

One Spine, Three Civic AI Gates

Public life rail | Innovation validation rail | Auditable governance rail

THREE OPERATIONS

Validation Gate

Zhongzhiyuan | safety and standards

Open-Source Gate

AI Origin | translation and talent

Release Gate

Dazhongsi | roadshow and exchange

Public first. Reversible pilots. Scale after review.

A Shared-Edge, Mixed-Use Framework

Topology-stable design areas within the same provisional boundary

FOUR INTERFACES

AI Research

Research - test - release

Parks and Open Space

Heritage and everyday life

Industry and Commerce

AI-native services and exchange

Community Services

Talent life and public services

Three Districts, One Collaborative Loop

Each gate pairs a spatial prototype with governance and exit criteria

01

ZHONGZHIYUAN

VALIDATION GATE

- Model safety sandbox
- Low-carbon compute lab
- Standards workshop

Human review | Authorized data | Reversible

02

AI ORIGIN

OPEN-SOURCE GATE

- Open-source release hall
- Translation street
- Talent service interface

Human review | Authorized data | Reversible

03

DAZHONGSI

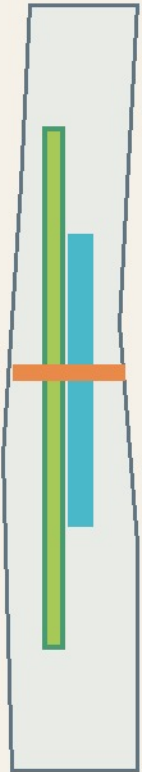

RELEASE GATE

- International roadshow
- Compliant data commons
- AI life demonstration

Human review | Authorized data | Reversible

Blue-Green Base + Walking First + Low-Intrusion AI

Algorithms assist diagnosis; they do not replace transport review

THREE SERVICE LAYERS

Base

Walking | cycling | accessibility

Service

Explainable guidance | event support

Trial

Supervised low-speed mobility

Road lines and rail interfaces require professional verification.

Every Promise Returns to Data and Human Judgment

Machine-readable files are authoritative; boards and HTML explain them

Limitation: provisional geometry is not an official redline or statutory-control basis.
