

Jingzhang AI Meridian: Overview

One spine – three cores – two wings – many nodes (provisional)

Legend

- Park green
- Plaza
- Research/AI R&D
- Commercial
- Residential
- Education
- Sports/health
- Medical
- Reserved
- Provisional overall design boundary

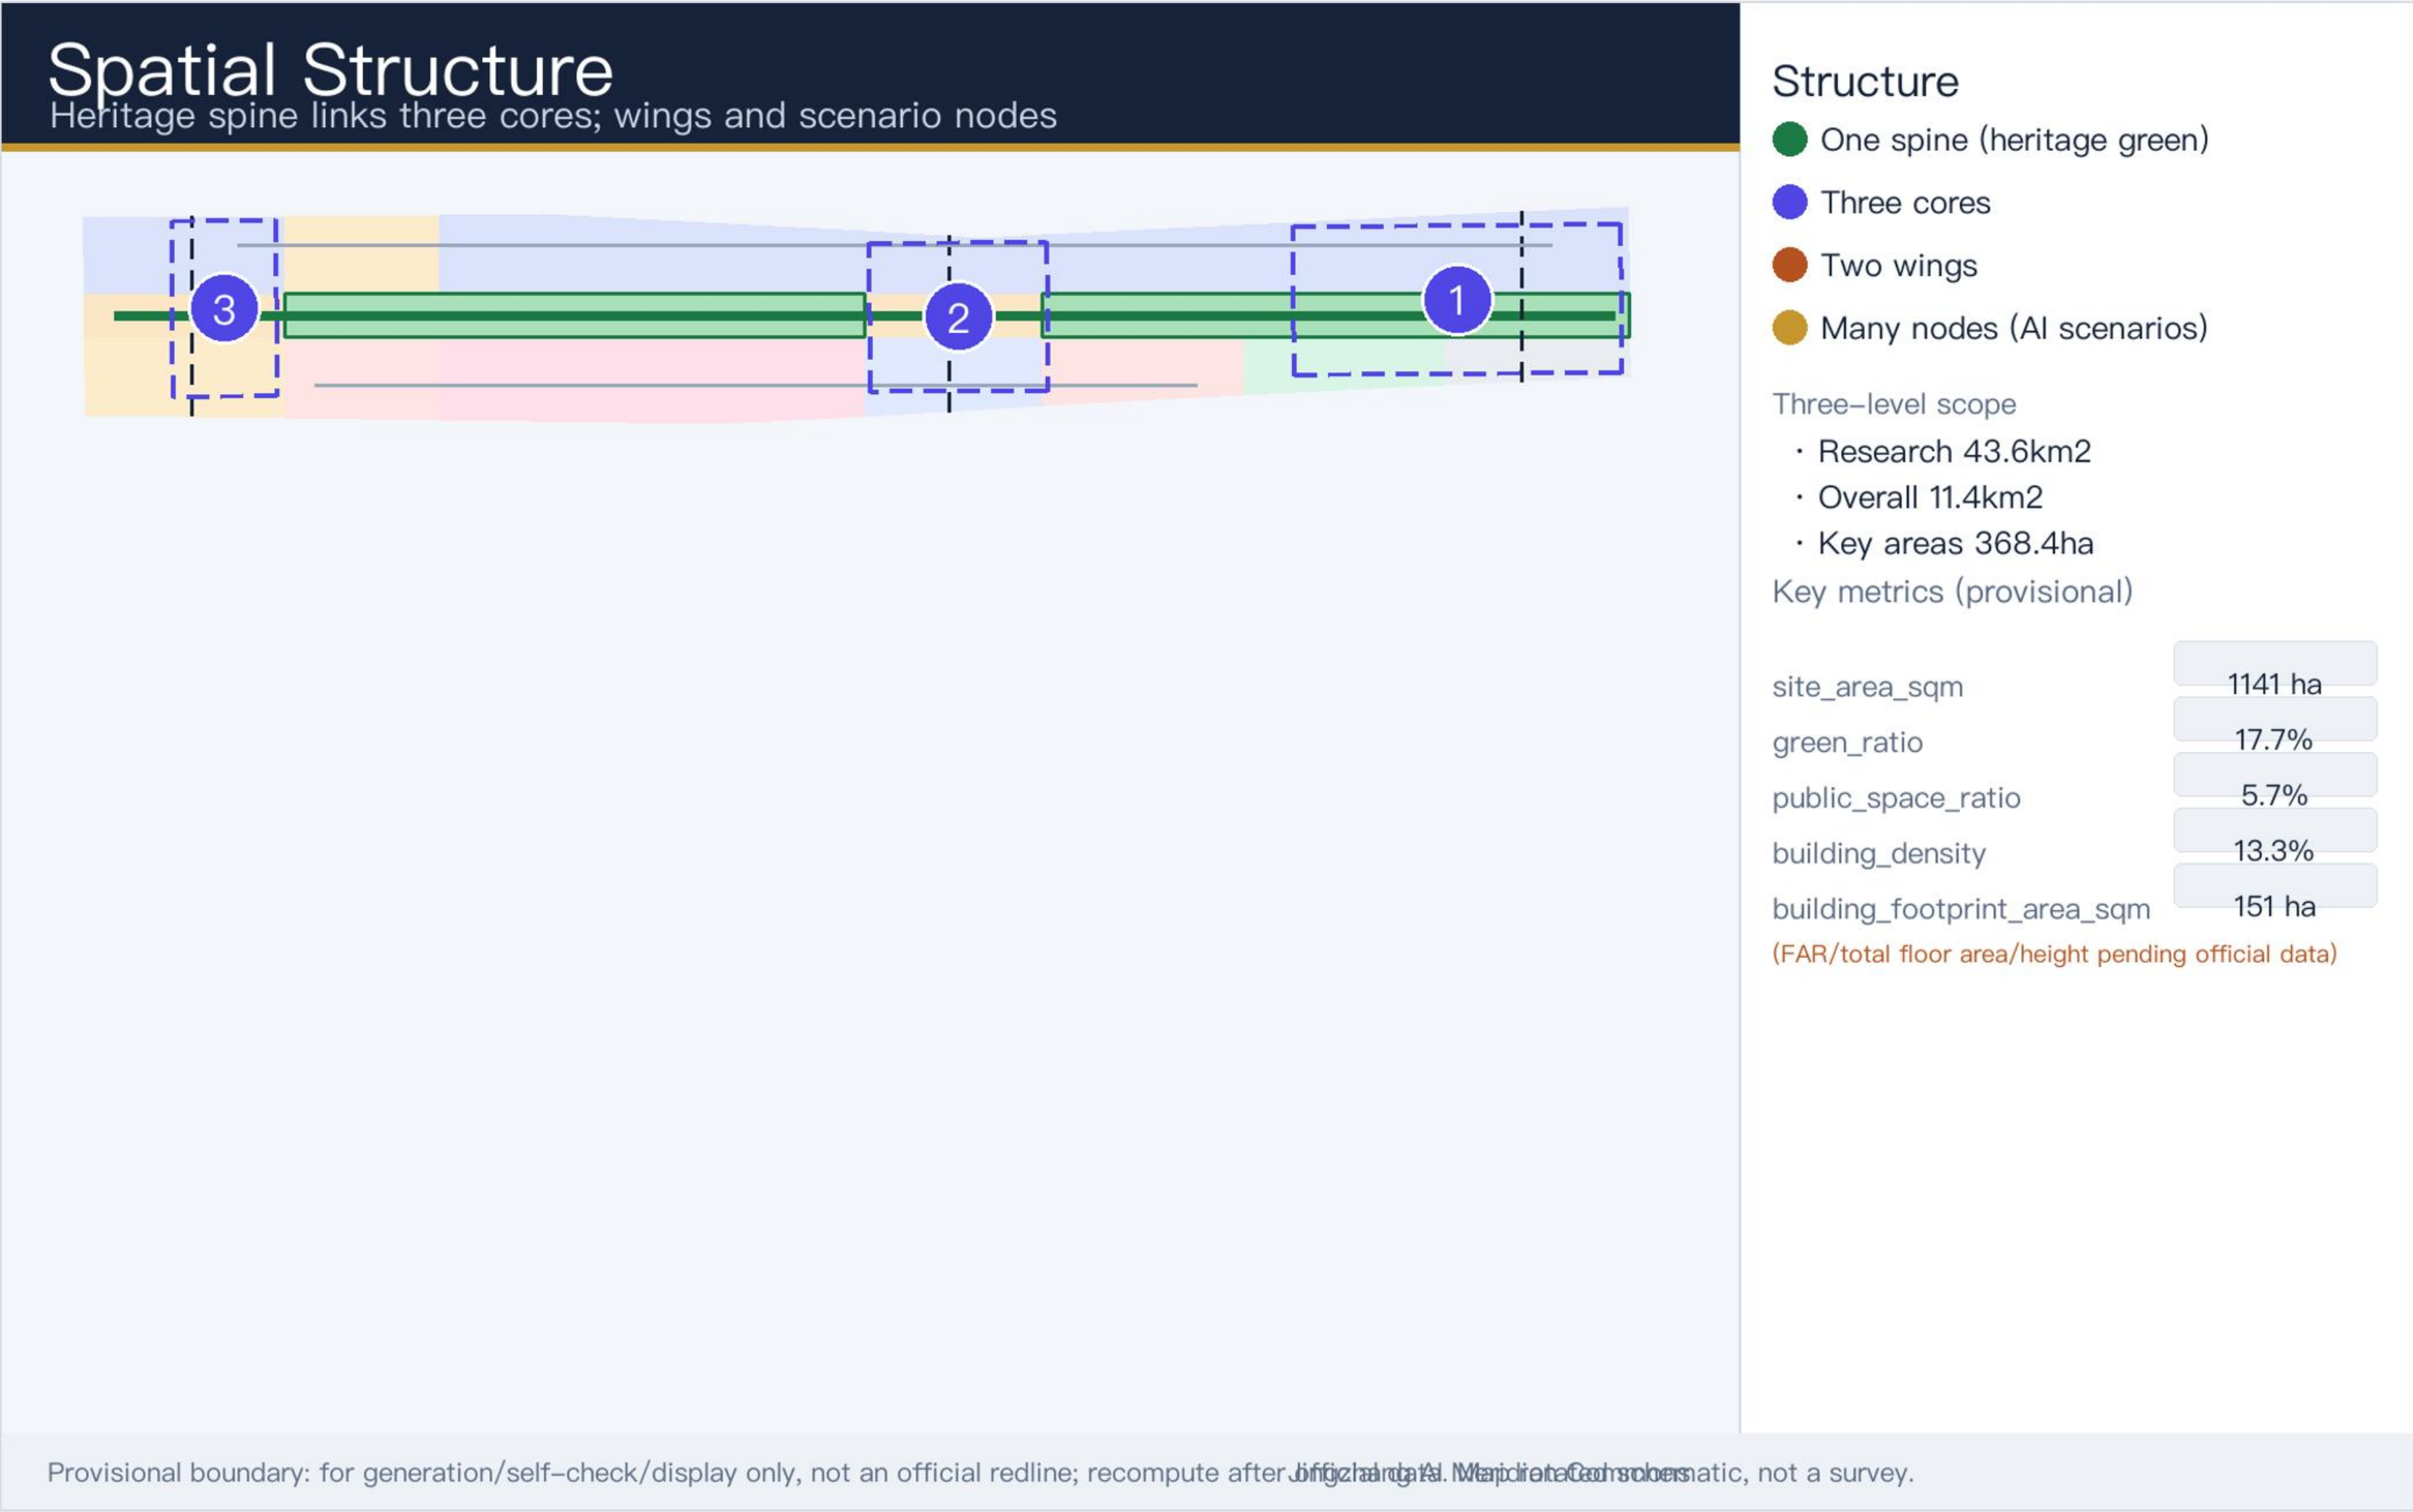

Key metrics (provisional)

site_area_sqm	1141 ha
green_ratio	17.7%
public_space_ratio	5.7%
building_density	13.3%
building_footprint_area_sqm	151 ha
(FAR/total floor area/height pending official data)	

Provisional boundary: for generation/self-check/display only, not an official redline; recompute after official data. Jingzhang AI Meridian is a schematic, not a survey.

Concept

Heritage park spine (history+slow-mobility+blue-green) links three cores; AI industry east, living/services west; networked AI scenario nodes. Brand: railway sleeper x neural net.

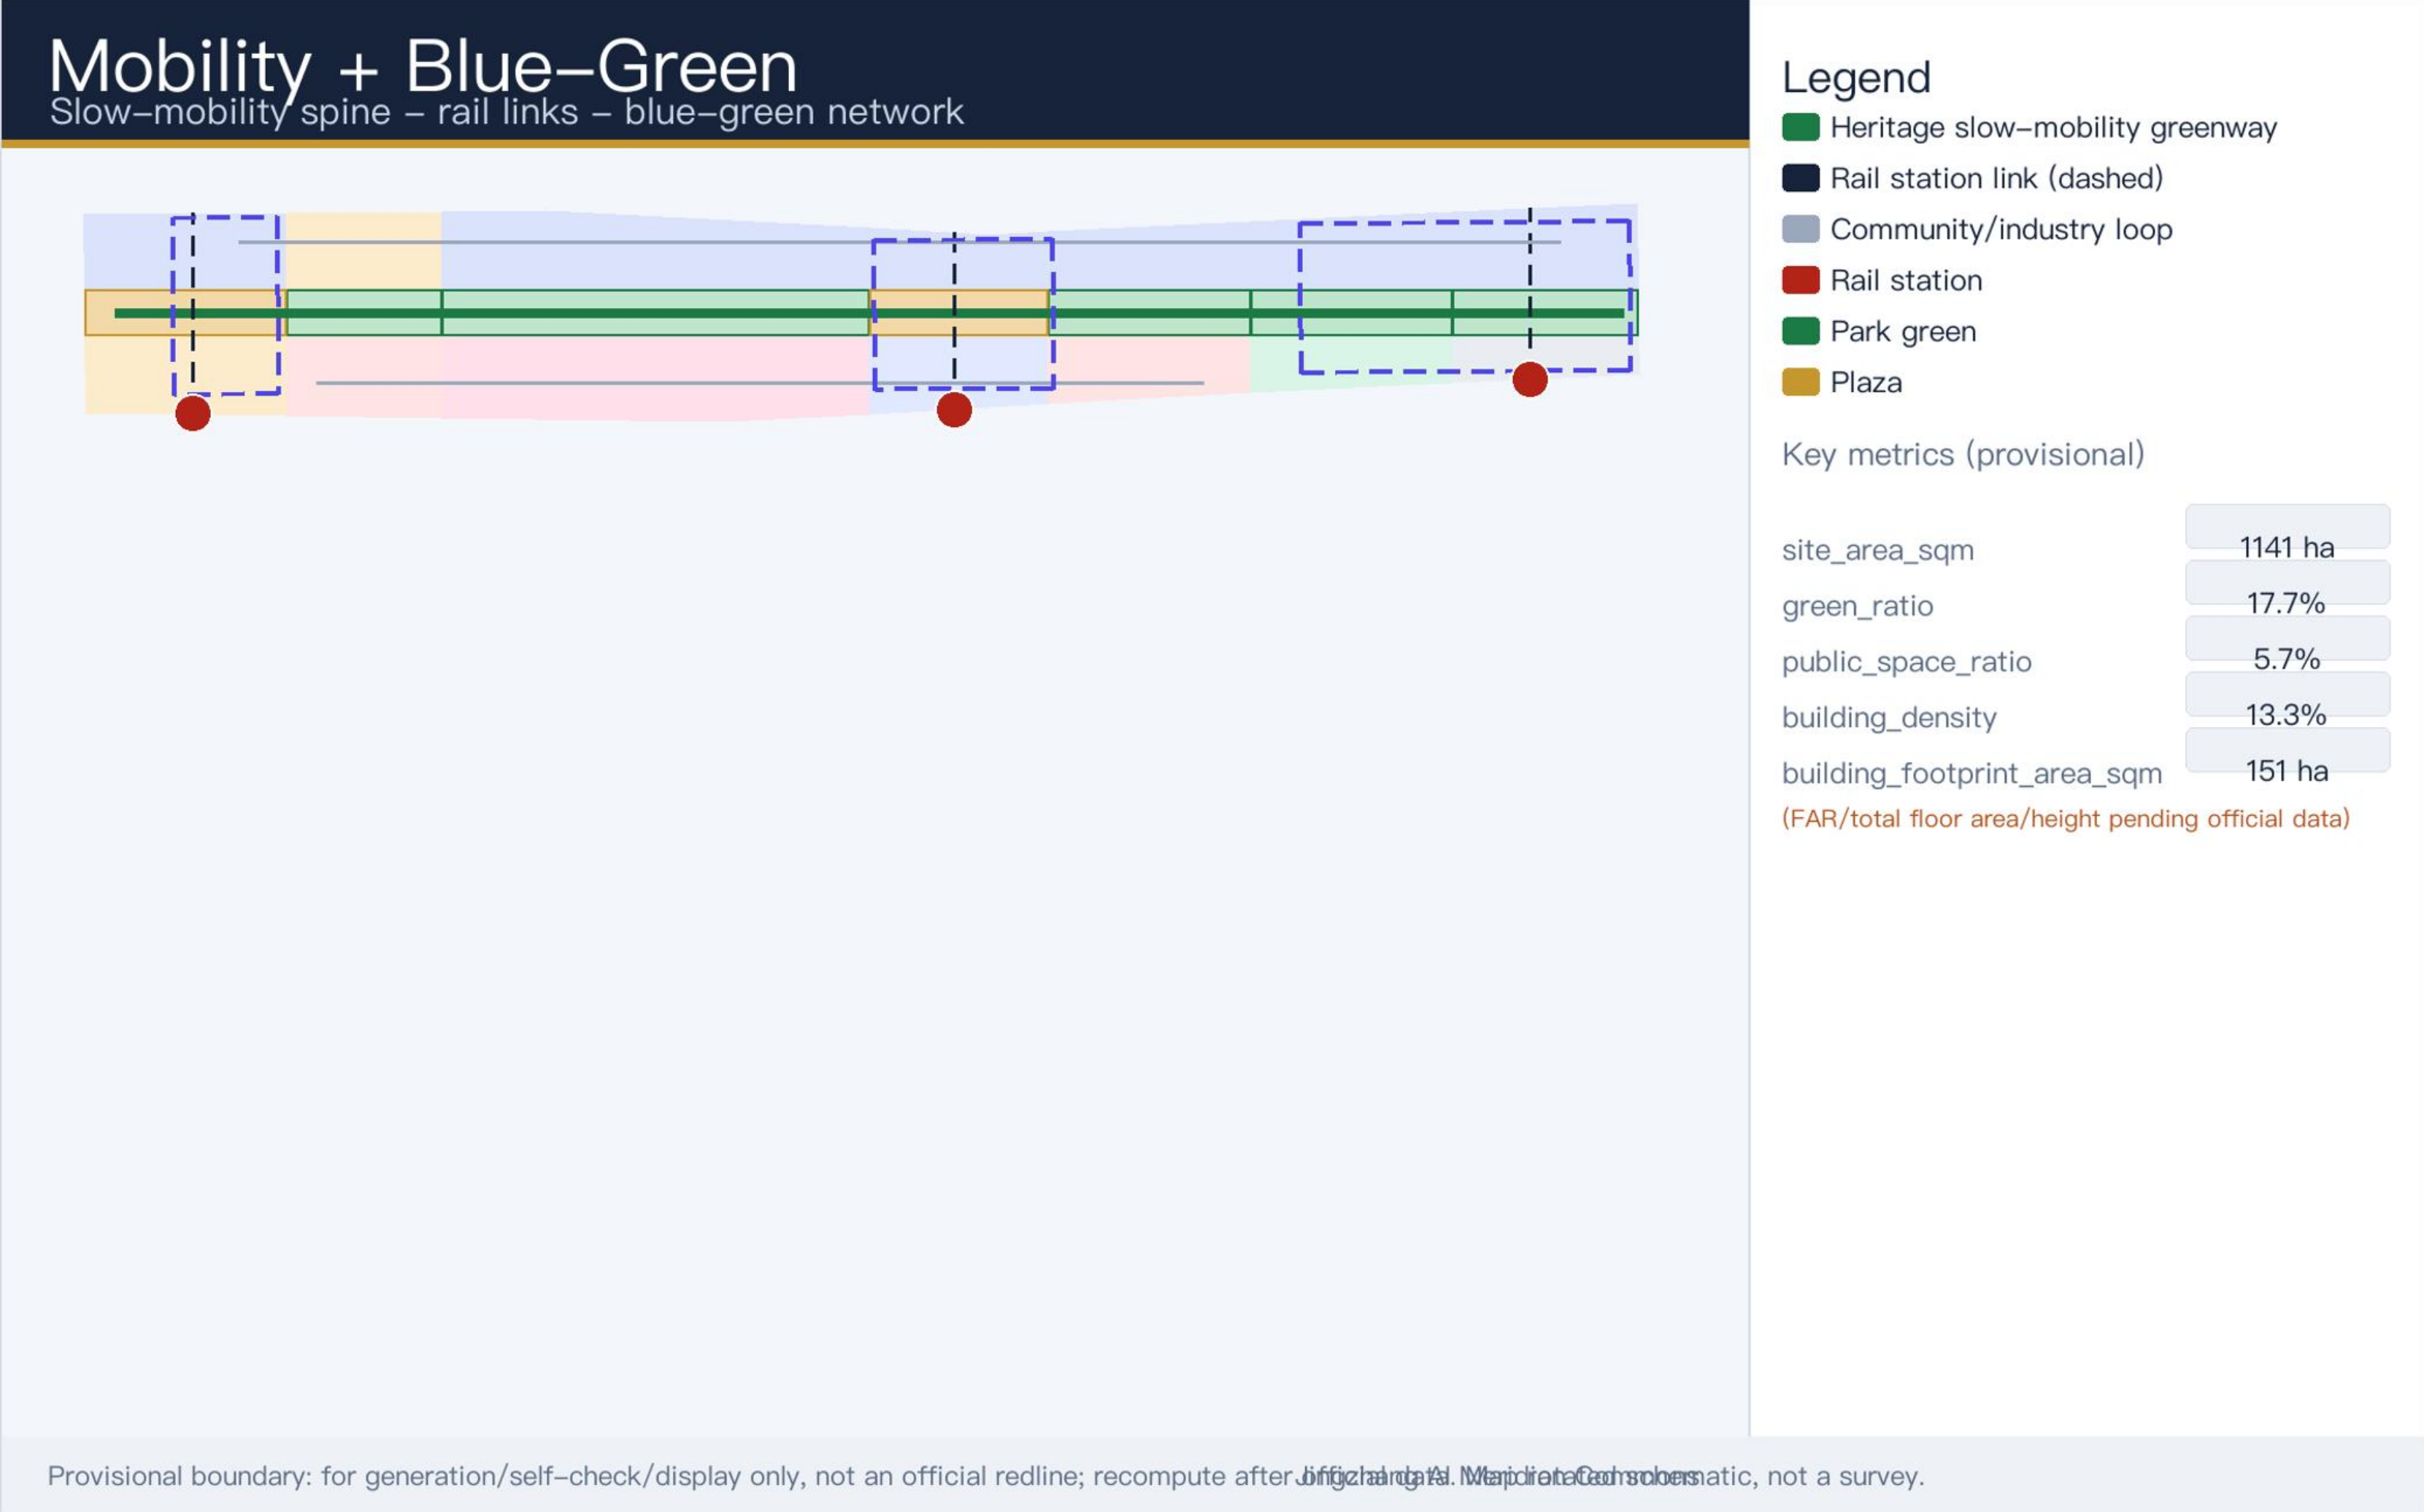

Land use & intensity

Land use tiles the boundary per national codes: green ~17.7%, footprint density ~13.3% (illustrative). Retain/renovate/demolish are concepts; FAR/total floor area/height pending controls.

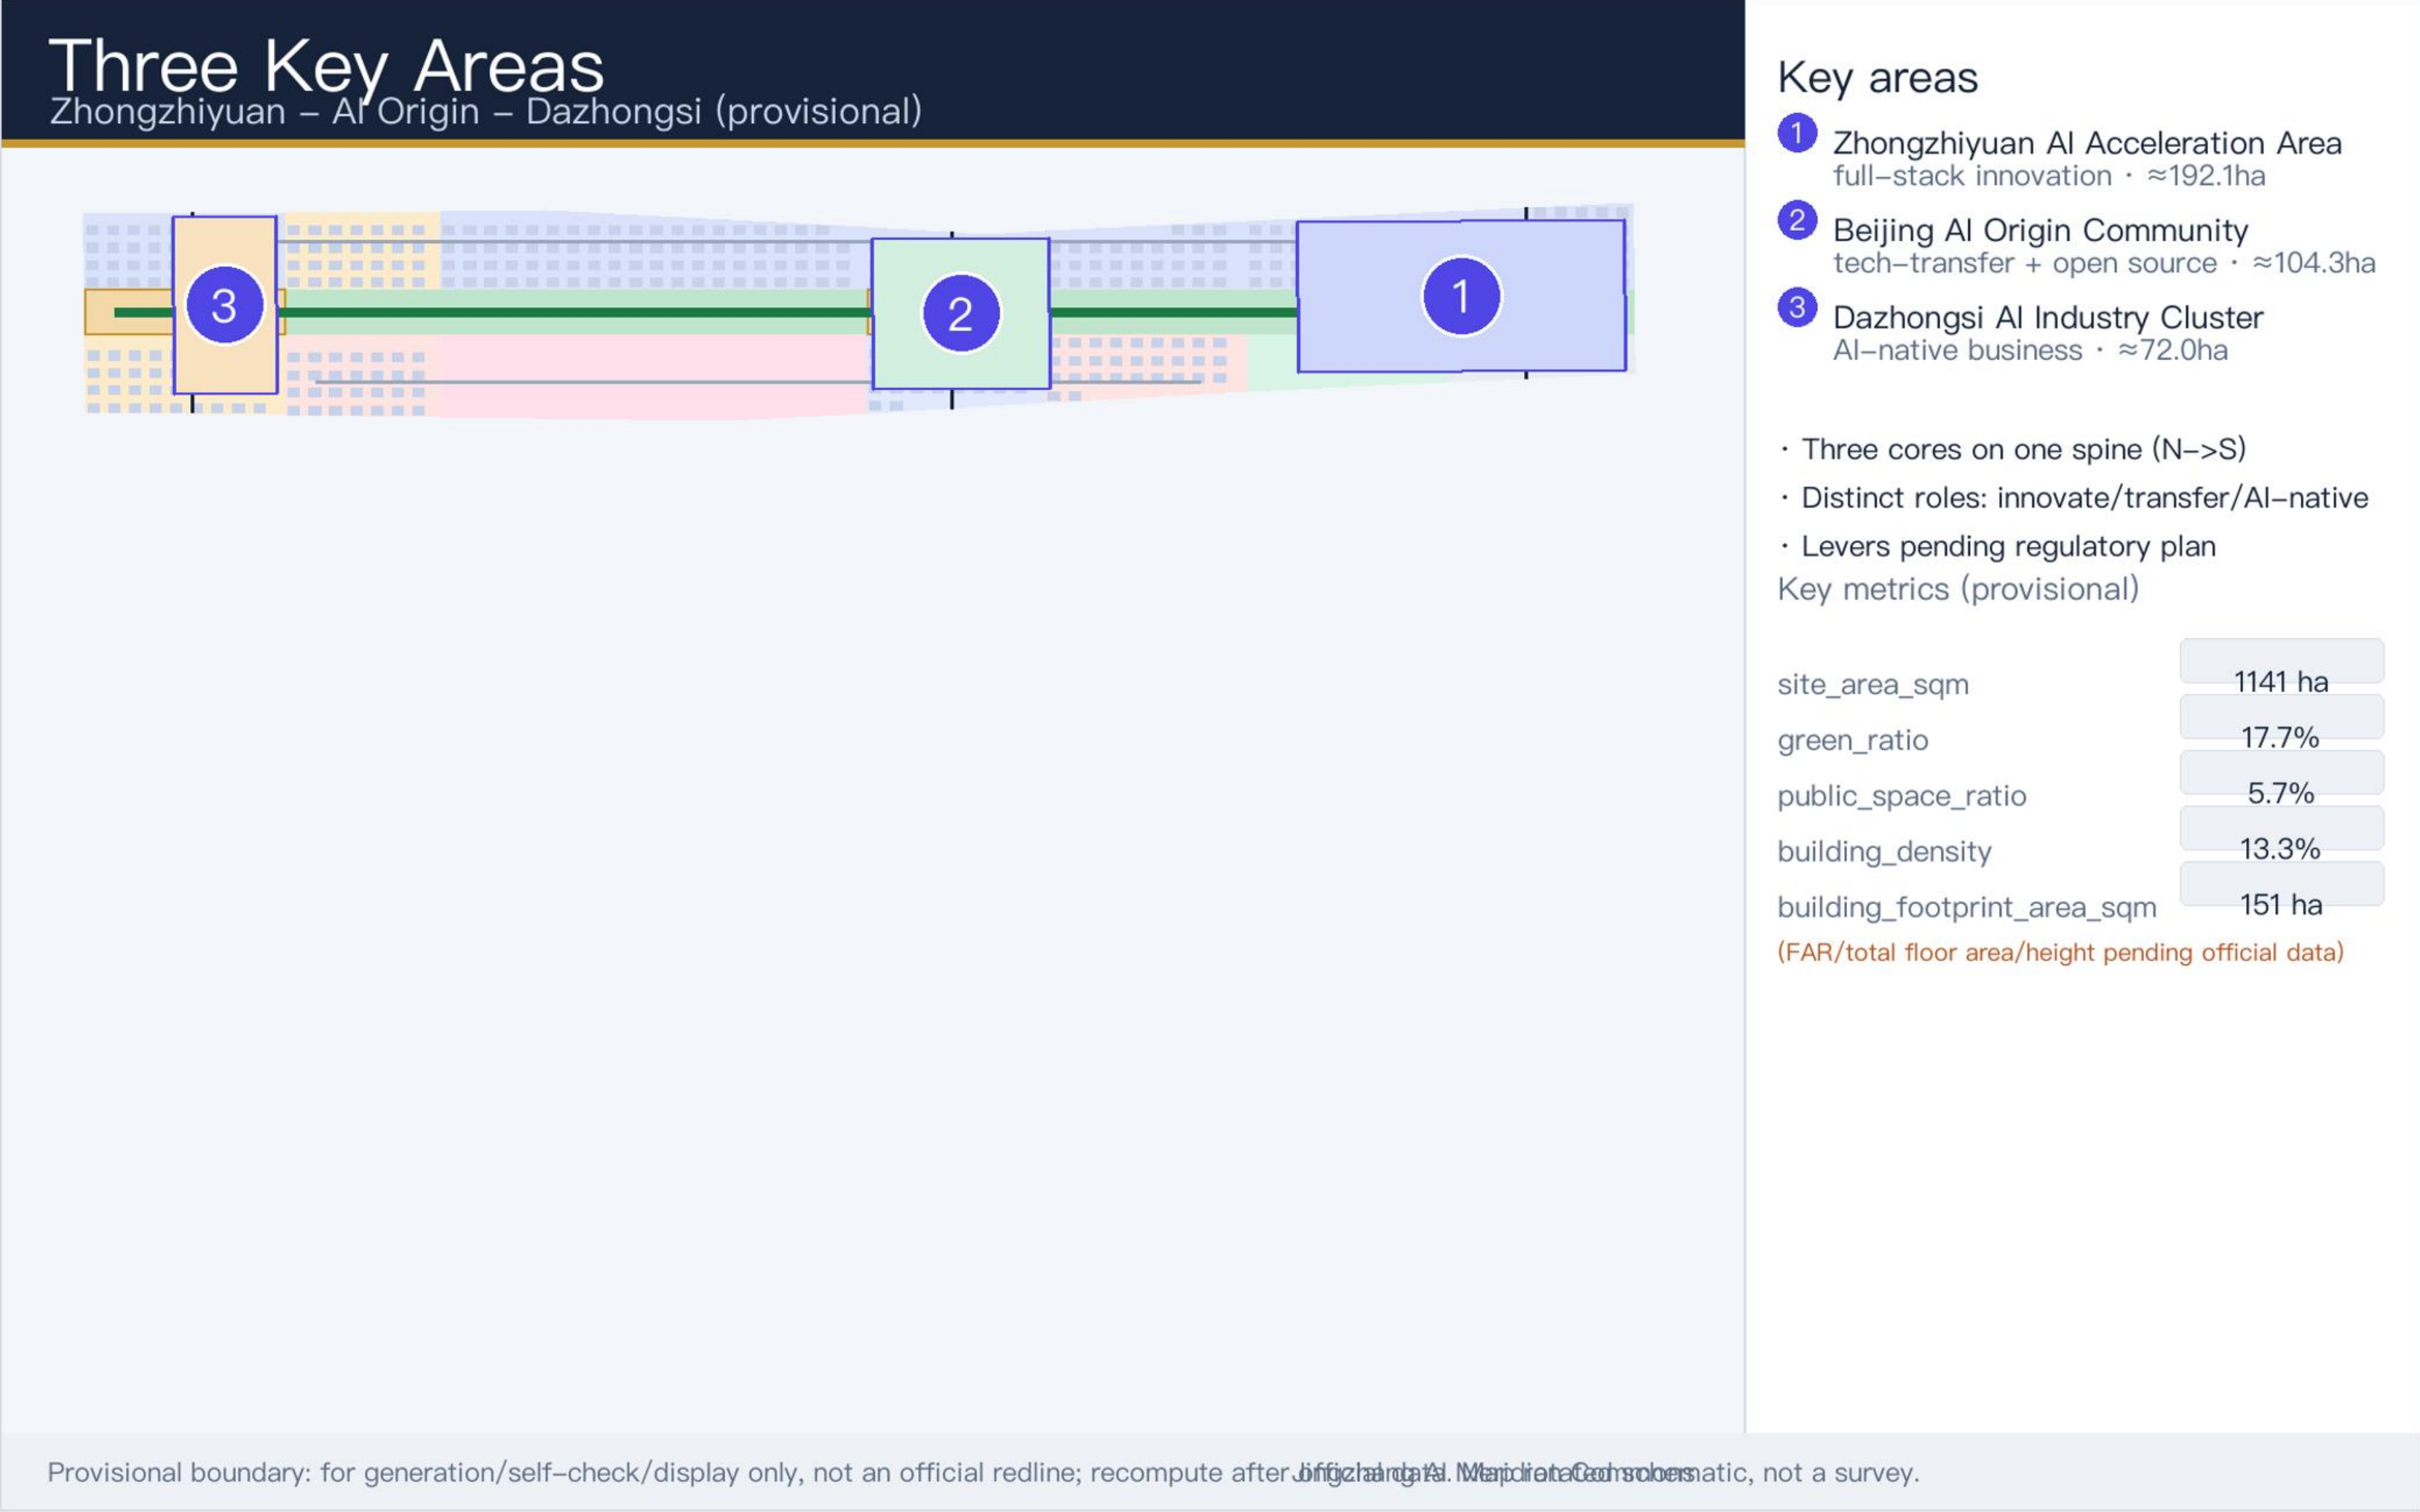

Board 3 · Mobility & Blue-Green

greenway / rail links / infra

Systems

N-S greenway + station links + community/industry loops; repair gaps and cross-ring nodes; utilities with distributed energy & edge compute pending engineering confirmation.

Provisional boundary: for generation/self-check/display only, not an official redline; recompute after official data. Map data: Mapbox, OpenStreetMap contributors

Three differentiated cores

Zhongzhiyuan=full-stack innovation (garden); AI Origin=tech-transfer (near-campus); Dazhongsi=AI-native business (urban). Implementation-depth design with levers and pending risks.

Board 5 · AI Scenarios & Operation

10 scenario cards / operations

>=10 scenario cards (3 test/validation), >=5 personas, scenario–space–operation mapping; >=3 pilgrimage landmarks (Memory Gate, Origin Honor Wall, Full–stack Beacon). Annual events, devel
oper community, open–scenario operation, international outreach – all as mechanisms for deepening.

Phasing

Near: light facilities/operations; Mid: renewal & scenarios; Long: deepen after controls confirmed. Phasing is a concept.

Metrics & Evidence

Recomputed from same GeoJSON/metrics; pending controls flagged

Key metrics (provisional, EPSG:4548)

Site area

块/pcs

Recompute

· green=green_area/site; public=public_area/site

· land-use tiles cover the boundary; recompute from geometry/*.geojson

Pending official: FAR / total floor area / building height

* density is illustrative, not statutory; recomputed on provisional boundary

Evidence: geometry/*.geojson + metrics.json + matrices + self-check PASS

Provisional boundary: for generation/self-check/display only; Meridian Control Line; recompute after official data. Map rotated schematic, not a survey.

Recalculation summary

Area ~1141 ha, green 17.7%, public 5.7%, footprint 151 ha, density 13.3%. FAR/total floor area/height pending official data.
