

01 / PLACE RELATIONSHIP + DESIGN STRUCTURE

The left panel locates the place; the right panel explains the design structure.

A / PLACE RELATIONSHIP

Three public anchors and one observed walking chain.

Esri World Imagery + Amap POI + OpenStreetMap named roads / 2026-08-10 / context only
Walking QA roads: Chengfu Rd · Heqing Rd · Zhongguancun South 5th St · Dazhongsi East Rd · Beisanhuan West Rd

B / DESIGN STRUCTURE

Schematic connection, not a road redline.

HERITAGE SLOW SPINE

P1 AI Origin → S2 Translate · P2 Jingzhang Park → S1 Verify · P3 Dazhongsi → S3 Exchange · C1/C2 seams + P3 forecourt

READ ORDER 1 locate places → 2 connect the spine and seams → 3 assign a public job

Read the neutral public streets first, then the coloured concept marks; the map keeps the two layers separate.

A / CONTEXT + CONCEPT PLAN

Grey = public street geometry • coloured = proposal connections • dashed = provisional window

HOW TO READ THE MAP

Existing street geometry is neutral; coloured marks are the concept layer.

- public street geometry
visible road fabric
- design building carrier
retain / renew / new concept
- heritage slow spine
one north-south concept link
- east-west seam
walk / cycle public crossing
- P3 forecourt
station-city exchange concept
- QA walking chain
observed route, not a design line
- provisional window
temporary constraint, not statutory

FIVE DESIGN BANDS

- A** Research + verification
models / standards / safety
- B** Heritage park + green base
slow movement / rain / stopping
- C** Public service ground
results become usable interfaces
- D** Talent + community life
work / care / learning
- E** Cultural translation
Jingzhang + Zhongguancun + AI

PUBLIC ANCHORS → STATION JOBS

- P1 AI Origin**
S2 / TRANSLATE
- P2 Jingzhang Park**
S1 / VERIFY
- P3 Dazhongsi**
S3 / EXCHANGE

Colored marks are conceptual connections, not road redlines.

03 / THREE STATIONS · SPACE ACTIONS

JZ / 03

Each station explains arrival, ground-floor action, and a human fallback.

01 / VERIFY

Zhongzhi Park

B / STREET-EDGE SECTION

QA street reference: Chengfu Rd + Heqing Rd QA

A-A' / concept

C / NODE EXPERIENCE

Controlled testing, standards, safety.

- P2 / Jingzhang Park QA · C1 / Heqing Rd
- test garden + steward desk

Design proposal · tied to public QA street context

02 / TRANSLATE

AI Origin Community

B / STREET-EDGE SECTION

QA street reference: Chengfu Rd 45-1 / Wudaokou QA

A-A' / concept

C / NODE EXPERIENCE

Open learning, talent life, public explanation.

- P1 / Chengfu Rd 45-1 public anchor
- C2 / Chengfu Rd - Zhongguancun South 5th St

Design proposal · tied to public QA street context

03 / EXCHANGE

Dazhongsi

B / STREET-EDGE SECTION

QA street reference: Dazhongsi East Rd + Beisanhuan West Rd QA

A-A' / concept

C / NODE EXPERIENCE

Station-city service and multilingual guidance.

- P3 / Metro Lines 12/13 + Exit E
- P3 forecourt / Dazhongsi East Rd - Beisanhuan West Rd

Design proposal · tied to public QA street context

04 / MOBILITY + PUBLIC GROUND

Two seams connect the spine; P3 uses a station forecourt for exchange.

A / CONNECTIVITY MAP

QA CHAIN / P1 -> P2 -> P3: observed route anchors, not a proposed alignment.

Road labels: Chengfu • Zuanchu West • Zhongguancun South 5th • Dazhongsi East • Sidaokou • Beisanhuan West

B / HOW THE GROUND WORKS

Four layers make mobility civic and recoverable.

- 01 SPINE / SLOW PRIORITY**
Continuous walking and cycling along the heritage line.
- 02 SEAM / CROSSING**
Two seams repair east-west gaps and test accessibility.
- 03 NODE / PUBLIC GROUND**
Public nodes combine shade, signs, service, and feedback.
- 04 FALLBACK / HUMAN SERVICE**
Paper, fixed signs, staff, and manual service remain available.

STREET EDGE / 首层界面

05 / EVIDENCE + METRICS

Every number carries a source, a formula, and a data boundary.

A / EVIDENCE CHAIN

The package separates what is computed now from what needs official confirmation.

STATUS

KNOWN = derived from package; UNKNOWN = official control missing.

TRACE KEYS

PHASES 03 prove • stitch • govern geometry/phasing.geojson#PHASE-001-003 formula: phase_count PROVISIONAL	UNKNOWN FAR / height / redlines official controls pending ranges/planning_limits.json formula: official control UNKNOWN

Prove reversible public interfaces, stitch the space, then govern the long term.

THREE PHASES / 三个阶段

Each phase has a spatial move, a human owner, a stop condition, and a fallback service.
