

# Identity system: make the human decision visible

Original concept mark, colors, applications and evidence fields; not an organizer or government mark

v0.2 · concept

## CONCEPT MARK

## JINGZHANG HUMAN CITY OS

From an AI showcase to a city for people

- Open bracket: callable interface
- Rail line: century continuity
- Human dot: final decision remains human
- Red: stop/appeal; blue: constrained machine; green: hard limits; orange: spillover

## COLOR AND APPLICATION RULES

-  Human dignity / stop
-  Machine / interface
-  Energy + climate / limits
-  Spillover
-  Version record

Every spatial card shows:

- |                |                                    |
|----------------|------------------------------------|
| Spatial action | Affected people                    |
| Human fallback | Entry evidence                     |
| Stop condition | Version / role class / update time |

# Brief → spatial response: one-page alignment atlas

3 positions · 5 functions · 3 areas + 2 wings · 4 differentiated value chains

PACKAGE v1.9

CONCEPT / PROVISIONAL

## POSITIONING

P1

Jing-Zhang Centennial Heritage Belt

百年京张文化带

P2

Urban AI Everyday-Life Belt

都市 AI 生活体验带

P3

AI Integration and Innovation Belt

AI 融合创新带

## FUNCTIONS

F1

Full-stack AI self-innovation system

research → prototype → review

F2

World-class AI innovation ecosystem

cases, talent, capital, compute, data

F3

AI+ scenario enablement paradigm

scenarios with human fallback

F4

Intelligent, vibrant AI city

public space, culture, mobility

F5

Global voice in AI governance

rights, standards, versioned learning

## SPATIAL DELIVERY

A1

Zhongzhiyuan AI Self-innovation Accelerator

controlled tests · compute-energy audit · incident replay  
PROV-KEY-001 · provisional constraint

A2

Beijing AI Origin Community

community retention · human channel · skill transition · screen-free recovery  
PROV-KEY-002 · provisional constraint

A3

Dazhongsi AI Industry Cluster

city API · OPC · public data · international services  
PROV-KEY-003 · provisional constraint

W1

Zhongguancun Technology-Service Wing

standards / data / compute interfaces; conceptual only  
SC-D04 · conceptual interface

W2

Xiaoyuehe Scenario-Enablement Wing

human-machine sharing / sponge resilience / flood simulation; conceptual only  
SC-G03 · conceptual interface

## DIFFERENTIATION → EVIDENCE

A

Human dignity

People-first: AI Origin Community + ROAD-A-SKILL | Scenarios: SC-A01 / SC-A03 / SC-A05 | Metric: community\_retention\_support\_area\_ratio | gap: resident / shop / employment baselines missing

B

Machine usability

Machine-ready: Zhongzhiyuan + ROAD-B-SILICON | Scenarios: SC-B01 / SC-B02 / SC-B04 | Metric: silicon\_right\_of\_way\_length\_m | gap: road / airspace / responsibility sections missing

C

Hard constraints

Guardrails: Xiaoyuehe wing + SC-C01—SC-C05 | Scenarios: energy, flood, sandbox, data authorization | Metric: operational\_pue (unknown) | gap: energy / hydrology / insurance / authorization inputs missing

D

Spillovers

Spillovers: Dazhongsi + W1/W2 interfaces | Scenarios: SC-D01—SC-D04 | Metric: version\_release\_count | gap: actors / IP / cross-region cooperation unverified

All spatial moves are conceptual suggestions / reference schemes for professional teams. official\_boundary=false; geometry\_role=provisional\_constraint. Evidence paths are package-local, not an official score, field result, or implementation approval.

V3.0 B02 2/24 EN HOLD

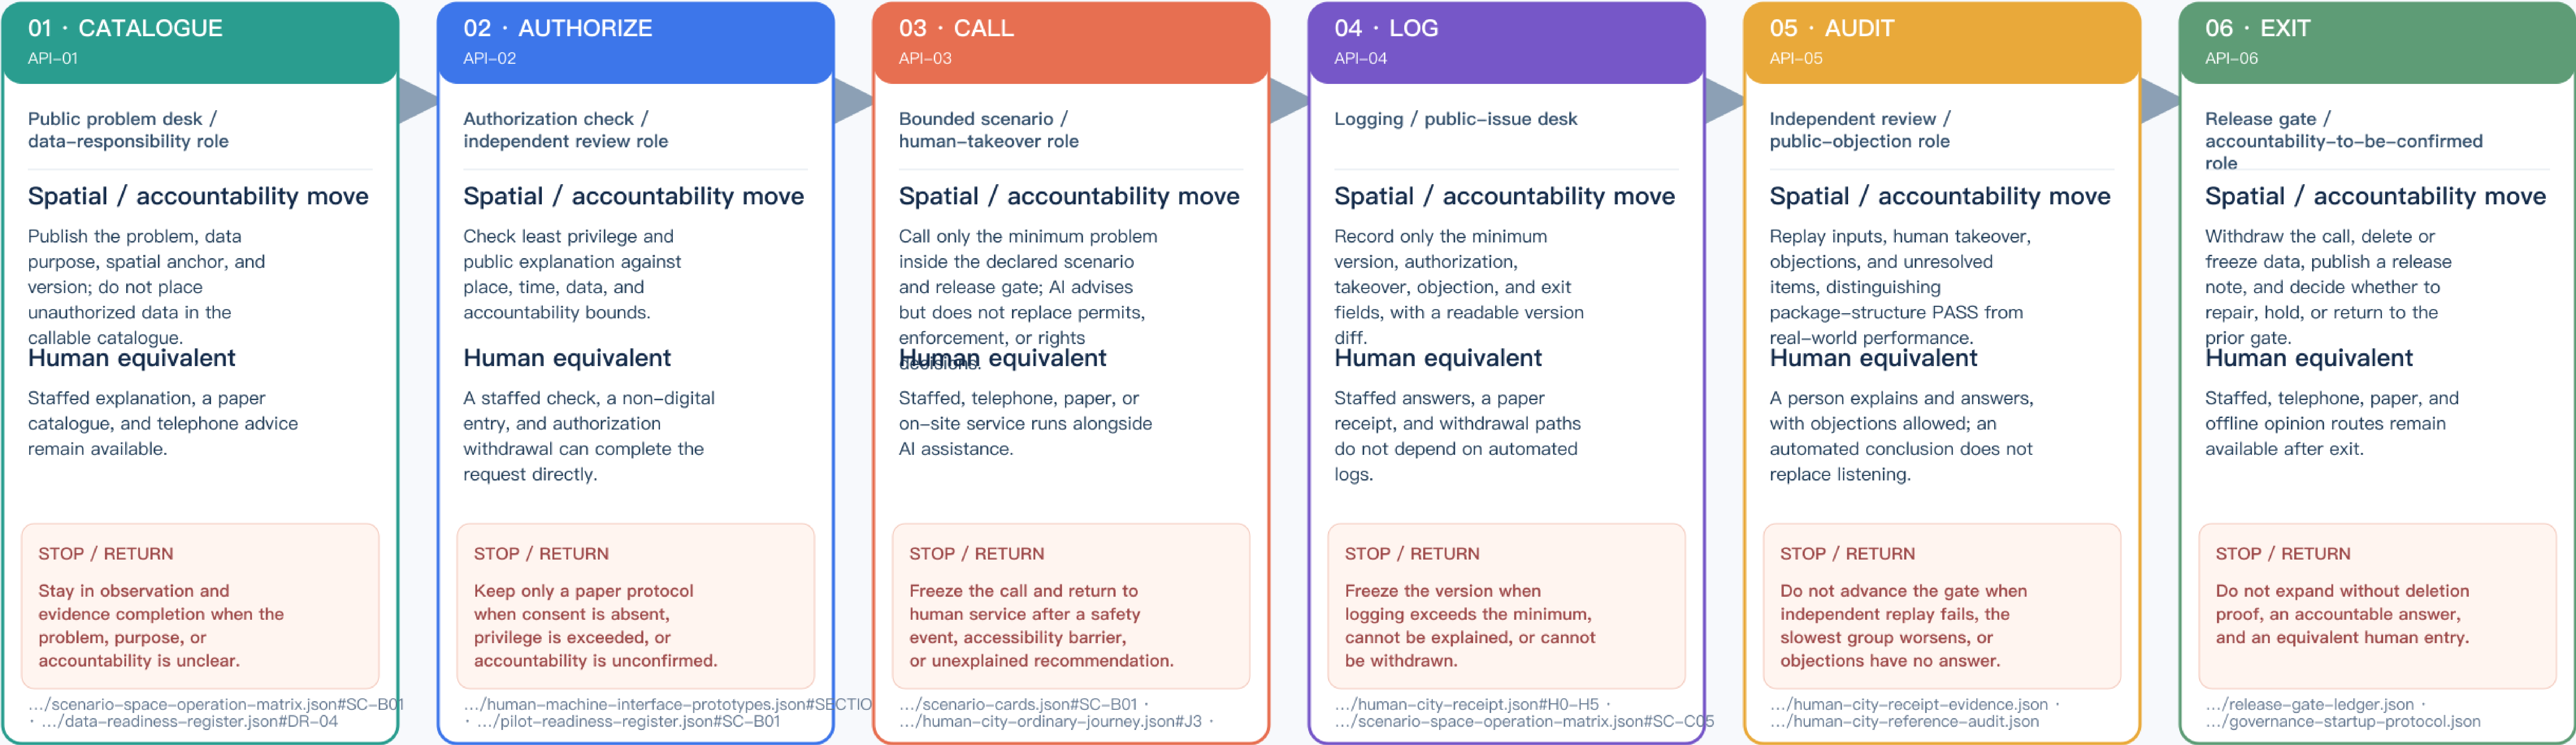

# Human City OS | six-step replayable city-API sequence

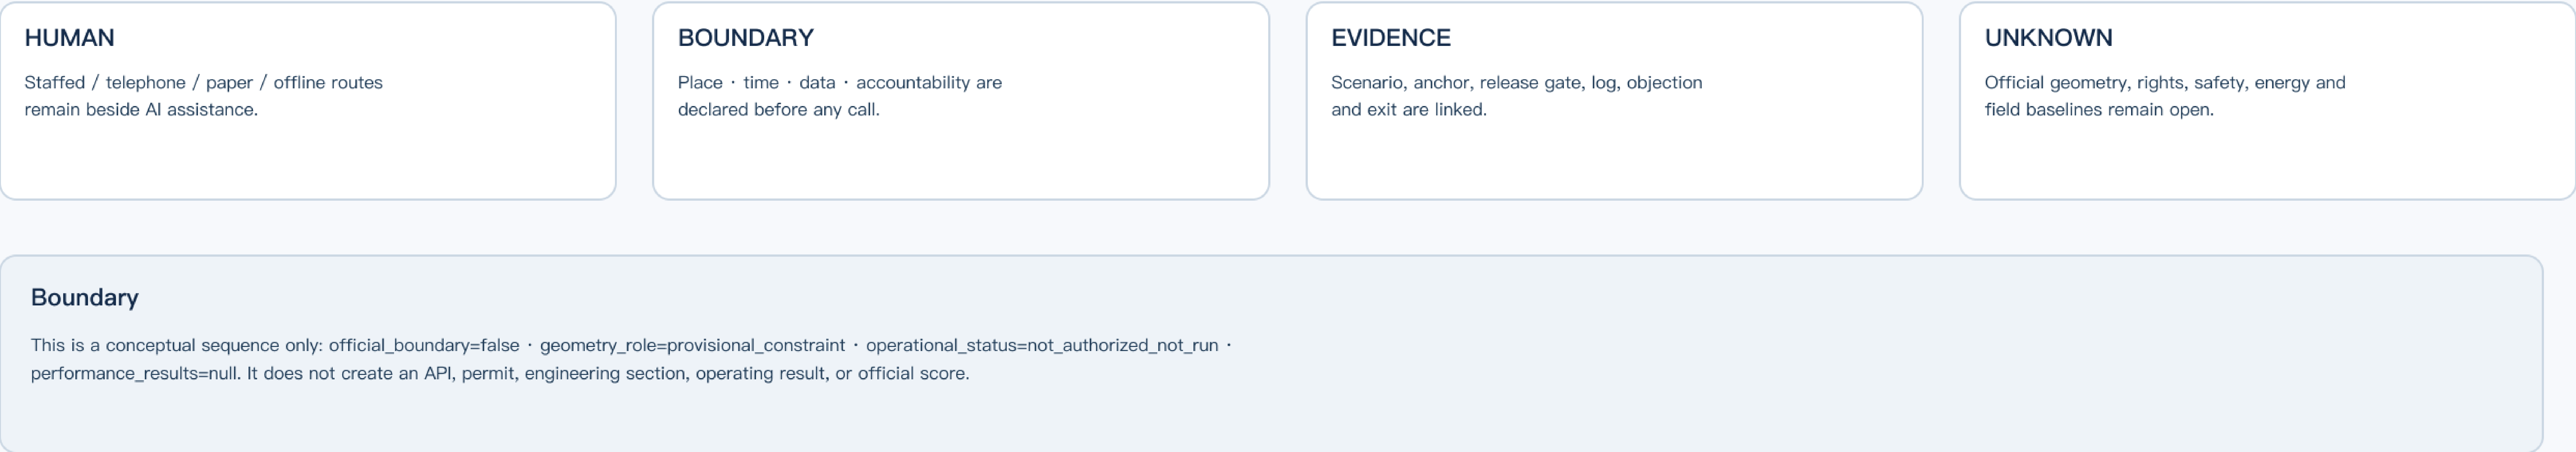

Catalogue → authorize → call → log → audit → exit · concept evidence only

PACKAGE v2.3

CONCEPT / NOT AUTHORIZED / NOT RUN

## Replay contract / what a reviewer can verify

Conceptual suggestion / reference scheme for professional teams to deepen · no external requests

FIG. 07

# DATA READINESS: TURNING GAPS INTO CLOSABLE RELEASE GATES

Seven evidence paths connect assumptions, scenarios, metrics, and fallbacks; missing data remains unknown or conceptual.

Derived from geometry/\*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

# HUMAN CITY ACCEPTANCE ATLAS: WHO ENTERS, WHO STOPS

Six users, 16 scenario cards, provisional spatial anchors, and three release gates resolve on one page; not an operating dashboard or delivery commitment.

## unknown / 待补数据

official boundary · FAR/height controls · resident retention · employment transition · manual-service equivalence · PUE · green electricity · recovered heat

Every unknown is a gate, not a hidden assumption.

official\_boundary=false · geometry\_role=provisional\_constraint · all actions are conceptual suggestions for professional deepening

# 人机共行与蓝绿韧性

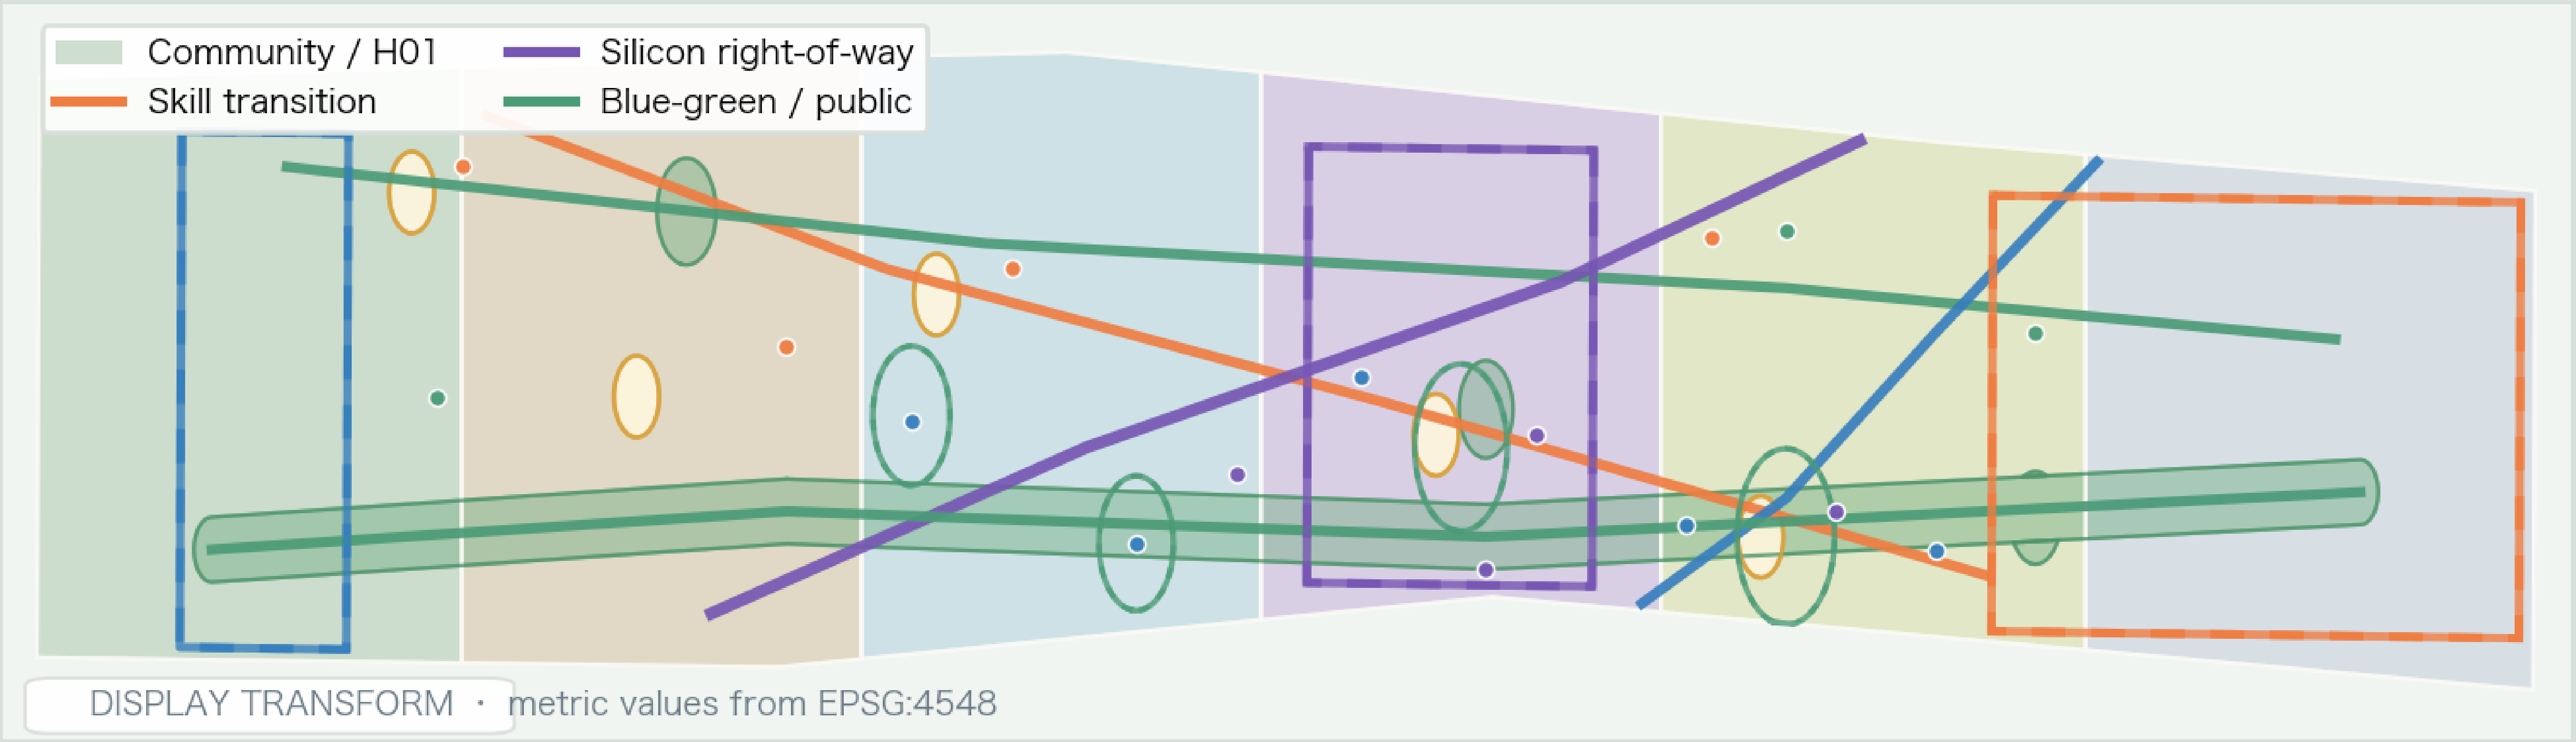

Human-machine co-presence + blue-green resilience

四条概念廊道与三处节点交叉；人行优先、人工接管、退避与回放并列 · four conceptual corridors meet three nodes; pedestrian priority, human takeover, retreat and replay are explicit

PACKAGE v1.7

CONCEPT / PROVISIONAL

04 / corridors + crossing nodes

four spatial rules

SKILL / skill transition

5.919 km

retraining → new work

SILICON / silicon right-of-way

4.586 km

human priority + controlled test

LOW-AIR / vertical layer

2.015 km

conceptual layer; later review

SPONGE / Xiaoyue River

area / line

floodway + sponge inspection

At every crossing: visible state, low-speed pause, staffed takeover, incident replay.

concept corridor; not an engineering alignment or approved route

official\_boundary=false · geometry\_role=provisional\_constraint · all actions are conceptual suggestions for professional deepening

PARAMETRIC SPATIAL TRADE-OFFS | BASELINE, PEOPLE-FIRST, MACHINE-READY

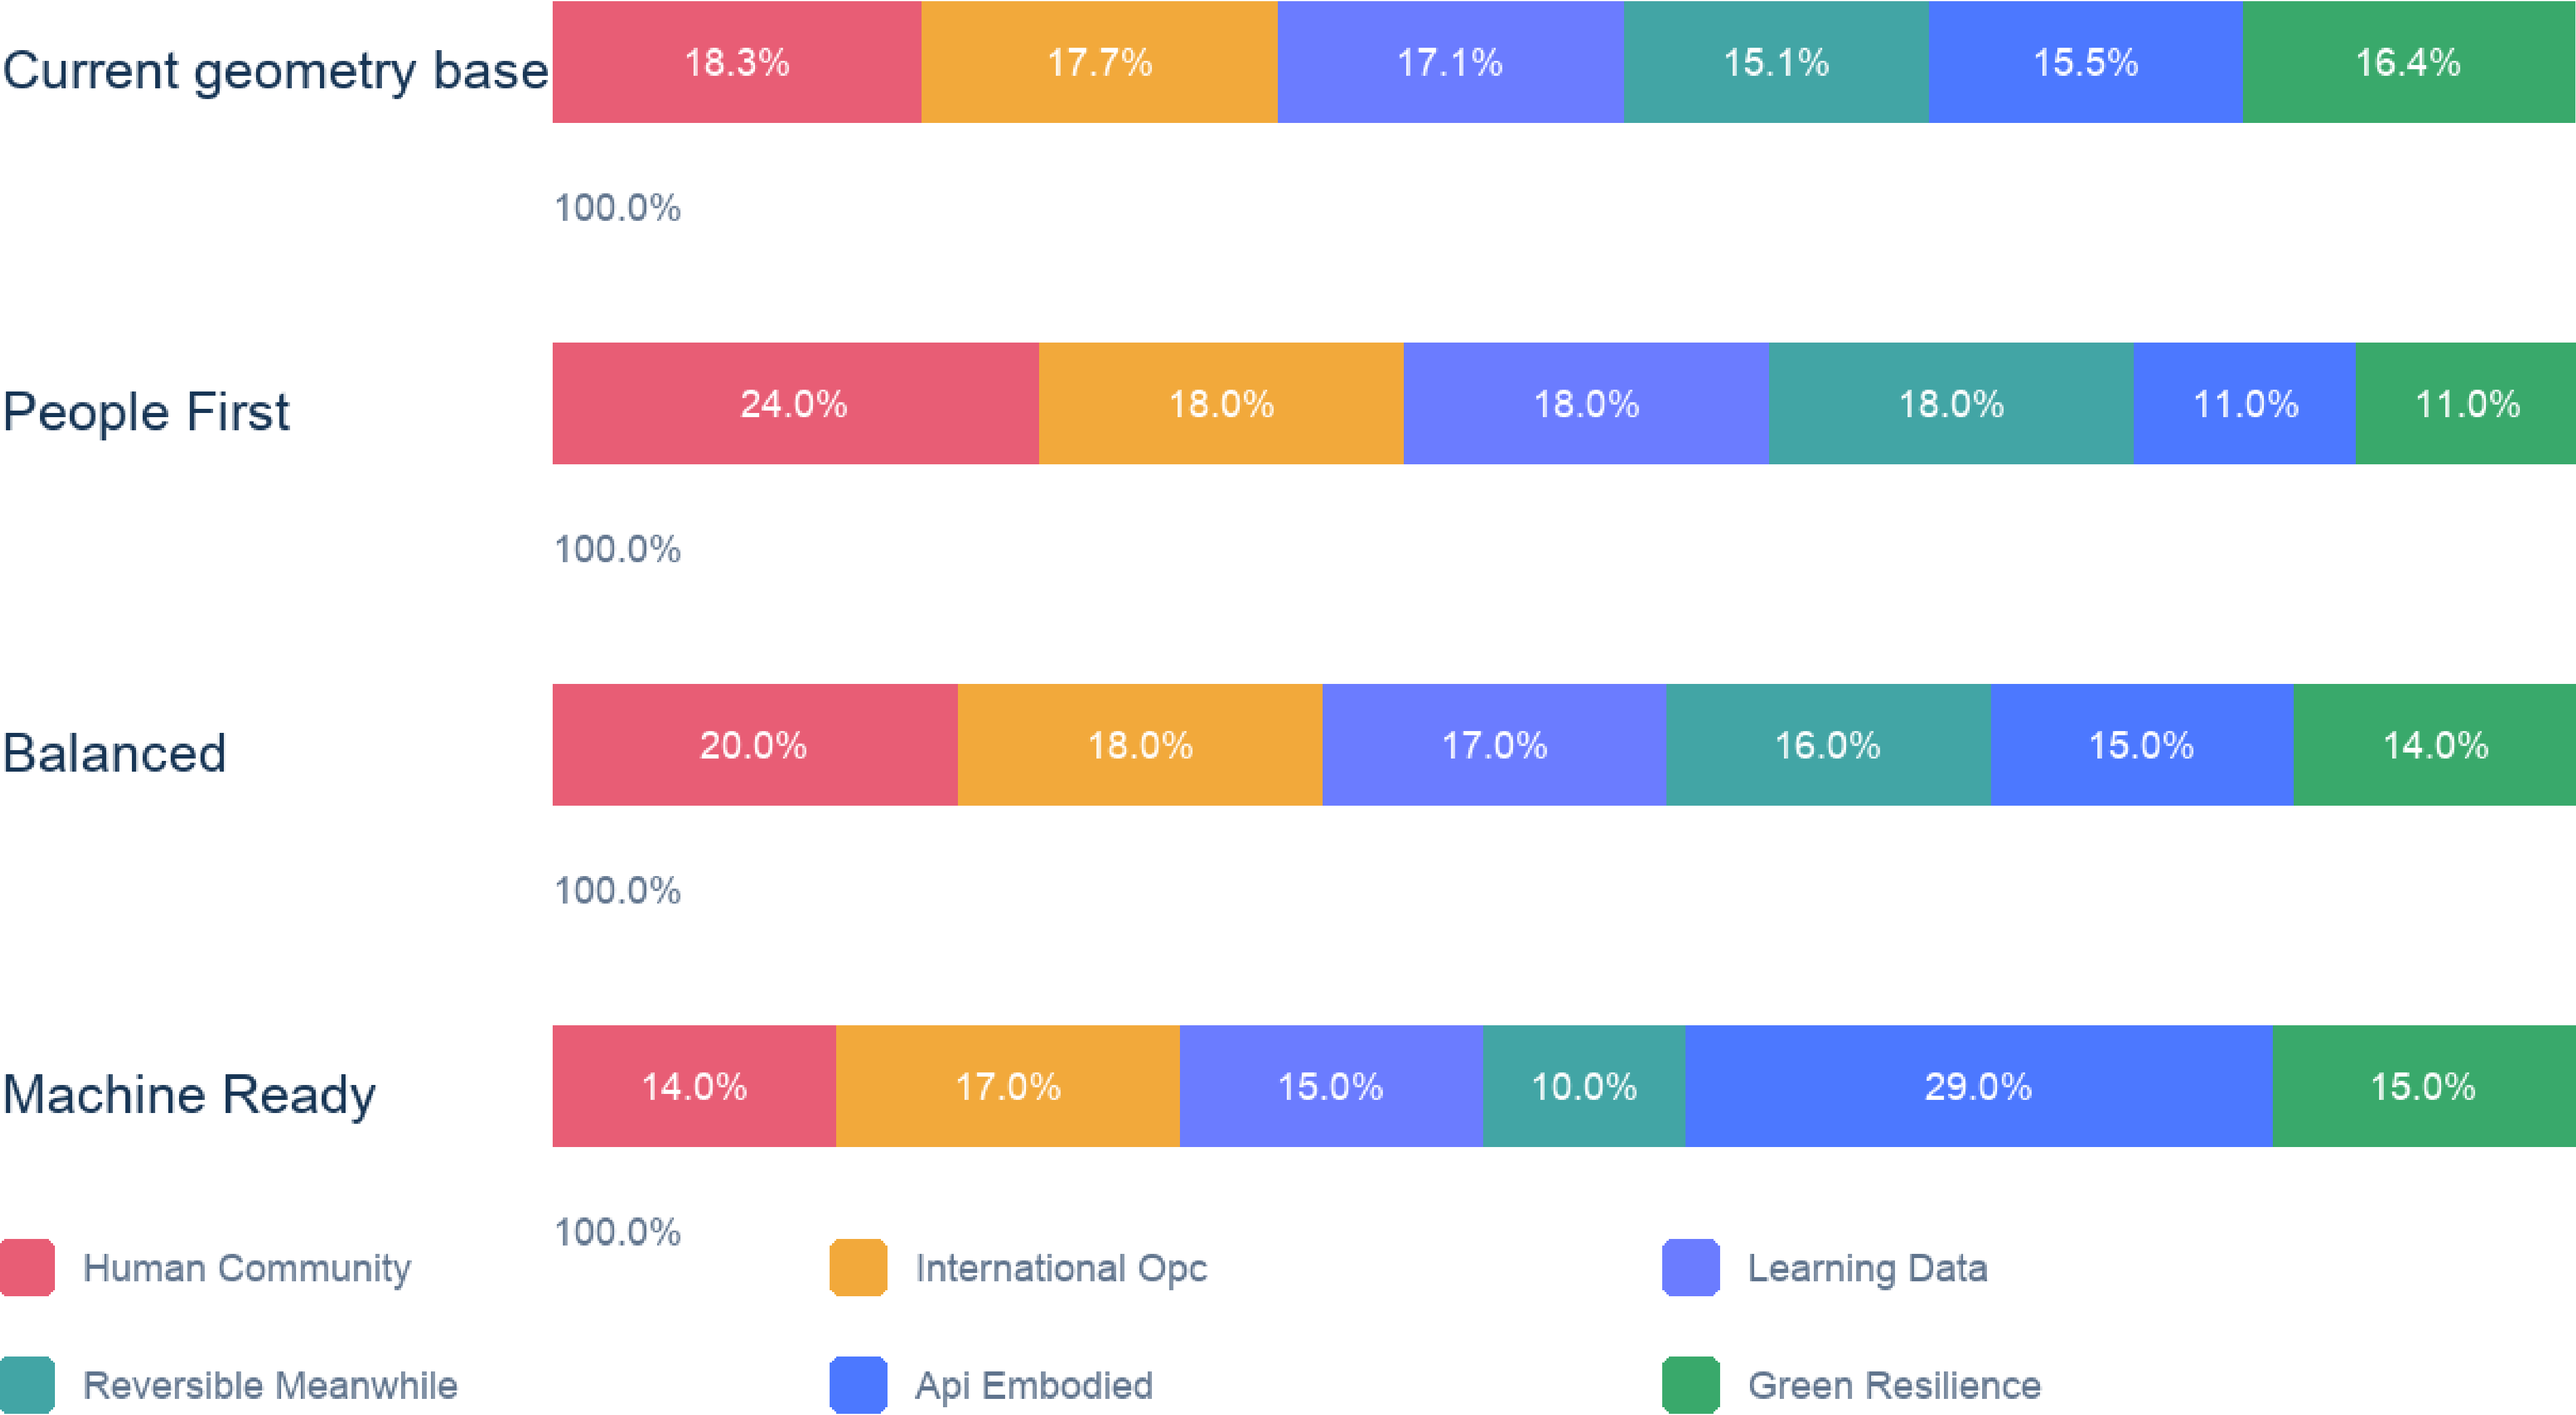

v0.8

ONE PROVISIONAL BOUNDARY · SIX CONCEPTUAL BANDS · REPLAYABLE AREA FORMULA

CONCEPT ONLY

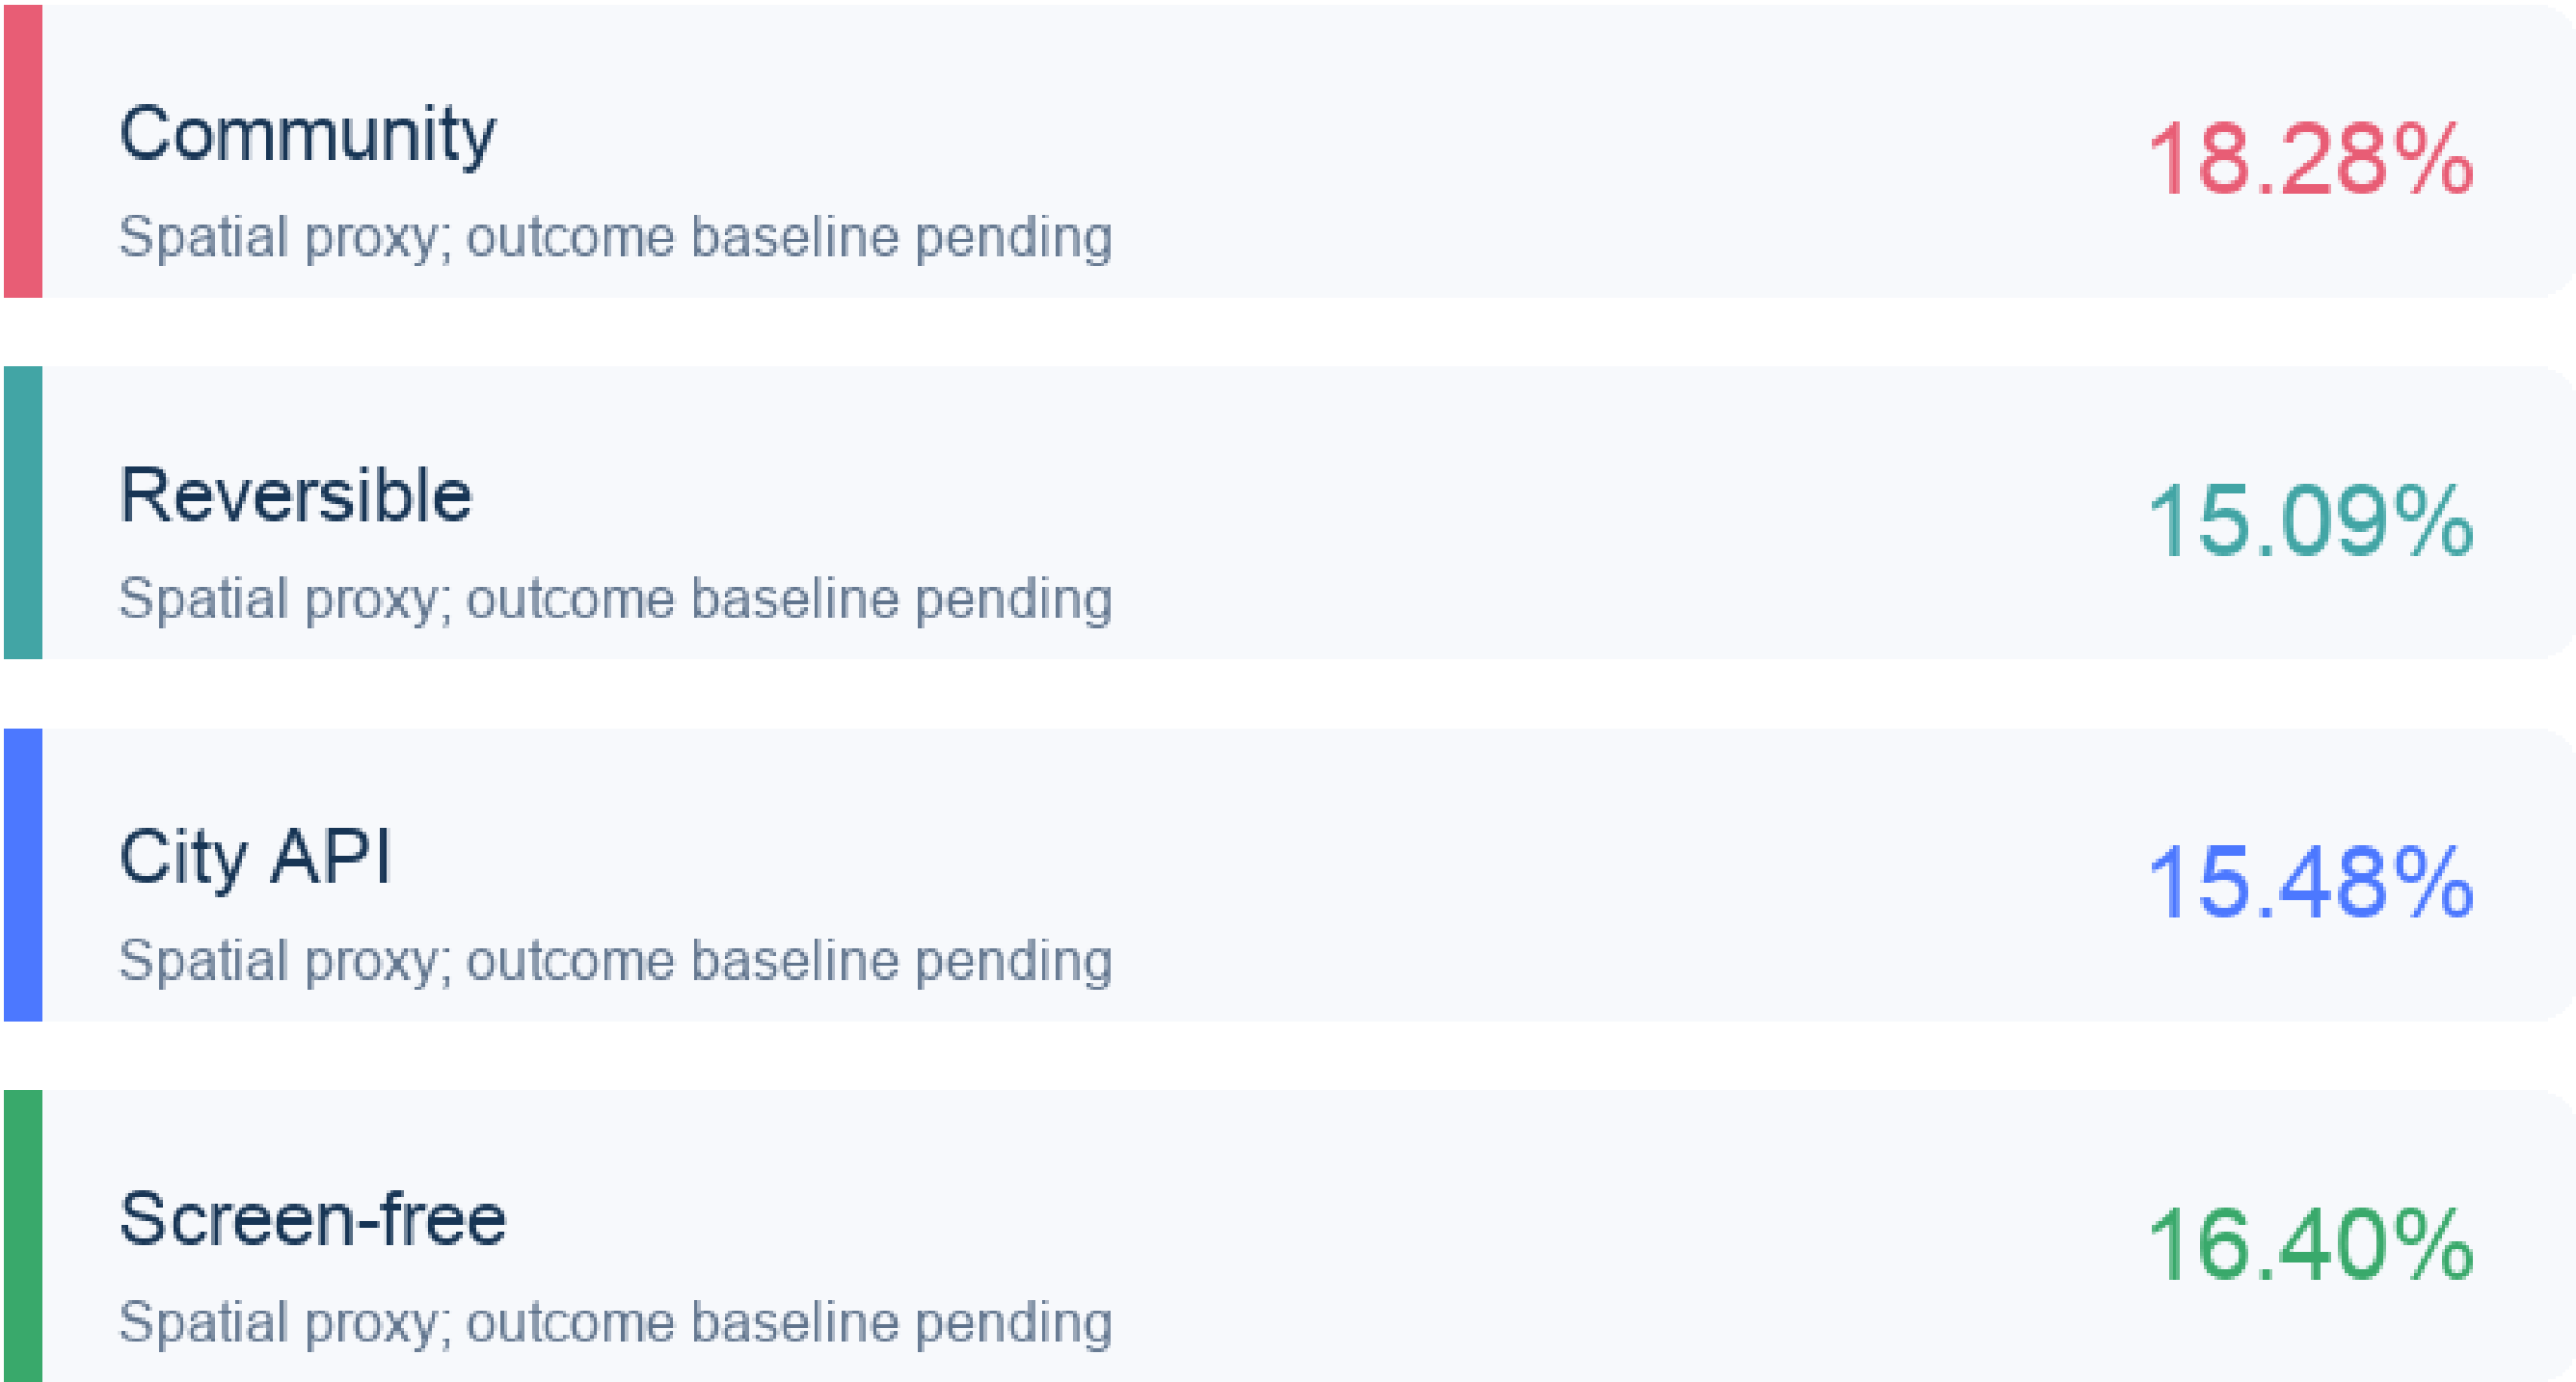

Six-band area parameters

share × provisional site\_area\_sqm

Review readout

Current baseline

Three candidates

- People-first: more community, learning, and reversible space
- Balanced: a middle comparison set for professional calibration
- Machine-ready: more API discussion while retaining human and resilience floors

Conceptual suggestions only; no FAR, building-height, engineering, investment, or policy conclusion.  
formula: area = share × provisional site area

source: geometry/land\_use.geojson · metrics.json · EPSG:4548 internal recalculation · confidence: low

# Public space + culture + annual operation atlas

3 concept landmarks · 4-season operating rhythm · 5 project families

PACKAGE v2.0

CONCEPT / NO OPERATOR

## LANDMARKS

L1 People's Version Hall

issue · change · retract  
SC-C05  
/ PROV-KEY-002 · conceptual anchor

L2 Rail Interface Clock

rail time · version change · public  
explanation  
SC-D02 / PROV-KEY-003  
· conceptual anchor

L3 Screen-free Recovery Beacon

shade · sound · night safety ·

## ANNUAL RHYTHM

SPRING Public problem open week

public questions, data  
boundary, human answers

SUMMER City API + embodied test month

four-limit reversible  
concept checks

AUTUMN Work transition + OPC co-creation

workers, mentors, small  
teams, replay

WINTER City version conference

audit, issue response,  
rollback, next gate

## PROJECT FAMILIES → SPACE / GATE

PF-A Human buffer + community retention

A2 / v0.1 · conceptual scope

PF-B City API + reversible space

A3 / v0.2 · conceptual scope

PF-C Human-machine, climate + compute-energy gate

A1 + W2 / v0.2 · conceptual scope

PF-D Public-data authorization + version governance

L1 / v0.1 - v1.0 · conceptual scope

PF-E Small-team ecology + spillovers

A3 + W1 / v1.0 · conceptual scope

## CULTURE GRAMMAR

Rail = Jing-Zhang continuity; time = annual version release; interface = public explanation and human authority.

All landmarks and operating rhythms are conceptual suggestions / reference schemes for professional teams. official\_boundary=false; geometry\_role=provisional\_constraint; no operator, permit, funding, capacity, or field outcome is claimed.

North–south continuity + east–west stitching · contribution display · community-to-release pathway

Connector strategy

Existing anchors are reused; directions are a reading rule, not a surveyed route.

Stop: no authorization, accessibility review, accountability or replay → remain at the previous gate.

Reusable public-space components

- Staffed desk / 人工入口
- Intergenerational table / 代际共学
- Screen-free node / 无屏恢复
- Contribution replay / 贡献回放
- Pause + rollback / 暂停回退

Developer / community conversion (concept only)

OPEN PROBLEM

LEARN / REVIEW

BOUNDED TEST

REPLAY / RELEASE

Concept only · official\_boundary=false · provisional\_constraint · no scale / operator / approval / performance claim

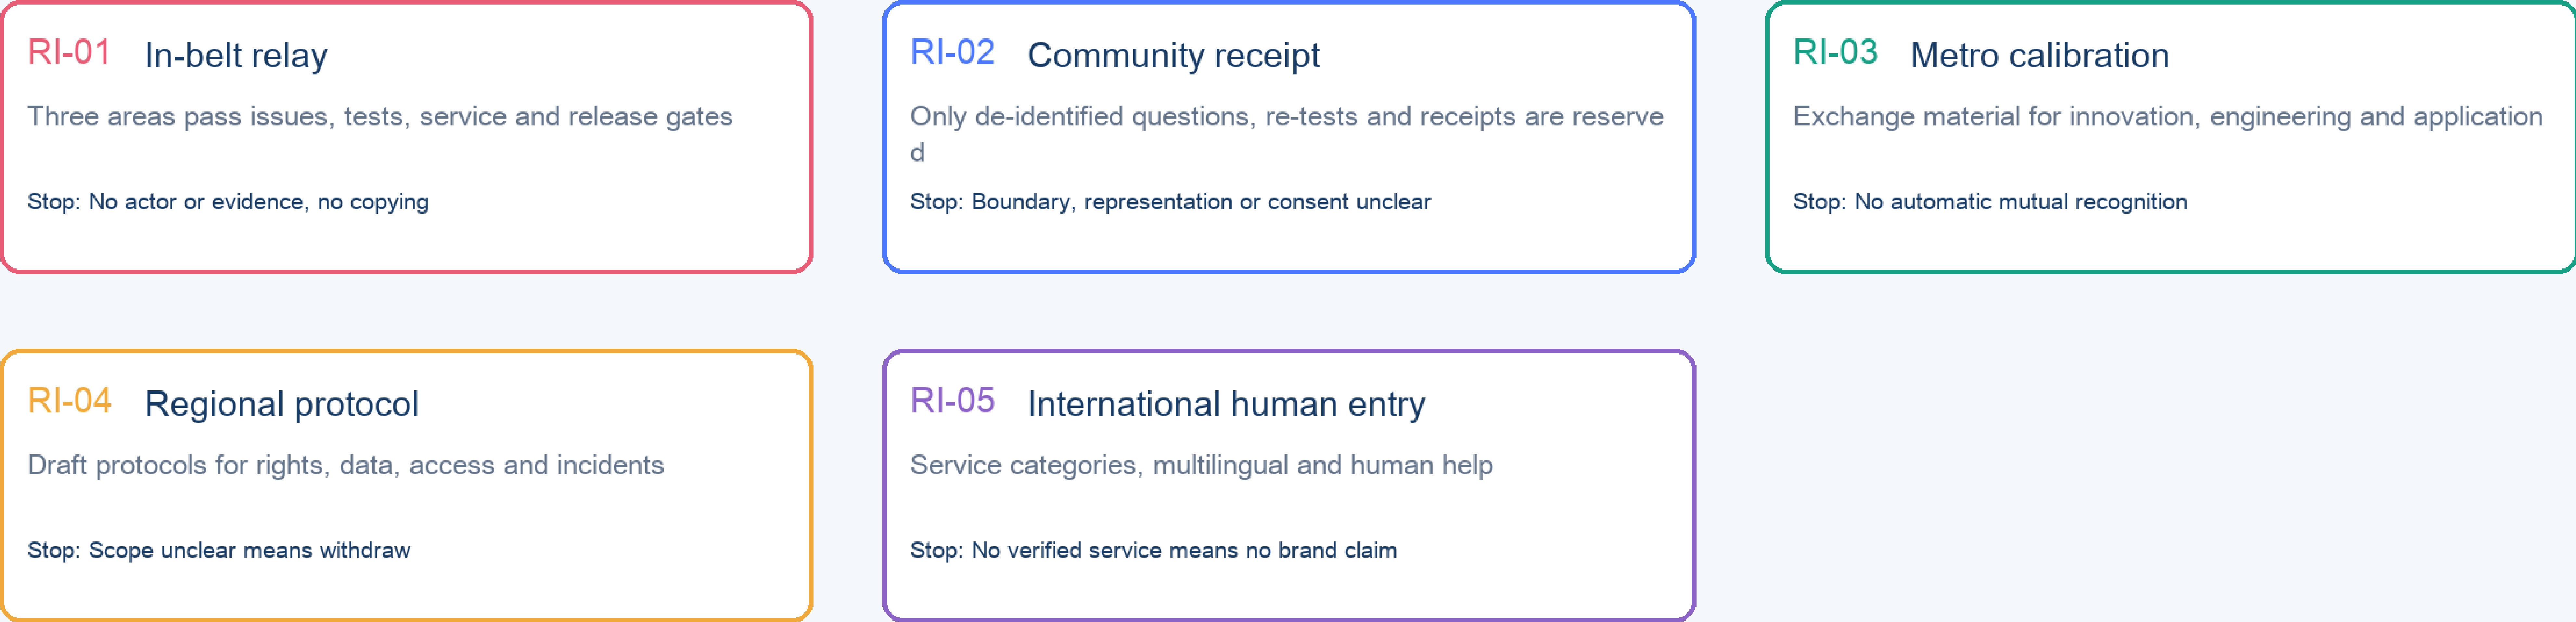

# Regional interfaces: exchange questions before scaling

Four layers from belt to region; interfaces are not existing partnerships or resource commitments

v0.2 · concept

## 五个接口卡 / Five interface cards

Concept interfaces only; no partnership, administrative division, company list, investment, procurement or implementation claim.

FIG. 06

# CITY RELEASE GATES: EVERY EXPANSION CAN BE VETOED

All 16 scenarios progress from observation through bounded pilots to expansion only with data boundaries, human fallback, review evidence, and exit conditions.

16

scenario cards

6

test/validation scenarios

3

release gates

0

authorized implementation commitments

Every gate is a conceptual review interface, not a permit, engineering feasibility finding, investment commitment, or settled policy.

Derived from geometry/\*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

FIG. 10

# REVIEW EVIDENCE MAP: 13 TASKBOOK + 7 WORKFLOW QUESTIONS

The two question sets retain separate sources and boundaries; this page shows offline reading paths only, not a score, official finding, or delivery commitment.

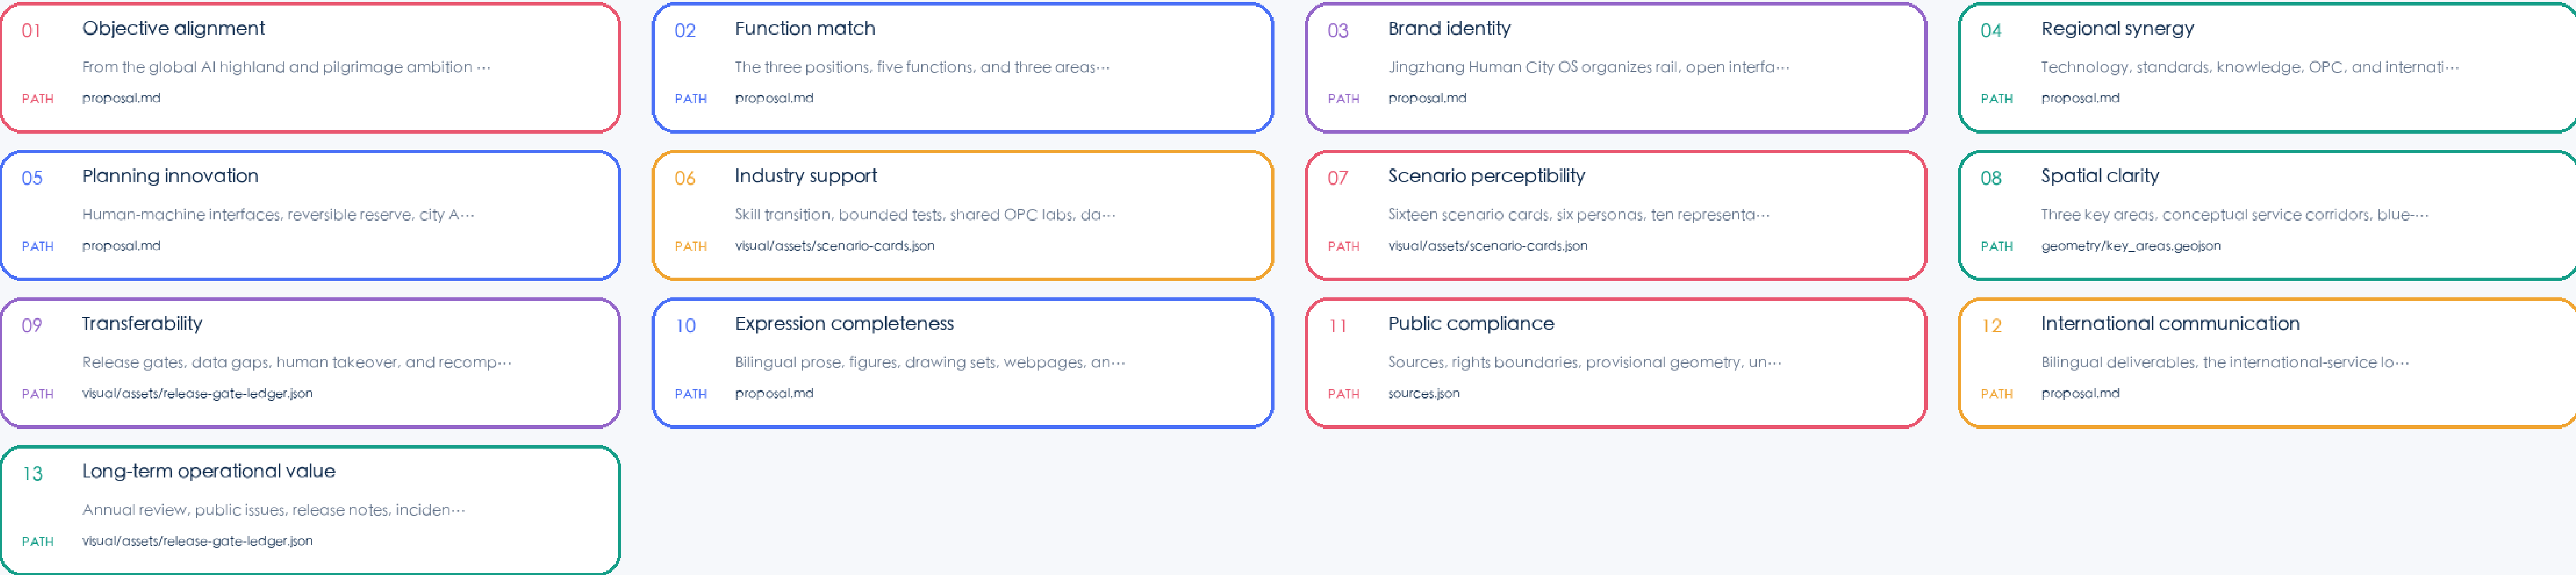

13/13 TASKBOOK DIMENSIONS

7/7 REPOSITORY WORKFLOW QUESTIONS

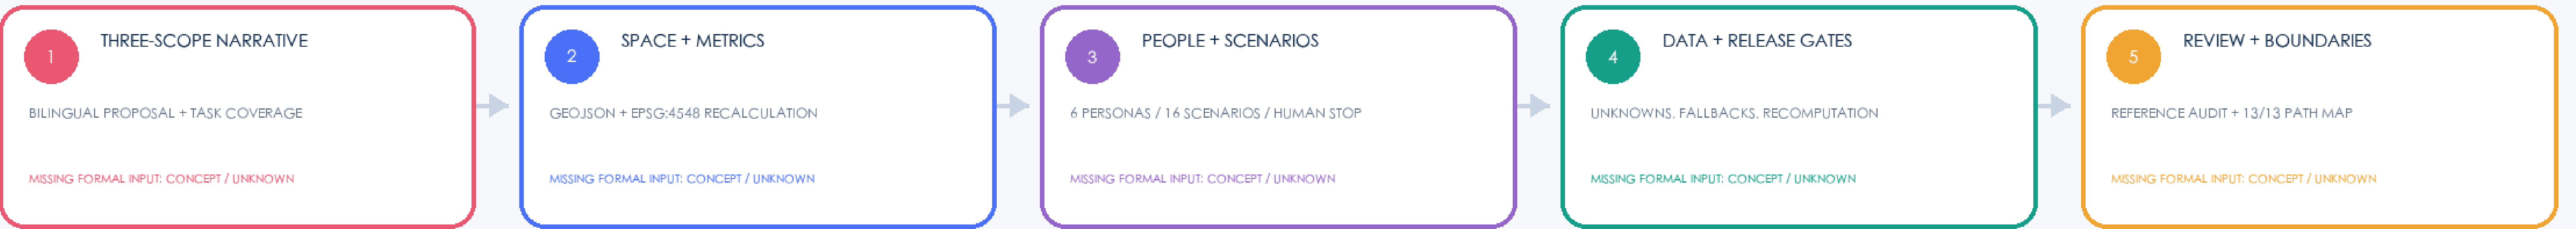

42/42 PACKAGE-LOCAL PATHS RESOLVE

NOT A SCORE  
NO ORGANIZER WEIGHT OR RESULT INFERRED

Read the 13 taskbook questions and their evidence entries first; then use the 7-question repository formal-scorecard workflow. Its percentages are recorded only in JSON as a repository template source, never as organizer scoring.

FIVE EVIDENCE SPINES: PATHS RESOLVE; THEY DO NOT PROVE OUTCOMES

Derived from geometry/\*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

# Seven-dimension review evidence map

七维评审证据地图

Reviewer order: question → evidence → boundary → next verification

7 dimensions · registered workflow questions

|                                                    |              |                                                                                                                                                                                       |
|----------------------------------------------------|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01 Brief alignment                                 | 20% template | Provisional boundaries, design partitions, and conceptual deliverables are not official redlines, statutory controls, or an implementation scheme.                                    |
| evidence: proposal.md                              |              |                                                                                                                                                                                       |
| 02 Originality                                     | 10% template | Contract-level replay proves reviewable structure, not real service performance, public acceptance, or deployed capability.                                                           |
| evidence: proposal.md                              |              |                                                                                                                                                                                       |
| 03 AI + planning innovation                        | 15% template | Local scripts cover offline structure and negative tests only; they do not call external systems or replace professional models, permits, or field tests.                             |
| evidence: assets/run-human-city-ordinary-journey.⋯ |              |                                                                                                                                                                                       |
| 04 Implementation feasibility                      | 20% template | Suggested roles are not confirmed operators; missing data, insurance, approvals, budget, real OD, and field baselines remain for authorized parties to establish.                     |
| evidence: assets/implementation-operation-matrix.⋯ |              |                                                                                                                                                                                       |
| 05 Public interest + inclusion                     | 10% template | The package provides design requirements and an offline contract; real coverage, group experience, consent, and outcomes require walk-throughs, sampling, and independent evaluation. |
| evidence: assets/personas-and-fairness.json        |              |                                                                                                                                                                                       |
| 06 Risk + compliance                               | 10% template | Source registration and usage boundaries are not permits, rights clearance, data authorization, or safety review.                                                                     |
| evidence: assumptions.json                         |              |                                                                                                                                                                                       |
| 07 Expression completeness                         | 15% template | Navigation completeness does not raise evidence level; HTML, drawings, and ledgers cannot replace formal data or field validation.                                                    |
| evidence: proposal.md                              |              |                                                                                                                                                                                       |

PACKAGE v1.8  
EVIDENCE / NO SCORE

## read this map

### 1 · Start

Open the proposal section named by the dimension.

### 2 · Trace

Follow the shortest path to geometry, metrics, ledgers, or drawings.

### 3 · Bound

Do not turn a conceptual suggestion or unknown into a result.

### 4 · Verify next

Use the missing-input gate before any professional deepening.

No score is generated by this figure.

Workflow template weights only · not an organizer score · provisional geometry and unknowns remain gates

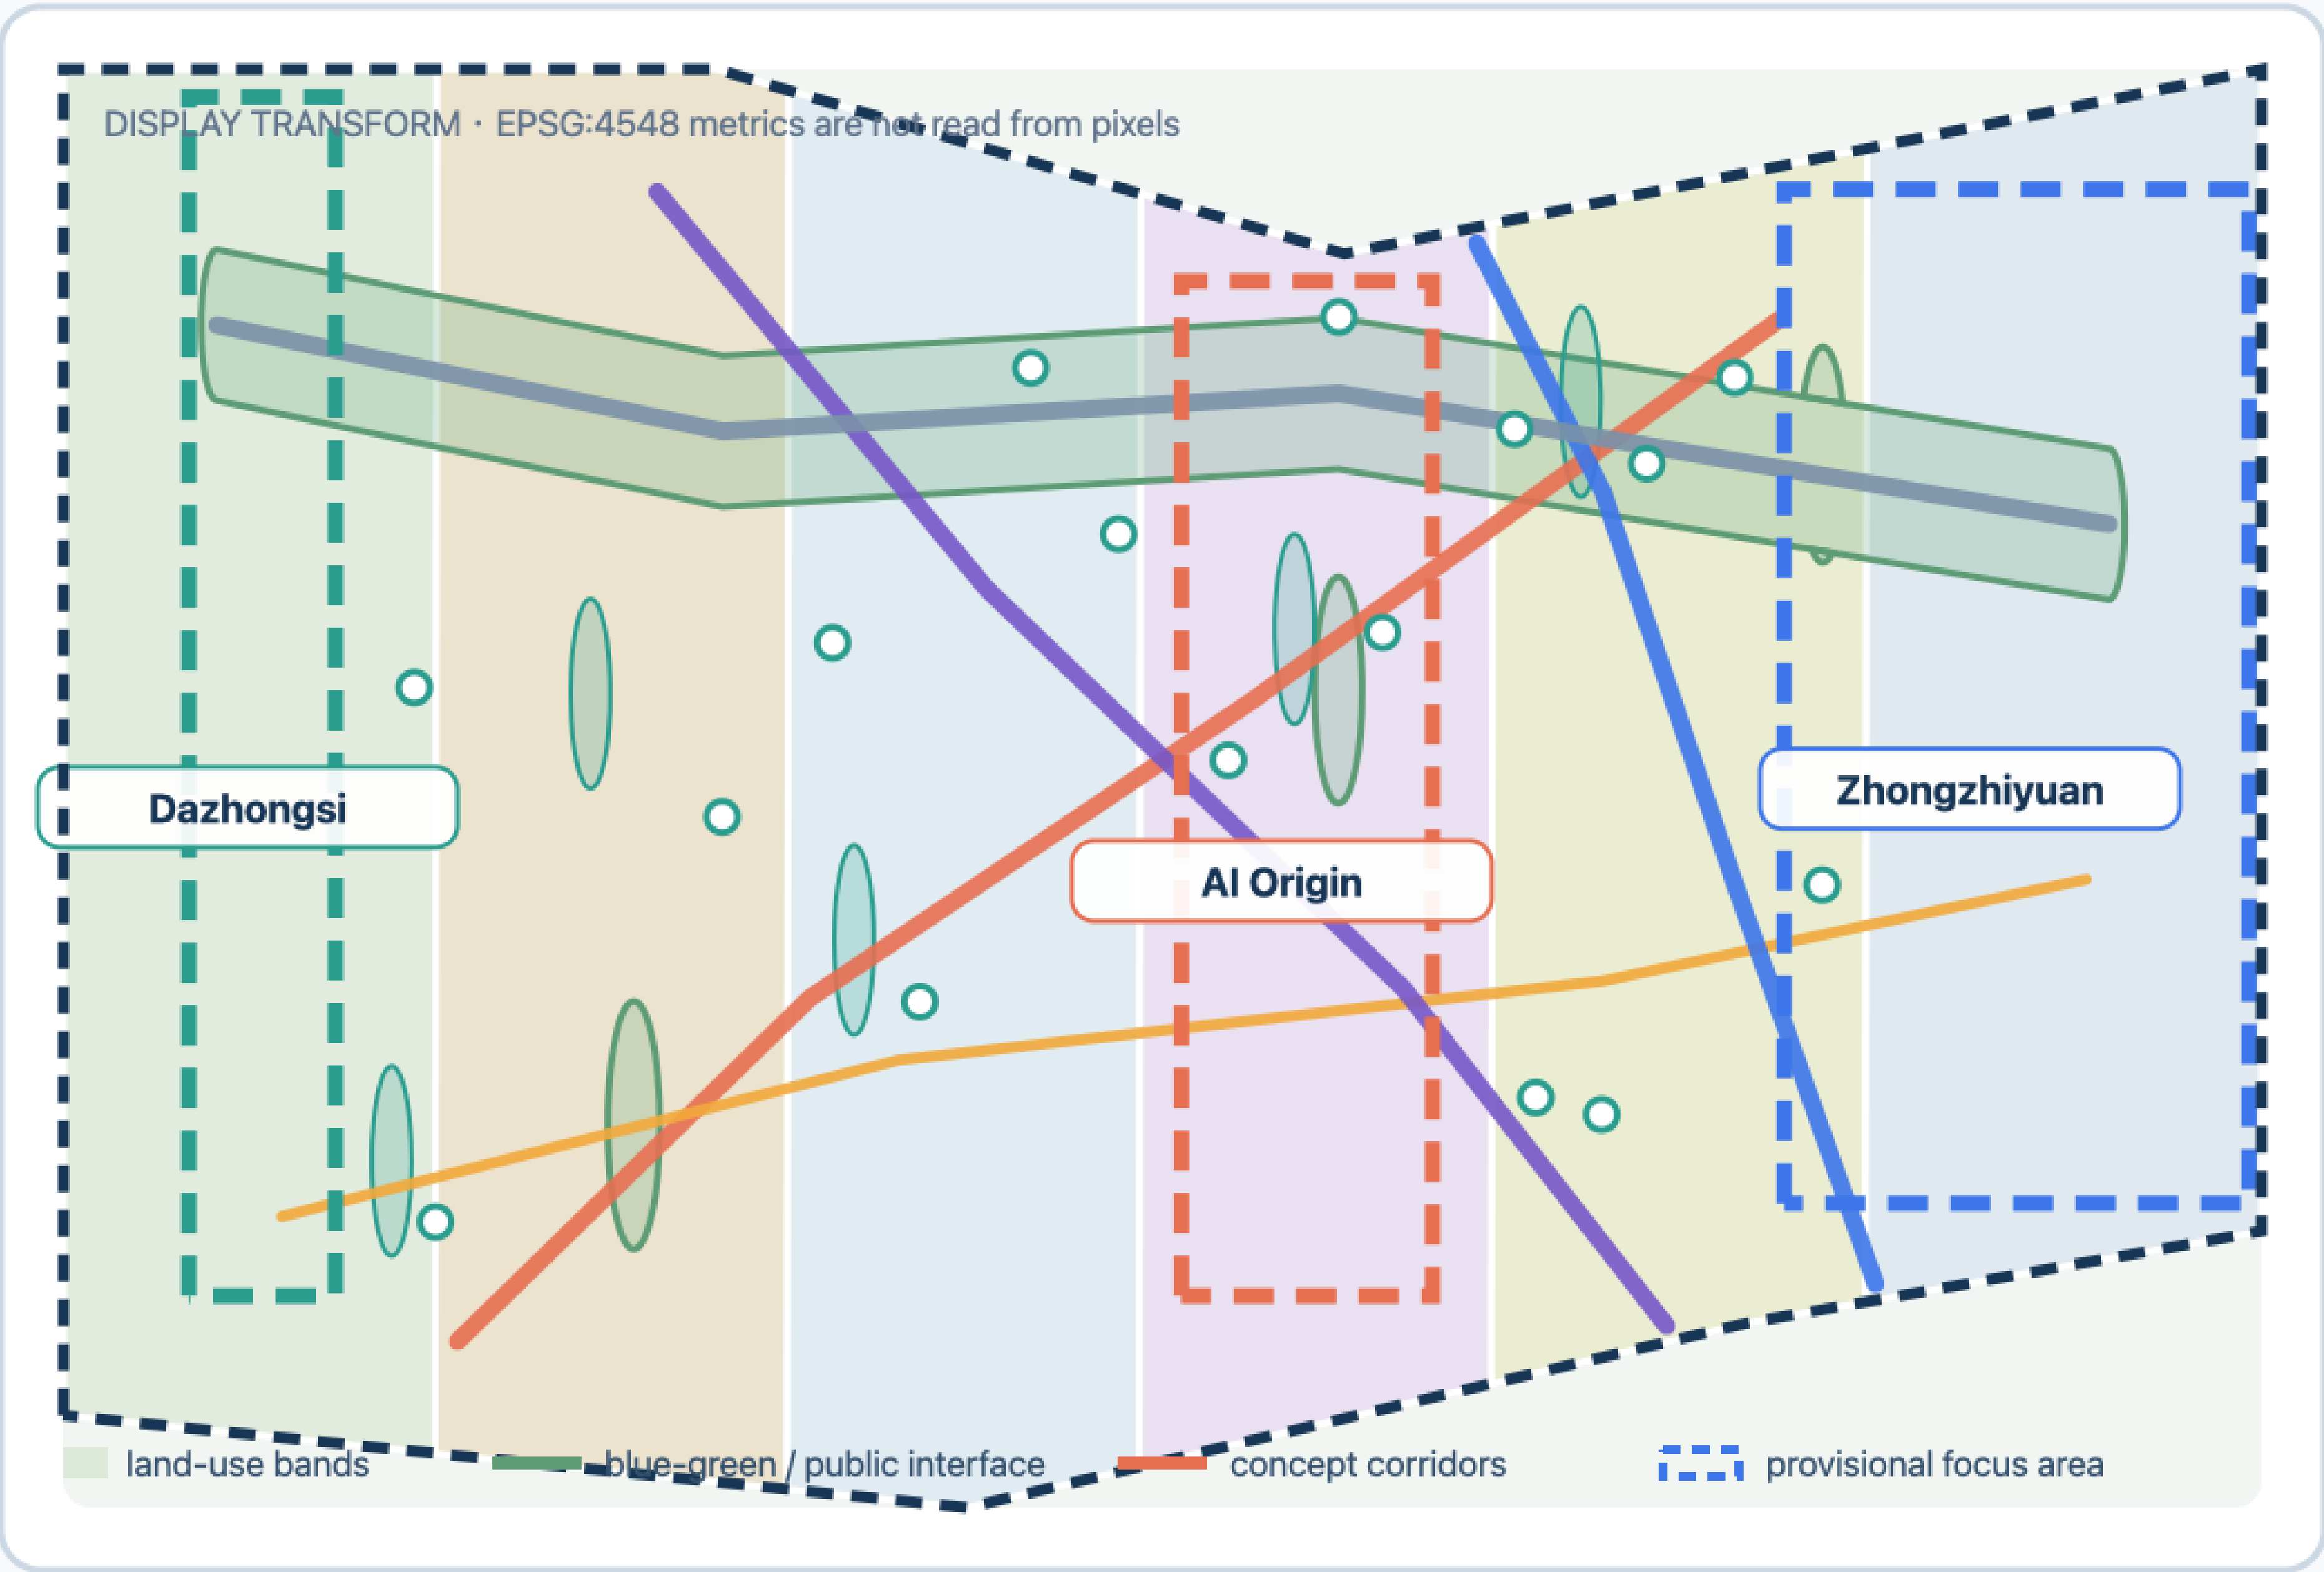

# Human City OS | reviewer-facing spatial evidence atlas

### GEOMETRY

7 GeoJSON layers · display transform

### METRICS

11.41 km<sup>2</sup> provisional input · EPSG:4548

### HUMAN PATH

paper / phone / staffed appeal retained

### UNKNOWN

official boundary · rights · safety · energy ·  
field baseline

### Reading rule

The same reviewer-facing contract runs through every row: arrive → human explanation → bounded interface → screen-free pause → staffed exit / replay. No card is an operating result or an official redline.

official\_boundary=false · geometry\_role=provisional\_constraint · conceptual suggestions for professional teams to deepen

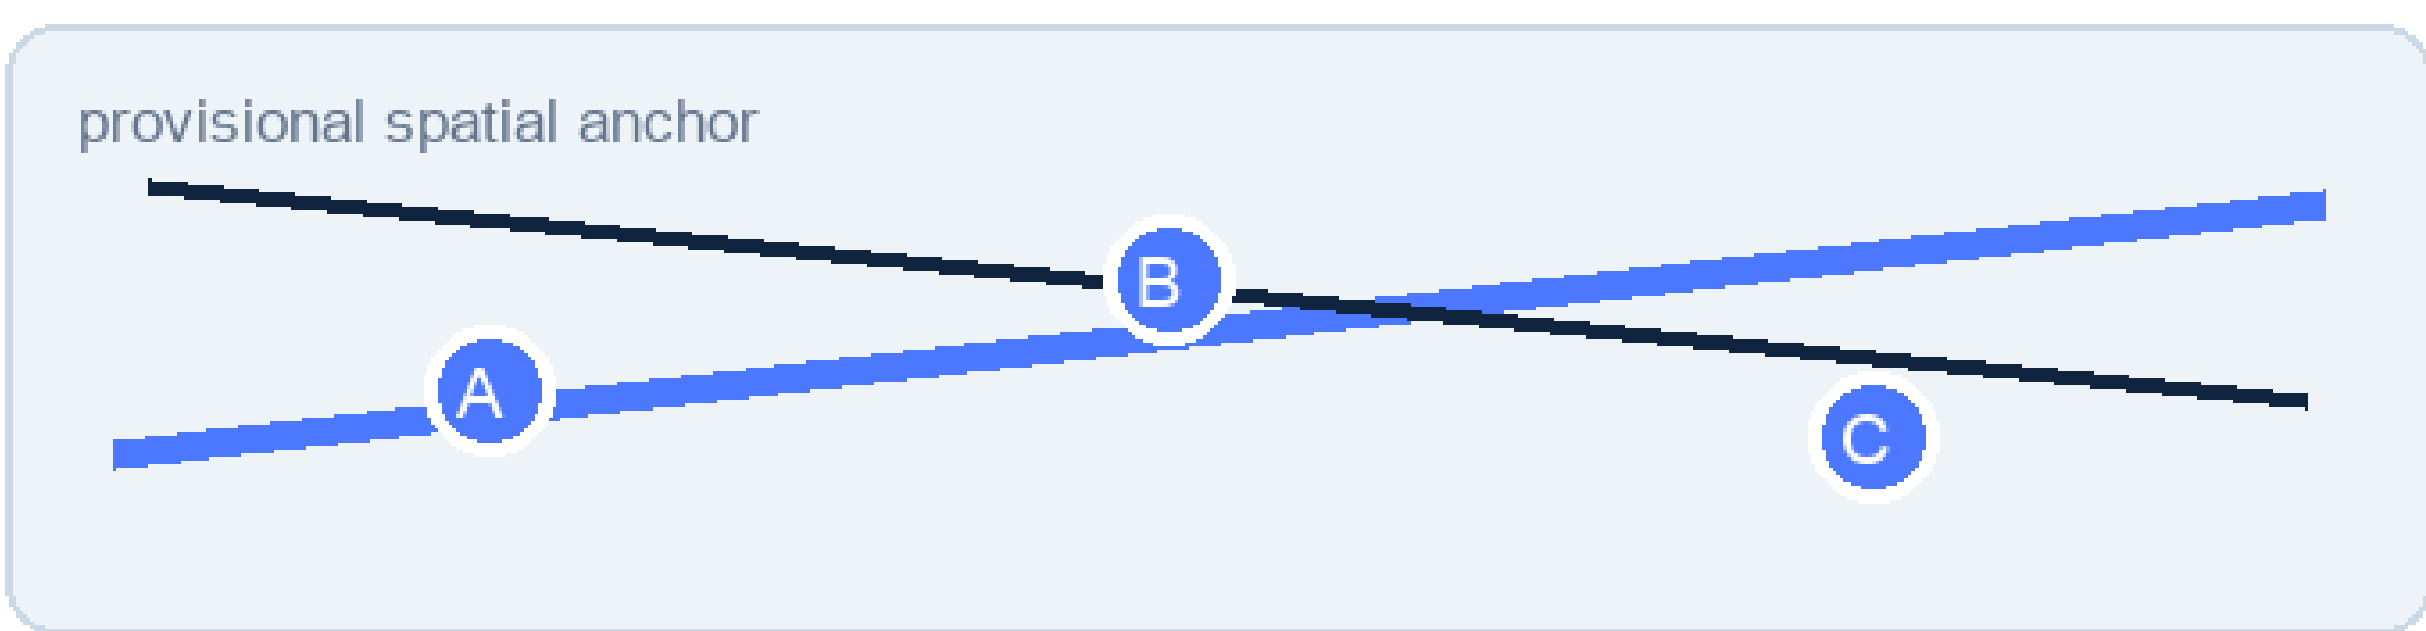

# Three key areas: actions before slogans

Put action, handoff and stop conditions into provisional spatial evidence; no official redlines.

v0.2 · concept

## 01 Zhongzhiyuan AI Acceleration

Machine entry begins with a stop right

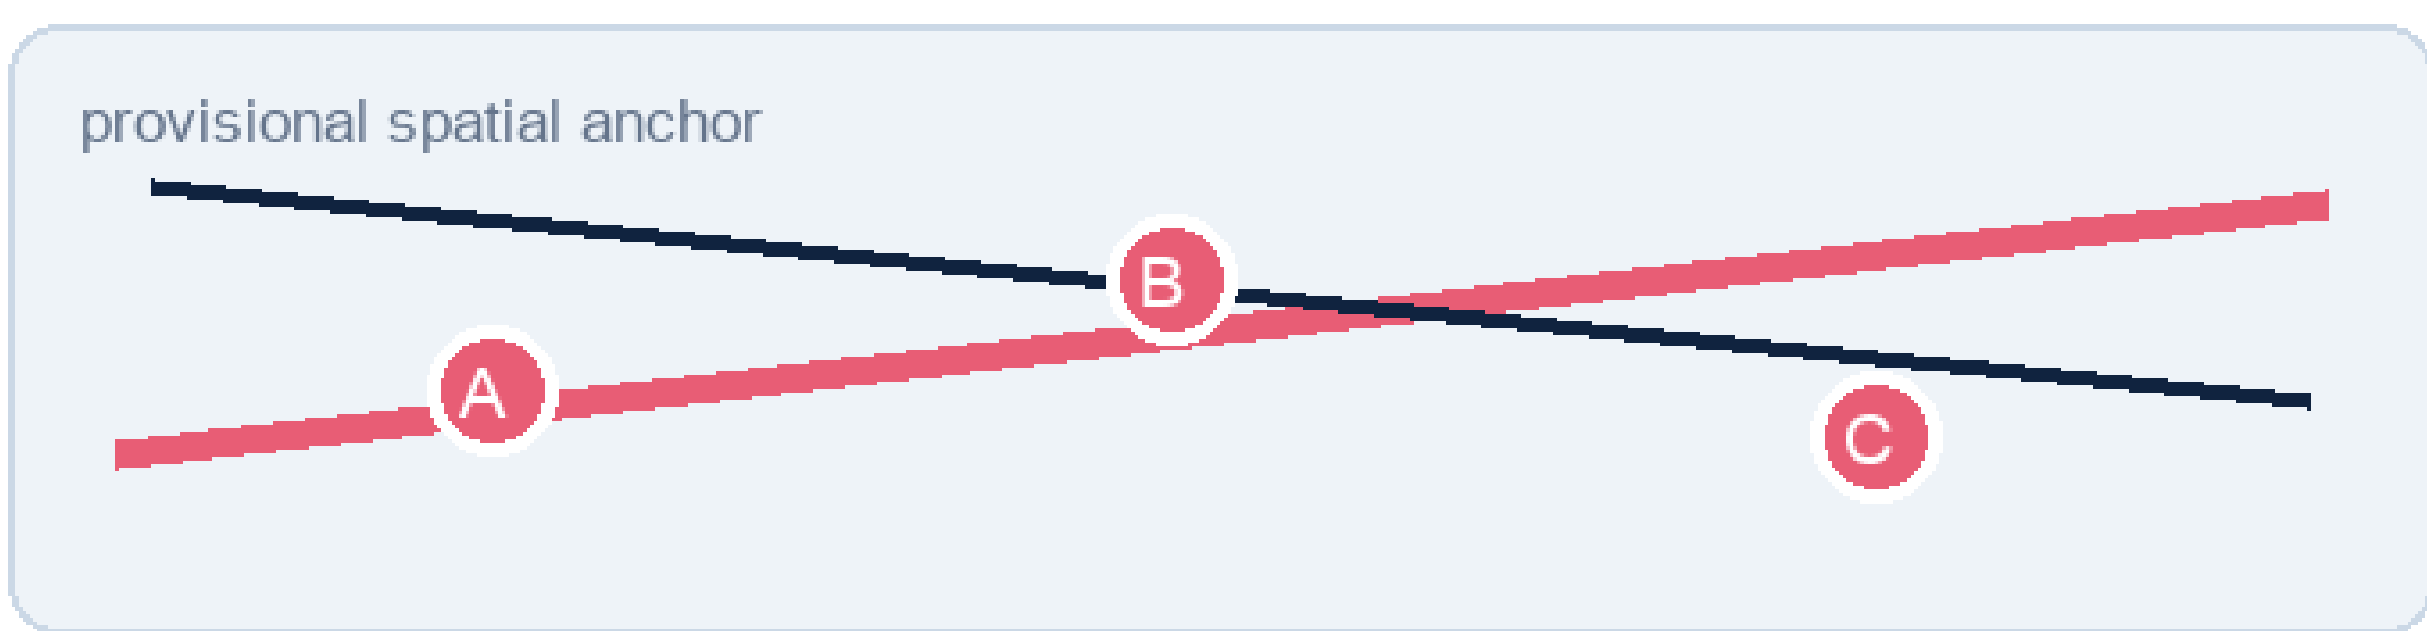

- 1 Human-first edge  
Pedestrians, access and human help enter first
- 2 Controlled test  
Low speed, time-boxed, reversible
- 3 Incident replay  
Positive and negative results stay visible
- 4 Sponge buffer  
Simulation and inspection only

Spatial refs: PROV-KEY-001 · SC-B02 · SC-C03 · ROAD-B-SILICON · GREEN-C-SPONGE

Role classes: 交通/能源/水务/安全/公众观察

## 02 Beijing AI Origin Community

Keep transition and service in daily life

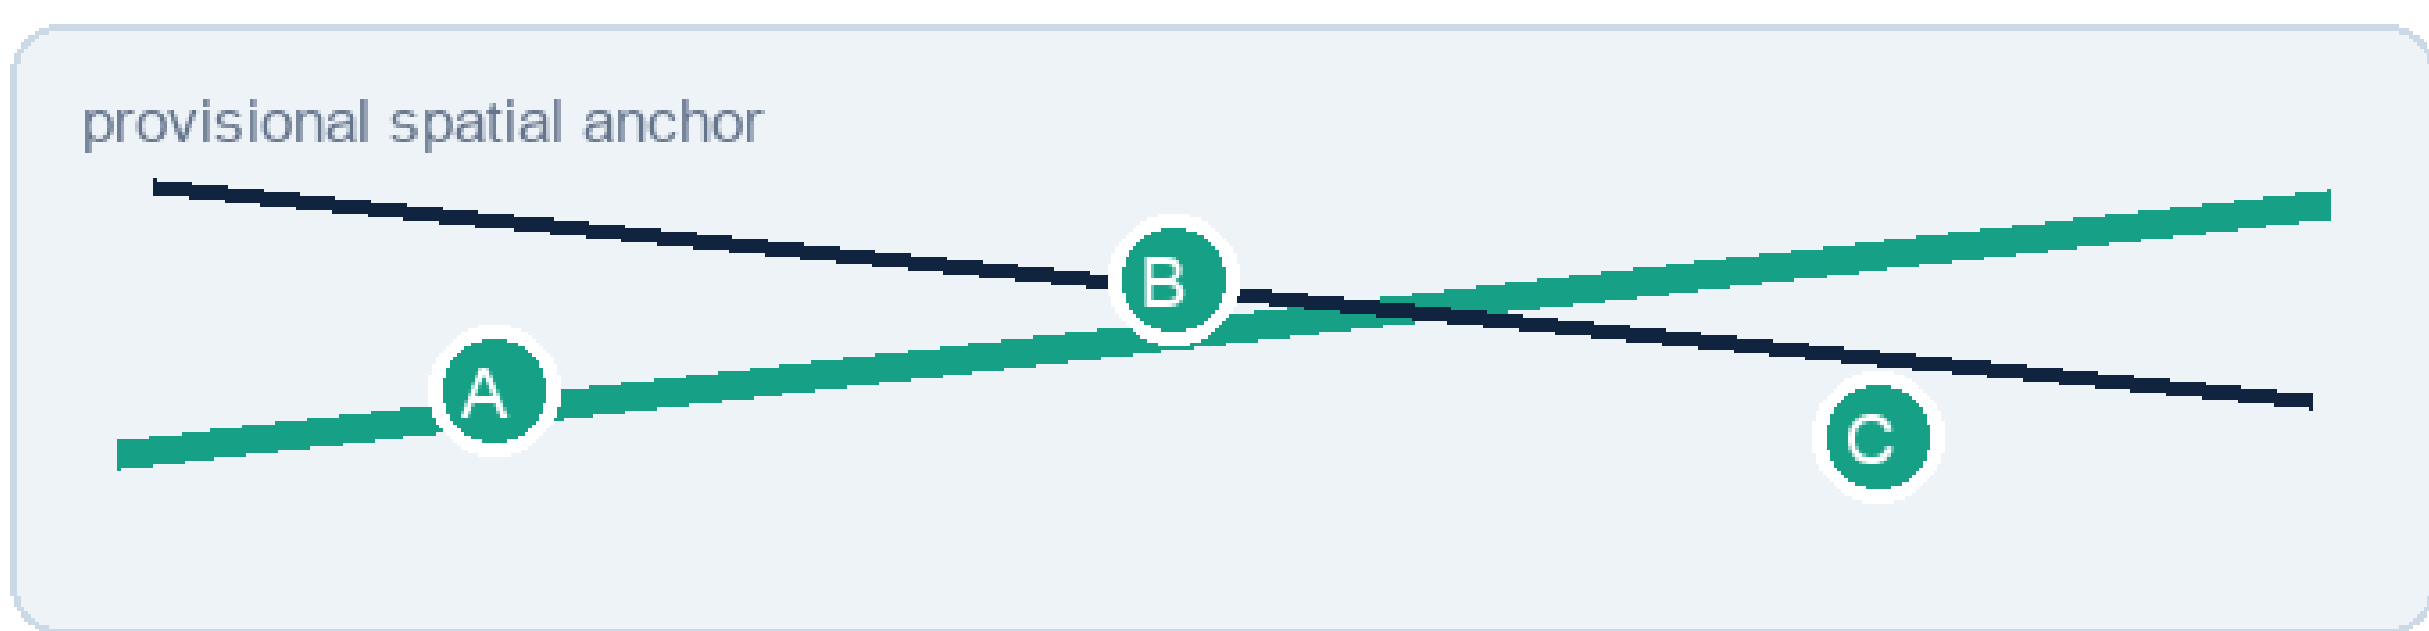

- 1 Human entrance  
Counter, phone and paper stay available
- 2 Skills transition  
Ability, paid training, trial role, new role
- 3 Resident retention  
Spatial support is not a retention result
- 4 Version release  
Questions, pauses and missing data are public

Spatial refs: PROV-KEY-002 · SC-A02 · SC-A03 · ROAD-A-SKILL · PUBLIC-A-INCLUSION

Role classes: 社区/就业/无障碍/资料责任

## 03 Dazhongsi AI Industry Cluster

Make data, energy and service legible

- 1 Data authorization  
Catalogue, permission, log and exit
- 2 Compute-energy audit  
PUE, green power and heat demand first
- 3 Small-team service  
Shared lab, legal help and fair access
- 4 International commons  
Multilingual help and human explanation

Spatial refs: PROV-KEY-003 · SC-C01 · SC-C04 · SC-D03 · BLDG-C-01 · BLDG-D-01/02

Role classes: 数据/能源/OPC/多语服务

The same five-stage spatial sequence, with a different human question at each provisional anchor

CONCEPT / PROVISIONAL

Common spatial rule

Human-readable arrival → public explanation → bounded interface → screen-free pause → staffed exit and replay. Every move remains conceptual until official geometry, rights, safety, accessibility, energy, climate, and public baselines are supplied.

# Human City OS | Spatial Decision Receipt

Protect the human mainline first, then decide how machines enter · HOLD / synthetic tabletop

## Three spatial organizations

### ALT-A Machine-first belt

#### REJECT

API, screens and test lanes are default  
Ordinary movement and repair move behind

Human mainline not independently protected

Reject: efficiency cannot replace dignity

### ALT-B Four value-chain rooms

#### REVISE

Rooms clarify programs and test boundaries  
Mainline, appeal, maintenance and release split

The operating system stops at room edges

Revise: add a shared release receipt

### ALT-C Human mainline + machine lanes

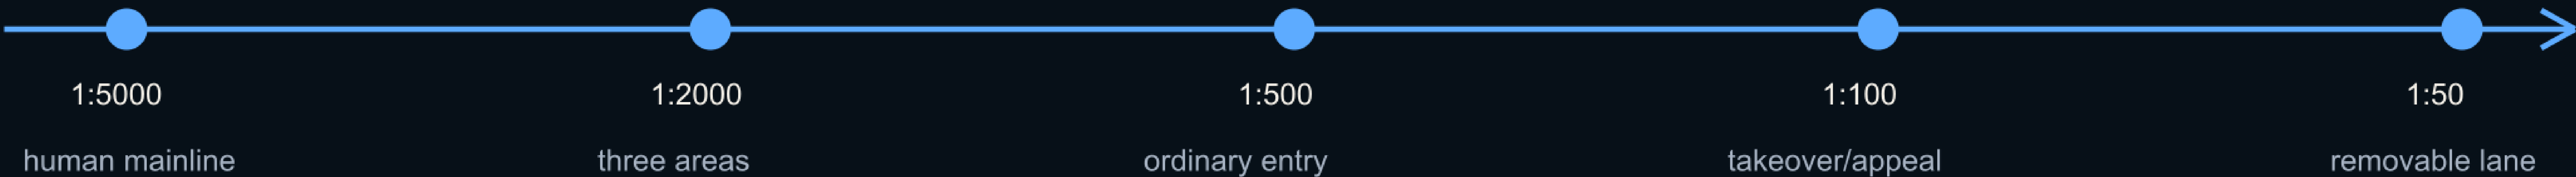

#### ADVANCE TO DESIGN REVIEW

Ordinary, accessible, staffed and repair first  
API, robot and low-air concepts pause and replay

Selected: deepen, but remain HOLD

Next: node walk, takeover, appeal readback

## Scale chain: from value-chain relation to readable release handoff

## Five public rights

dignity/ordinary access · non-digital/accessibility · consent/pause/appeal/exit · community repair/retention · public asset/privacy

0 authorizations · 0 field observations · baseline unknown · not\_authorized\_not\_run · no field claims

# Optional interoperability layer | SEB field crosswalk

Maps already-public package fields only; it is not adoption, a hard gate, formal scoring, or proof of live service

Five SEB v0.5.0 fields

1 AI-off equivalent route

2 Human handoff role

3 Current gate

4 Operating mode

5 Responsible role

source of record: package ledgers

## HC-T01 · Human channel and intergenerational learning

Staffed / telephone / paper / device-free entry | public-service desk role (not assigned)

SC-A03 · PHASE-V01 → SEB G0 · route copied from human\_alternative

## HC-T02 · City-API authorization desk

Human review / revocation / non-digital explanation | data steward and independent-review role (not assigned)

SC-B01 · PHASE-V02 → SEB G0 · freeze on excess permission or purpose drift

## HC-T03 · Regulatory-sandbox incident replay desk

Human stop / on-site handling / public appeal | test-accountability and incident-response role (not assigned)

SC-C03 · PHASE-V02 → SEB G0 · no human stop means no test

## HC-T04 · Multilingual public-service living room

Human translation / telephone / icons / paper forms | multilingual service and content-QA role (not assigned)

SC-D03 · PHASE-V01 → SEB G0 · stop digital guidance on bilingual mismatch

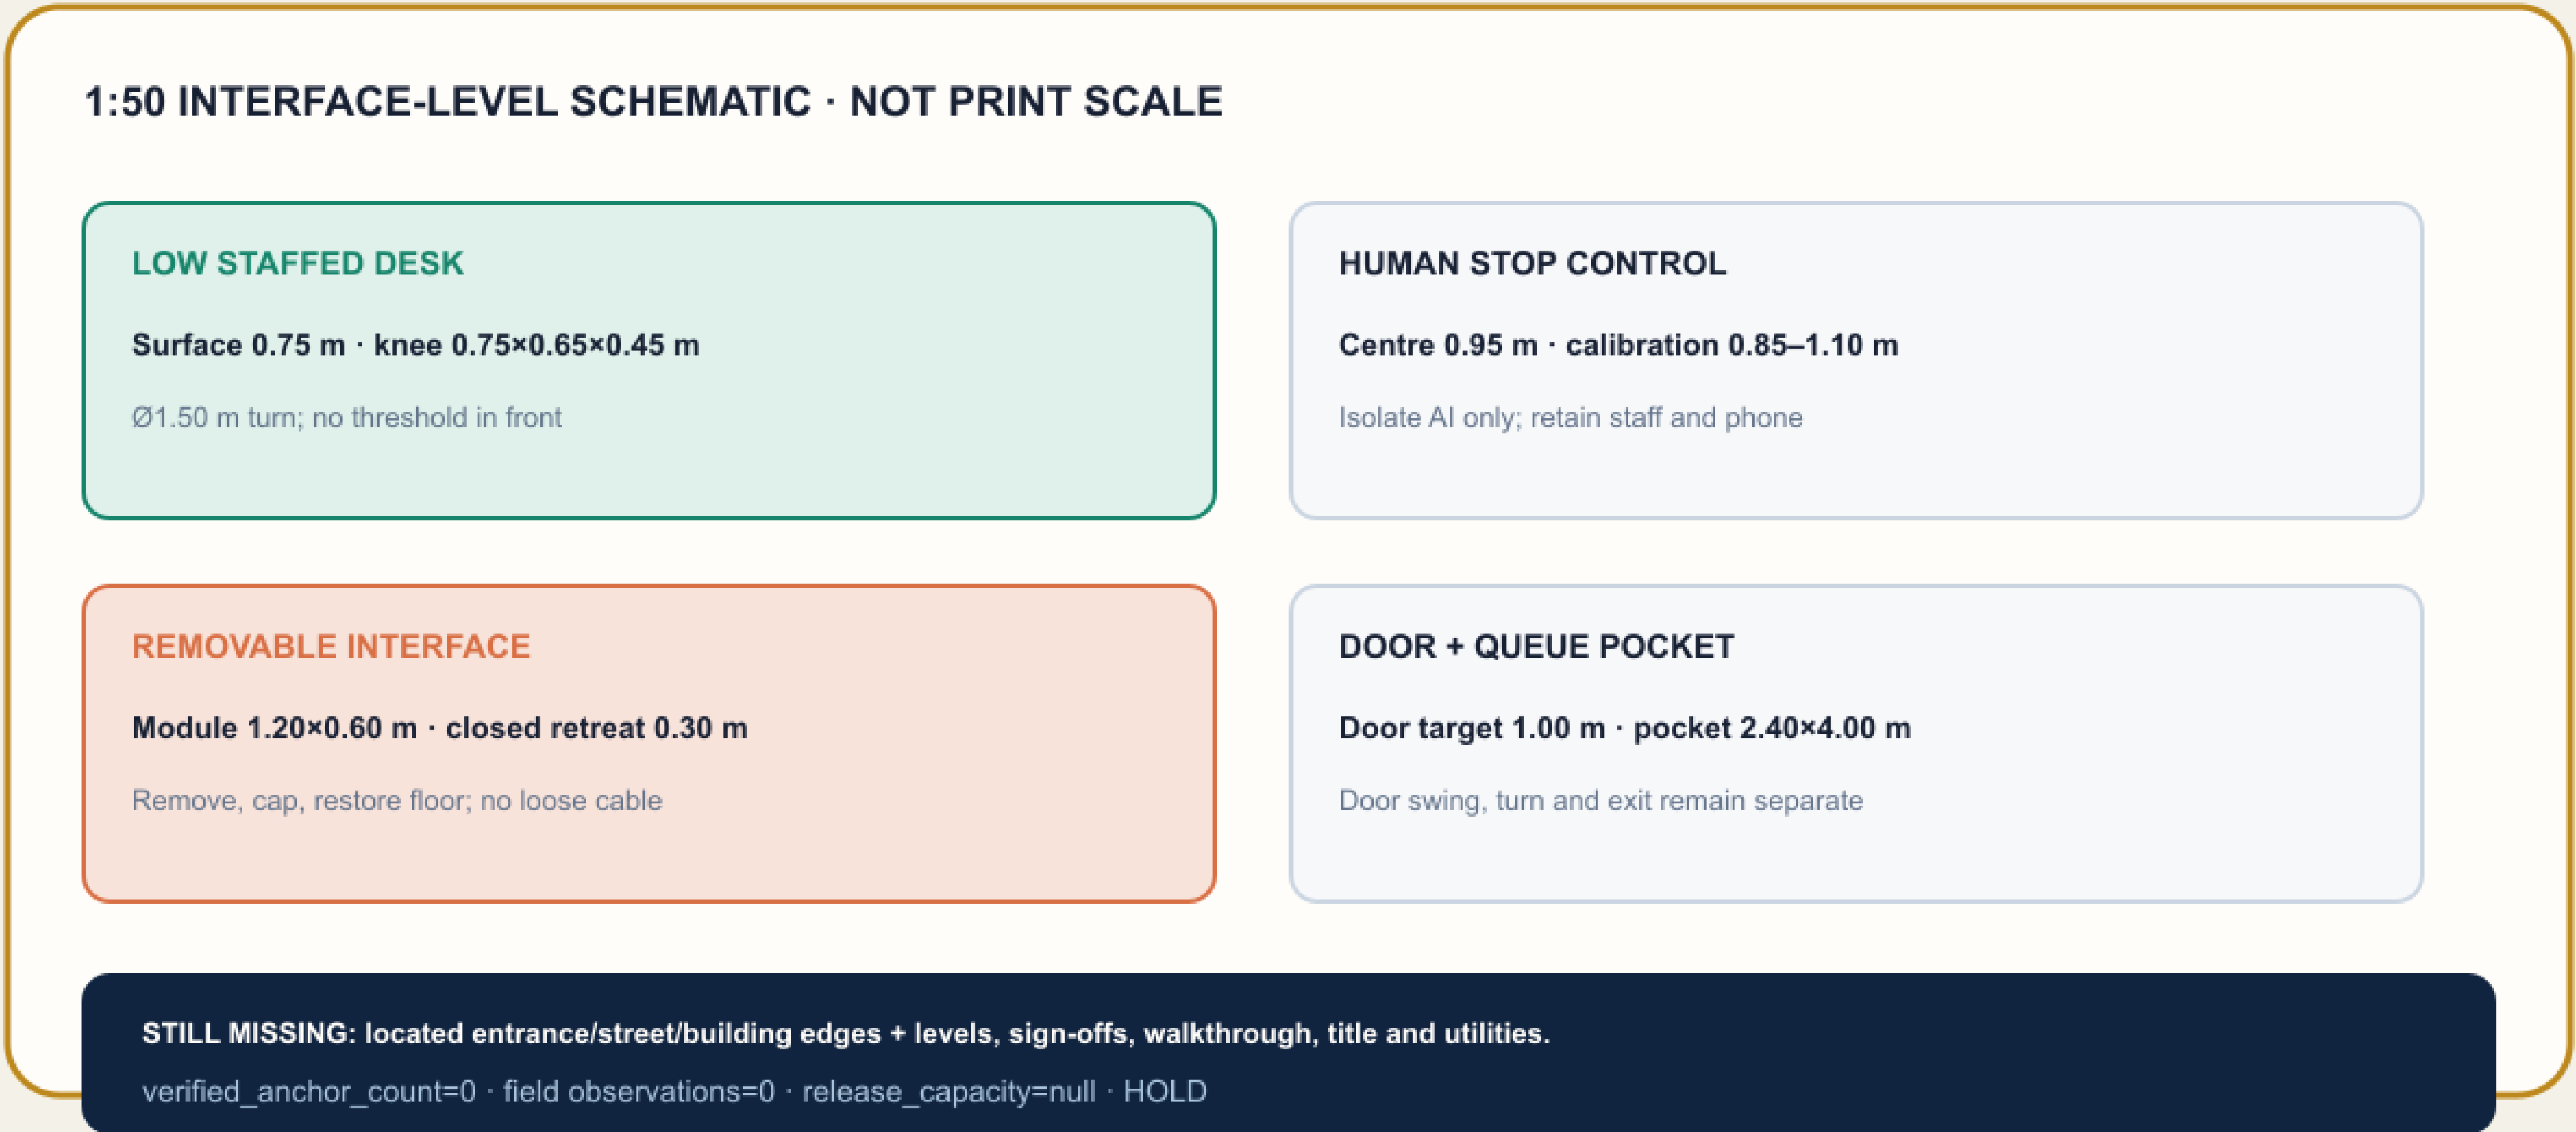

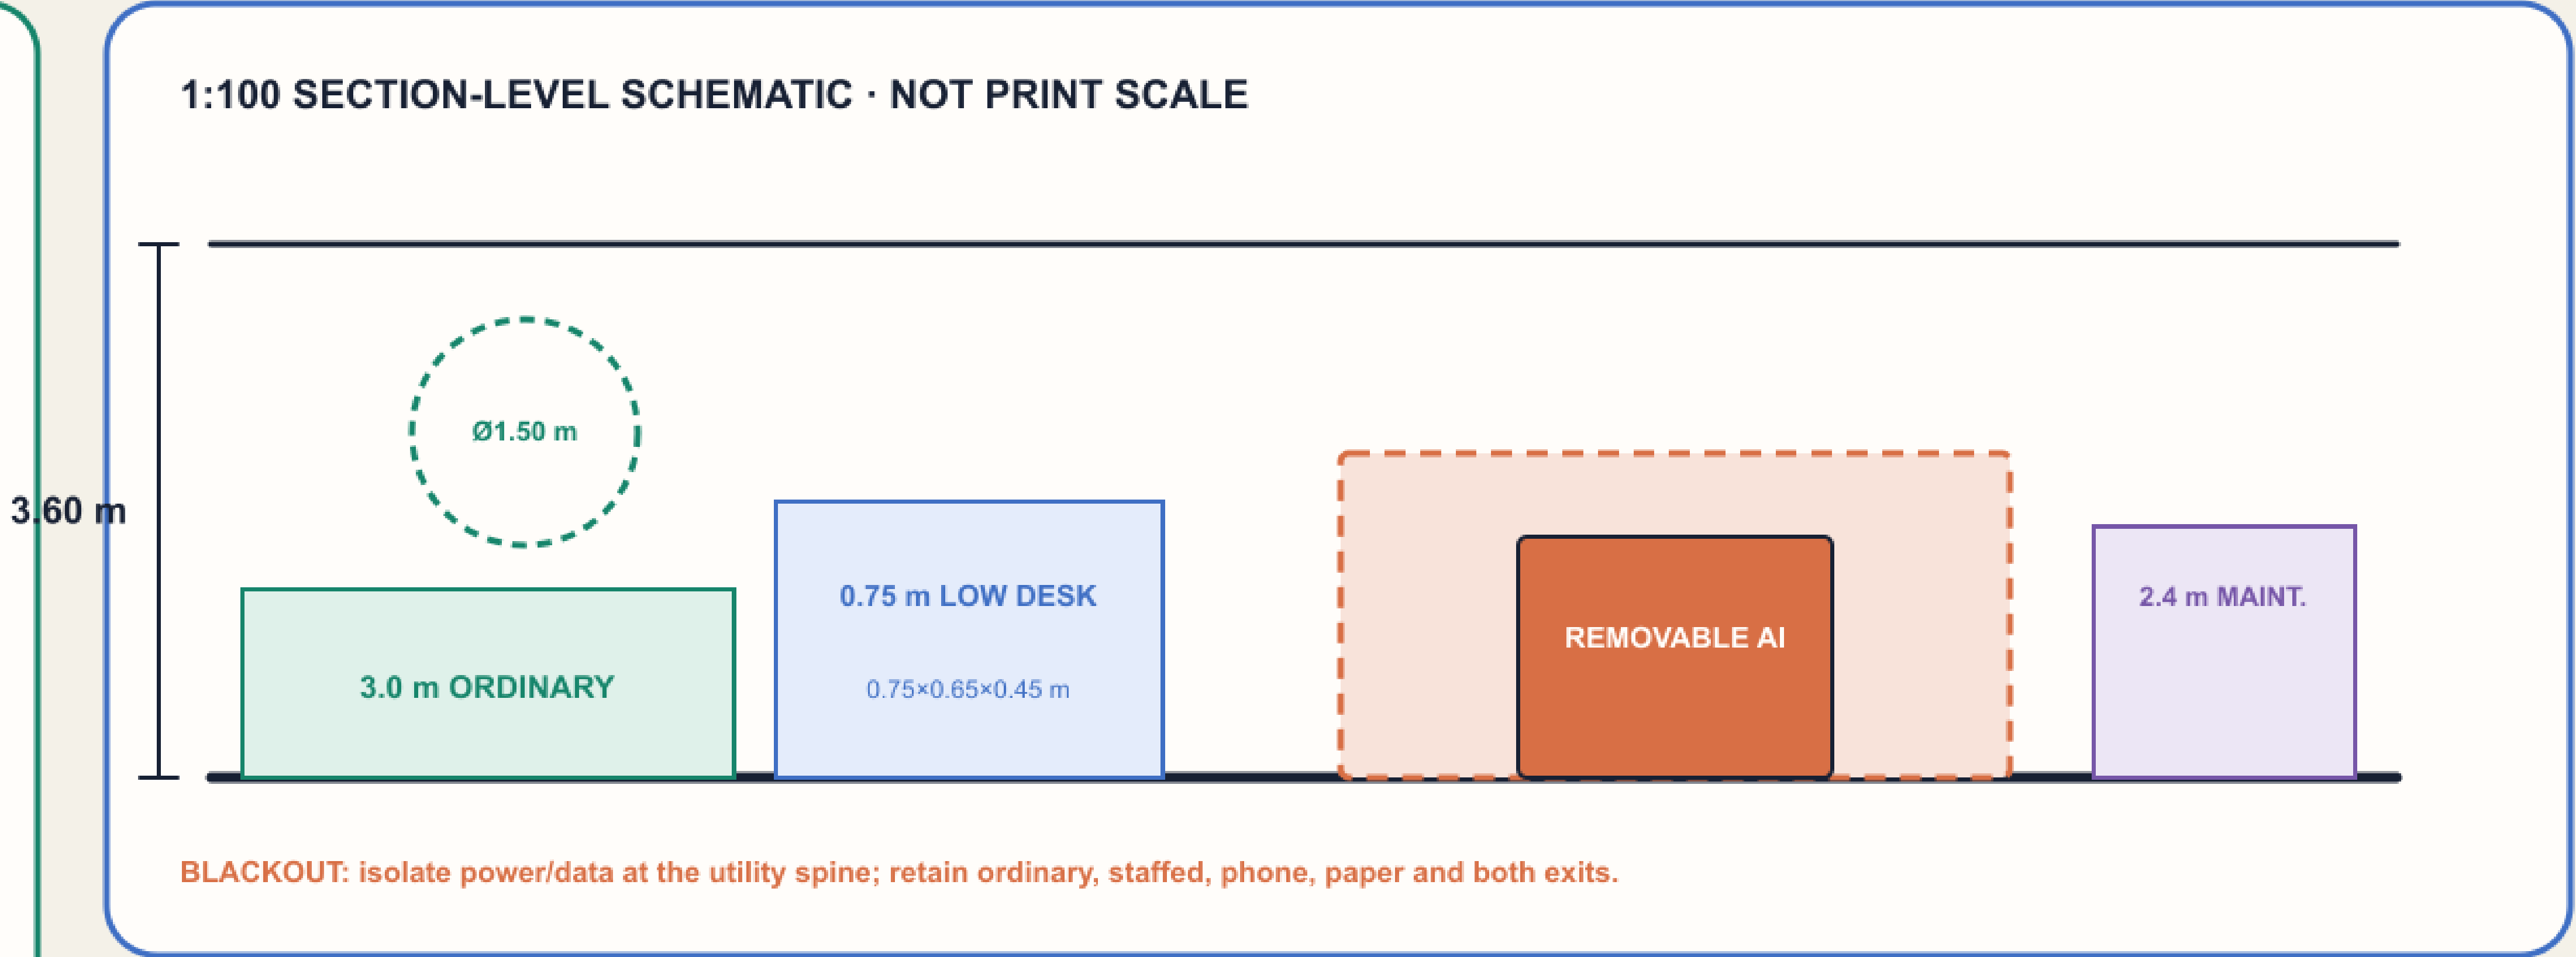

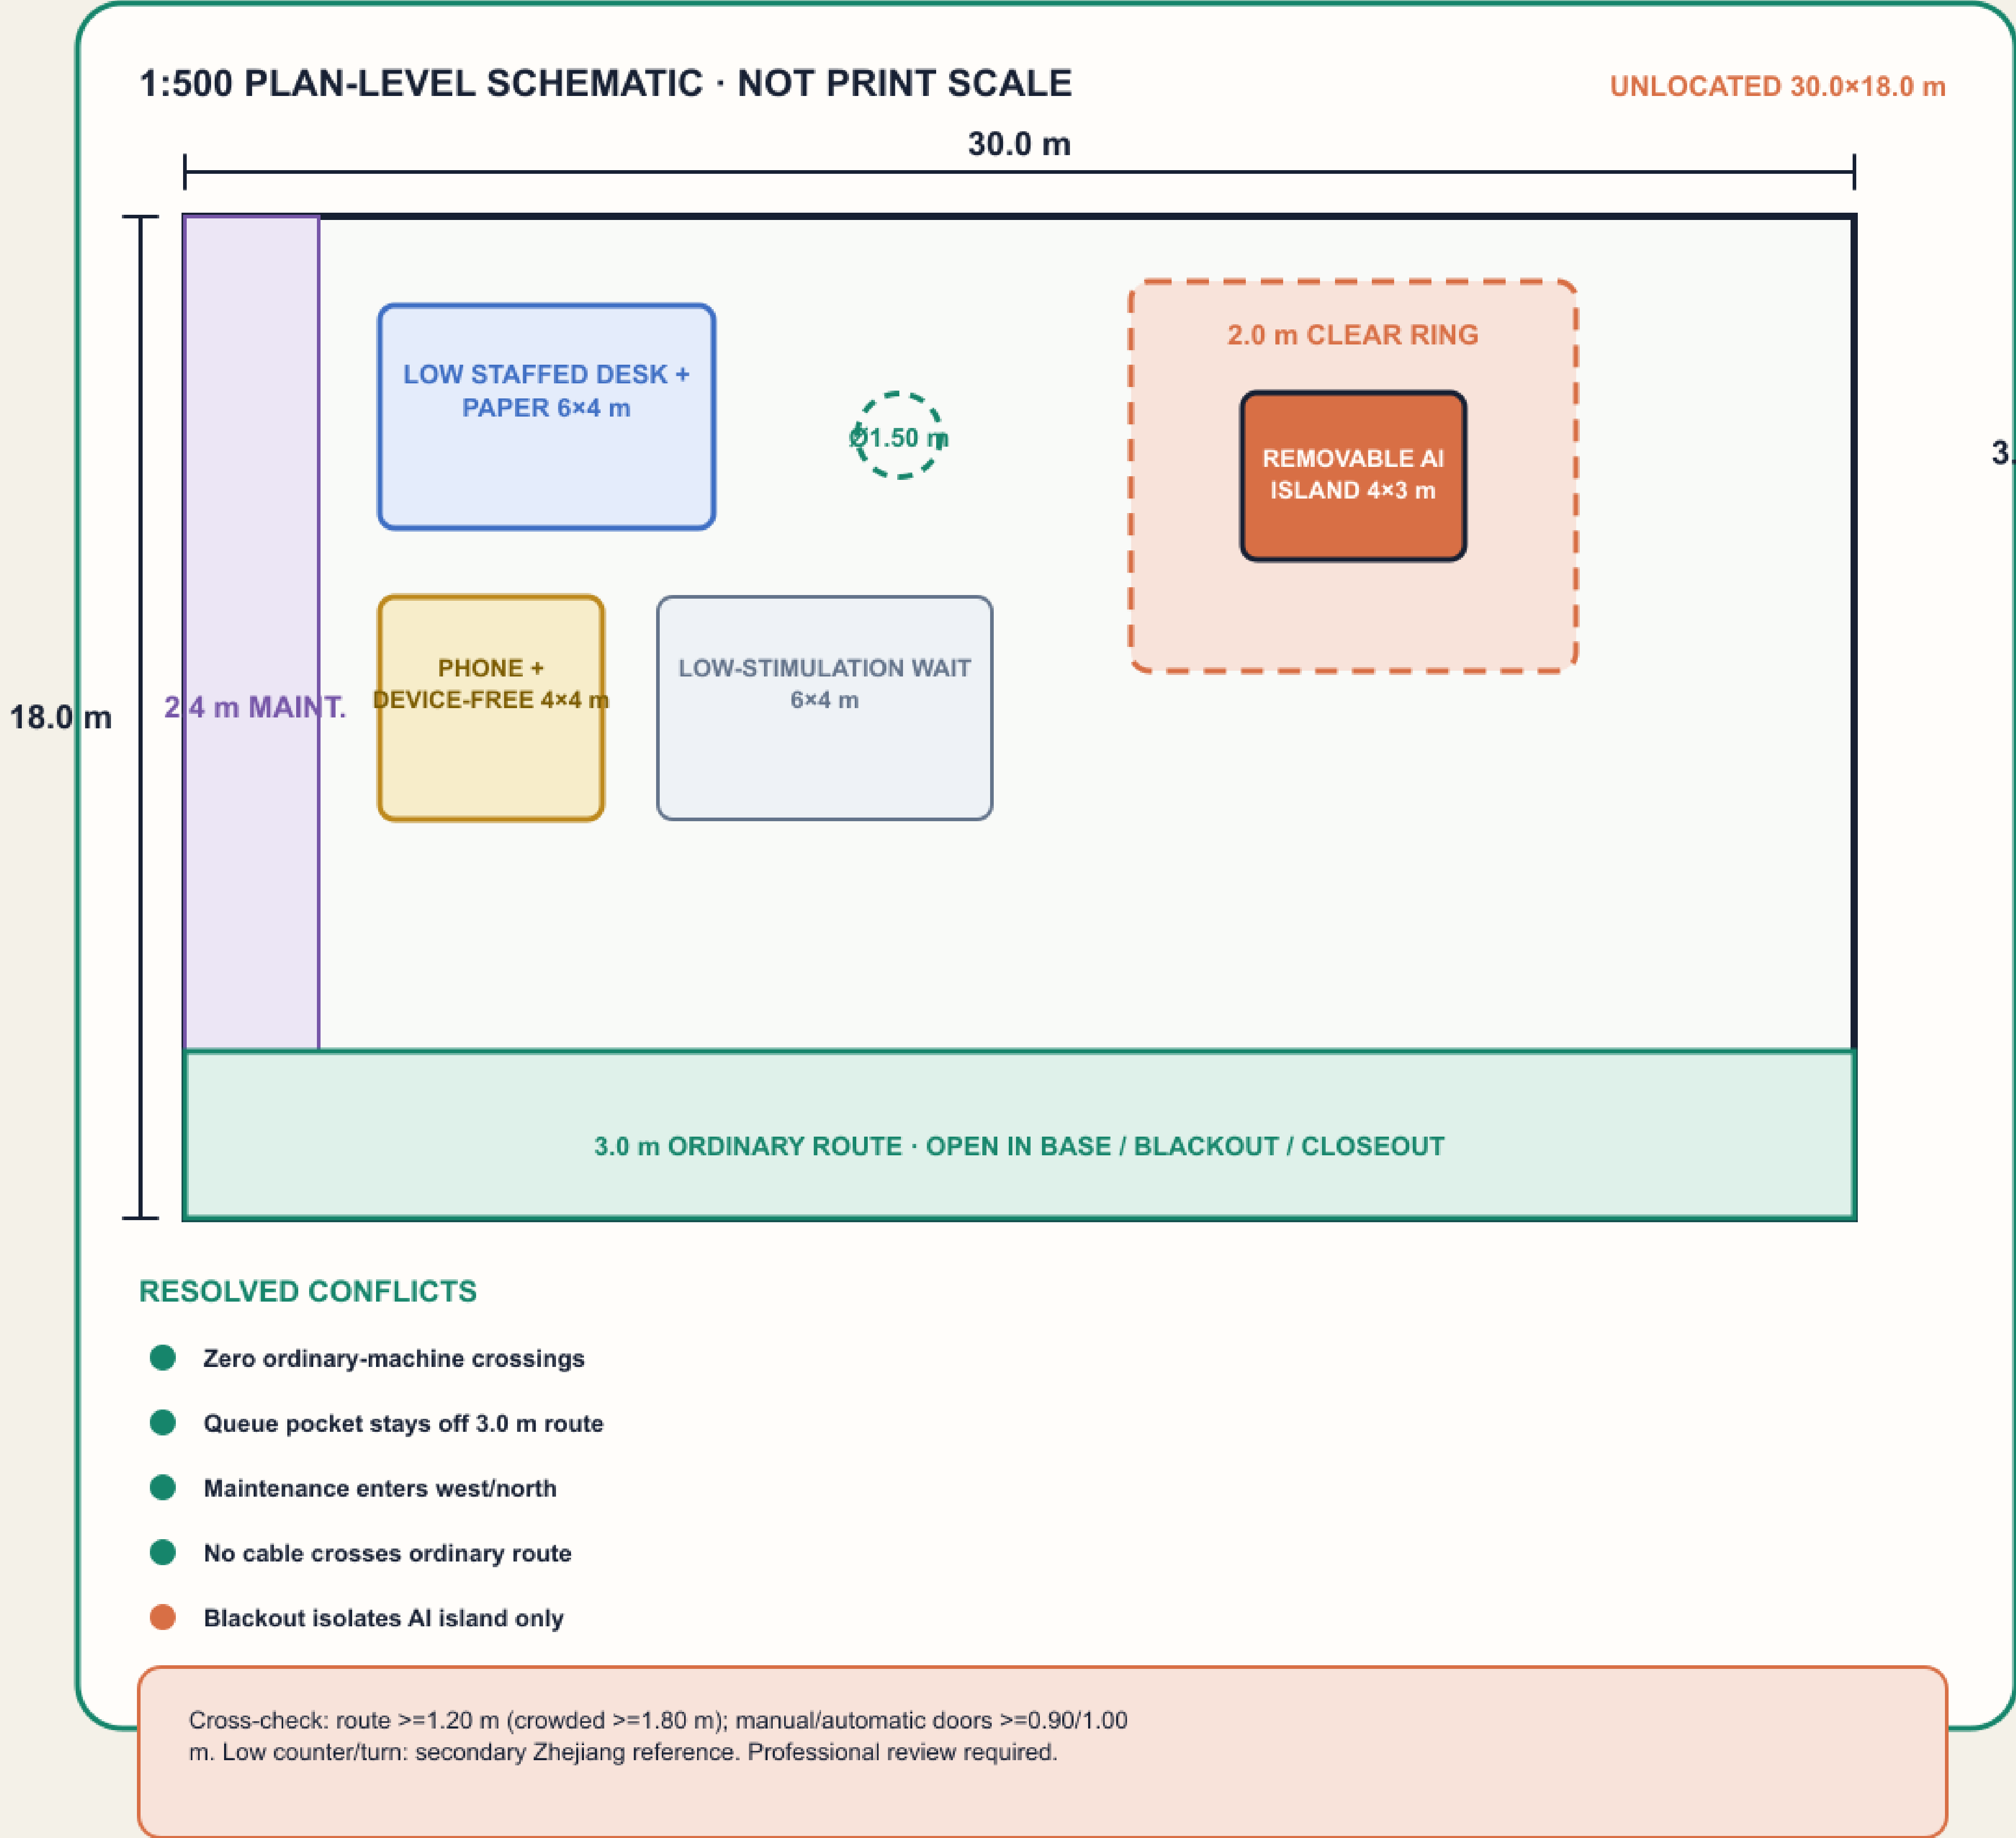

**HOLD · contract\_check\_only · authorization=0 · field\_observations=0 · baseline=unknown · performance=null**

Five negative fixtures reject digital dependency, missing roles, invalid gates, missing mode, and changed source fields; PASS is not adoption or outcome.

# One public-service node, three drawings that can be challenged

ALT-C: ordinary entry, low staffed desk and exit precede the removable AI island

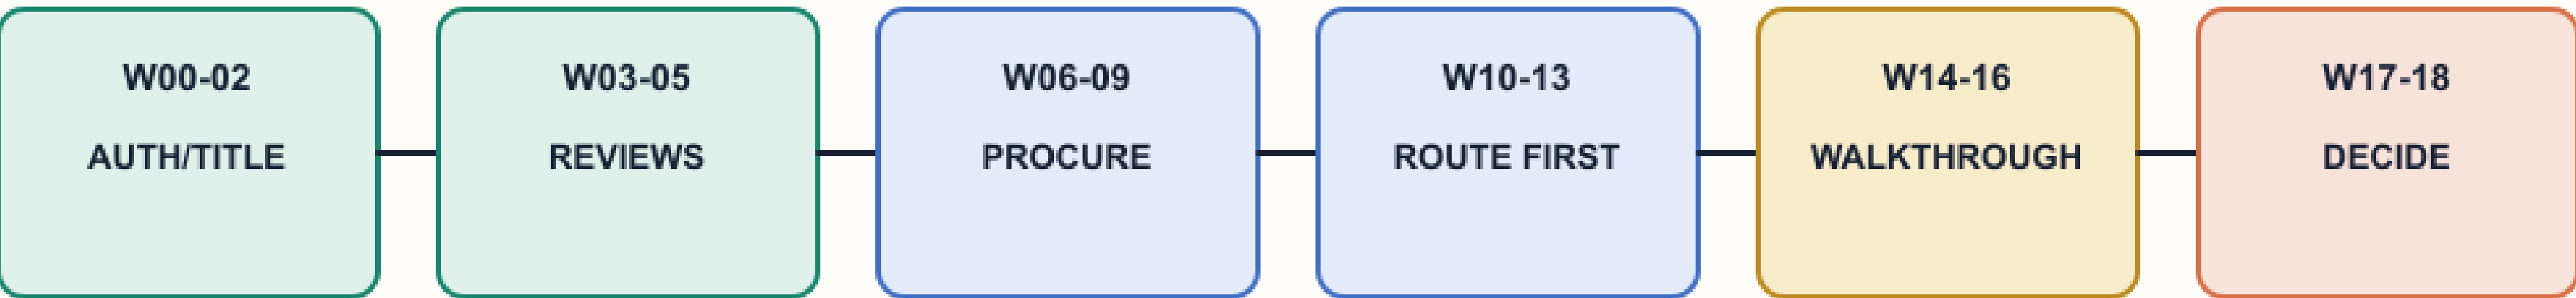

# From roles to retirement: a delivery receipt that does not pretend to be built

Conditional 18-week path, quantity-rate cost, RACI, SLA, insurance and dual rollback

## CONDITIONAL 18-WEEK DEPENDENCY CHAIN · STARTS AFTER G0

Every stage needs signable release evidence; any critical accessibility, fire, privacy, consent or accountability failure returns to HOLD.

**PROCUREMENT:** two-stage, performance-based, competitive, open quantities + rates; no preferred supplier.  
PAYMENT: after accepted route, blackout, handover and closeout evidence.

## QUANTITY × RATE CONCEPT COST · LOW CONFIDENCE, NOT TENDER

|                                                                                                        |                    |                                  |
|--------------------------------------------------------------------------------------------------------|--------------------|----------------------------------|
| Survey/design/reviews                                                                                  | 1 package          | CNY 100–150k                     |
| Route + reversible floor                                                                               | 180 sqm × 800–1200 | CNY 144–216k                     |
| Staffed/paper fit-out                                                                                  | 24 sqm × 4500–6500 | CNY 108–156k                     |
| AI island/offline interface                                                                            | 12 sqm × 12–18k    | CNY 144–216k                     |
| Wayfinding/accessibility                                                                               | 1 package          | CNY 80–120k                      |
| Test/train/reinstate                                                                                   | 1 package          | CNY 80–120k                      |
| <b>CAPEX +15% CONTINGENCY</b>                                                                          |                    | <b>CNY 754,400–1,124,700</b>     |
| MONTHLY OPEX: 320 staff-hours + maintenance + translation/accessibility + data/audit, plus 10% reserve |                    | <b>CNY 32,780–54,340 / month</b> |

## RACI ASSET HANDOFF · EVERY ORGANISATION ROLE UNCONFIRMED

| ASSET                                | RESPONSIBLE                     | ACCOUNTABLE             | CONSULTED                        |
|--------------------------------------|---------------------------------|-------------------------|----------------------------------|
| ordinary route and floor             | site works contractor role      | public-asset owner role | accessibility and fire reviewers |
| staffed, telephone and paper service | public-service operator role    | service commissioning   | community and accessibility      |
| removable AI island                  | prototype supplier role         | pilot operator role     | data, safety and accessibility   |
| logs, consent and complaints         | data-protection role            | service commissioning   | independent reviewer             |
| decommissioning and reinstatement    | maintainer and site works roles | public-asset owner role | operator and community           |

Every accountable role must be named and sign before procurement; status=role\_unconfirmed.

## FIVE SLA TARGETS · ALL UNOBSERVED DESIGN TARGETS

- 1 ordinary route plus staffed, telephone or paper completion remains available in every public service window
- 2 a stop trigger isolates the AI island within 2 minutes without closing the ordinary route
- 3 a complaint receives acknowledgment within 1 working day and a status within 5 working days
- 4 opening and closeout checks sign route, desk, paper stock, telephone, power isolation and maintenance access
- 5 a critical accessibility, fire, privacy or consent failure reduces AI service capacity to zero immediately

**RETIRE:** isolate/remove island, cap interfaces, restore floor, retain ordinary service, notify, close complaints, archive.

WALKTHROUGH PROTOCOL AUTHORED, NOT AUTHORISED: 5 tasks, 0 recruitment, 0 participants, result=null; owner, geometry, sign-offs, cost, insurance and decision remain missing.
