

01 Identity and Structure

- Open Jing-Zhang AI Civic Loop links railway heritage, open-source AI collaboration and civic services.
- The JZ / AI / Loop mark direction is original and uses no third-party logos or imagery.

Evidence: [proposal.en.md](#) / [manifest.json](#) / [metrics.json](#) / [visual/index.en.html](#)

02 Ecosystem and Key Areas

- The proposal separates regional research, overall design and three detailed key areas.
- Zhongzhi Park, AI Origin Community and Dazhongsi form the three anchors.

Evidence: [proposal.en.md](#) / [manifest.json](#) / [metrics.json](#) / [visual/index.en.html](#)

03 Scenarios and Tests

- Ten AI scenario cards define users, spaces, data sources, human review, metrics and stop conditions.
- Three validation pilots cover civic-agent safety, walking accessibility and edge-compute services.

04 Professional Deepening

- Control-depth items are split into recalculable metrics, official controls pending and operational KPIs.
- Implementation gates prevent concept proposals from being read as statutory approval or government endorsement.
