

Overall Design Overview: DATA Loop, Three Nodes (provisional concept)

Overall design scope ~11.4 km² – three nodes – Loop slow-traffic axis – greenbelt and public-space spine (provisional)

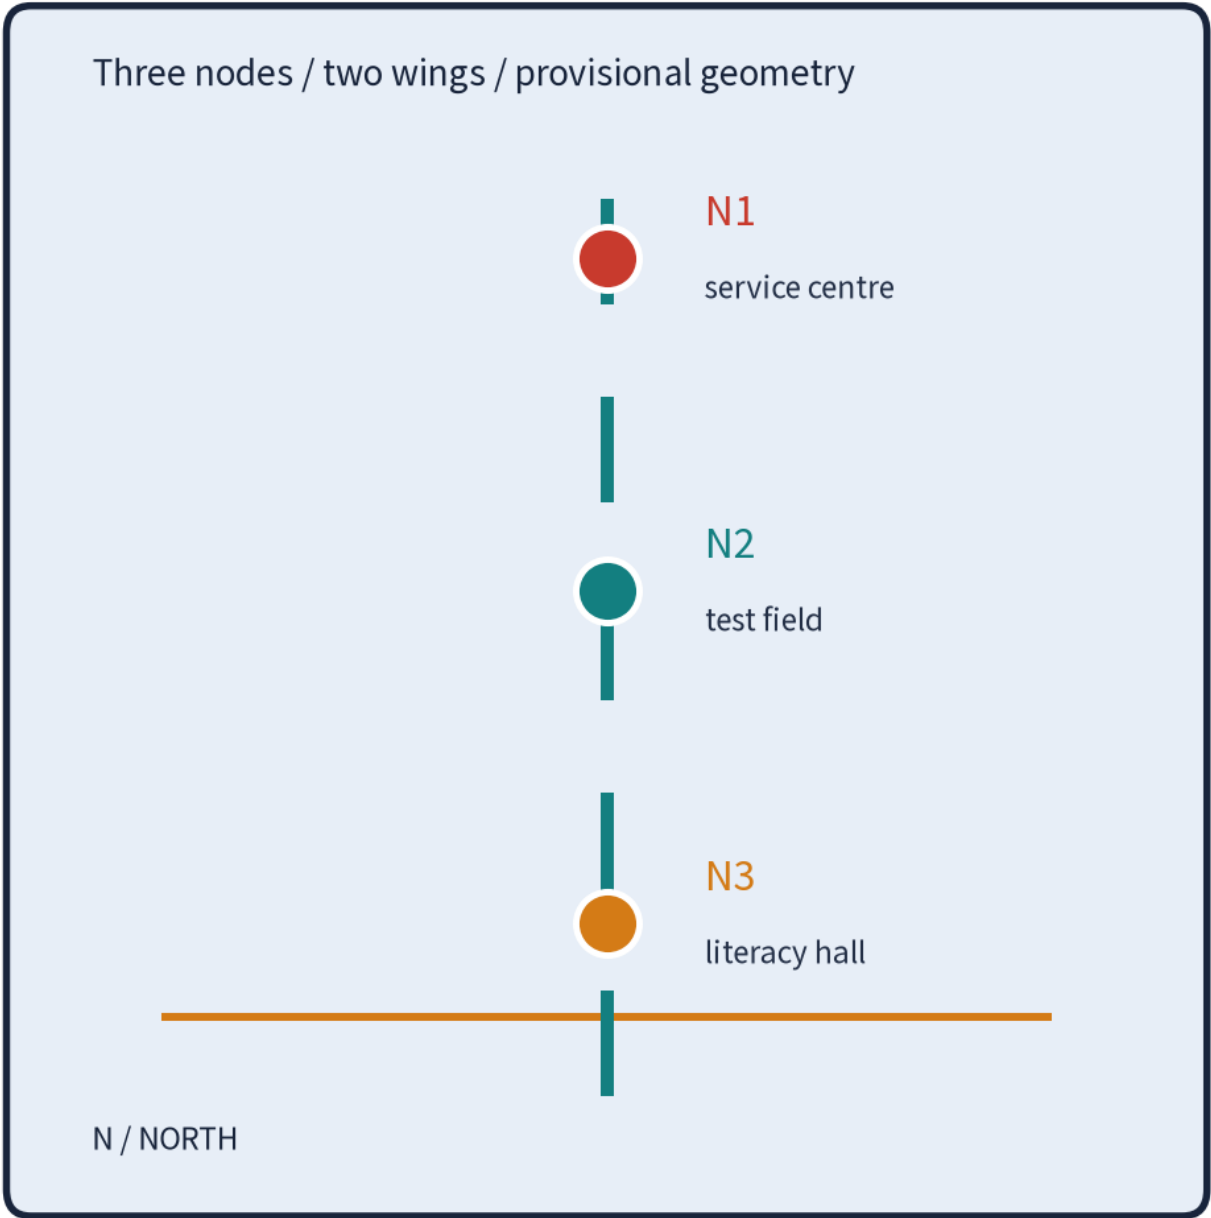

All geometry and node positions are provisional. No ownership, partnership, capacity or approval is implied.

Three node decision cards: input • space • responsibility • exit

PROVISIONAL • concept boundary • recompute

Registration → controlled testing → public literacy; every node has a human fallback

N1 Service Centre

Input: public metadata / voluntary checklist
Space: directory wall + staffed desk
Output: completeness prompt + referral
Exit: unclear rights or unresolved appeal

N2 Test Field

Input: synthetic / aggregate sample
Space: controlled room + report wall
Output: test log + risk note
Exit: breach, audit failure or no takeover

N3 Literacy Hall

Input: reviewed public corpus / questions
Space: bilingual gallery + paper class
Output: lesson + human referral
Exit: unsafe access or unreviewed corpus

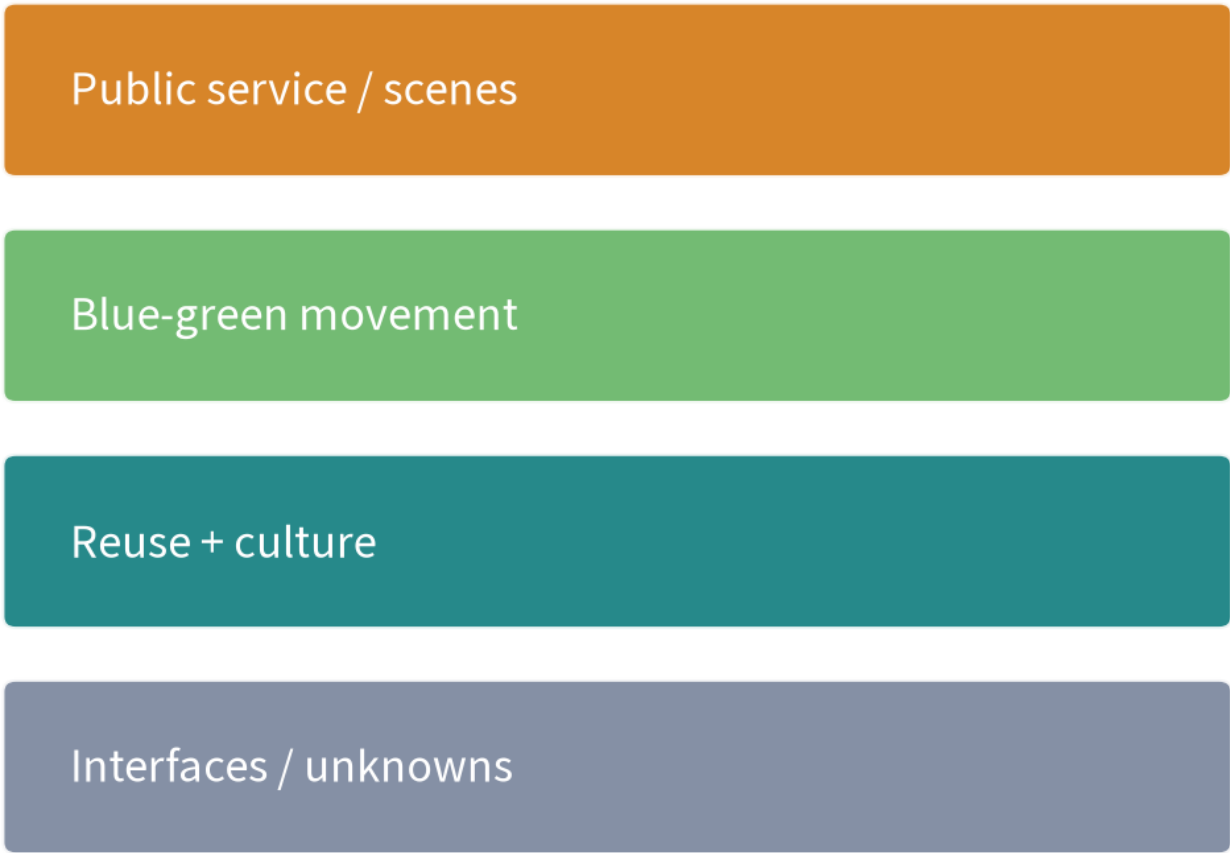

The three cards are service mechanisms, not approved facilities.

Land-use reading and formal geometry ratio

Broad concept layer is not the strict green_ratio; all geometry remains provisional

PROVISIONAL • concept boundary • recompute

Concept compatibility layers

Schematic only • no FAR, height, demolition, road redline or engineering conclusion

FORMAL METRICS / 严格口径

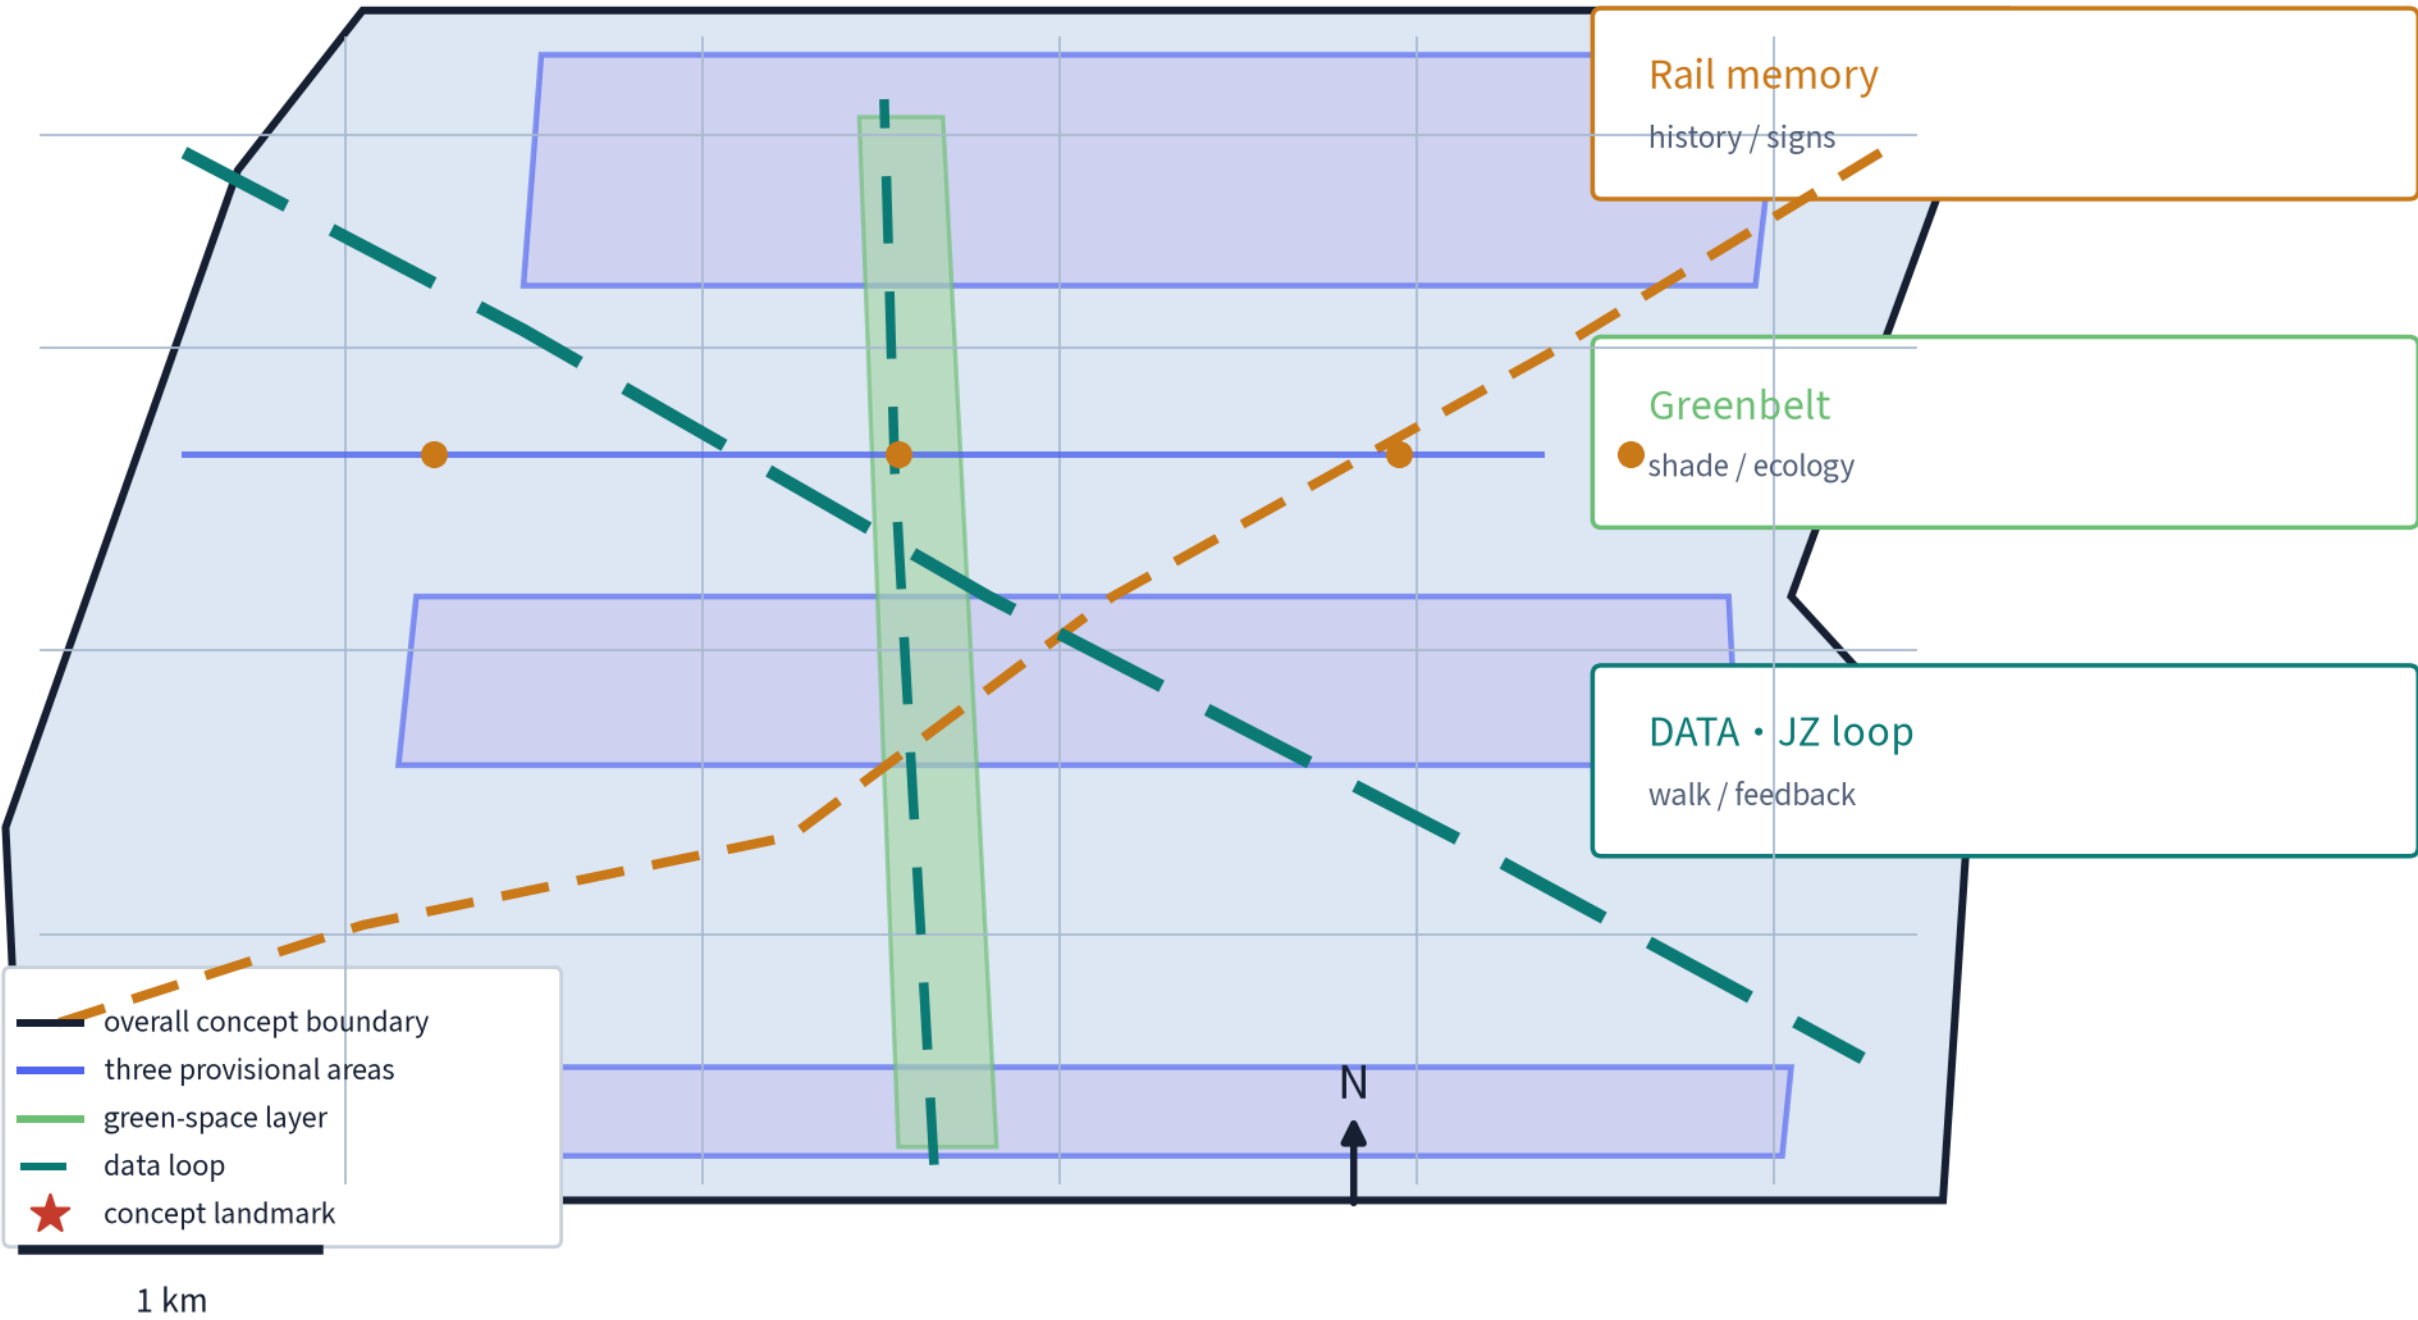

green_ratio 0.110044 union green / site boundary
public_space_ratio 0.003483 public / site
site_area_sqm 11,412,825.386 sqm package geometry

FAR, height, capacity and investment: UNKNOWN / NULL until official controls.

Mobility, blue-green and public-realm layers

Memory trail • greenbelt • DATA • JZ loop; conceptual path, not an engineering alignment

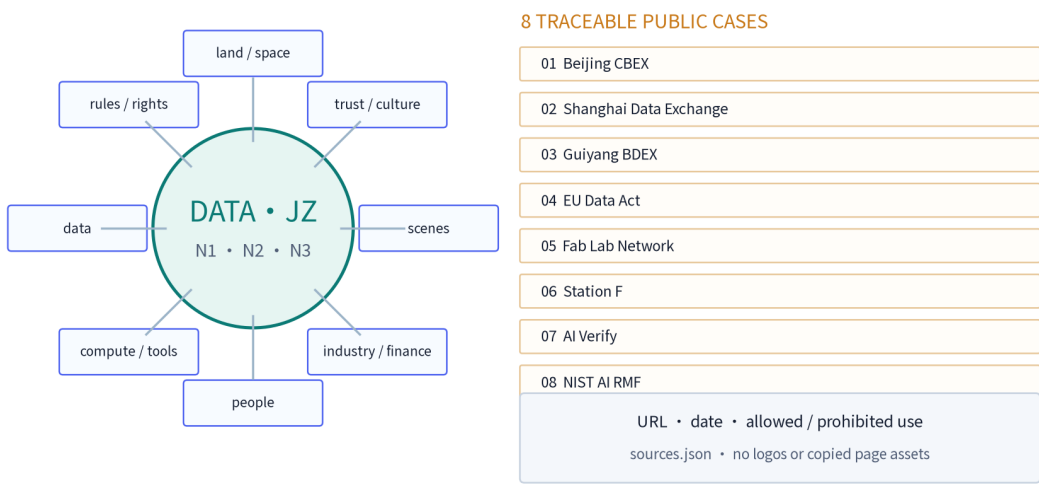

PROVISIONAL • concept boundary • recompute

Eight public mechanism cases → eight ecosystem elements

Comparison directions only; no partnership, endorsement, scale or local performance is claimed

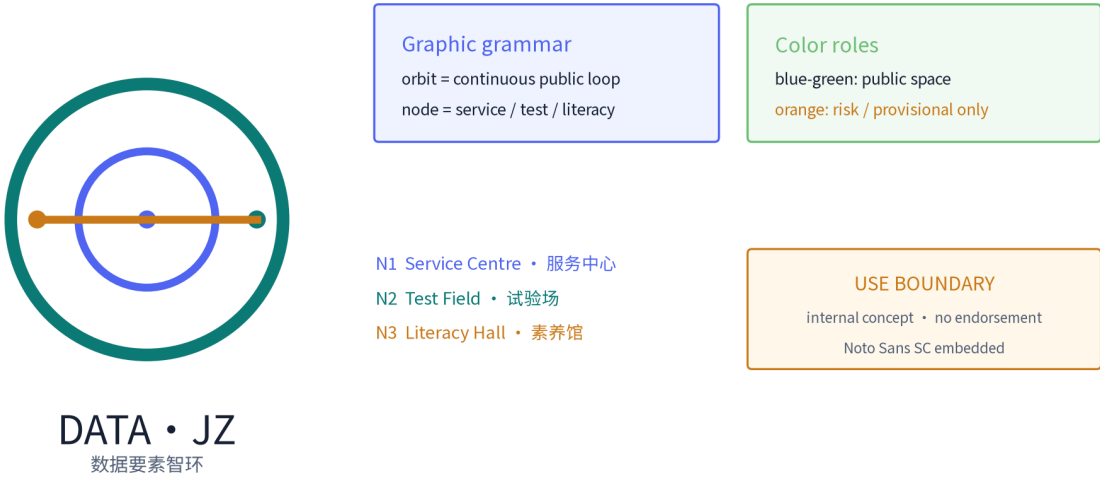

PROVISIONAL • concept boundary • recompute

DATA • JZ identity direction and use boundaries

An internal concept mark: orbit + node; no third-party trademark is embedded

PROVISIONAL • concept boundary • recompute

Three concept landmarks and an auditable honor display

Record public contribution and compliance practice; never a commercial ranking or approval

01Registration Hall
登记之厅

public directory + contribution plaque
公开目录 + 贡献铭牌

public, verifiable only
no raw data • no identity

02Sandbox Window
沙箱之窗

admission • test • review • exit
准入 • 测试 • 复核 • 退出

public, verifiable only
no raw data • no identity

03Literacy Lesson
素养之课

bilingual class + help route
双语课堂 + 求助路径

public, verifiable only
no raw data • no identity

Honor = evidence of research / community contribution / compliance practice; no rank, trademark or approval.

Evidence dashboard: formal ratios and auditable counts

Ratios and counts are separate scales; values are concept-model evidence, not performance promises

FORMAL VALUES	OPERATING COUNTS		BOUNDARY LEDGER
site_area_sqm	scenario cards	service personas	● Provisional geometry ● Human review ● Offline fallback ● Appeal + exit UNKNOWN / NULL: FAR • height • capacity • investment; not measured and not a promise.
11,412,825.386 sqm	10	8	
green_ratio	industry protocols	scenario nodes	
0.110044	3	8	
public_space_ratio	global cases	annual programs	
0.003483	8	3	

EPSG:4548 • package geometry • recompute after official data
