Overall Structure | Jing-Zhang AI Commons

PROVISIONAL INTAKE

A single public spine

History, daily life, testing and global exchange share one legible route.

- three innovation anchors
- low-contrast temporary boundary
- scenario nodes on public space

site_area_sqm
11,412,825.386 sqm

green_ratio
12.3423%

public_space_ratio
7.3281%

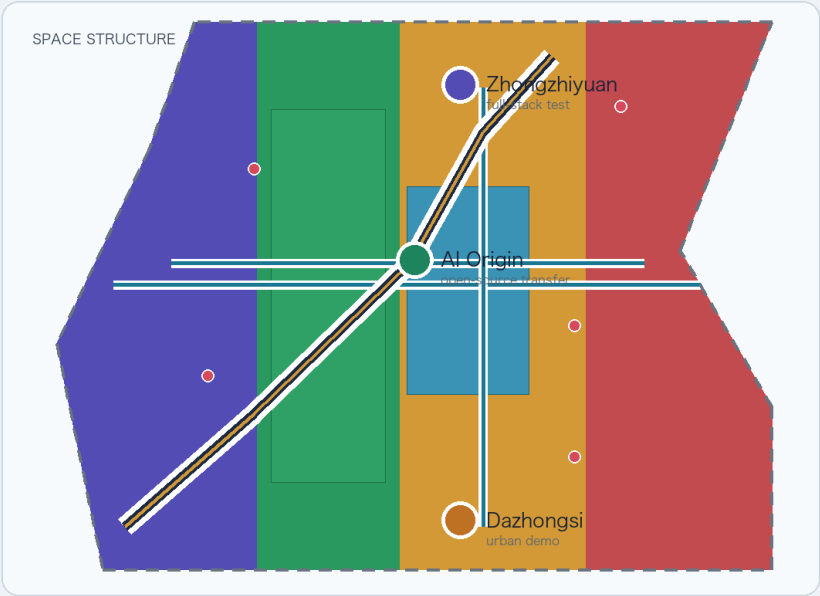

Source: same GeoJSON, metrics and matrix state; temporary polygons are not official redlines.

AI innovation open call · concept recommendation · professional deepening required

Land Use | Three Cores and Public Interfaces

PROVISIONAL INTAKE

Layered, not zoned apart

Land-use bands are interpreted through corridors, interfaces and operating relationships.

- R&D + shared test
- heritage park + blue-green
- services + daily life

site_area_sqm
11,412,825.386 sqm

green_ratio
12.3423%

public_space_ratio
7.3281%

Mobility + Blue-Green | Memory to Open Source to Demo

PROVISIONAL INTAKE

Connect the everyday

Slow mobility, blue-green space and station interfaces form a testable public network.

- walking + cycling continuity
- station interface concept
- human review for sensing

site_area_sqm
11,412,825.386 sqm
green_ratio
12.3423%
public_space_ratio
7.3281%

Key Areas | Three Spatial Prototypes

PROVISIONAL INTAKE

Three cores, three roles

Each key area gets a distinct spatial and operational proposition.

- full-stack / Zhongzhiyuan
- transfer / AI Origin
- urban demo / Dazhongsi

site_area_sqm
11,412,825.386 sqm
green_ratio
12.3423%
public_space_ratio
7.3281%

Evidence Chain | Geometry to Review

PROVISIONAL INTAKE

Recompute after official data

The structured layer is authoritative; visualis explain the chain but do not replace it.

- site area → ratios
- geometry → figures
- assumptions → review gates

site_area_sqm
