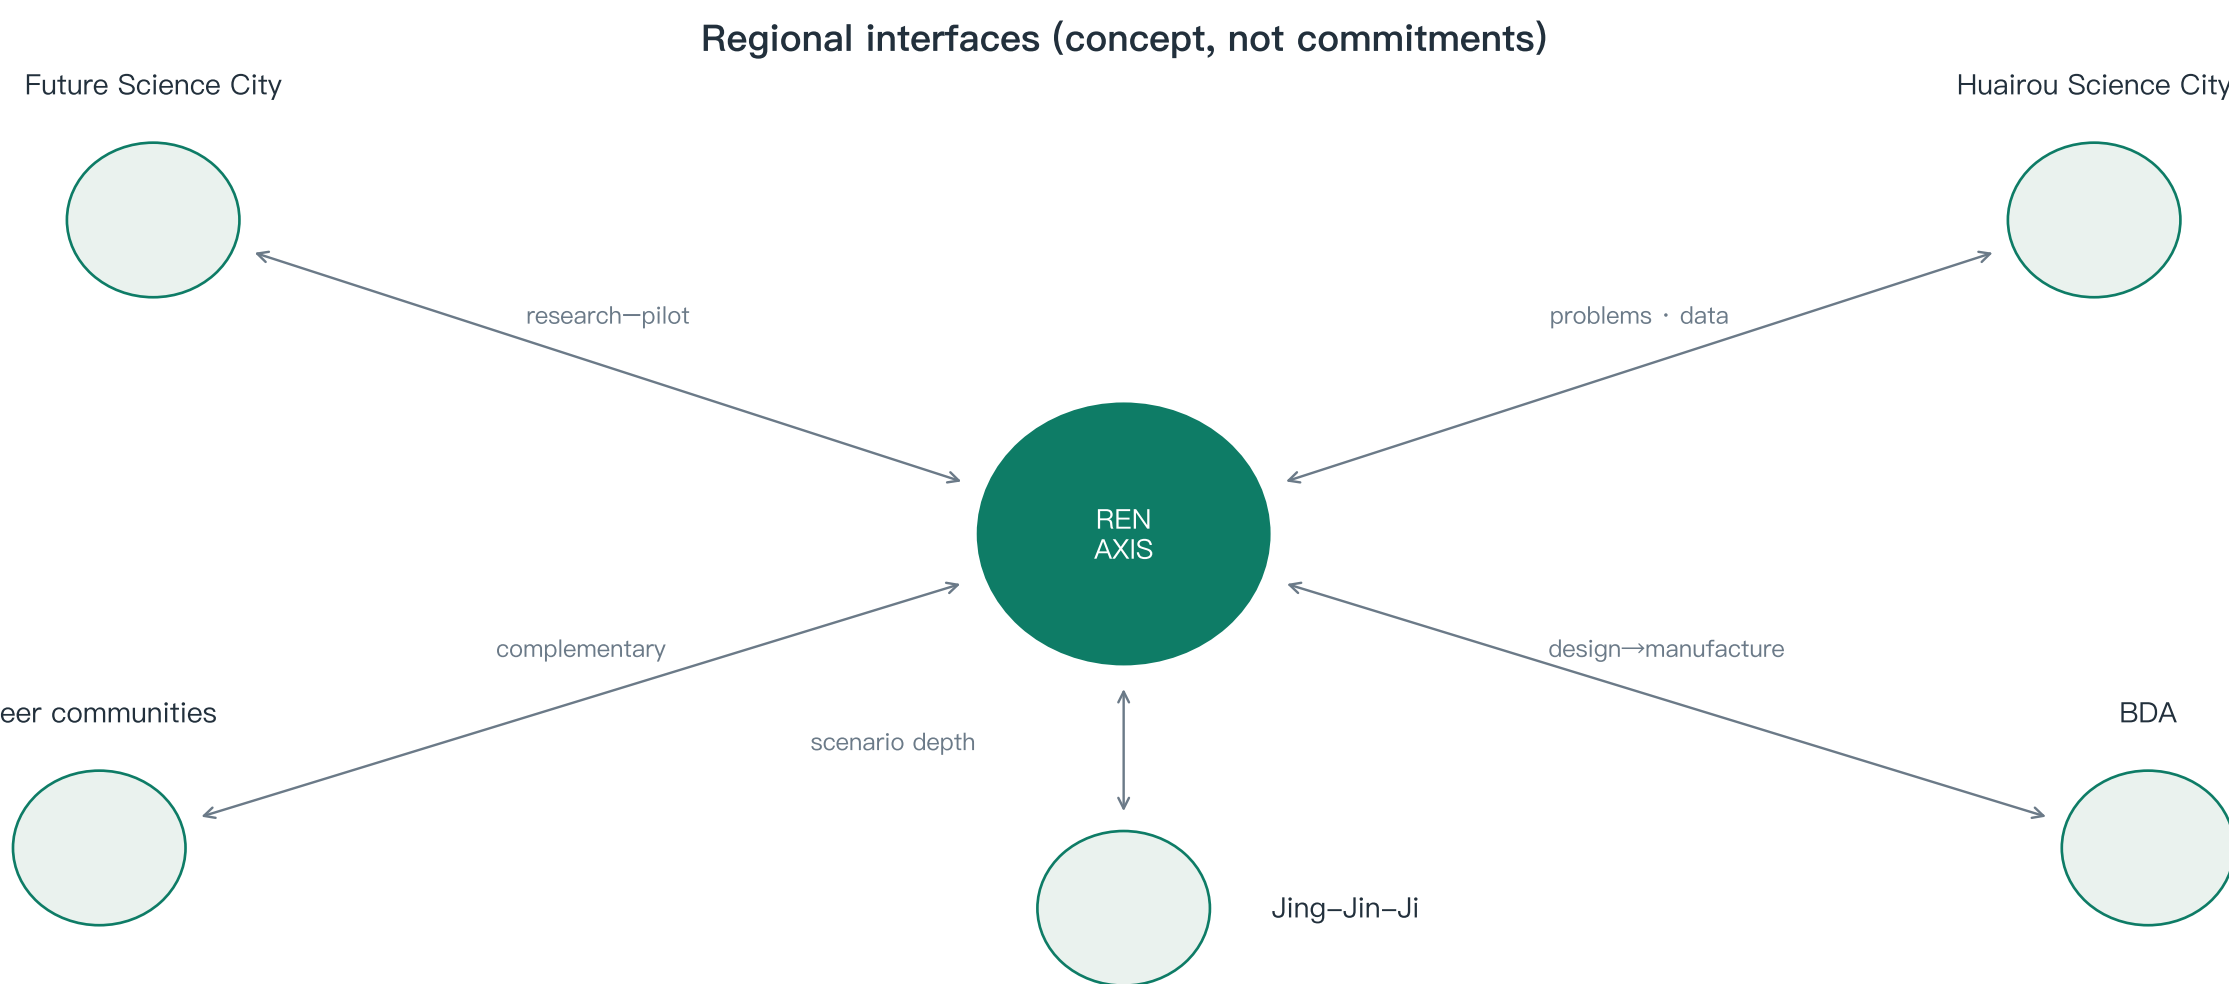

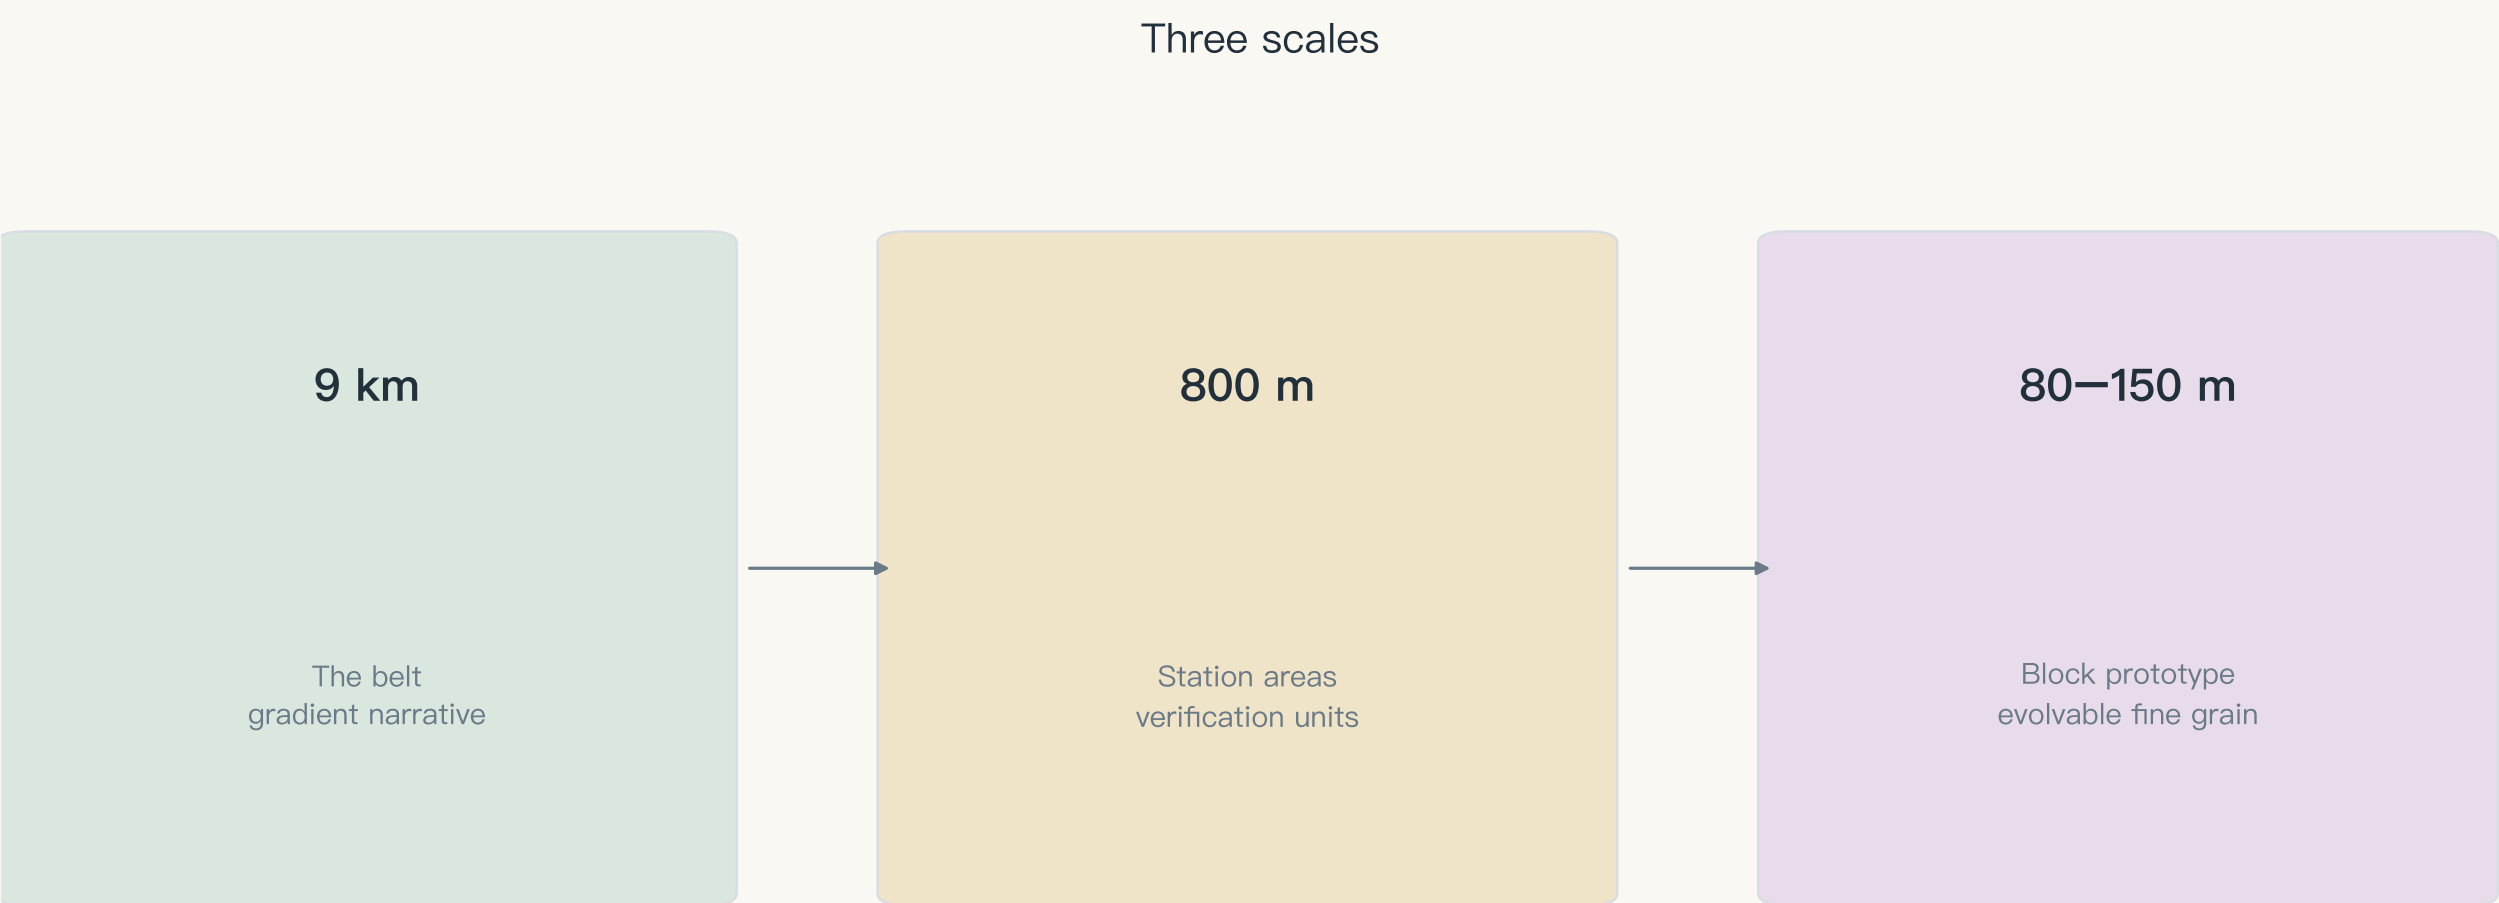

Three scope levels, one transmission; thirty-nine land-use cells in one pass

Research 43.6 km² → design 11.4 km² → key areas 368.4 ha; thirty-nine cells, complete division, no overlaps, gap below tolerance

Structure notes

- Research land 301.5 ha, the largest class: the AI industrial backbone
 - Park land 188.9 ha runs the full length of the axis
 - Residential + community 303.2 ha supports live-work balance
 - Three road corridors form the east-west stitching interfaces
 - Reserve 52.5 ha holds long-term flexibility
- *All concept suggestions, subject to the statutory plan

Evidence class

■ official fact · announcement figures and tasks

■ OSM concept alignment · existing alignments and points (concept level)

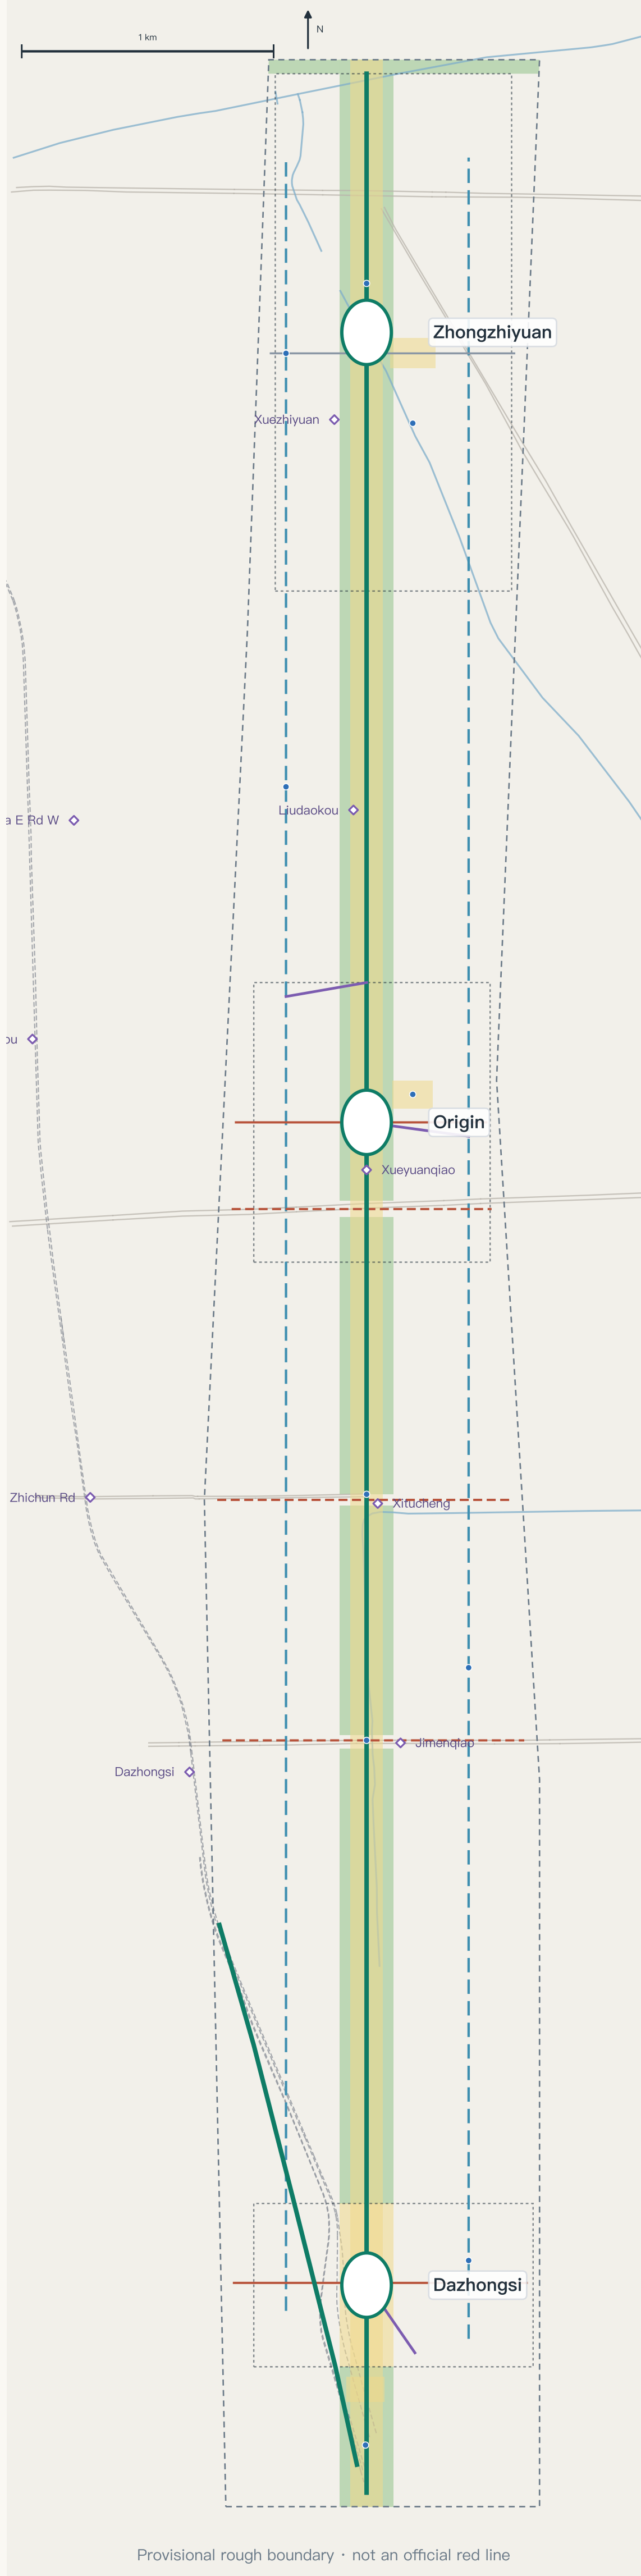

■ provisional proposal · this proposal's spatial suggestions (provisional)

Data: submissions/Abreto/ren-axis-jingzhang-ai-belt geometry/*.geojson and metrics.json (recomputed in EPSG:4548) · Existing features © OpenStreetMap contributors (ODbL) · Boundary is a provisional substitute; not valid as an official red line or precise area basis

36.6 km of slow-mobility network, stitching a severed belt back into the city

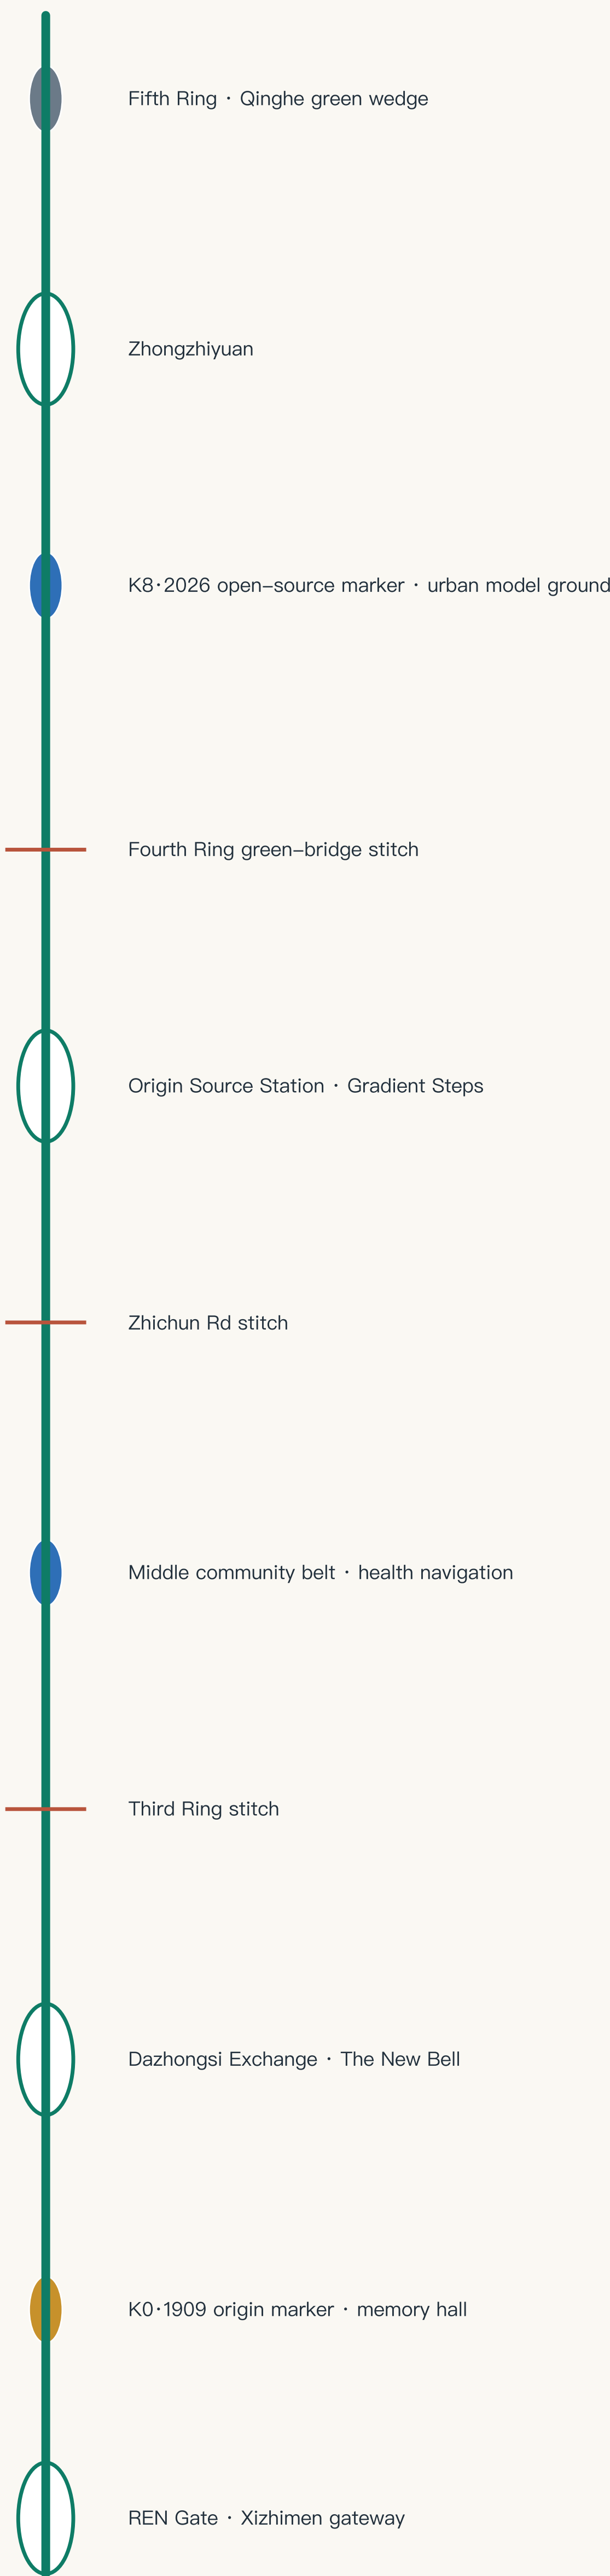

Slow-mobility and interchange network 36.6 km · green ratio 17.1% · public space ratio 11.8% (includes the axis band)

Slow mobility, interchange and blue-green (concept alignments; ◇ existing rail stations, OSM)

REN AXIS promenade Stitching / pedestrian link AI scenario node
Wing cycle routes Rail interchange (indicative)

REN AXIS route diagram (south → north)

Three stitching strategies (concept)

Option ① Green bridge: overpass link study at Fourth Ring / Xueyuandao
Option ② Underpass: improvement study at the Third Ring node
Option ③ At-grade crossing: signal timing study at Zhichun Road
*Three parallel options, compared per corridor; selection requires professional appraisal

Station-city integration (research suggestion)

Dazhongsi: four-quadrant pedestrian link + interchange
Toward Wudokou / Tsinghua East Road West Gate: connection
Station positions indicate the public network only
Cycles: stacked parking organised at the forecourt

Continuous blue-green system

Green space 194.9 ha (17.1%)
Meets Qinghe in the north · answers Xiaoyuqie in the east
Public space 134.2 ha: four plazas + promenade activity band
Edge computing pods share poles with smart posts along the axis

Evidence class

official fact · announcement figures and tasks

OSM concept alignment · existing alignments and points (concept level)

provisional proposal · this proposal's spatial suggestions (provisional)

Data: submissions/Abreto/ren-axis-jingzhang-ai-belt geometry/*.geojson and metrics.json (recomputed in EPSG:4548) · Existing features © OpenStreetMap contributors (ODBL) · Boundary is a provisional substitute; not valid as an official red line or precise legal basis

A0 board · Transport, rail, slow mobility and utilities · REN AXIS (AI-generated concept, provisional boundary)

Three stations, three characters: garden · campus–adjacent · urban

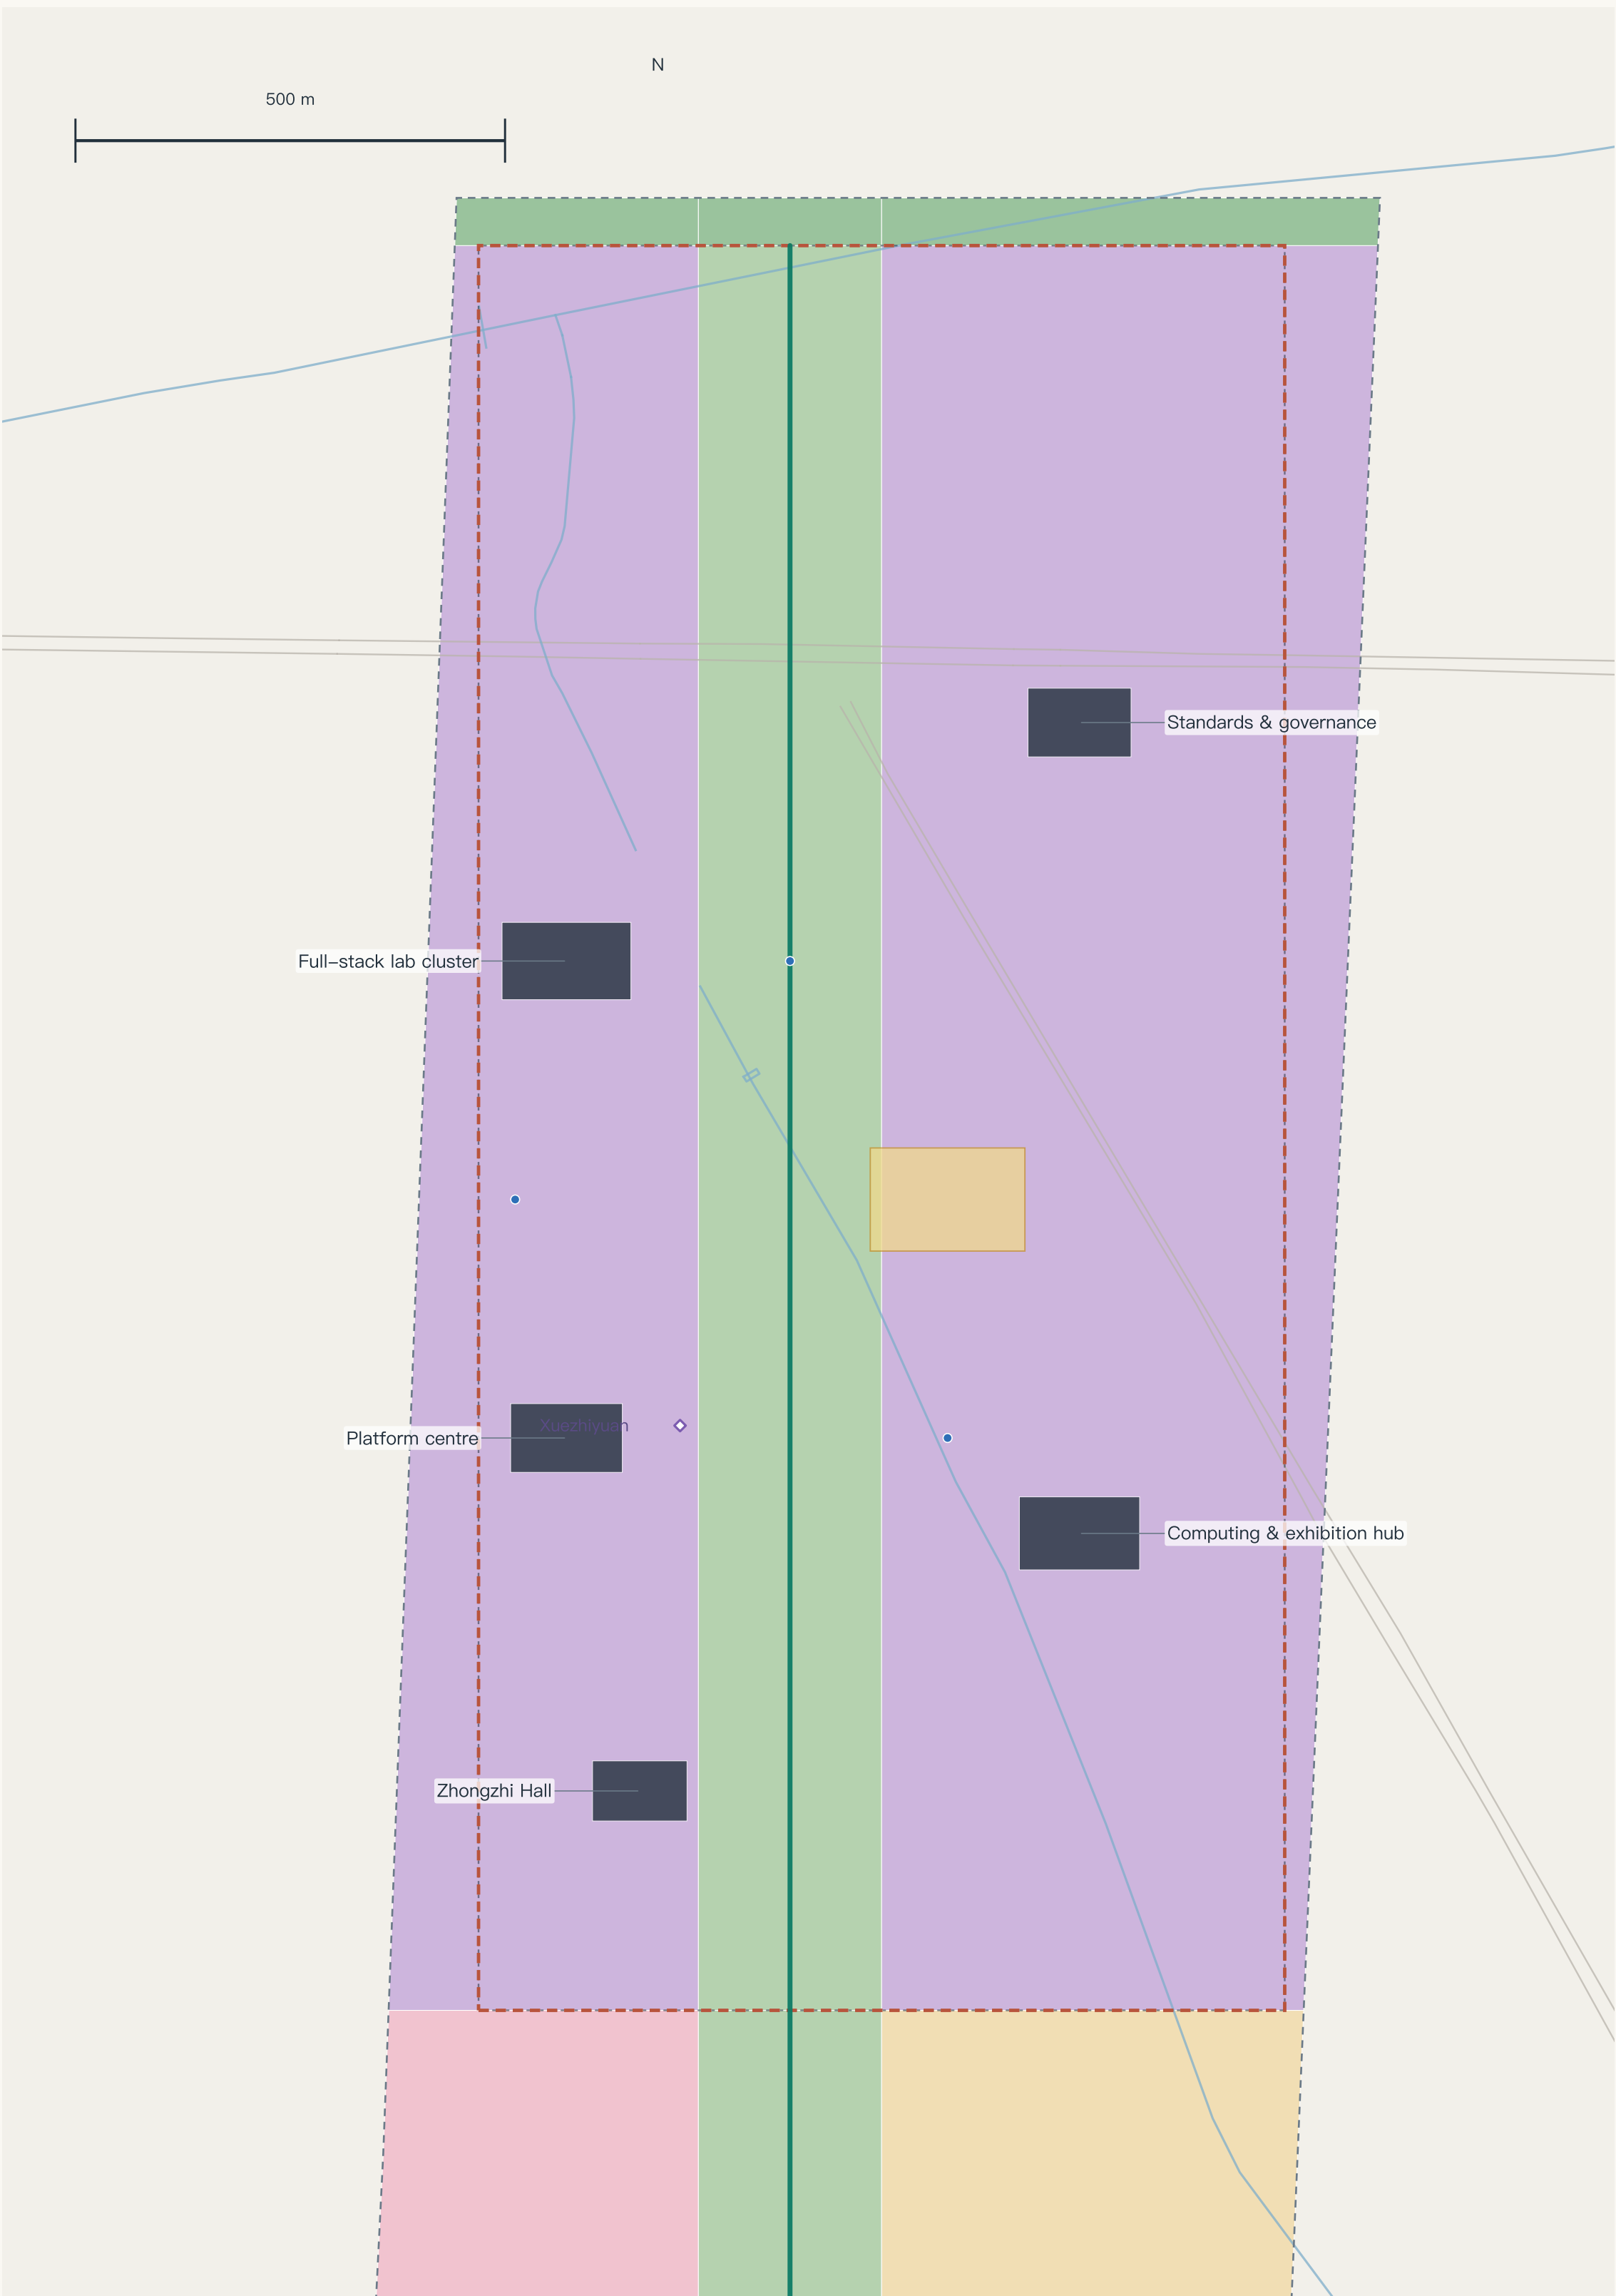

REN AXIS

Centennial Jing–Zhang AI Innovation Belt · AI-generated concept proposal

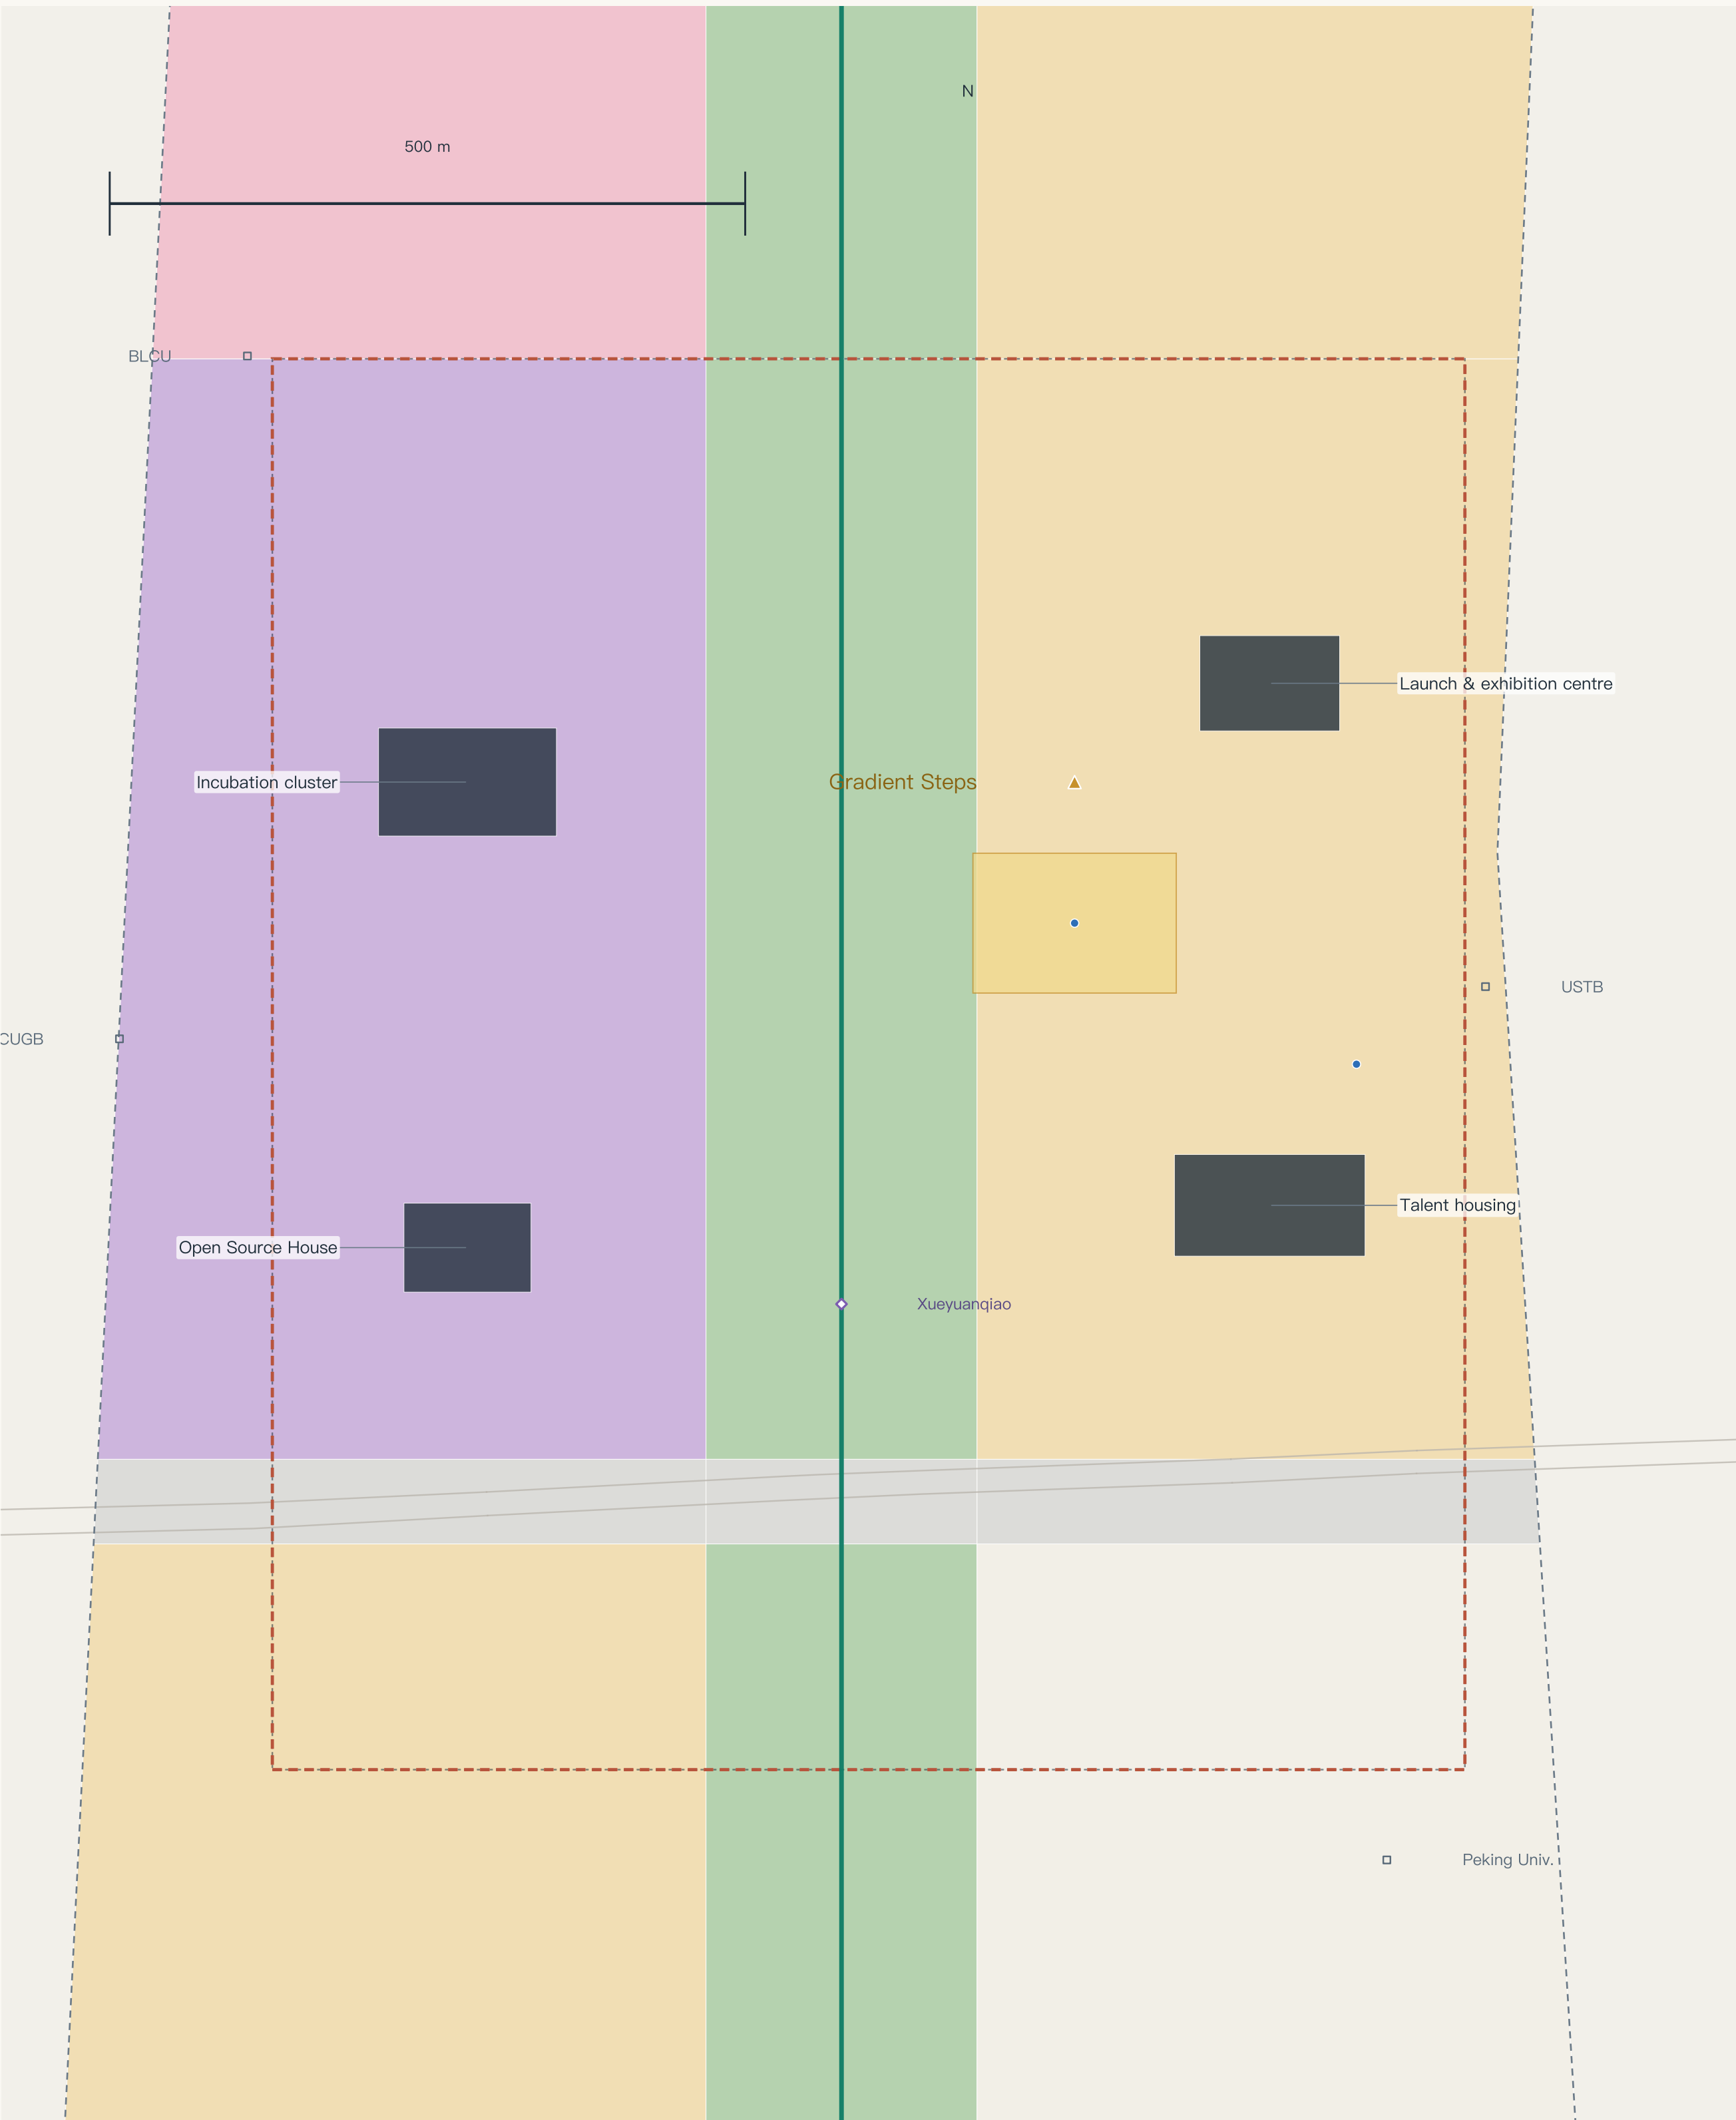

Zhongzhiyuan / Origin / Dazhongsi — differentiated positioning, spatial levers, risks; bottom row shows interface character sections (indicative; key–area polygons are provisional)

● Concept building cluster ■ Station forecourt ▲ Pilgrimage landmark ● Scenario node □ University ◇ Rail station (OSM) — REN AXIS --- Provisional key area

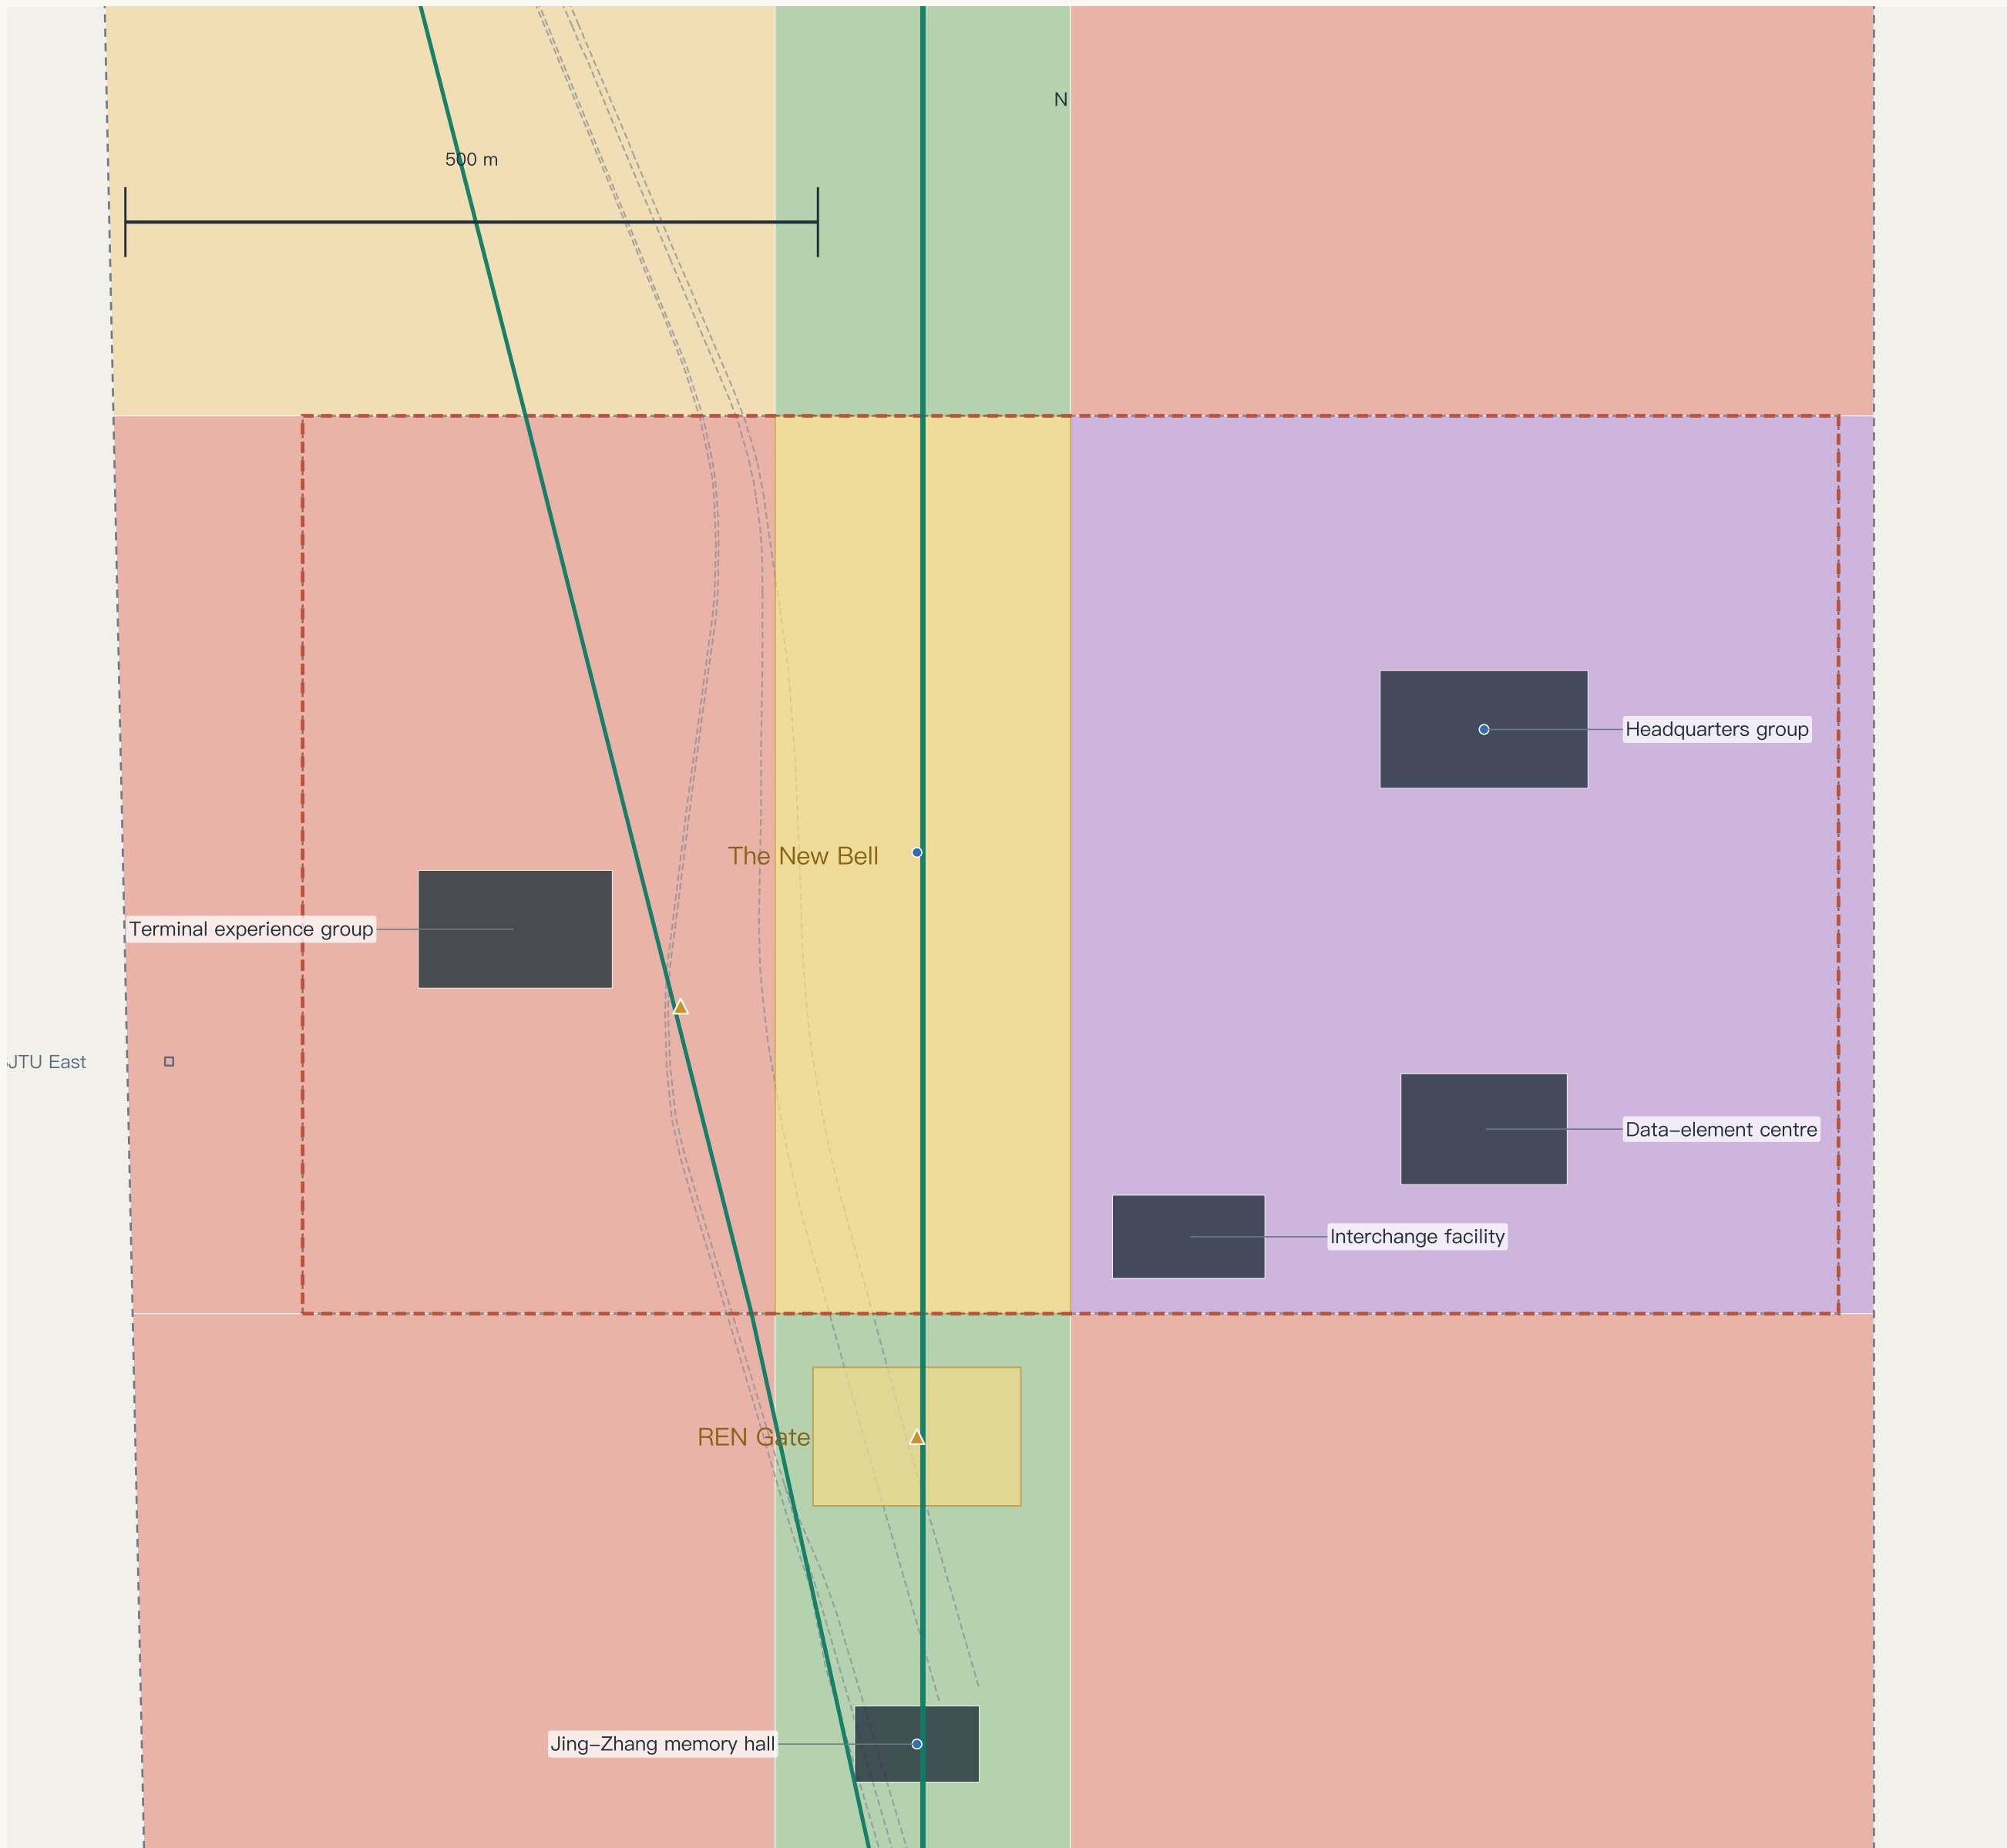

Zhongzhiyuan

Origin

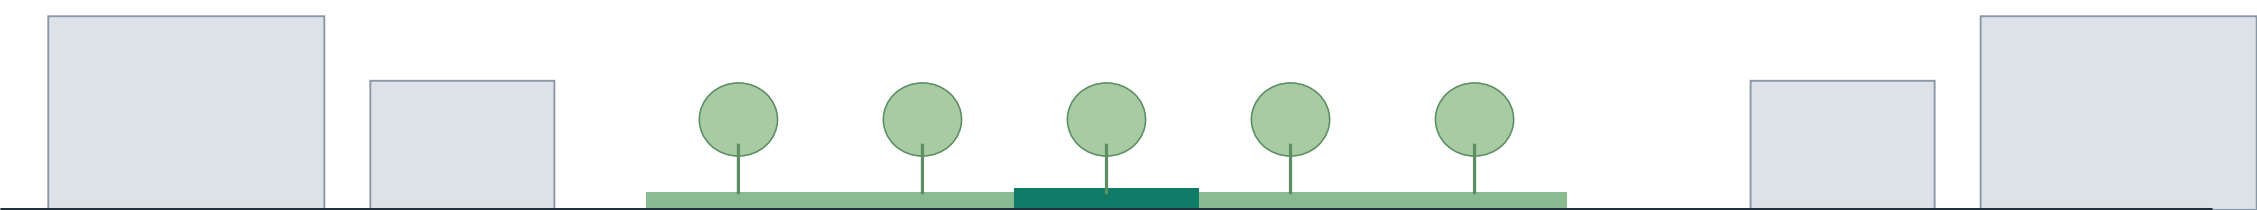

Dazhongsi

Garden-type innovation district · 192.9 ha (recomputed)

Full-stack innovation / AI governance voice
Lab clusters · governance centre · computing hub · Zhongzhi Hall
Innovation loop + ring–road integration study
Risks: tenure · ecology–intensity balance
Operations: scenario list system; time–boxed loop testing

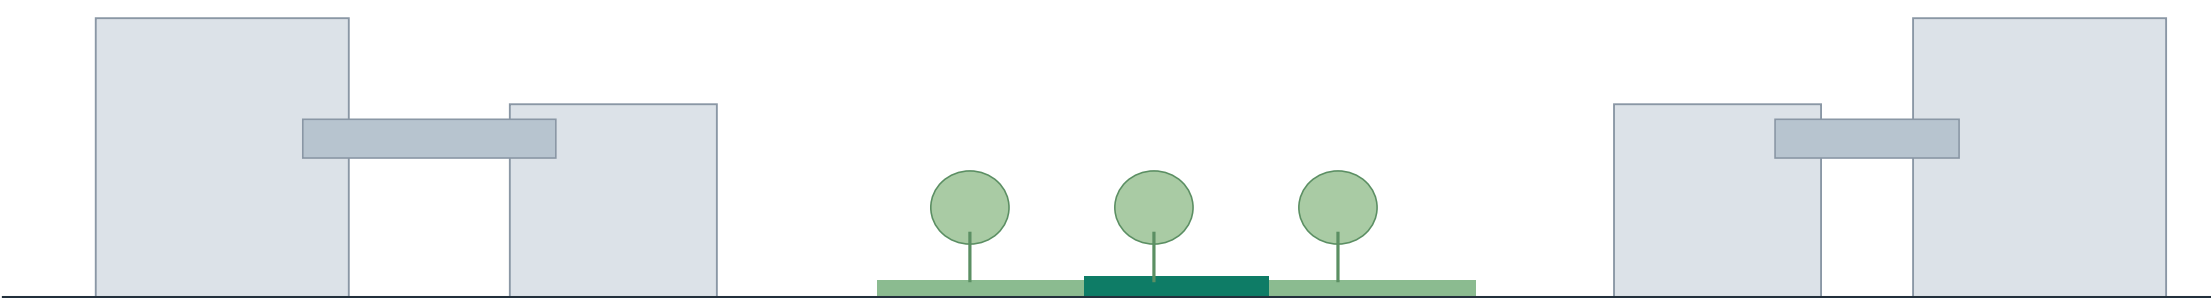

Mid-rise, high-green interface (indicative)

Campus-adjacent district · 104.3 ha (recomputed)

World-class AI innovation ecosystem
Incubation cluster · Open Source House · talent housing
Campus gallery + station integration study
Risks: campus coordination · low disturbance
Operations: permanent Open Source House; regular launch days

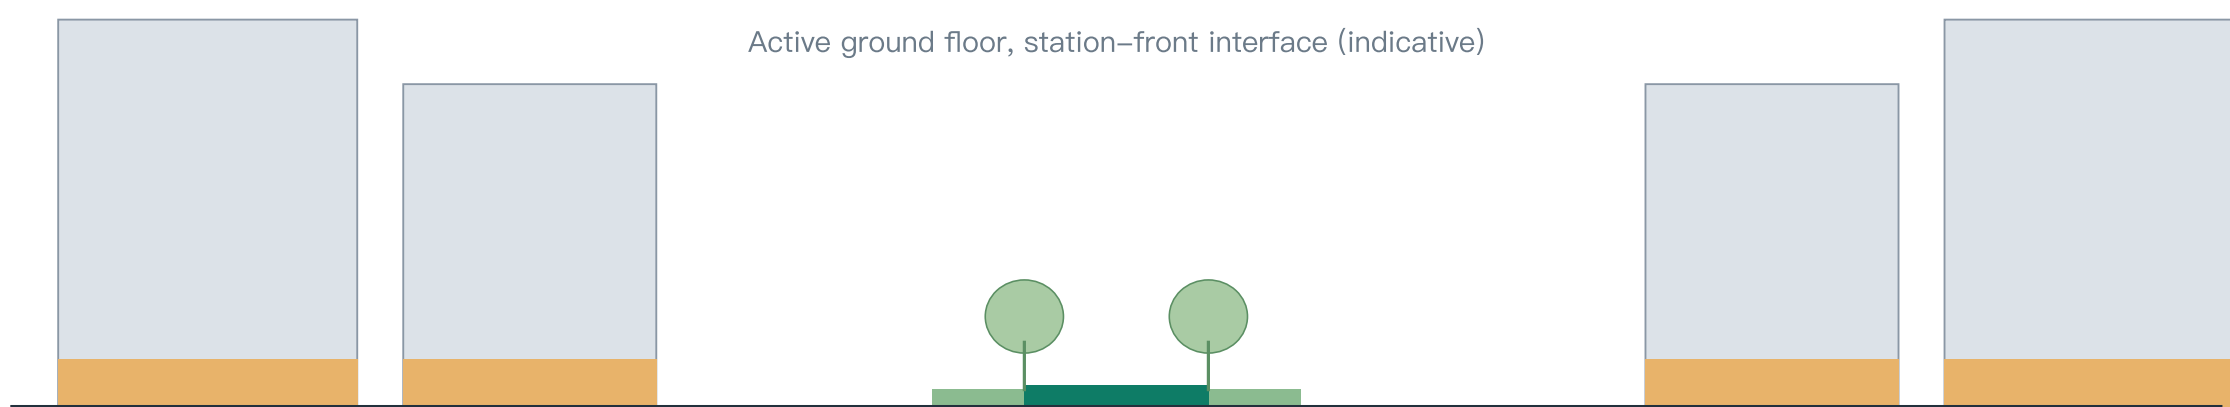

Stepped mid-rise, campus arcade interface (indicative)

Urban-type innovation district · 72.0 ha (recomputed)

AI-native business formats
Consumption showcase · headquarters · data-element centre
Four-quadrant pedestrian connection at the forecourt
Risks: heritage constraints · traffic pressure
Operations: showcase calendar; time-shared forecourt

Active ground floor, station-front interface (indicative)

Evidence class

■ official fact · announcement figures and tasks

■ OSM concept alignment · existing alignments and points (concept level)

■ provisional proposal · this proposal's spatial suggestions (provisional)

Data: submissions/Abreto/ren-axis-jingzhang-ai-belt geometry/*.geojson and metrics.json (recomputed in EPSG:4548) · Existing features © OpenStreetMap contributors (ODbL) · Boundary is a provisional substitute, not valid as an official red line or precise area basis

A0 board · Detailed design of the three key areas · REN AXIS (AI-generated concept, provisional boundary)

Every number recomputable — an auditable proposal

All known metrics are recomputed from geometry/*,geojson in EPSG:4548; displayed values match metrics.json

Centennial Jing-Zhang AI Innovation Belt · AI-generated concept proposal

Overall design area

11.41 km²

site_area_sqm · provisional

Green ratio

17.07 %

green_ratio

Public space ratio

11.76 %

public_space_ratio · incl. axis band

Concept floorspace

1.263 M m²

proposed_total_floor_area_sqm

Slow-mobility network

36.6 km

road_network_length_m

Key areas total

369.3 ha

key_area_total_sqm

AI scenario node

12 nodes

scenario_node_count

Renewal projects

18 projects

renewal_project_count

Evidence chain: from provisional boundary to self-check status

All derived from one source: figures · A3 booklet · A0 boards · visual/index.html (data-metric values match metrics.json)

Control values pending official data

Plot ratio · building height · building density · green ratio
(official*_control in metrics.json)
To be supplied by: approved regulatory plan /
official task book annex
*All area metrics recompute once the red line arrives

Meets Qinghe in the north · answers Xiaoyuehe in the east · a green corridor threading three stations · components repeated along the axis

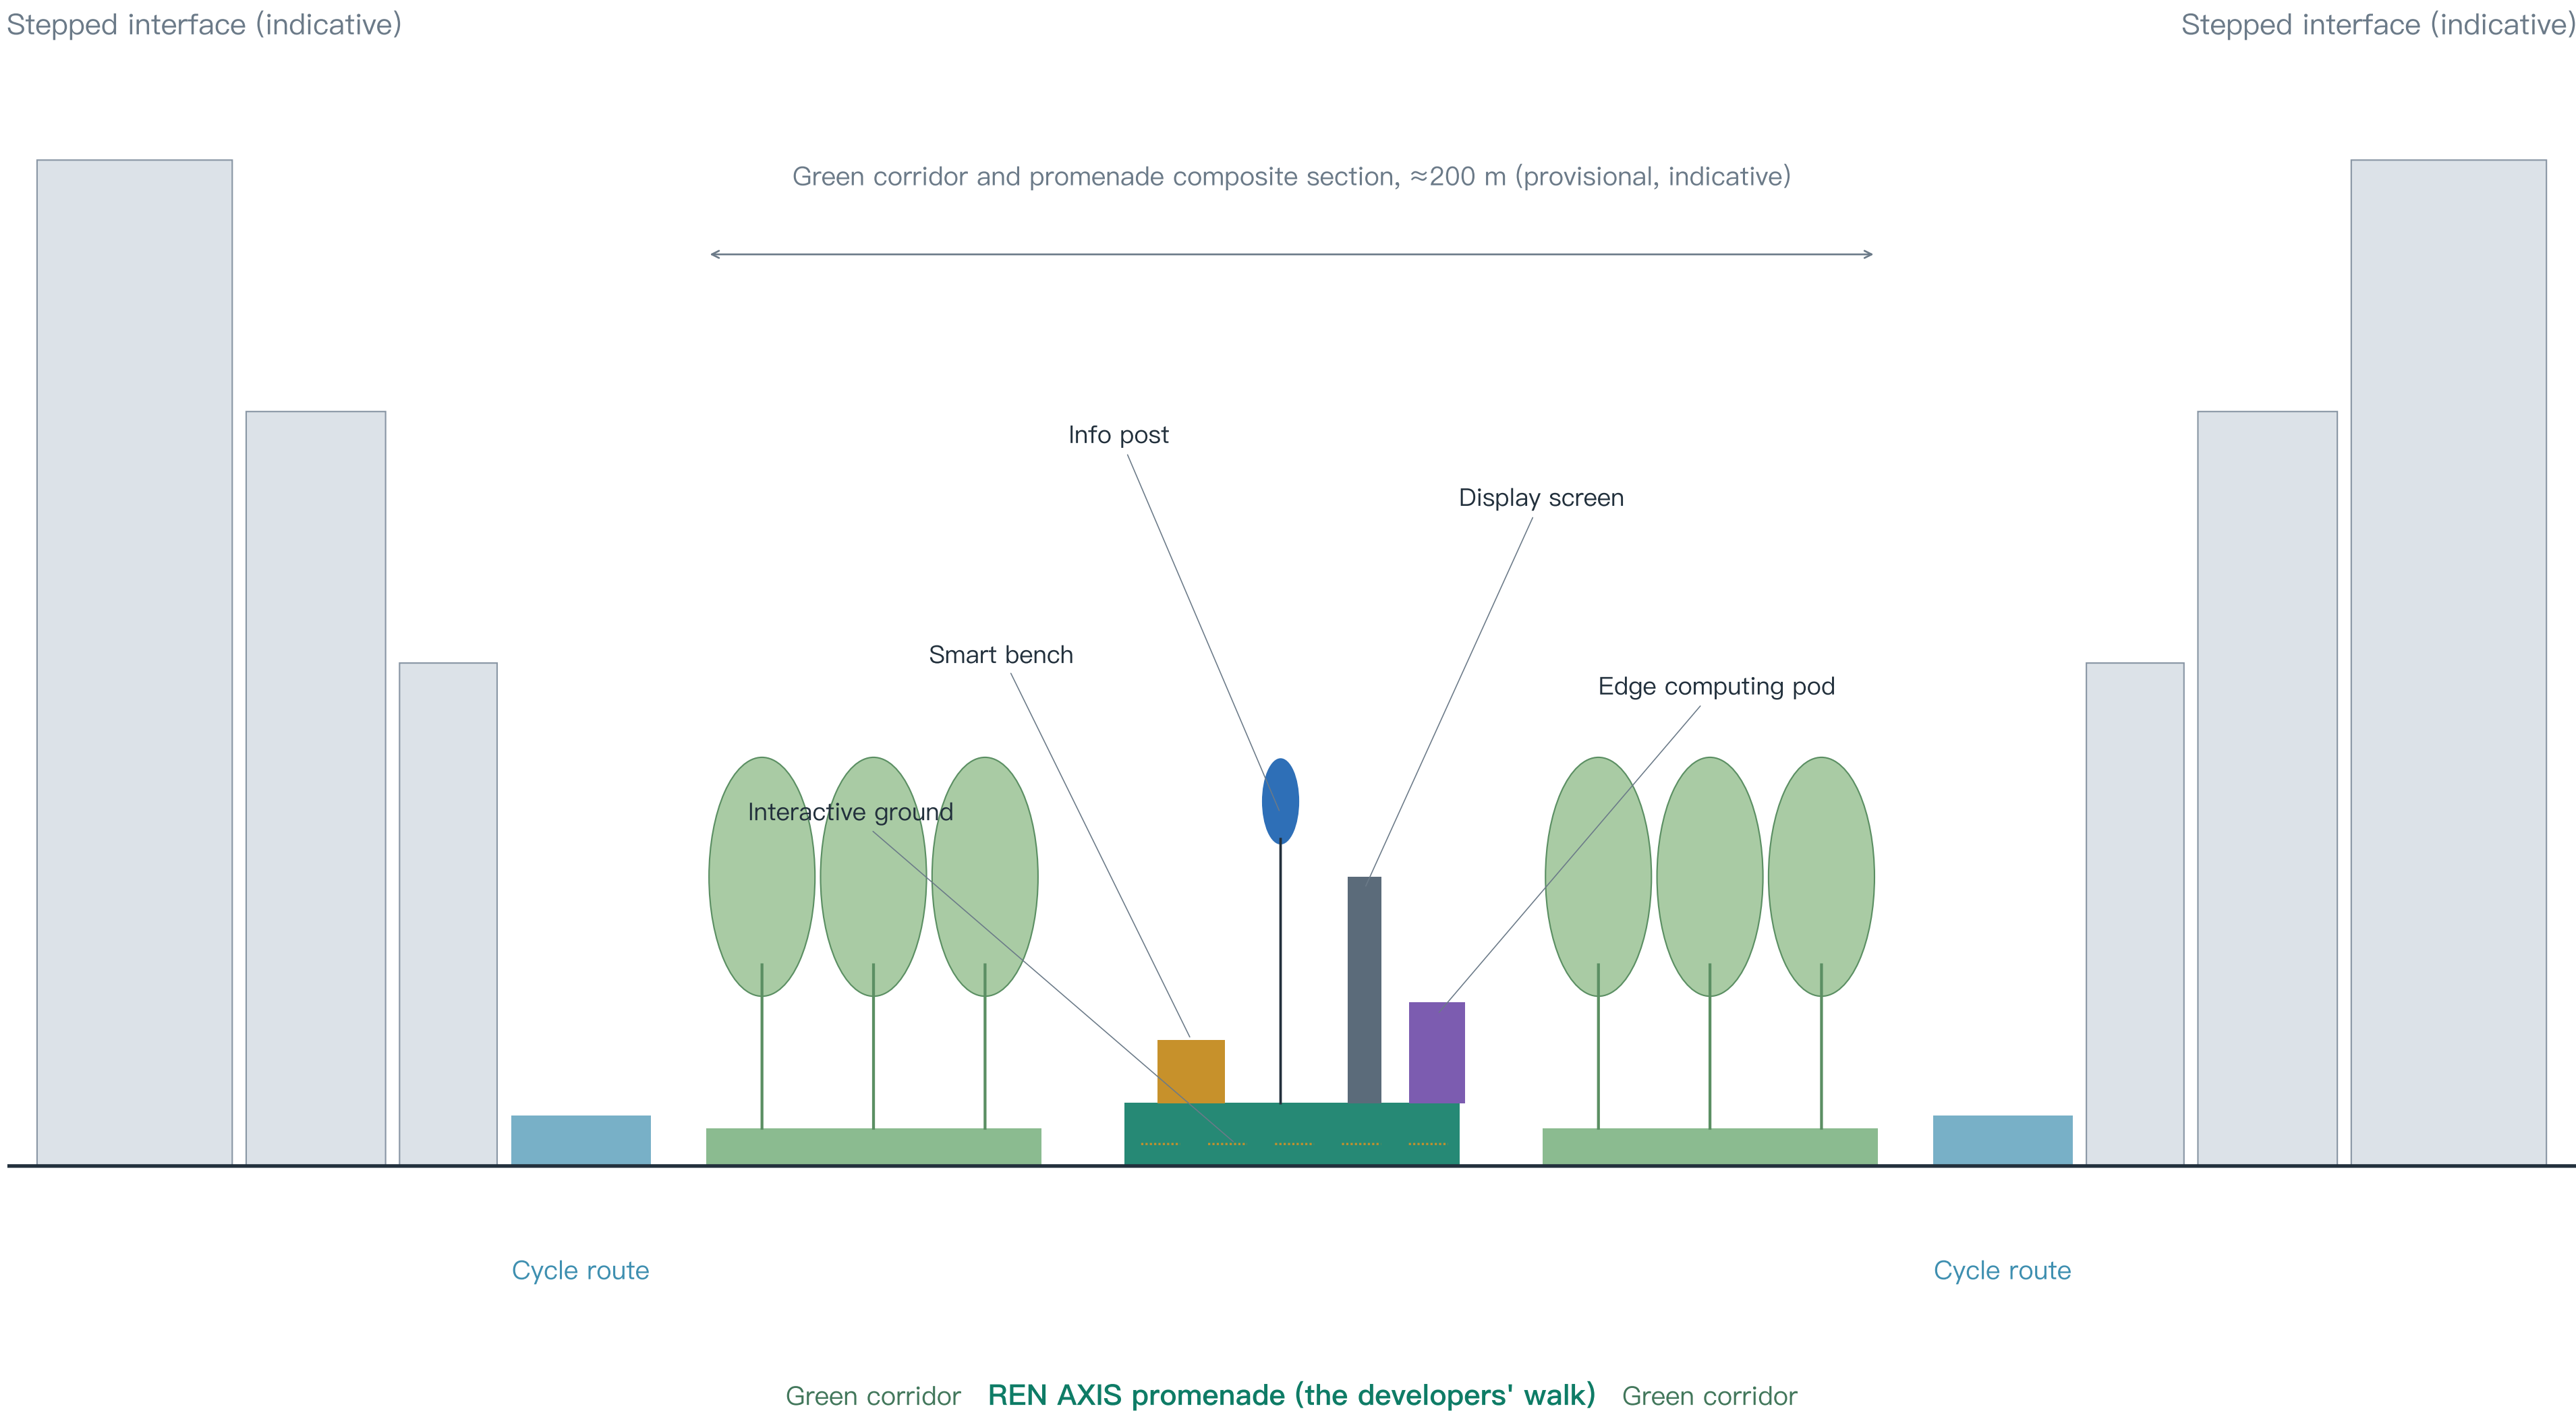

AI public space and pilgrimage landmarks · honours system (concept)

REN Gate (developers' wall of honour · Switch Plaza) · Gradient Steps (annual inscription ground for AI milestones)
The New Bell (sited clear of heritage protection, pending verification) · K–marker milestones (K0·1909 / K8·2026)
Mapped item by item onto the commemoration mechanism announced by the open call

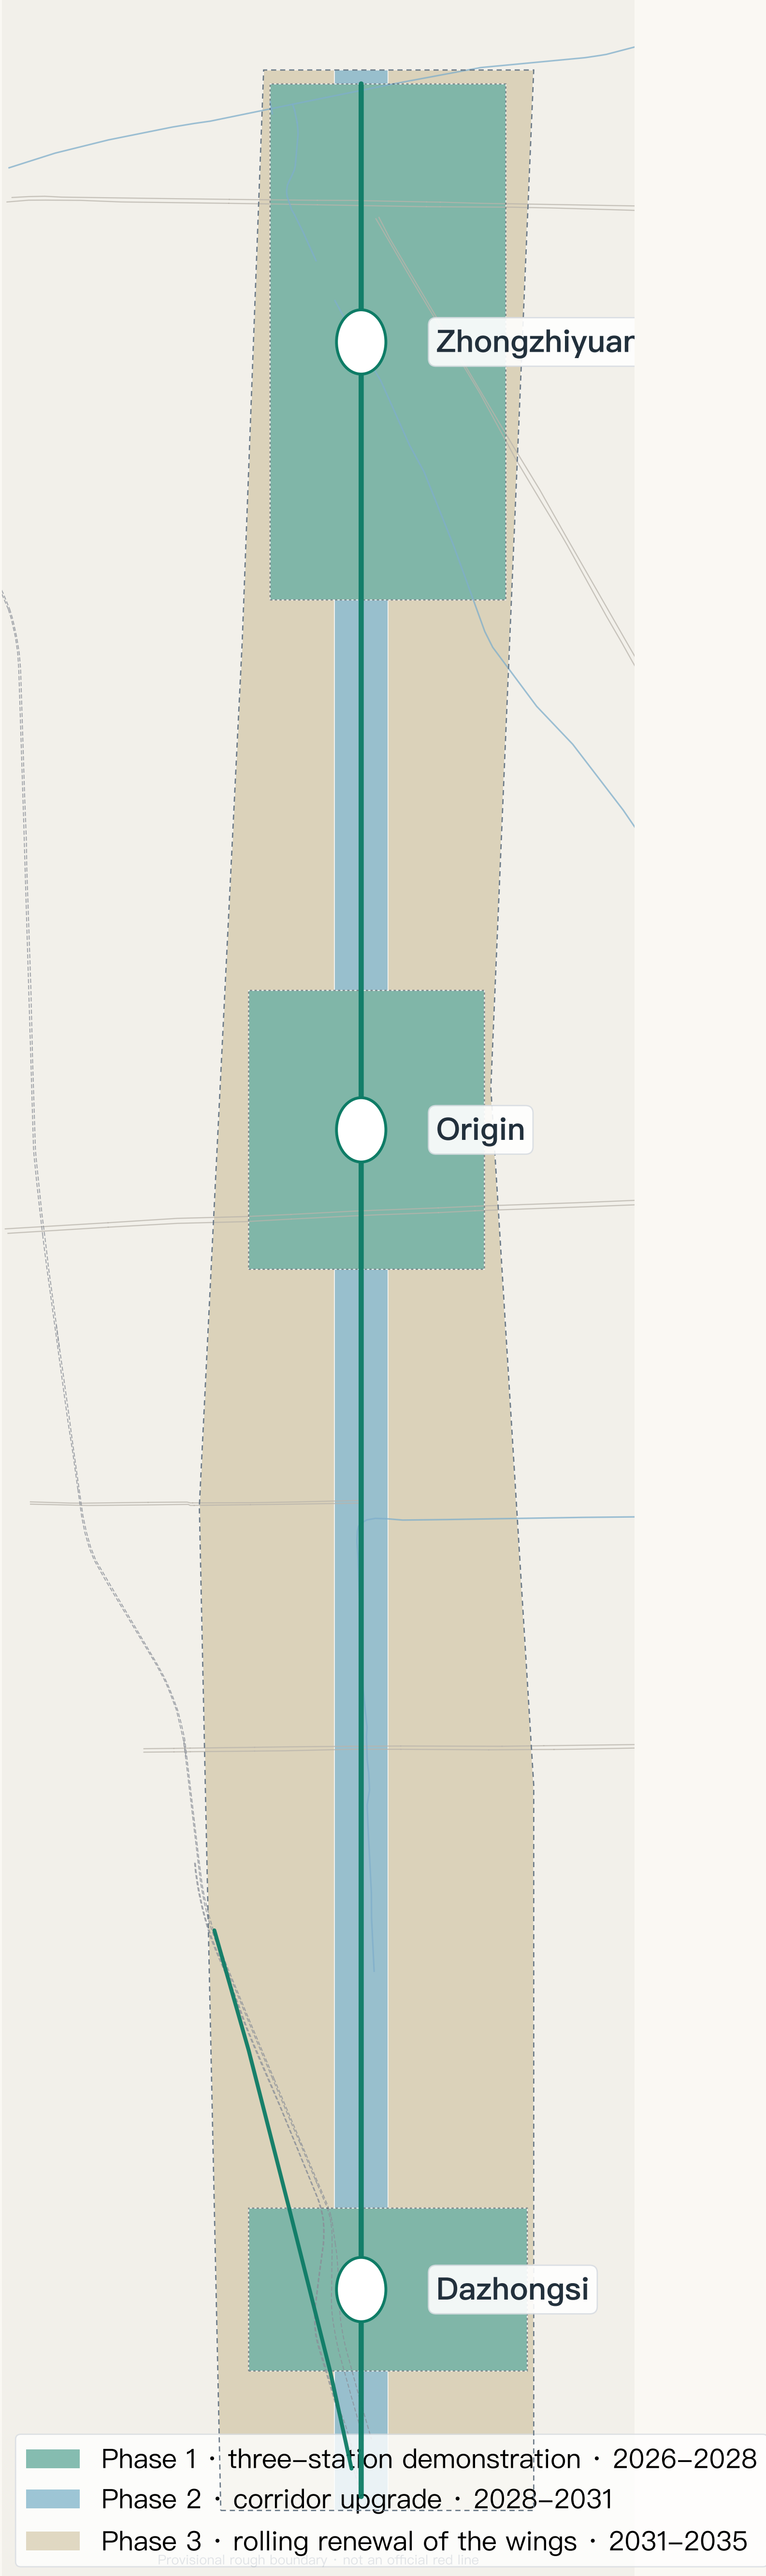

Cultural narrative: a century of climbing

The self–engineered switchback of 1909 → Zhongguancun innovation culture → the new open–source AI culture
Heritage assets such as Tsinghuayuan Station are used for narrative and display, not engineering conclusions; international theme: A Century of Climbing

REN AXIS standard section (indicative, not an engineering section) + public space component library

Twelve scenarios · eighteen projects · three rolling phases · annual programme and developer community

Renewal project list (18, concept)

Phase 1: forecourt connection / experience group / headquarters / data–element centre / Open Source House / incubation cluster / talent housing / lab cluster / computing hub / REN Gate

Phase 2: corridor upgrade / three–corridor stitching / Gradient Steps / station–city interchange

Phase 3: community renewal in the wings / reserve–area study / Xueyuan Road district renewal

Sequence is conceptual; not a development schedule or investment commitment

Long–term operations (agent.6)

Annual programme: developers' conference, open–source camp, art and city festival, honours night

Community: permanent Open Source House, member co–creation, mentor pairing, corporate challenges

Scenario opening: publish, apply, review, time–limited test, human check, exhibit or exit

Conversion: events → talent station → incubation → space supply

All arrangements are concept suggestions
