

Suture Line — Overall Structure & Three-Level Scope

Provisional boundary PROV-SITE-001 (EPSG:4548 recomputed) · official red line pending

Three headline numbers

150 m (concept)

Needle spacing: ≈2-min walk; design hypothesis for pilots

71.7% (illustrative)

750 m Euclidean-buffer coverage around meeting nodes

11.2 m²/person

Public activity space per person (incl. plazas)

Four stitch techniques · four layers

Running stitch: 4.03 km Suture Line spine (heritage / under-viaduct / below-ground sections)

Whip stitch: 29 needle lanes + companion lanes (each ≤250 m)

Back stitch: three key areas interlock with old-city fabric (open walls / station-city integration)

Hidden stitch: AI hidden in everyday furniture (lamps / benches / bins speak)

Four layers: Encounter → Shared activity → Healing → Warmth (fallback throughout)

Three highlight installations

200 LLM chat furniture terminals (SOS links straight to 120; AI never decides)

Token-generating Embroider Bikes (symbolic; contributions light the star wall)

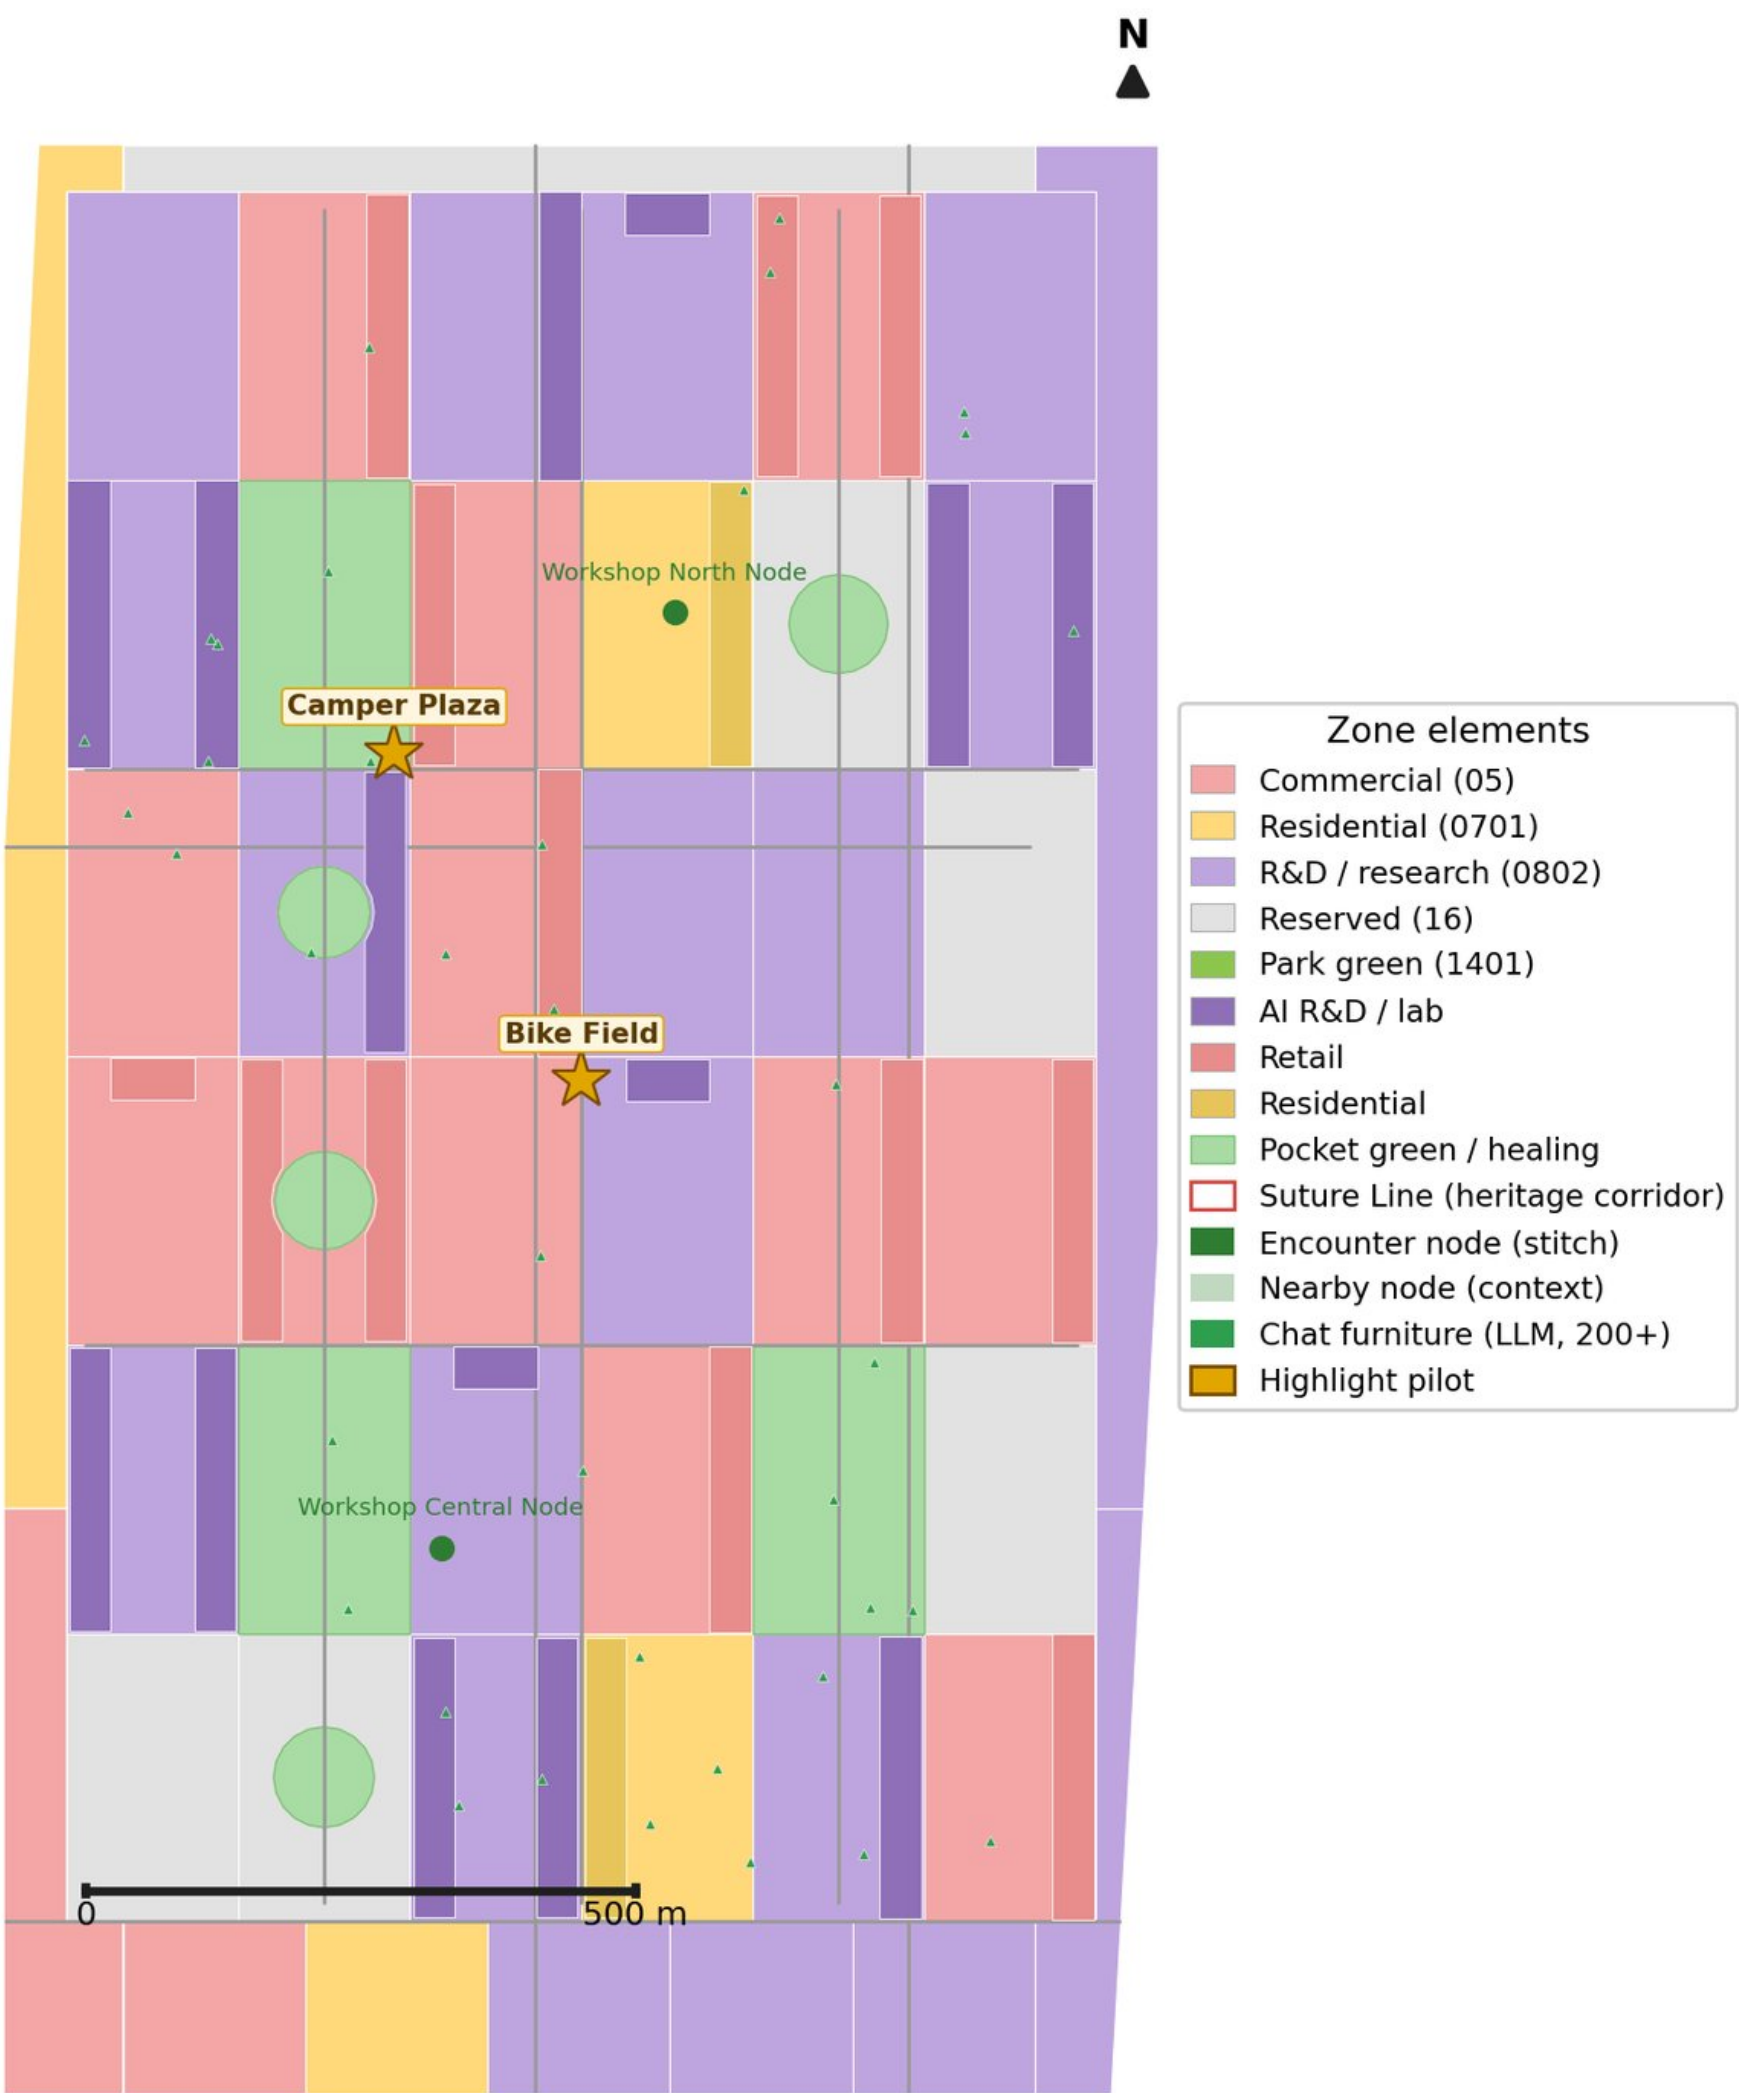

Embroidered Phrase Garden Transformer landmark (the black box walked as a readable line)

AI as planning logic: node layout = concept design target (≈2-min walk)

Data loop: sense (anonymous heatmap) → decide (quarterly re-stitch) → feedback (before/after)

K1 Zhongzhiyuan • Embroidery Workshop

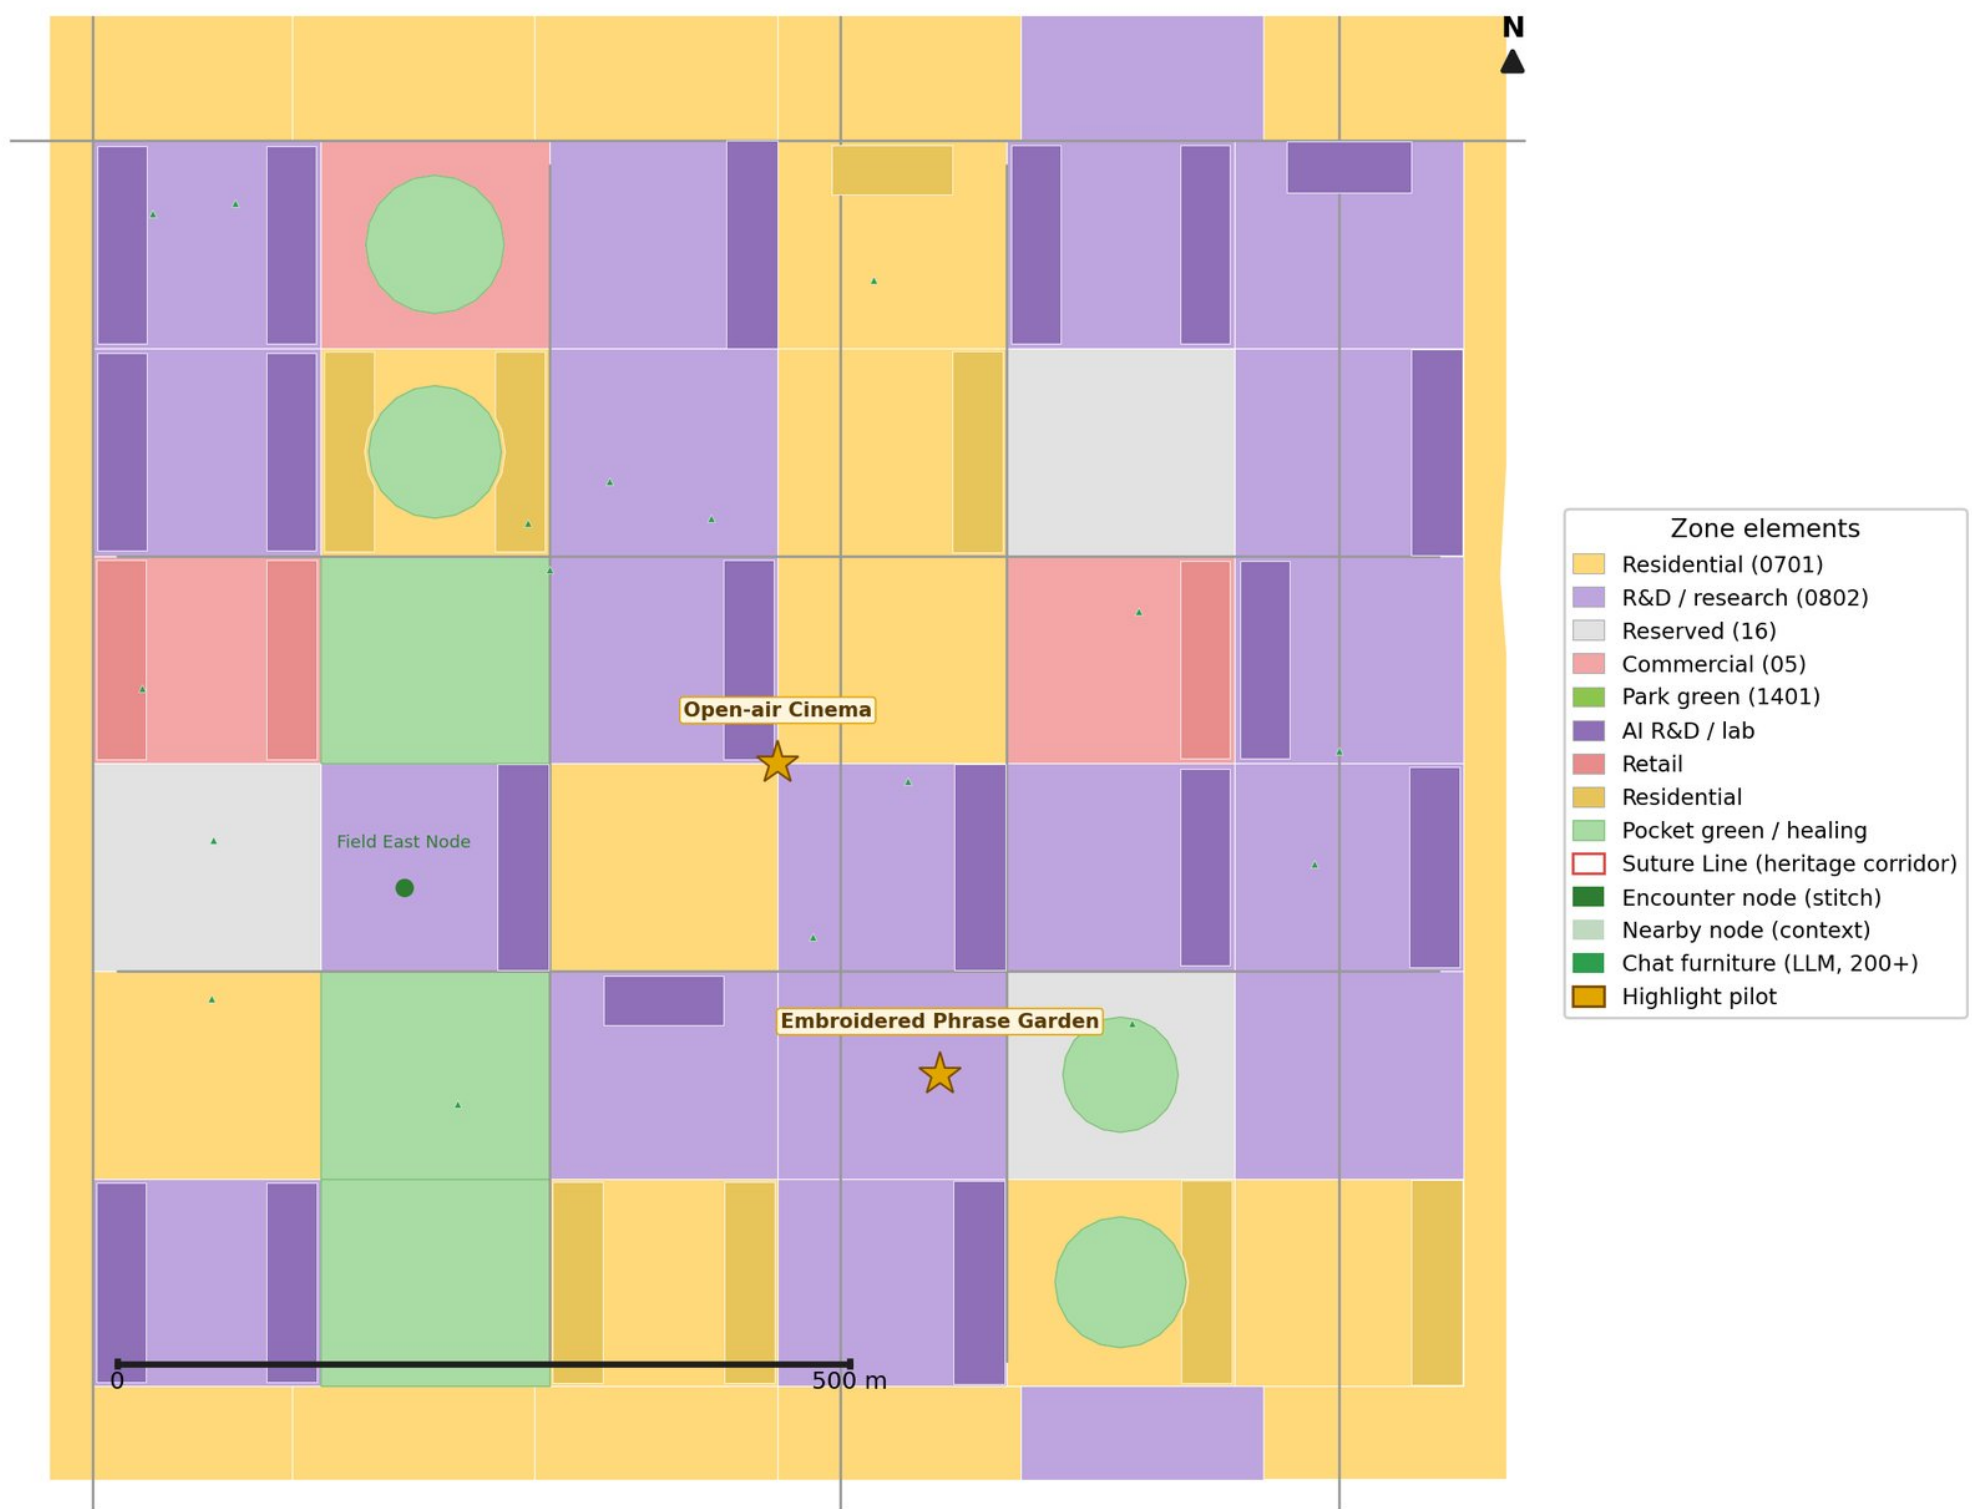

AI R&D cluster + community park + chat-furniture pilot

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈150 m (about a 2-min walk). Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

K2 Origin Community • Encounter Field

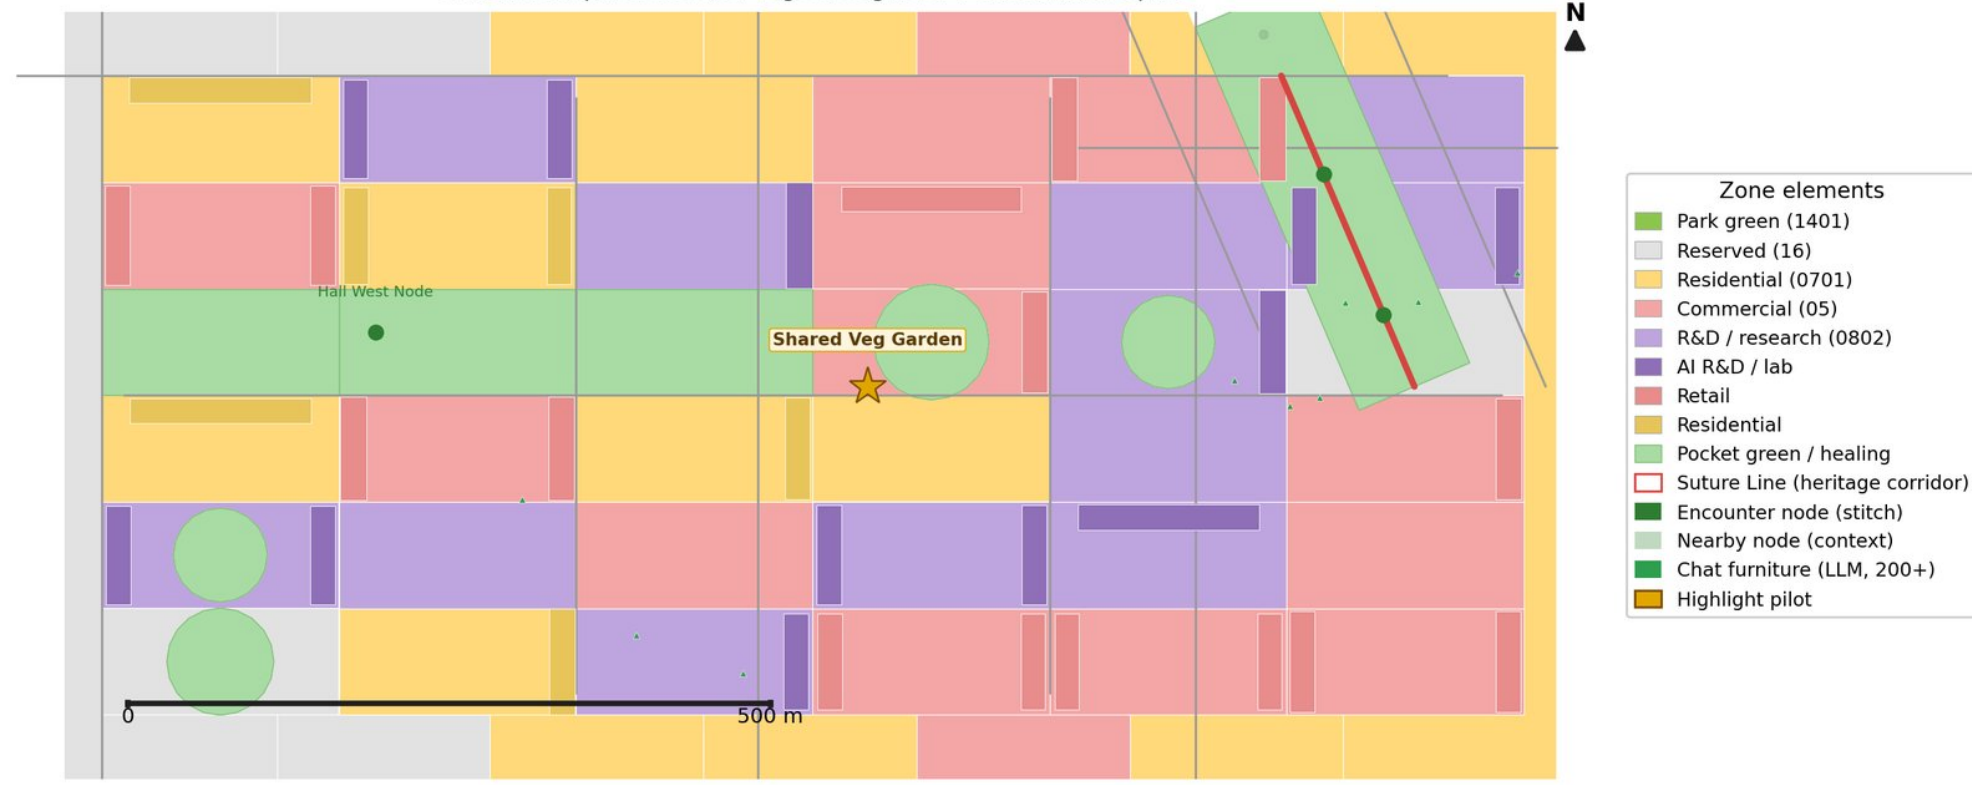

Embroidered Phrase Garden (Transformer landmark) + bikes + open-air cinema

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈150 m (about a 2-min walk). Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

K3 Dazhongsi • Station-front Hall

Station-front plaza + shared vegetable garden + chat-furniture pilot

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈150 m (about a 2-min walk). Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

K1 Embroidery Workshop (10.0%)

K2 Encounter Field (11.4%)

K3 Station Hall (16.4%)

Indicator Evidence Chain — 43 Indicators, Item-by-Item Source Files

Every indicator in metrics.json registers its method, source file and formula; recalculated values, declared values and targets awaiting verification are distinguished.

Geometry recalculated (EPSG:4548)

A1 SITE area 1,141.8 ha
B6 Total road length 63.42 km
B7 Road density 5.56 km/km²
B12 Land-use mix (Shannon) 1.47
E3 Belt-wide green ratio 6.9%
F3 Building coverage 7.2%
F3 Building volume in key areas 8.8%

Declared / target values (to verify)

C14 Stitch spacing (concept target) 150 m
C15 Encounter coverage (750m buffer) 100%
C16 Public space per person 11.2 m²
D2 AI scenario cards 12
D2 Industry test scenarios 3
A5 Chat furniture density 17.5/km²

Population is an assumption (K1≈20k / K2≈30k / K3≈20k, total 70k); all area and density values are recalculated under the design-layer caliber and do not constitute statutory planning indicators; official red line release triggers full recalculation.

Credibility statement (compliance bottom line)

43 metrics each register source file & formula (EPSG:4548); recomputed vs declared vs to-be-verified values distinguished

16 geometric validations all PASS (2026-08-30)

Population assumed (K1≈20k/K2≈30k/K3≈20k); recompute after official redlines

Provisional boundary: official_boundary=false; recompute & version after official redlines

Power output symbolic • Emergencies bypass AI • Manual/paper fallback 100%

8 Q&A: hallucination / false alarm / offline / privacy / children / maintenance / cost / copy
