

JING-ZHANG AUTHENTICITY COMMONS

A BIDIRECTIONAL EVIDENCE SPINE THAT SENDS ERRORS BACK TO THEIR SOURCE

Bidirectional Evidence Spine | Overall Mechanism

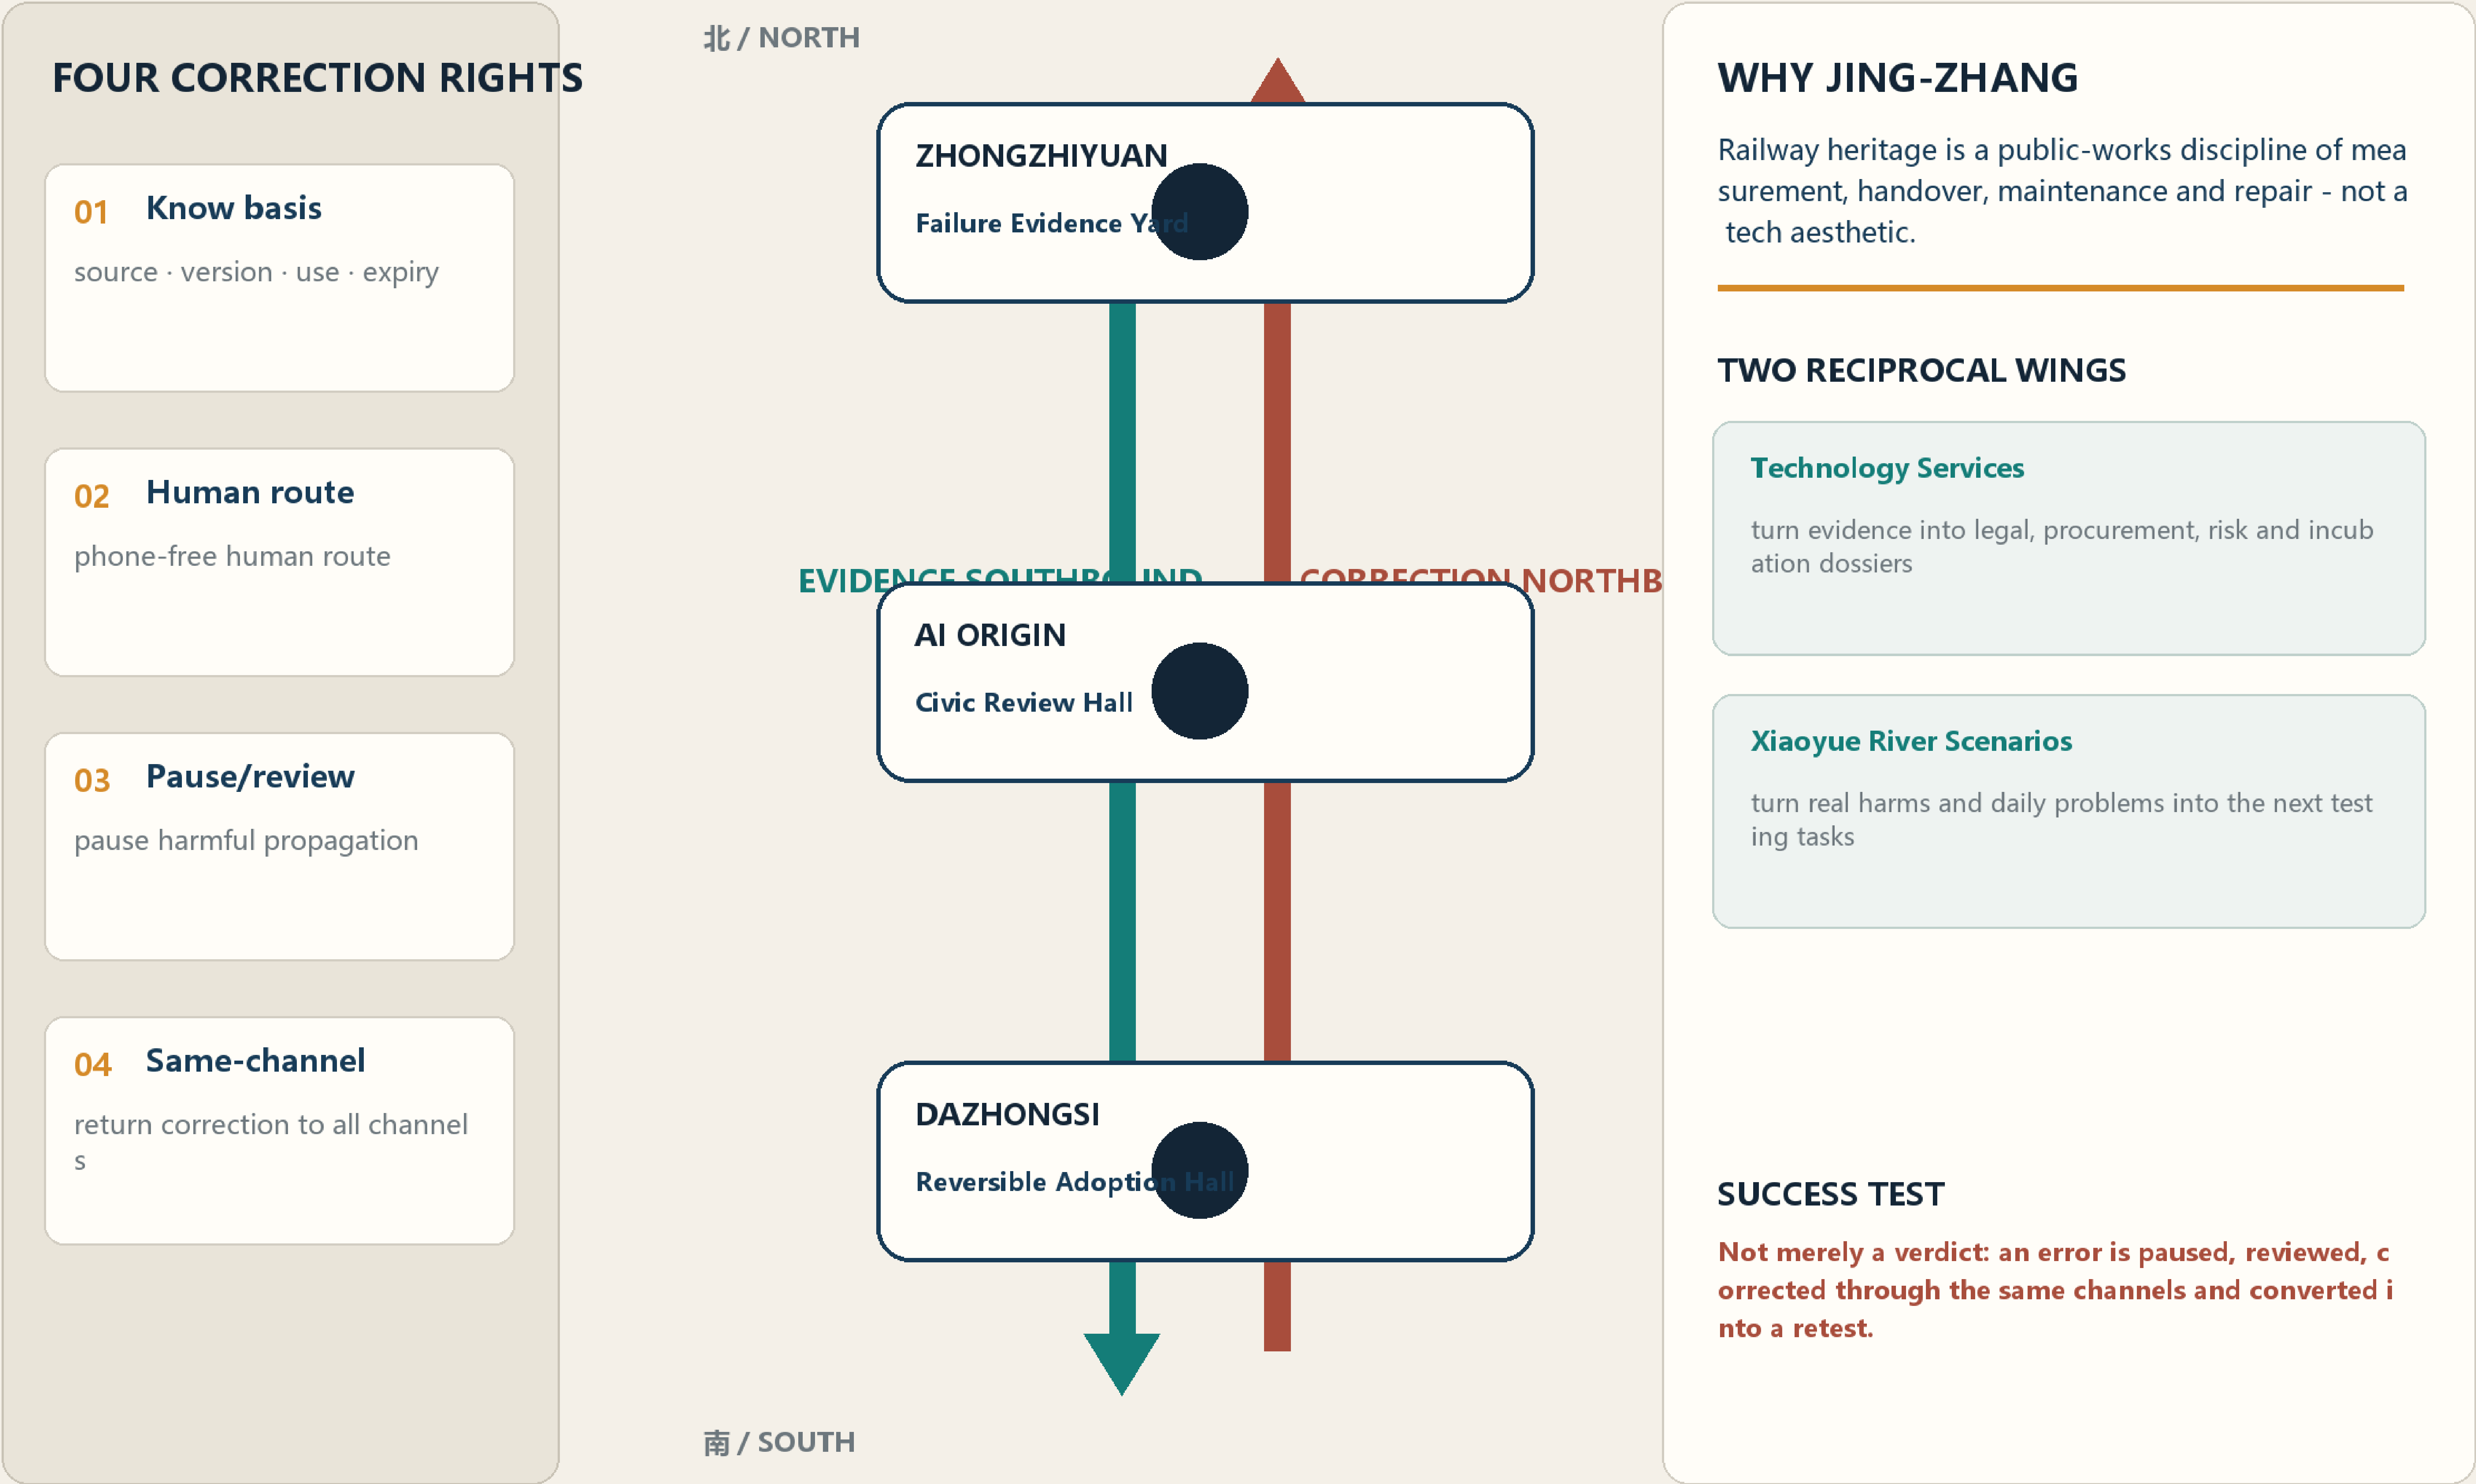

Evidence moves south; corrections return north - the city can send errors back to their source

01 / 05

Bidirectional Evidence Spine | Overall Mechanism

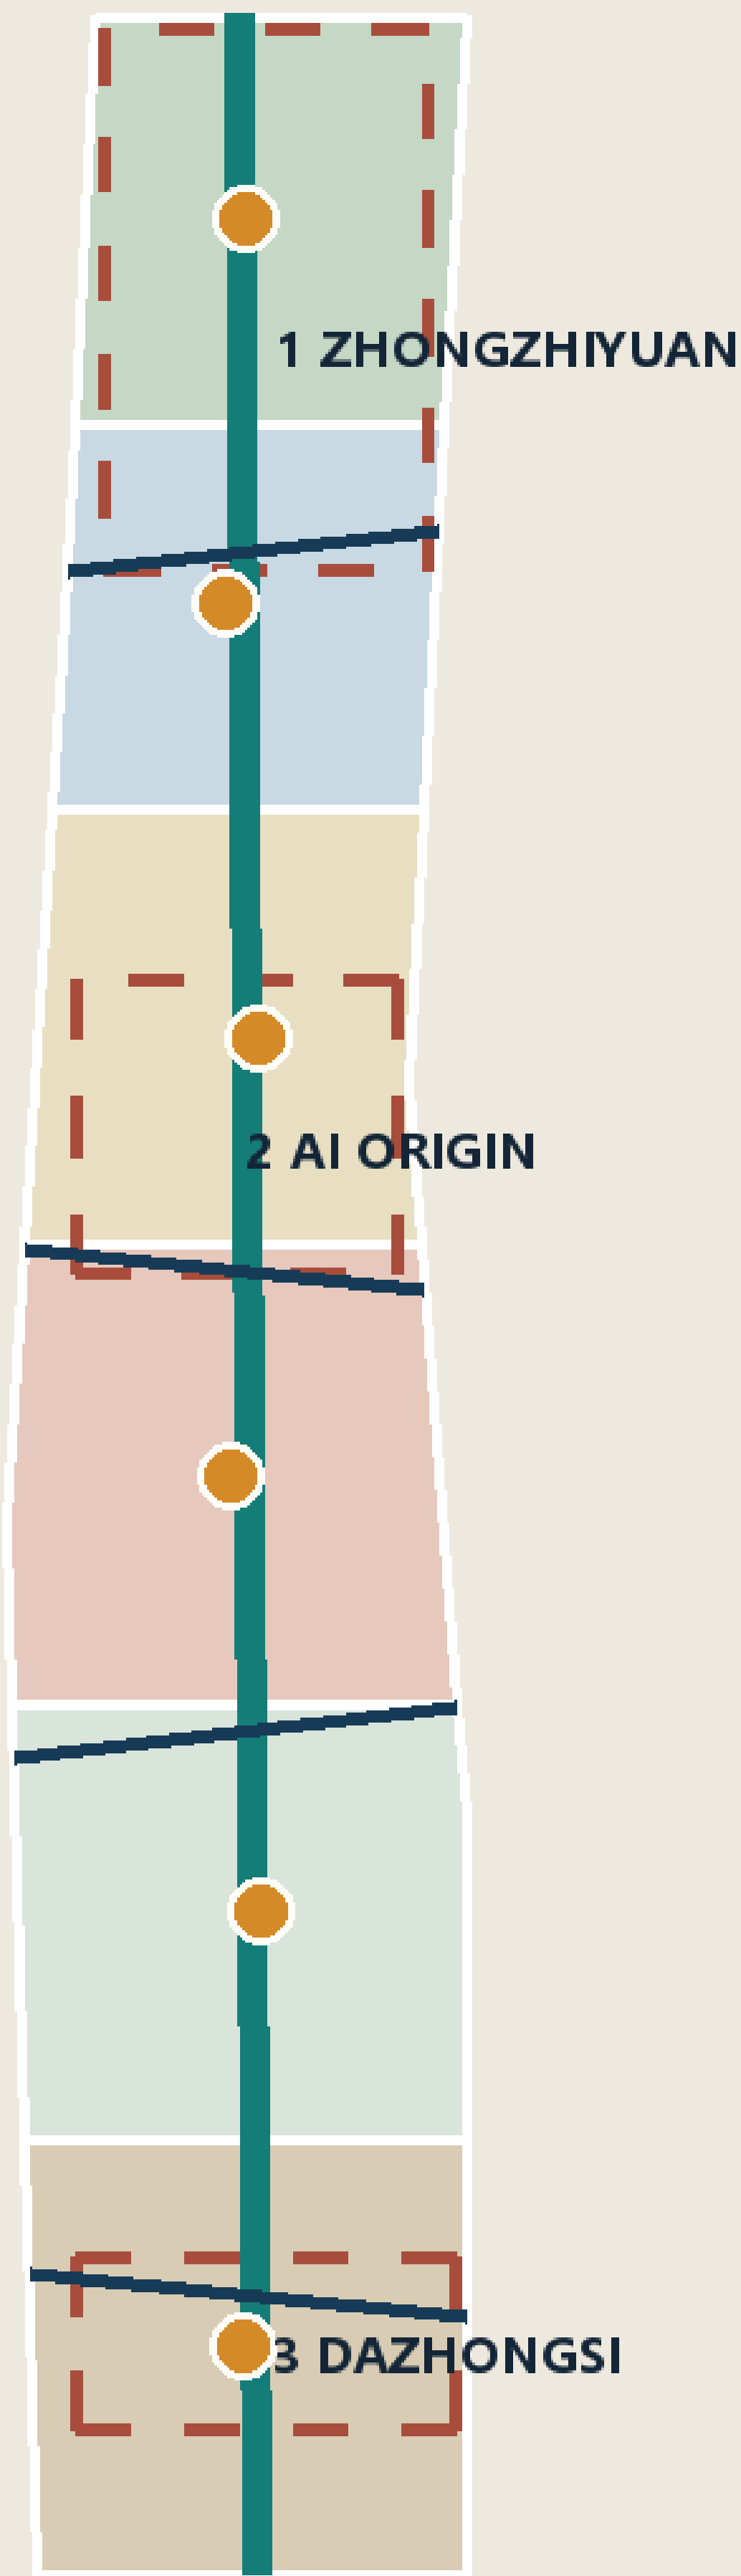

Evidence moves south; corrections return north - the city can send errors back to their source

Three Belts | Service and Correction Spaces

Provisional land-use fields recede; public-service protocols carry the design intent

SUBMITTED SPATIAL FRAME

provisional land uses / dashed key areas / slow spine / six stations

THREE WORKING BELTS

CENTURY-OLD CULTURAL BELT

versioned memory | original, repaired, reconstructed, AI-interpreted

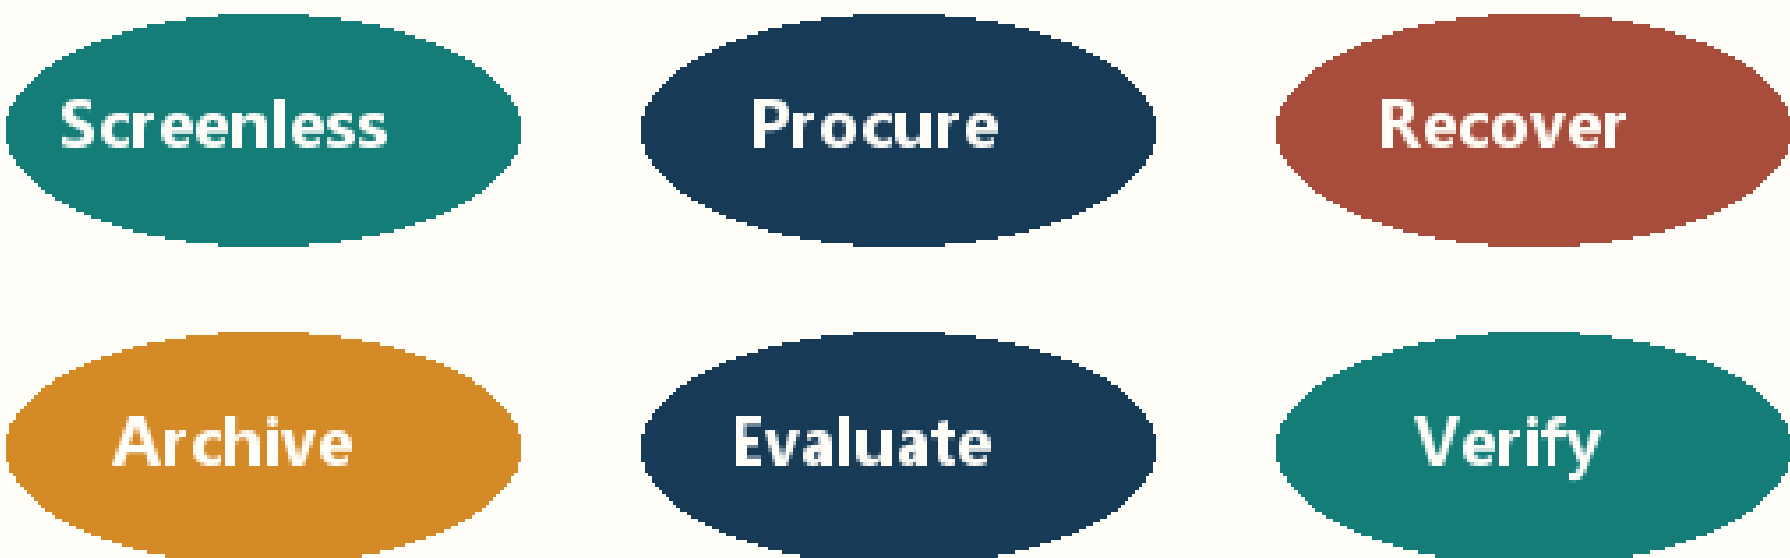

URBAN AI LIFE BELT

screenless service | human review | same-channel recovery

AI CONVERGENCE BELT

failure testing | expiring evidence | reversible adoption

OVERLAP AT SIX STATIONS

PROTOTYPES

FAILURE EVIDENCE YARD

controlled test / observation / isolation / retest

DAILY TEST RECOVERY

CIVIC REVIEW HALL

evidence vestibule / review / translation / return wall

DAILY TEST RECOVERY

REVERSIBLE ADOPTION HALL

procurement / lifecycle cost / exit test / expiry wall

DAILY TEST RECOVERY

LIMITS

no truth score | no blacklist | no removal power | no government certification

Three Key Areas | Daily, Test and Recovery States

Each area has a distinct section, accountability chain and reversible implementation unit

03 / 05

01 ZHONGZHIYUAN

Failure Evidence Yard

Carry failure cases and use limits into industry evidence.

SPATIAL SECTION

- public observation
- controlled test
- isolation bay
- repair and retest

THREE STATES

- DAILY** open service / low-tech equivalent
- TEST** controlled material / visible boundary
- RECOVERY** pause / return correction / recover assets

02 AI ORIGIN

Civic Review Hall

Translate technical evidence into public language that can be contested.

SPATIAL SECTION

- screenless intake
- evidence vestibule
- private review
- correction return wall

THREE STATES

- DAILY** open service / low-tech equivalent
- TEST** controlled material / visible boundary
- RECOVERY** pause / return correction / recover assets

03 DAZHONGSI

Reversible Adoption Hall

Test migration, shutdown and recovery before adoption.

SPATIAL SECTION

- procurement desk
- lifecycle cost table
- exit test
- screenless recovery

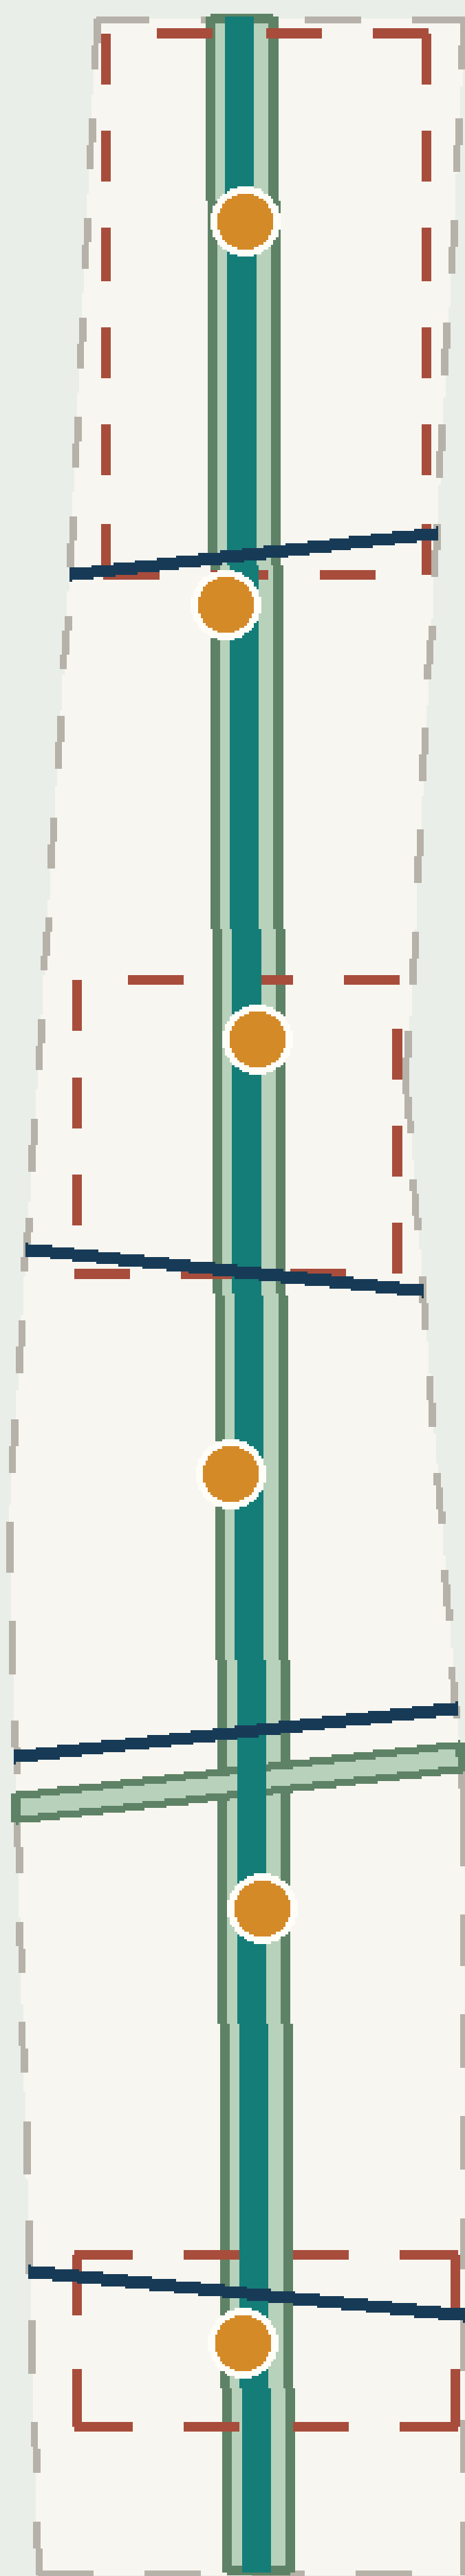

THREE STATES

- DAILY** open service / low-tech equivalent
- TEST** controlled material / visible boundary
- RECOVERY** pause / return correction / recover assets

Access and Recovery Routes | Governance in the Last 50 Metres

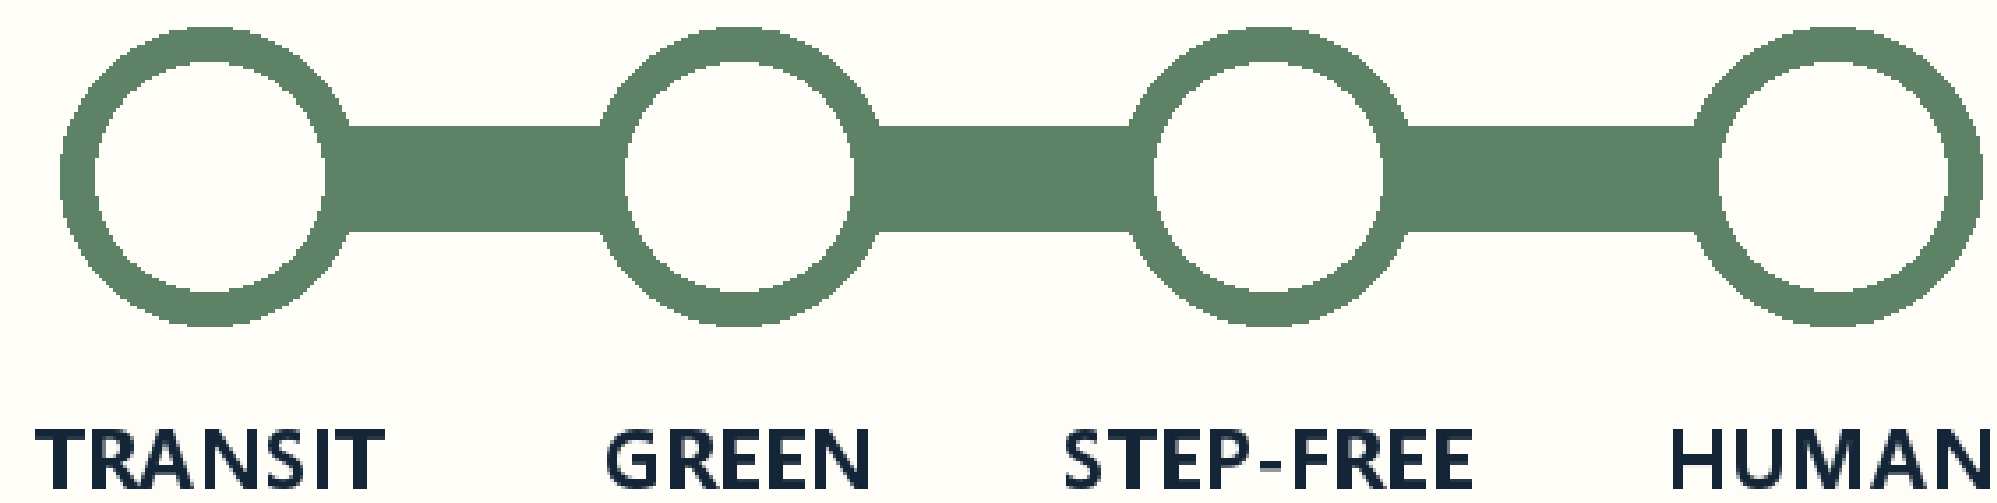

Transit - slow spine - step-free entrance - human handover - same-channel return

SLOW, BLUE-GREEN, SIX STATIONS

design centrelines, not road redlines; all boundaries provisional

LAST 50 M HUMAN HANDOVER

SERVICE ARRIVAL

- phone, paper, telephone and oral intake
- no account, fee or continuous facial recognition
- equivalent outcomes across access modes
- private case review separated from public method display

SAME-CHANNEL RECOVERY: return to every sign, counter, page and subscriber

STATION CONTRACT

- 01** Accountable role
- 02** Human handover
- 03** Return channels
- 04** Pause trigger
- 05** Shutdown trigger
- 06** Recovery action

FIELD MEASURES

handover time | step-free continuity | correction on return time | understanding

Metrics and 90-day Pilot | Acceptance by Recovery Capability

Separate package-computable readiness from outcomes requiring real operational baselines

PACKAGE-COMPUTABLE

- 15 scenarios
- 12 journeys
- 6 staffed stations
- 5 industry tests
- 3 key areas
- 4 correction rights

NEW READINESS METRICS

completion of owner, human route, return channel, pause, shutdown and recovery fields

90 DAYS / FOUR STAGES

DISPOSITION: ADOPT / MODIFY / RETIRE

BASELINE IN OPERATION

- human handover time
- same-channel correction time
- appeal reversal rate
- screenless parity completion
- harm exposure window
- post-remediation retest
- understanding provenance ≠ truth
- data and asset recovery completion

STOP when there is no owner, lawful material or correction-return channel.
