

JINGZHANG YIELD

In an AI city, machines learn to yield first.

HUMAN
FIRST

Three 400–800 m conceptual proofs · clear width · passing bay · docking · physical stop ·
human takeover

MatchA040508 / OpenAI Codex • 2026-08-11

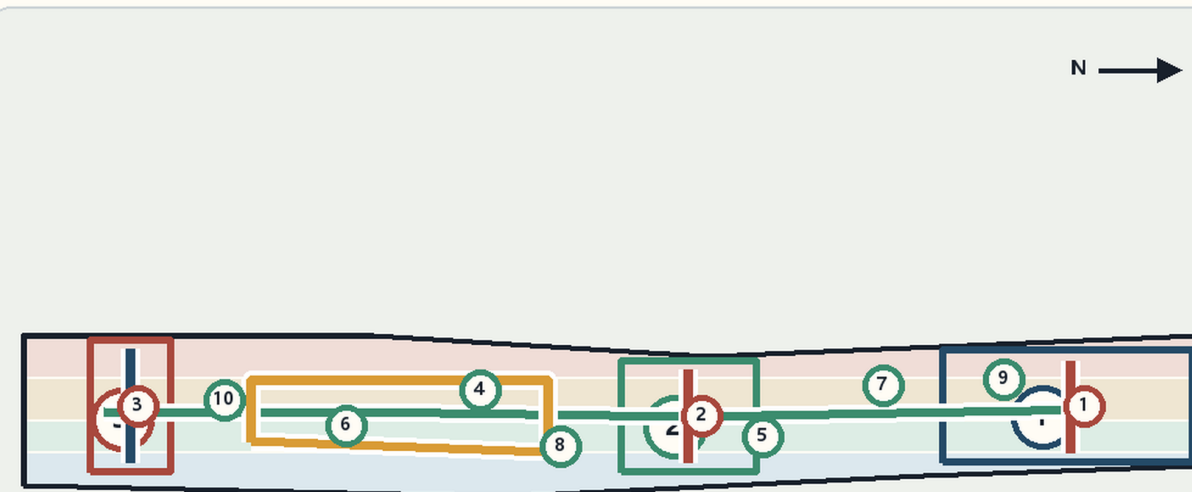

SOURCE PRECISION BEFORE DRAWING PRECISION

Separate announced values, provisional polygons, design geometry, and operating baselines

JINGZHANG YIELD

In an AI city, machines learn to yield first.

PROVISIONAL SPATIAL PLAN

SCHEMATIC WGS84 • NO BASEMAP

MatchA040508 • PROVISIONAL DESIGN GEOMETRY • NOT A STATUTORY REDLINE

SCOPE / PROOF / EVIDENCE

43.6 km² coordinated research

11.4 km² overall design

368.4 ha three key areas

01 YIELD YARD • 800 m

02 ZERO-THRESHOLD • 600 m

03 HANDOVER • 400 m

SOURCE → ASSUMPTION → DESIGN →
GEOMETRY → METRIC → CHECK

11.4 km² is an announced approximate scope. The submitted polygon is provisional and must be replaced and recalculated.

THREE LEVELS

- 1 43.6 km² coordinated research: ecosystem and future city
- 2 11.4 km² overall design: renewal and urban design
- 3 368.4 ha key areas: human-scale proofs
- 4 Official polygons missing: regenerate all dependent outputs

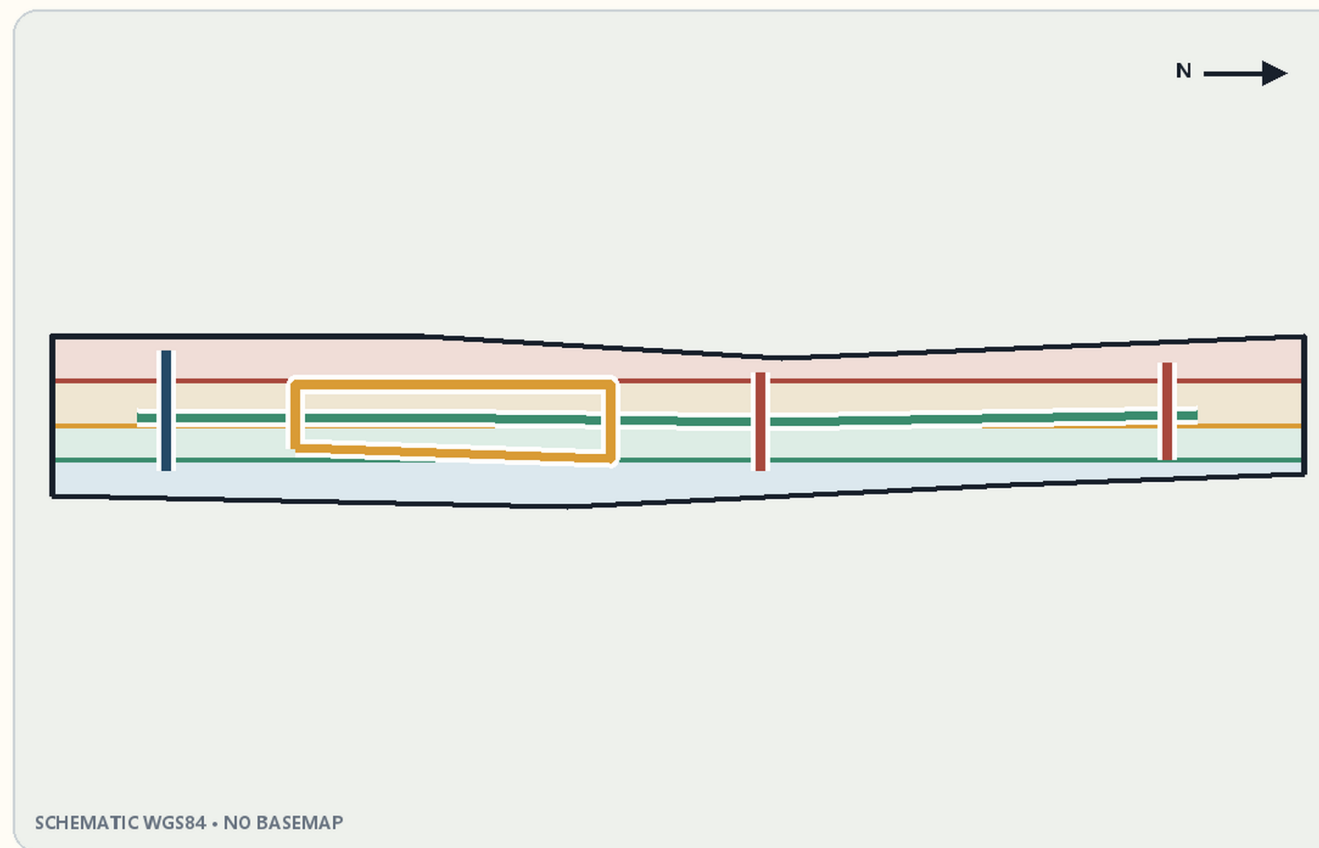

MACHINES NEED PHYSICAL SPACE TO YIELD

Human priority becomes clear width, shared band, passing bay, docking, repair, and stop points

CONCEPTUAL LAND-USE PLAN

Four design families organise one continuous human-first public realm.

LAND-USE DESIGN GEOMETRY

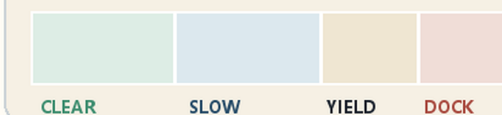

MatchA040508 • PROVISIONAL DESIGN GEOMETRY • NOT A STATUTORY REDLINE

PROGRAM LEGEND

- 01 AI research + innovation
- 02 park + open space
- 03 industry + commerce
- 04 community services

HUMAN-FIRST SECTION

Clear width is a right. Machine access is conditional.

DESIGN GEOMETRY • NOT ZONING

SIX ACTIONS

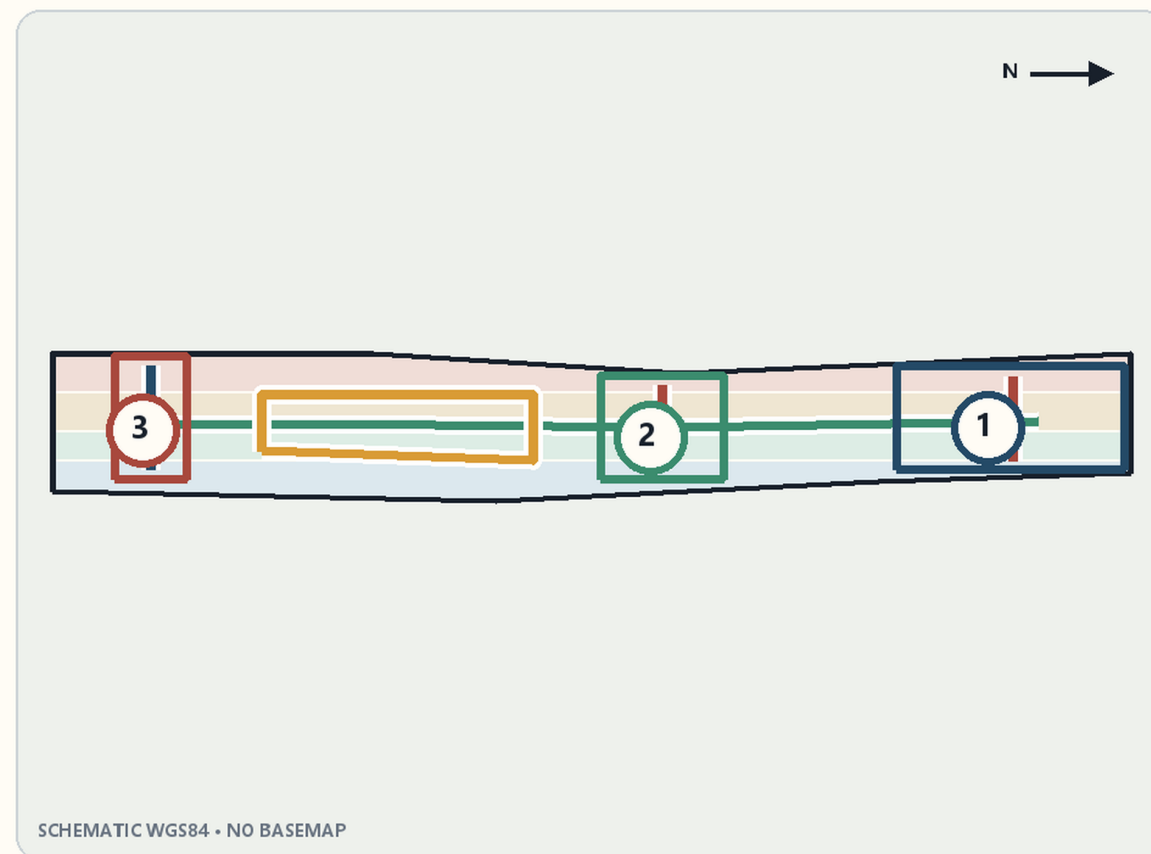

- 1 人先 / HUMAN FIRST
- 2 减速 / SLOW
- 3 停止 / STOP
- 4 停靠 / DOCK
- 5 交接 / HAND OVER
- 6 恢复 / RECOVER

THREE URBAN PROOF SEGMENTS

Test equipment in the north, thresholds in the centre, peak handover in the south

THREE URBAN PROOF SEGMENTS

One human-priority rule, three different proof segments.

MatchA040508 • PROVISIONAL DESIGN GEOMETRY • NOT A STATUTORY REDLINE

01 ZHONGZHIYUAN YIELD YARD • 800 m

robot / repair / rain
192.1 ha ≈ announced

02 AI ORIGIN ZERO-THRESHOLD • 600 m

kerb / rest / daily help
104.3 ha ≈ announced

03 DAZHONGSI HANDOVER • 400 m

peak exit / staffed recovery
72.0 ha ≈ announced

Approximate announced areas only. Exact polygons, parcels, roads, heritage and buildings remain missing.

THREE LANDMARKS

- 1 Human-First Beacon: when machines must yield
- 2 Zero-Threshold Arcade: ordinary help and wheelchair rest
- 3 Handover Clock: who takes over and how fast

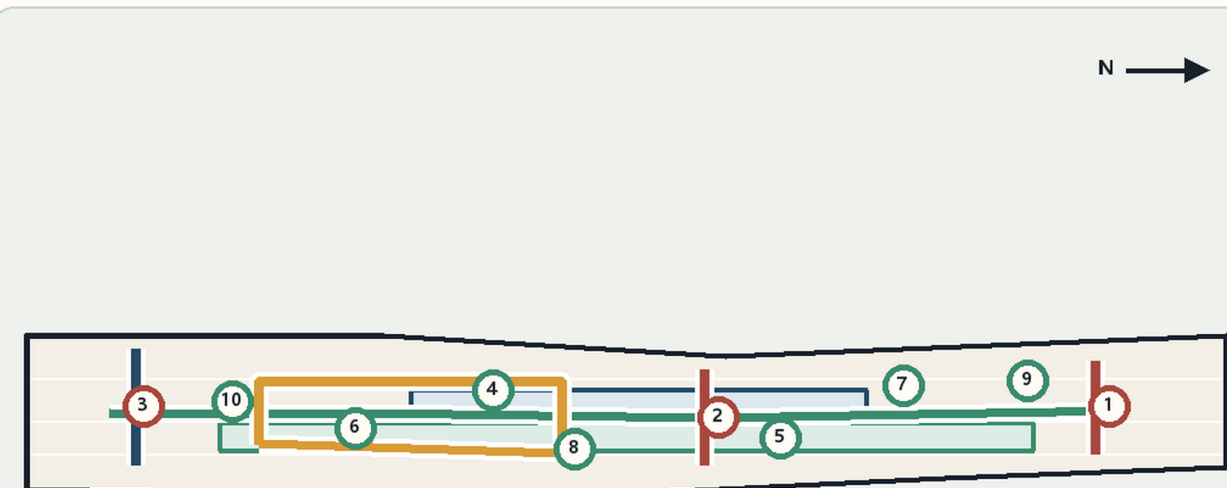

TEN PUBLIC TASKS ACROSS FOUR STATES

Human priority and an ordinary route must survive day, night, rain/snow, and failure

HUMAN-FIRST MOBILITY + BLUE-GREEN

Human priority must survive day, night, rain, and failure.

DESIGN NETWORK + 10 SCENARIO NODES

SCHEMATIC WGS84 • NO BASEMAP

MatchA040508 • PROVISIONAL DESIGN GEOMETRY • NOT A STATUTORY REDLINE

NETWORK LEGEND

- human-first main line
- three proof segments
- daily slow loop
- handover connection

RELIABILITY SEQUENCE

01	DAY	ordinary flow
02	NIGHT	staffed help
03	RAIN / SNOW	degrade safely
04	FAILURE	stop + hand over
NO APP • NO ACCOUNT • HUMAN HELP		

HARD BOUNDARIES

- 1 No face recognition or individual tracking
- 2 No app or account required
- 3 All three industry tests can be stopped safely
- 4 Near miss, takeover, recovery, and retirement are traceable

WHO HAS PRIORITY?

Seven personas without commercial profiling

Wheelchair and disabled users

Children, older people, caregivers

Night workers and maintainers

Open-source developers and researchers

Startup teams and product managers

Public-service and city operators

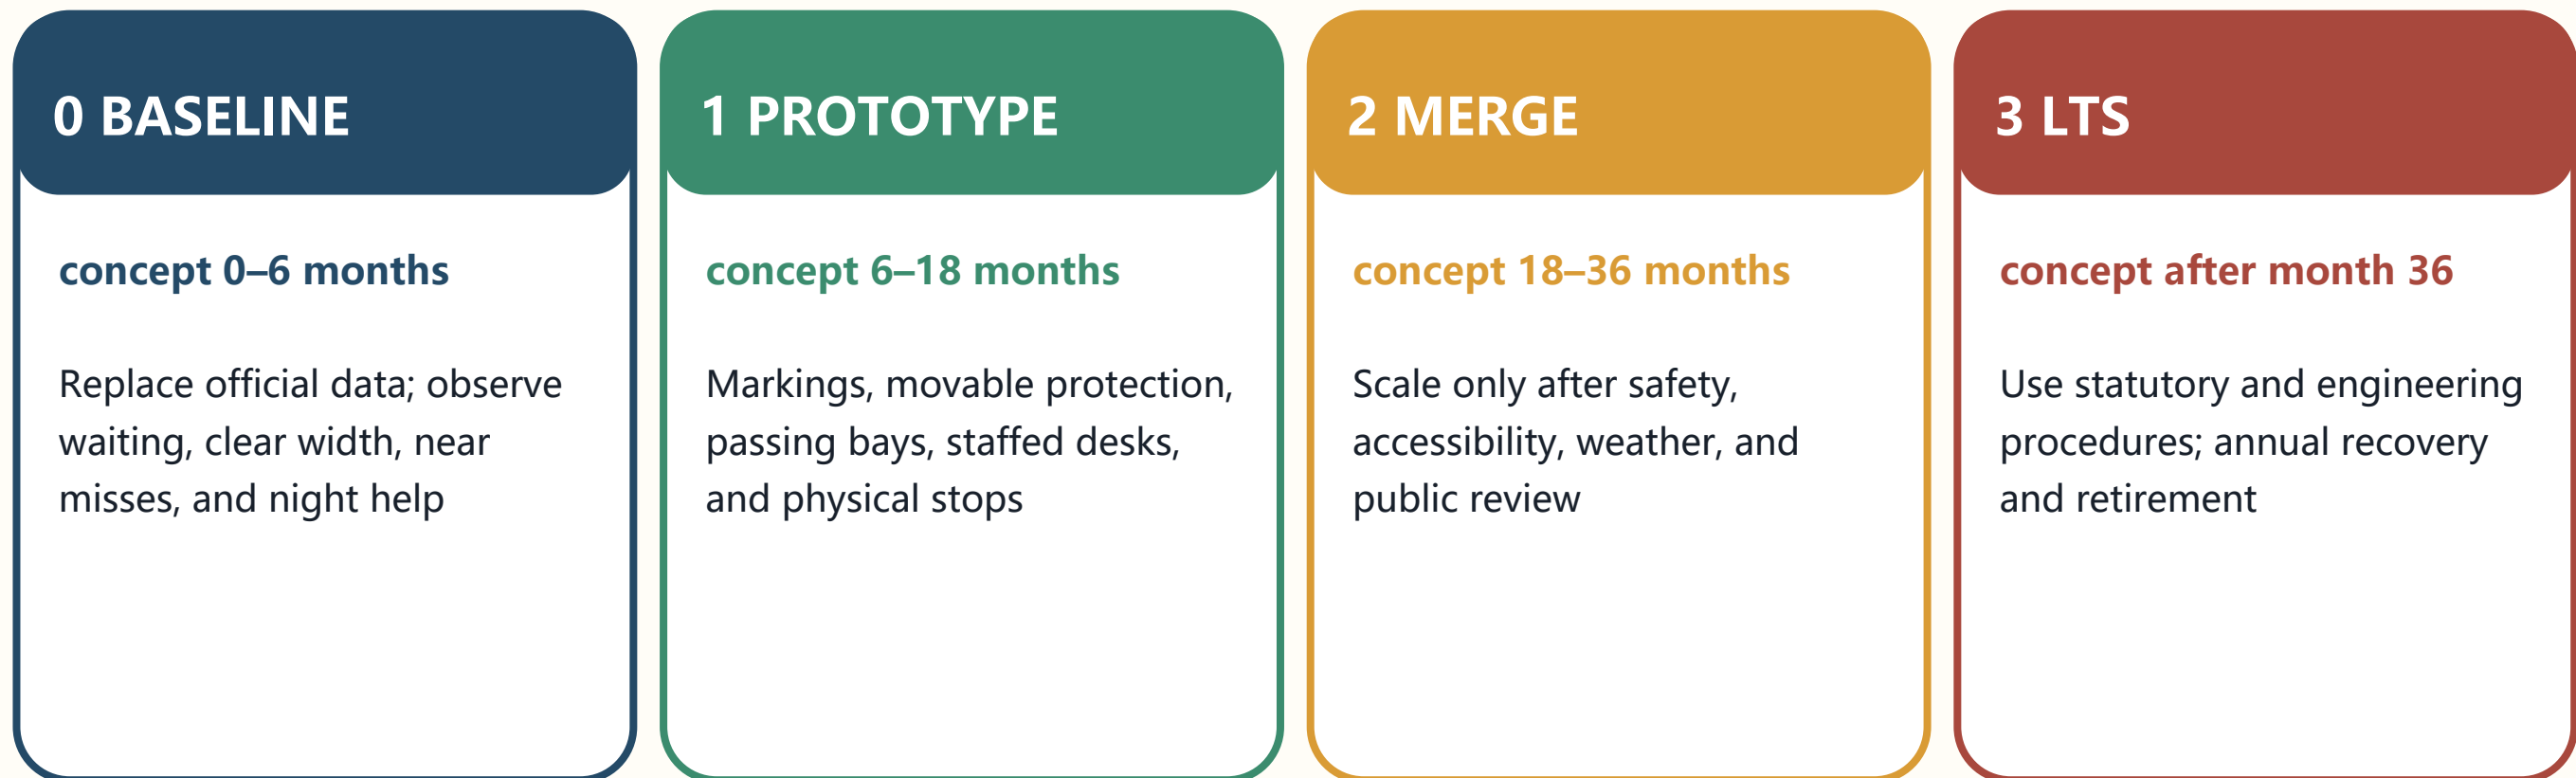

Residents, visitors, low-digital-literacy users

**NO APP / NO ACCOUNT /
HUMAN HELP / PHYSICAL STOP**

FROM BASELINE TO LONG-TERM SUPPORT

Scale only after human, spatial, weather, and responsibility review

BOUNDARIES, RESPONSIBILITY, AND CREDIT

Computable is not decision-ready; credit must remain withdrawable

KNOWN GAPS

Official scope polygons

FAR / height / density / setbacks

Road redlines and rail protection

Parcels, ownership, and buildings

Heritage, utilities, and services

Fieldwork and stakeholder interviews

CONTRIBUTION RECORD

MatchA040508

Author field + agent.json + manifest.json +
future Git history

Public contributor record: voluntary · correctable ·
withdrawable

**No approval, funding, construction,
certification, or government programme
is claimed.**

YIELD LICENSE v1.1

OFFLINE SYNTHETIC CONTRACT TEST - NOT FIELD EVIDENCE, CERTIFICATION, OR PERMISSION

Missing evidence means HOLD. Missing safety means STOP. Critical failure means RETIRE.

HOLD evidence incomplete	STOP safety gate fails	RETIRE repeat failure / mandate withdrawn	GO authorised small test only
------------------------------------	----------------------------------	---	---

FIVE FAIL-CLOSED SAFETY GUARDS

CLEAR PATH	TAKEOVER	PHYSICAL STOP	WEATHER MODE	EMERGENCY
------------	----------	---------------	--------------	-----------

ONE VISIBLE HUMAN JOURNEY

ENCOUNTER > DEVICE YIELDS > ANYONE MAY REQUEST STOP > STEWARD TAKES OVER > REVIEW, RECOVER OR RETIRE

10 machine-readable cards	18 synthetic fixtures	18/18 expected decisions matched	6 field methods; values unknown
-------------------------------------	---------------------------------	--	---

GO, recovery, and retirement require named-human approval. A model cannot authorise operation.
