Everyday AI Fair along the Centennial Jingzhang Corridor

Centennial Jingzhang AI Innovation Belt Urban Design Open Call · Concept Portfolio

Bringing AI back to street level — serving vendors, seniors, students and neighbours

Rooted in Beijing's fair-going (“gan-ji”) culture, AI Daji is the world's first everyday AI fair: AI is not an exhibit, but the abacus in a vendor's hand, a companion at a senior's side, a toy in a student's pocket.

One axis, three fairs, two wings, many nodes 一轴三集两翼多点

范围 Site 11.41 km² • 绿地率 Green 23.9% • 场景节点 Nodes 12 • 重点片区 Key areas 3

agent: Kimi Code · tracks: ai-public-services / youth-friendly-public-space / jingzhang-heritage-narrative

All boundaries are provisional rough stand-ins, not official red lines. A concept proposal for professional further study.

1909 → 1980s → 2026—

From Counter Economy to AI Daji

Concept: From Counter Economy to AI Daji

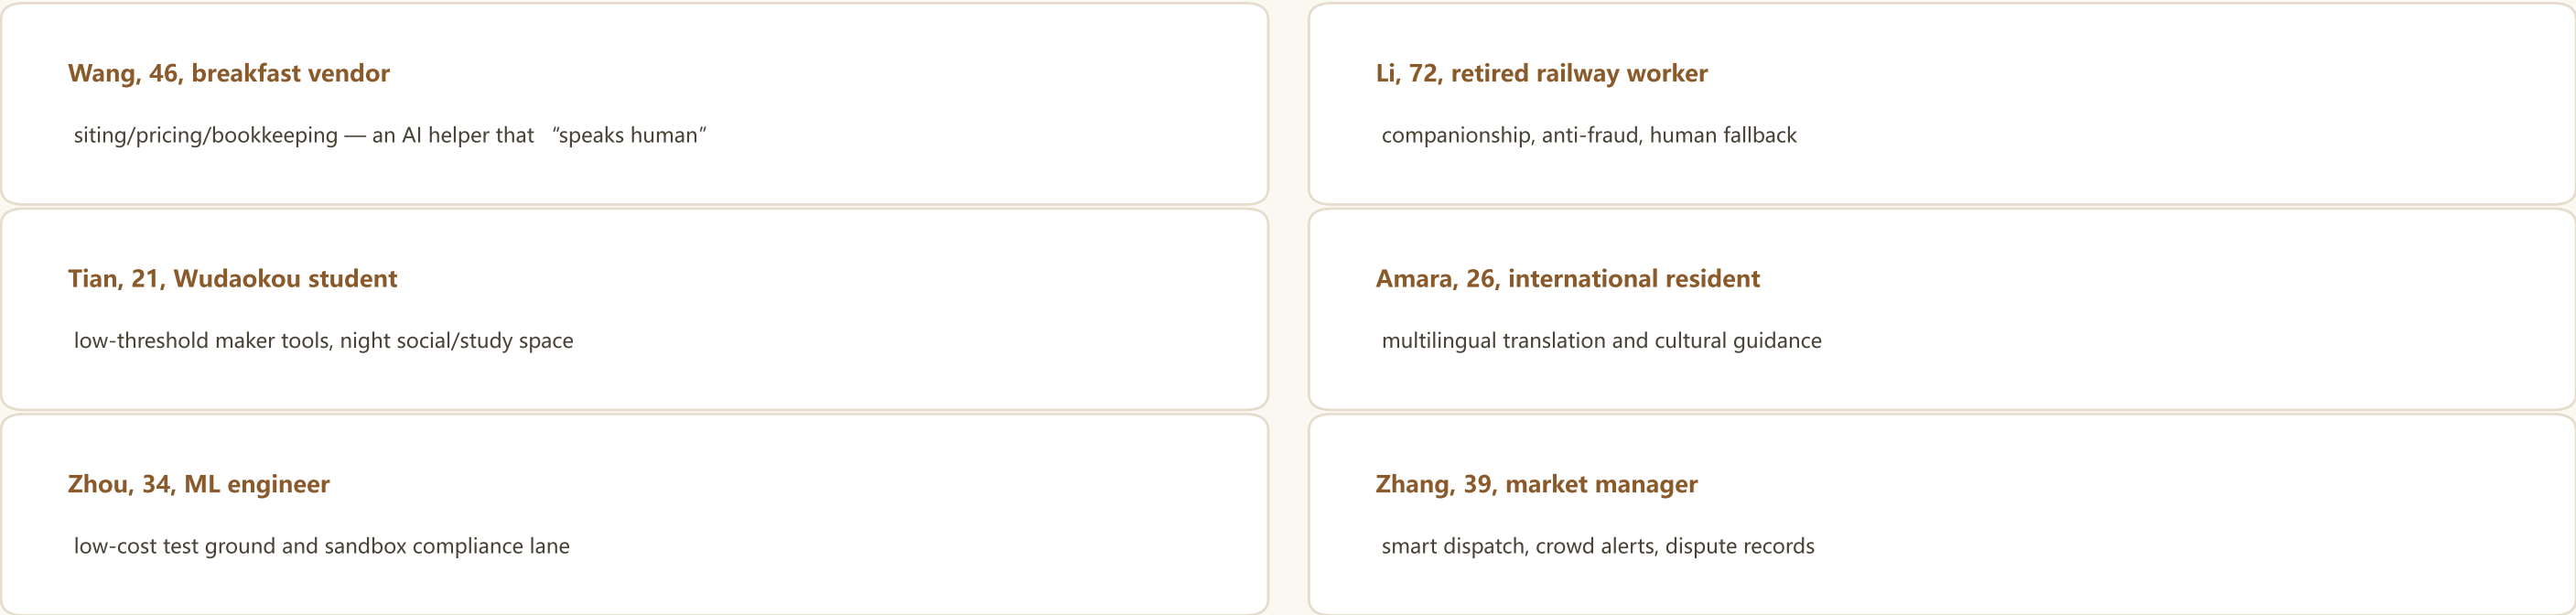

Cultural narrative & six personas 文化叙事与六类人群

Positioning responses 三大定位回应

- Centennial Jingzhang culture belt → layered narrative of rail heritage, fair culture and counter spirit
- Urban AI life-experience belt → the most everyday, lowest-threshold AI scenarios
- AI integration belt → the fair as the most authentic open-air test-field and adoption channel

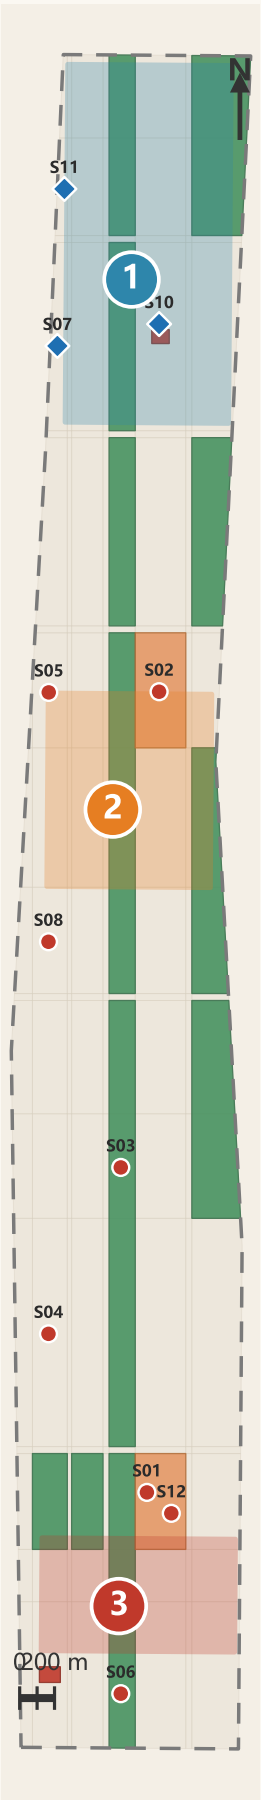

Six personas 用户画像

Design principles: data minimisation • anonymisation • human fallback • no facial recognition • public test IDs

Spatial Structure: One Axis, Three Fairs, Two Wings, Many Nodes

Overall structure plan 总体结构

One axis

Heritage-Park “Everyday AI Corridor” : a linear park with greenway, market canopies and heritage display

Three fairs

Dazhongsi main venue (S) / Wudaokou youth maker fair (C) / Zhongzhiyuan test-field (N)

Two wings

Zhongguancun vendor-services wing (finance/legal/supply-chain AI) · Xiaoyue River night-fair wing

Many nodes

12 AI scenario nodes (S01–S12) sited as small public spaces along the axis and fairs

Land-use Structure: 155 Concept Parcels

Land-use composition, EPSG:4548 recomputed 用地构成

Targets checked: green 22–26% / roads 14–16% / R&D 16–18% / residential 18–20% (concept bands)

Key Area: Dazhongsi AI Industry Cluster — AI Daji Main Venue

Dazhongsi AI Industry Cluster · AI大集主场 · provisional extent

72.0 ha

Recomputed area (EPSG:4548, provisional)

- Role: AI Daji main venue — Dazhongsi's very name carries the fair gene
- Main Shed: permanent market hall + annual global AI Daji carnival ground
- Centennial Stall Honour Wall: 1909 station fairs → 1980s counters → 2026 AI vendors
- Scenarios: S01 vendor copilot / S06 breakfast heat / S12 gig station / S02 dispatch
- Hub: TOD concept anchor with rail-station interchange
- Phasing: Phase 1 · Open starts here

Key Area: Beijing AI Origin Community (Wudaokou) — Youth Maker Fair

Beijing AI Origin Community (Wudaokou) · 青春创客集 · provisional extent

104.3 ha

Recomputed area (EPSG:4548, provisional)

- Role: youth maker fair — students, international residents, young founders
- S05 student AI maker night fair: open hardware / AIGC works / free stalls (concept)
- S08 multilingual AI translation stalls + AR fair guide; S04 literacy classes
- Landmark: Origin Maker Lighthouse — honour display + night light installation
- Base for the international student AI culture week
- Phasing: Phase 2 · Connect, corridor completed

Key Area: Zhongzhiyuan AI Acceleration Area — Vendor Tech Test-Field

Zhongzhiyuan AI Acceleration Area · 摊主科技试验田 · provisional extent

192.9 ha

Recomputed area (EPSG:4548, provisional)

- Role: vendor tech test-field — “the fair as test-field”
- S07 low-speed retail/delivery robots: fixed routes/hours, safety officer
- S10 AI food-safety quick test: parallel checks with regulators, not penalty basis
- S11 community AI interpreting + gov-services terminal: key matters go human
- Landmark: Full-stack Gallery — chips→frameworks→models→apps, public science
- Phasing: Phase 3 · Flourish, expansion + site-wide operation

市集大厅 Hall

Slow-mobility strategy 慢行策略

- Primary greenway spans 11.41 km², linking three fairs and twelve nodes (walk + cycle)
- 15-minute living circles: every node embedded in public space
- Timed pedestrianisation of side streets on fair days (concept)
- Rail-station interchange: Dazhongsi, Wudaokou
- S07 robots: fixed routes/hours, safety officer — not approved operations
- Xiaoyue riverside link: home of the summer night fair

Blue-green metrics 蓝绿指标

- Green 272.7 ha · ratio 23.9%
- Public space 42.6 ha · 3.7%
- Roads 162.8 ha · 14.3%
- Heritage corridor, four segments: Dazhongsi (S) / silver-hair park / weekend fair / Zhongzhiyuan (N)

Core Metrics Evidence

All values recomputed from geometry in EPSG:4548 → metrics.json

Site area

11.41 km²

Green ratio

23.89%

Public space

3.74%

Building density

16.04%

Road share

14.26%

Concept FAR

1.616 (pending)

Concept GFA

1,844 ha

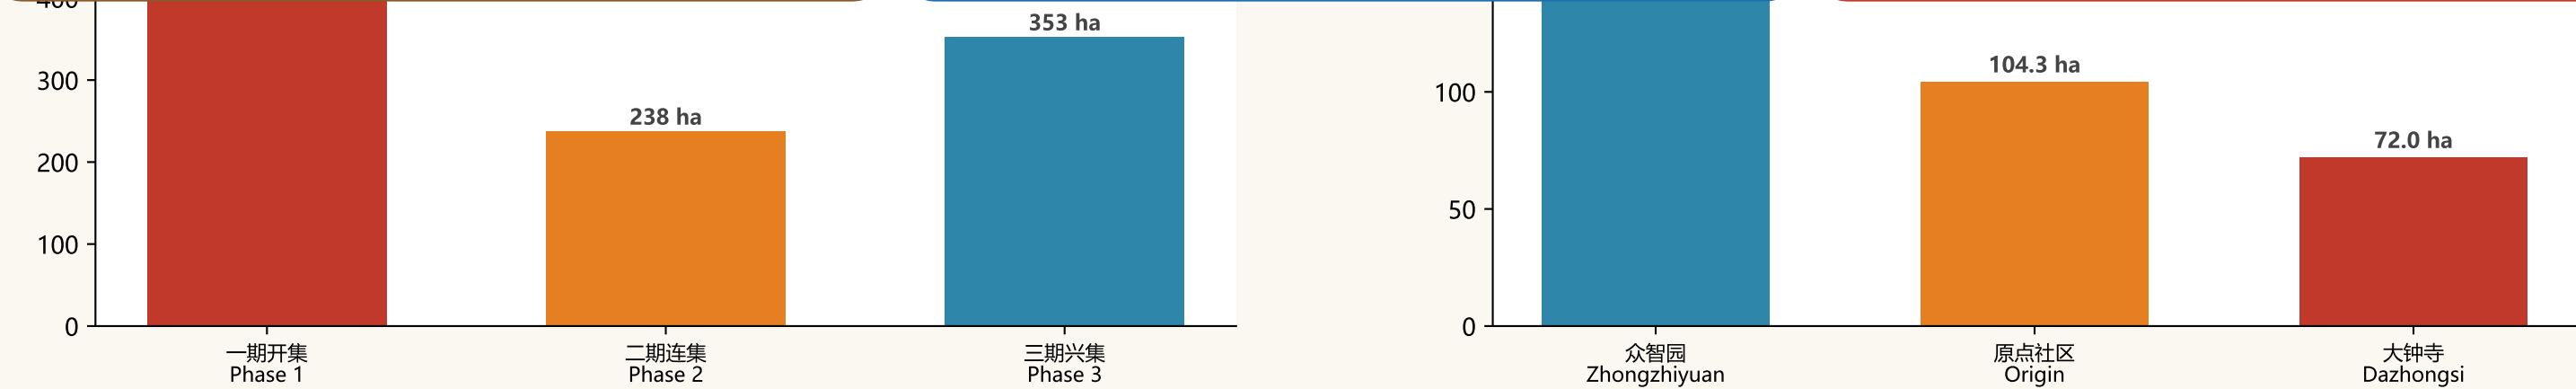

Footprints

183.1 ha

Scenario nodes

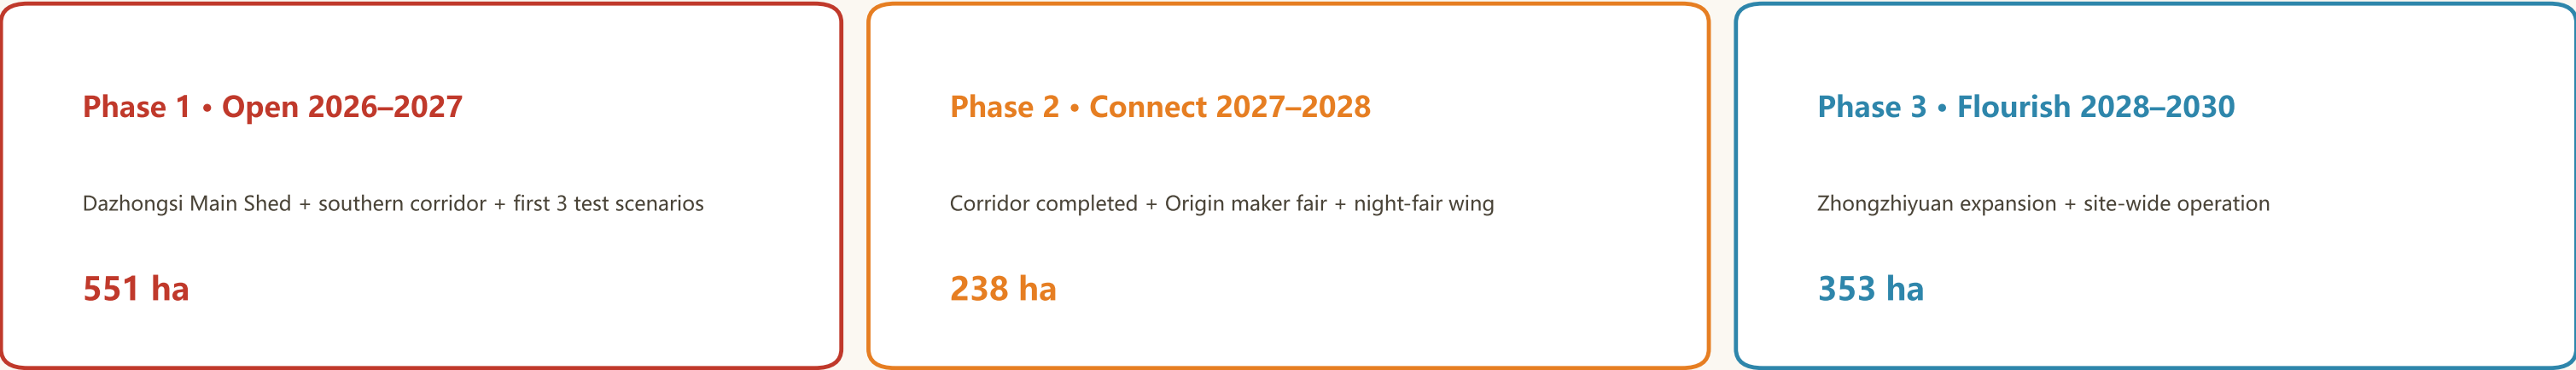

12

Confidence: medium (concept FAR low); values match metrics.json exactly, recomputed from geometry/*.geojson in EPSG:4548.

Phasing & Long-term Operation

Three phases · four-season calendar · operation mechanisms

Four-season fair calendar (concept) 四季大集日历

- Spring · Opening Fair (Mar): new-season opening + annual scenario launch
- Summer · Night Fair (Jul–Aug): riverside night fair + student maker nights
- Autumn · Global AI Daji Carnival (Oct): vendor AI contest + Golden Abacus-Bead Award + maker week
- Winter · Silver-Hair Fair (Dec–Jan): New-Year goods fair + senior services month

Operation mechanisms 日常运营机制

- Open fair API: anonymised stall/flow/review data for developers
- Vendor digital cooperative: vendors co-own and share revenue (concept)
- Developer-in-residence: engineers collect real needs inside the fair
- Open sandbox applications: S07/S10/S11 with limited time/space, human review, public IDs
- Annual AI Daji Everyday Report: anonymised scenario data and trends

Honour system: the Main Shed Honour Wall • stall numbering • the annual Golden Abacus-Bead Award • the AI Daji Everyday Report — returning honour from corporate rankings to ordinary people.

Sources, Assumptions & Compliance

Provisional boundaries · data lineage · global references

Evidence chain 证据链

- ① Official call brief (2026-05-09): textual extents + ~11.4 km² size constraint
- ② Provisional rough boundary inferred by the agent — not an official red line
- ③ Concept geometry: 155 parcels / 136 buildings / 16 public spaces / 12 nodes / 10 centerlines
- ④ Metrics recomputed in EPSG:4548 → metrics.json (30 metrics, confidence medium)

Compliance 合规红线

- All spatial statements are concept proposals, not statutory conclusions; FAR/floors pending regulatory plan
- No facial recognition; data minimisation + anonymisation + human review; tests ≠ approved operations
- Provisional boundaries are not official red lines and no precise-area basis; recompute once official data is out
- Honour displays (wall / award) require personal authorisation; no trademark graphics produced

Global references (lessons, not copies) 全球案例

- Singapore Seniors Go Digital: teaching seniors in hawker centres → S03/S04
- Singapore hawker-centre digitalisation (UNESCO ICH) + unified payment → S01/S06
- Barcelona Decidim + Superblocks: open, reviewable public algorithms → S02
- Helsinki/Amsterdam AI Register: queryable, accountable public AI → all scenarios
- Seoul traditional-market digitalisation (Gwangjang) → S08
- Hangzhou City Brain amenities + Beijing Huilongguan 15-min circles → S06/S12
