FROM RAIL TIMETABLE TO URBAN SCORE

CHOREOGRAPH PEOPLE FIRST; SCHEDULE MACHINES SECOND

JINGZHANG MOVEMENT SCORE

ONE SPINE · THREE YARDS · SIX ROOMS · TWELVE STATIONS · TWO WINGS

Data: submitted GeoJSON; grey dash = provisional extent

PROVISIONAL GEOMETRY · CONCEPTUAL · NOT FOR AI

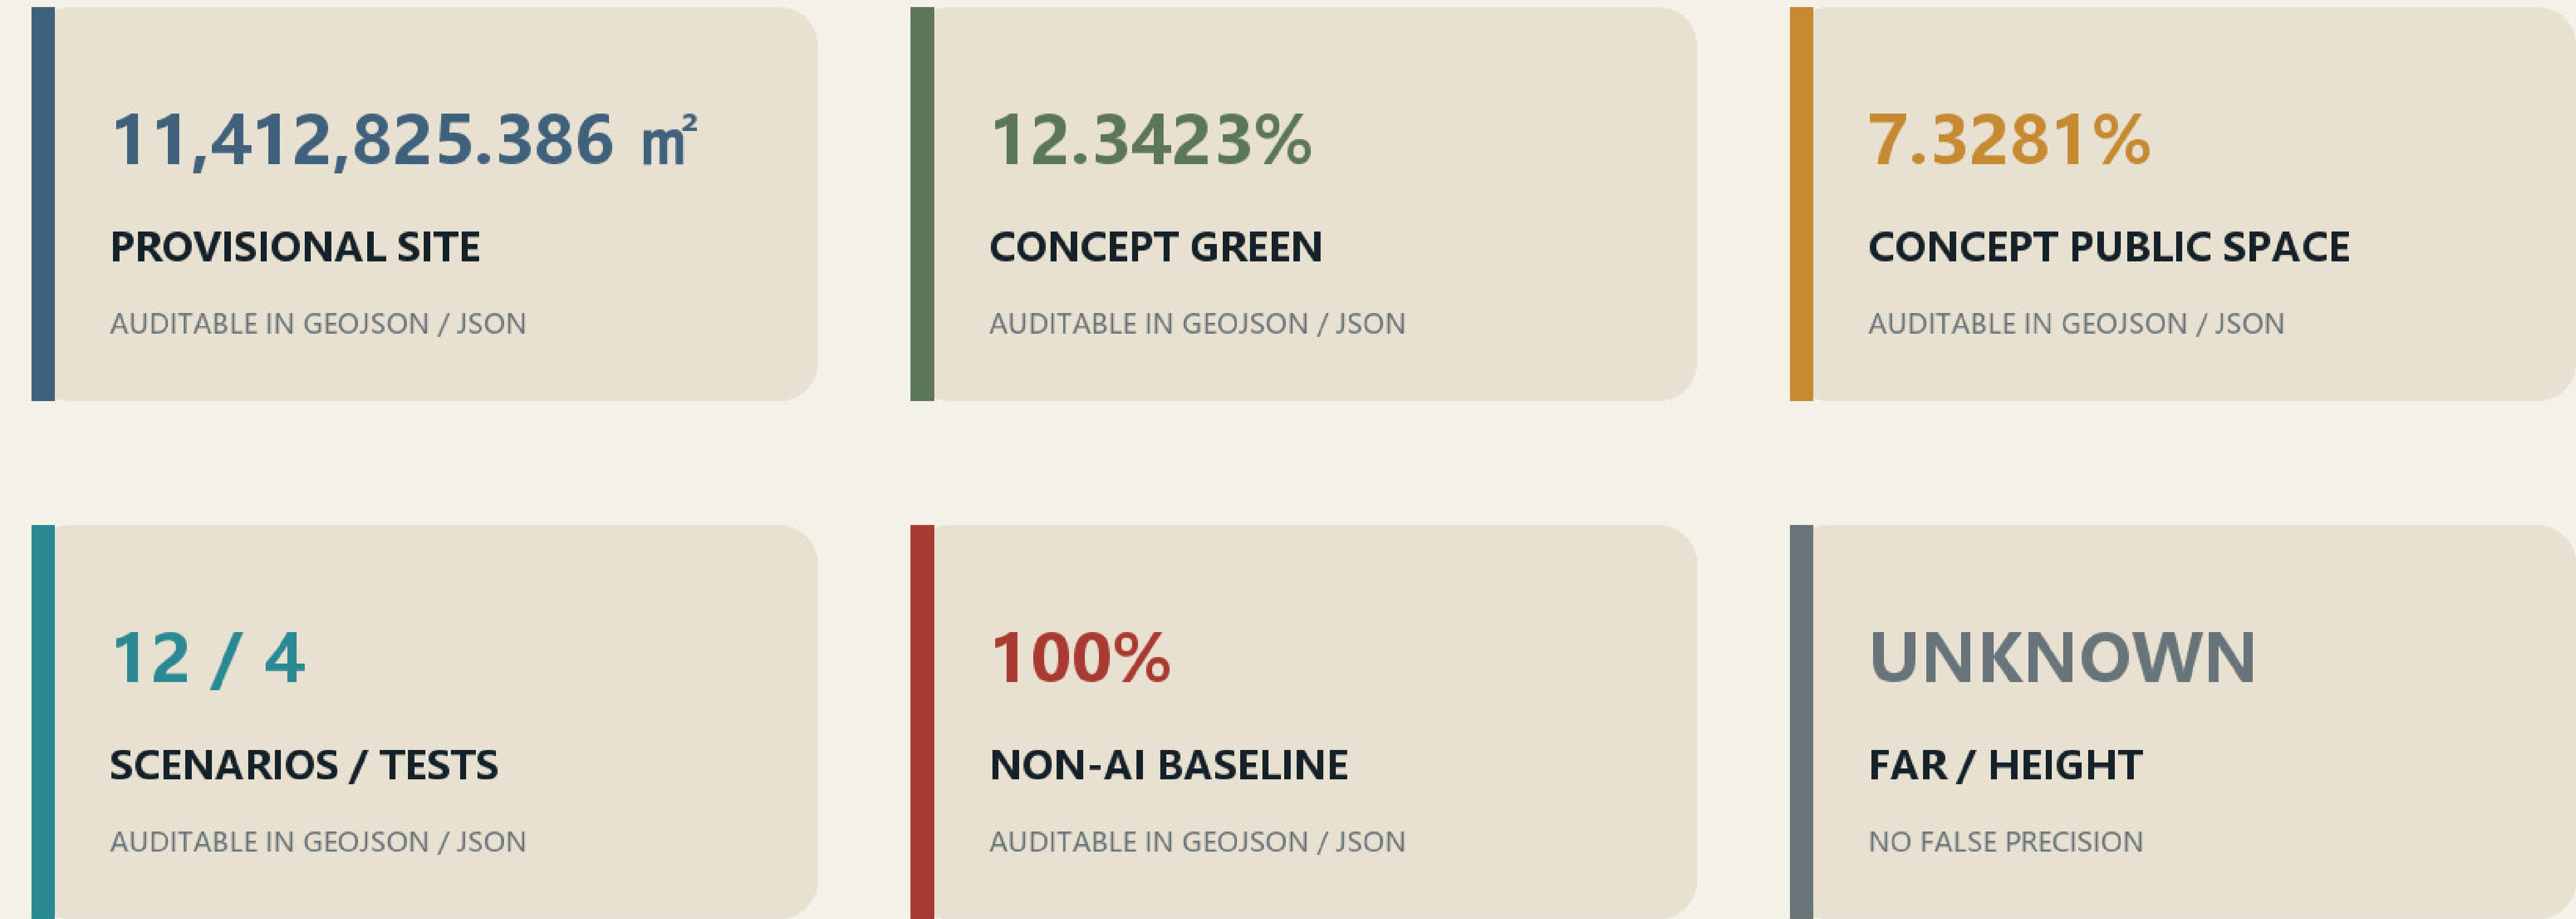

The score does not automate everyone. Every intelligent system must first prove:

- 01 People retain priority
- 02 A screen-free route works
- 03 A person can pause it
- 04 Failure and exit are public
- 05 Replication follows a passed gate

METRICS ARE EXIT GATES, NOT DECORATION

GEOMETRY · SCENARIO COUNTS · EXPLICIT UNKNOWNNS

PROVISIONAL GEOMETRY · CONCEPTUAL · NOT FOR AI

CHAIN: submitted geometry → EPSG:4548 area → metrics.json → offline HTML data-metric → self-check

EVIDENCE CHAIN: GEOMETRY → METRICS → OFFLINE DISPLAY → FOUR-GATE CHECK
