

AN ADAPTIVE CIVIC NETWORK FOR CENTENNIAL JING-ZHANG

ADAPTIVE JING-ZHANG THE DISAGREEMENT ATLAS AND REVERSIBLE CITY

Let many paths emerge. Build only the connections that earn trust.

OpenAI Codex · GPT-5 family · MartinForReal · 2026-08-13

CONCEPTUAL RECOMMENDATION / NORMALIZED CONCEPTUAL GEOMETRY - NOT TO SCALE / FOR PROFESSIONAL DEVELOPMENT

STRONG FRAME, MANY PATHS

Beijing does not need a slime-mould masterplan. It needs publicly comparable, reversible, and stoppable feedback between its strong planning layers.

01 STRONG FRAME, MANY PATHS

Algorithms generate alternatives; people set goals, safeguards, and stop rules

LET MANY PATHS
EMERGE.
BUILD ONLY WHAT EARNS
TRUST.

STRONG FRAME

heritage · safety · ecology · accessibility ·
affordability

LOOSE FIT

reversible ground floors · walking-and-cycling links
· modular services

FAST FEEDBACK

use · maintenance · exclusion · complaints ·
failure

64 RUNS · 6 PERSIST · 8 DISAGREE

* Dazhongsi provisional extent is disputed in Issue #1029

STATUS: CONCEPT REFERENCE; NORMALIZED CONCEPTUAL GEOMETRY - NOT TO SCALE; PROVISIONAL BOUNDARY ≠ OFFICIAL REDLINE

Source: official announcement; provisional repository geometry; agent-generated design ensemble.

PROVISIONAL WORKING AREA 11.413 km² · 64 ENSEMBLE RUNS

THREE SCALES + LAND AS RESISTANCE

Approximately 43.6 km² frames the ecosystem; 11.4 km² organizes interfaces; and 368.4 ha hosts differentiated conceptual pilots. The complete partition demonstrates topology, not statutory control.

02 LAND USE AS A RESISTANCE FIELD

A complete partition is not a statutory answer; weights are public policy choices

12 CELLS · 100% PARTITION COVERAGE

01 DEMAND AND ACCESS

02 HEAT, STORMWATER, GREEN SPACE

03 HERITAGE AND SAFETY

04 AFFORDABILITY AND EXCLUSION RISK

NON-TRADEABLE GATES: RIGHTS / SAFETY
/ HERITAGE / ACCESSIBILITY /
AFFORDABILITY

Weights are set by people; they are not biological truths.

STATUS: CONCEPT REFERENCE; NORMALIZED CONCEPTUAL GEOMETRY - NOT TO SCALE; PROVISIONAL BOUNDARY ≠ OFFICIAL REDLINE

Source: geometry/land_use.geojson; agent-generated reference partition; EPSG:4548 topology check.

SHARED-EDGE PARTITION COVERAGE: 100%

THREE AREAS, THREE LEARNING LOOPS

Zhongzhiyuan tests controlled innovation; AI Origin addresses everyday barriers; and Dazhongsi tests arrival and repair. Each pilot includes stop-and-recovery rules.

TEN AI SCENARIO CARDS

Every scenario states its place type, minimum data, human-review requirement, non-digital fallback, responsible operator, and stop rule.

S01
Accessible mobility

S02
Jing-Zhang heritage interpretation

S03
Public-service navigation

S04
Health-service wayfinding

S05
Legal/compliance orientation

S06
Enterprise-service assistance

S07
Low-speed logistics and repair

S08
Heatwave shade operations

S09
Event-day flow support

S10
Appeals and model retirement

NON-TRADEABLE GATES: safety · rights · heritage · affordability · accessibility · privacy · human review

ONE NETWORK, FOUR DUTIES

Movement, shade and stormwater, maintenance, and failure alternatives overlap. Persistent edges are not approvals, and disagreement is not an error.

04 ONE NETWORK, FOUR DUTIES

walking and cycling · shade and stormwater · maintenance access · failure alternatives

- WALK / WHEELCHAIR / CYCLE
- SHADE / STORMWATER / HABITAT
- REPAIR / SUPPLY / HUMAN TAKEOVER
- ALTERNATIVE ROUTES AFTER A SINGLE-EDGE FAILURE

PERSISTENT	6
DISAGREEMENT	8
DETOUR PROXY	1.023
EDGE-LOSS RETENTION	95.5%

SYNTHETIC TOPOLOGY STRESS TEST ≠ TRANSPORT OR ENGINEERING PERFORMANCE

STATUS: CONCEPT REFERENCE; NORMALIZED CONCEPTUAL GEOMETRY - NOT TO SCALE; PROVISIONAL BOUNDARY ≠ OFFICIAL REDLINE

Source: agent-generated candidate network and conceptual green-space/public-space geometry; no observed origin-destination or hazard data.

DETOUR PROXY 1.023 · SINGLE-EDGE EFFICIENCY RETENTION 95.5%

FROM GENERATION TO ACCOUNTABILITY

Sixty-four fixed-seed runs reveal both model stability and disagreement; people retain authority to reject, revise, run controlled tests, launch public pilots, or retire every candidate.

PROJECTS, PHASING, AND RISK GATES

Phase 0 verifies; Phase 1 runs 90-day reversible micro-pilots; Phase 2 learns across two seasons; Phase 3 may institutionalize a pilot only when public-interest, professional, and maintenance evidence supports it.

Missing does not mean unconstrained: without official planning boundaries, ownership records, heritage evidence, flood and utility data, fire-access analysis, and demand evidence, no engineering or statutory conclusion can be made.
