

01 · SPATIAL X COMPUTATIONAL TWIN

ONE CITY, TWO SYNCHRONIZED READINGS

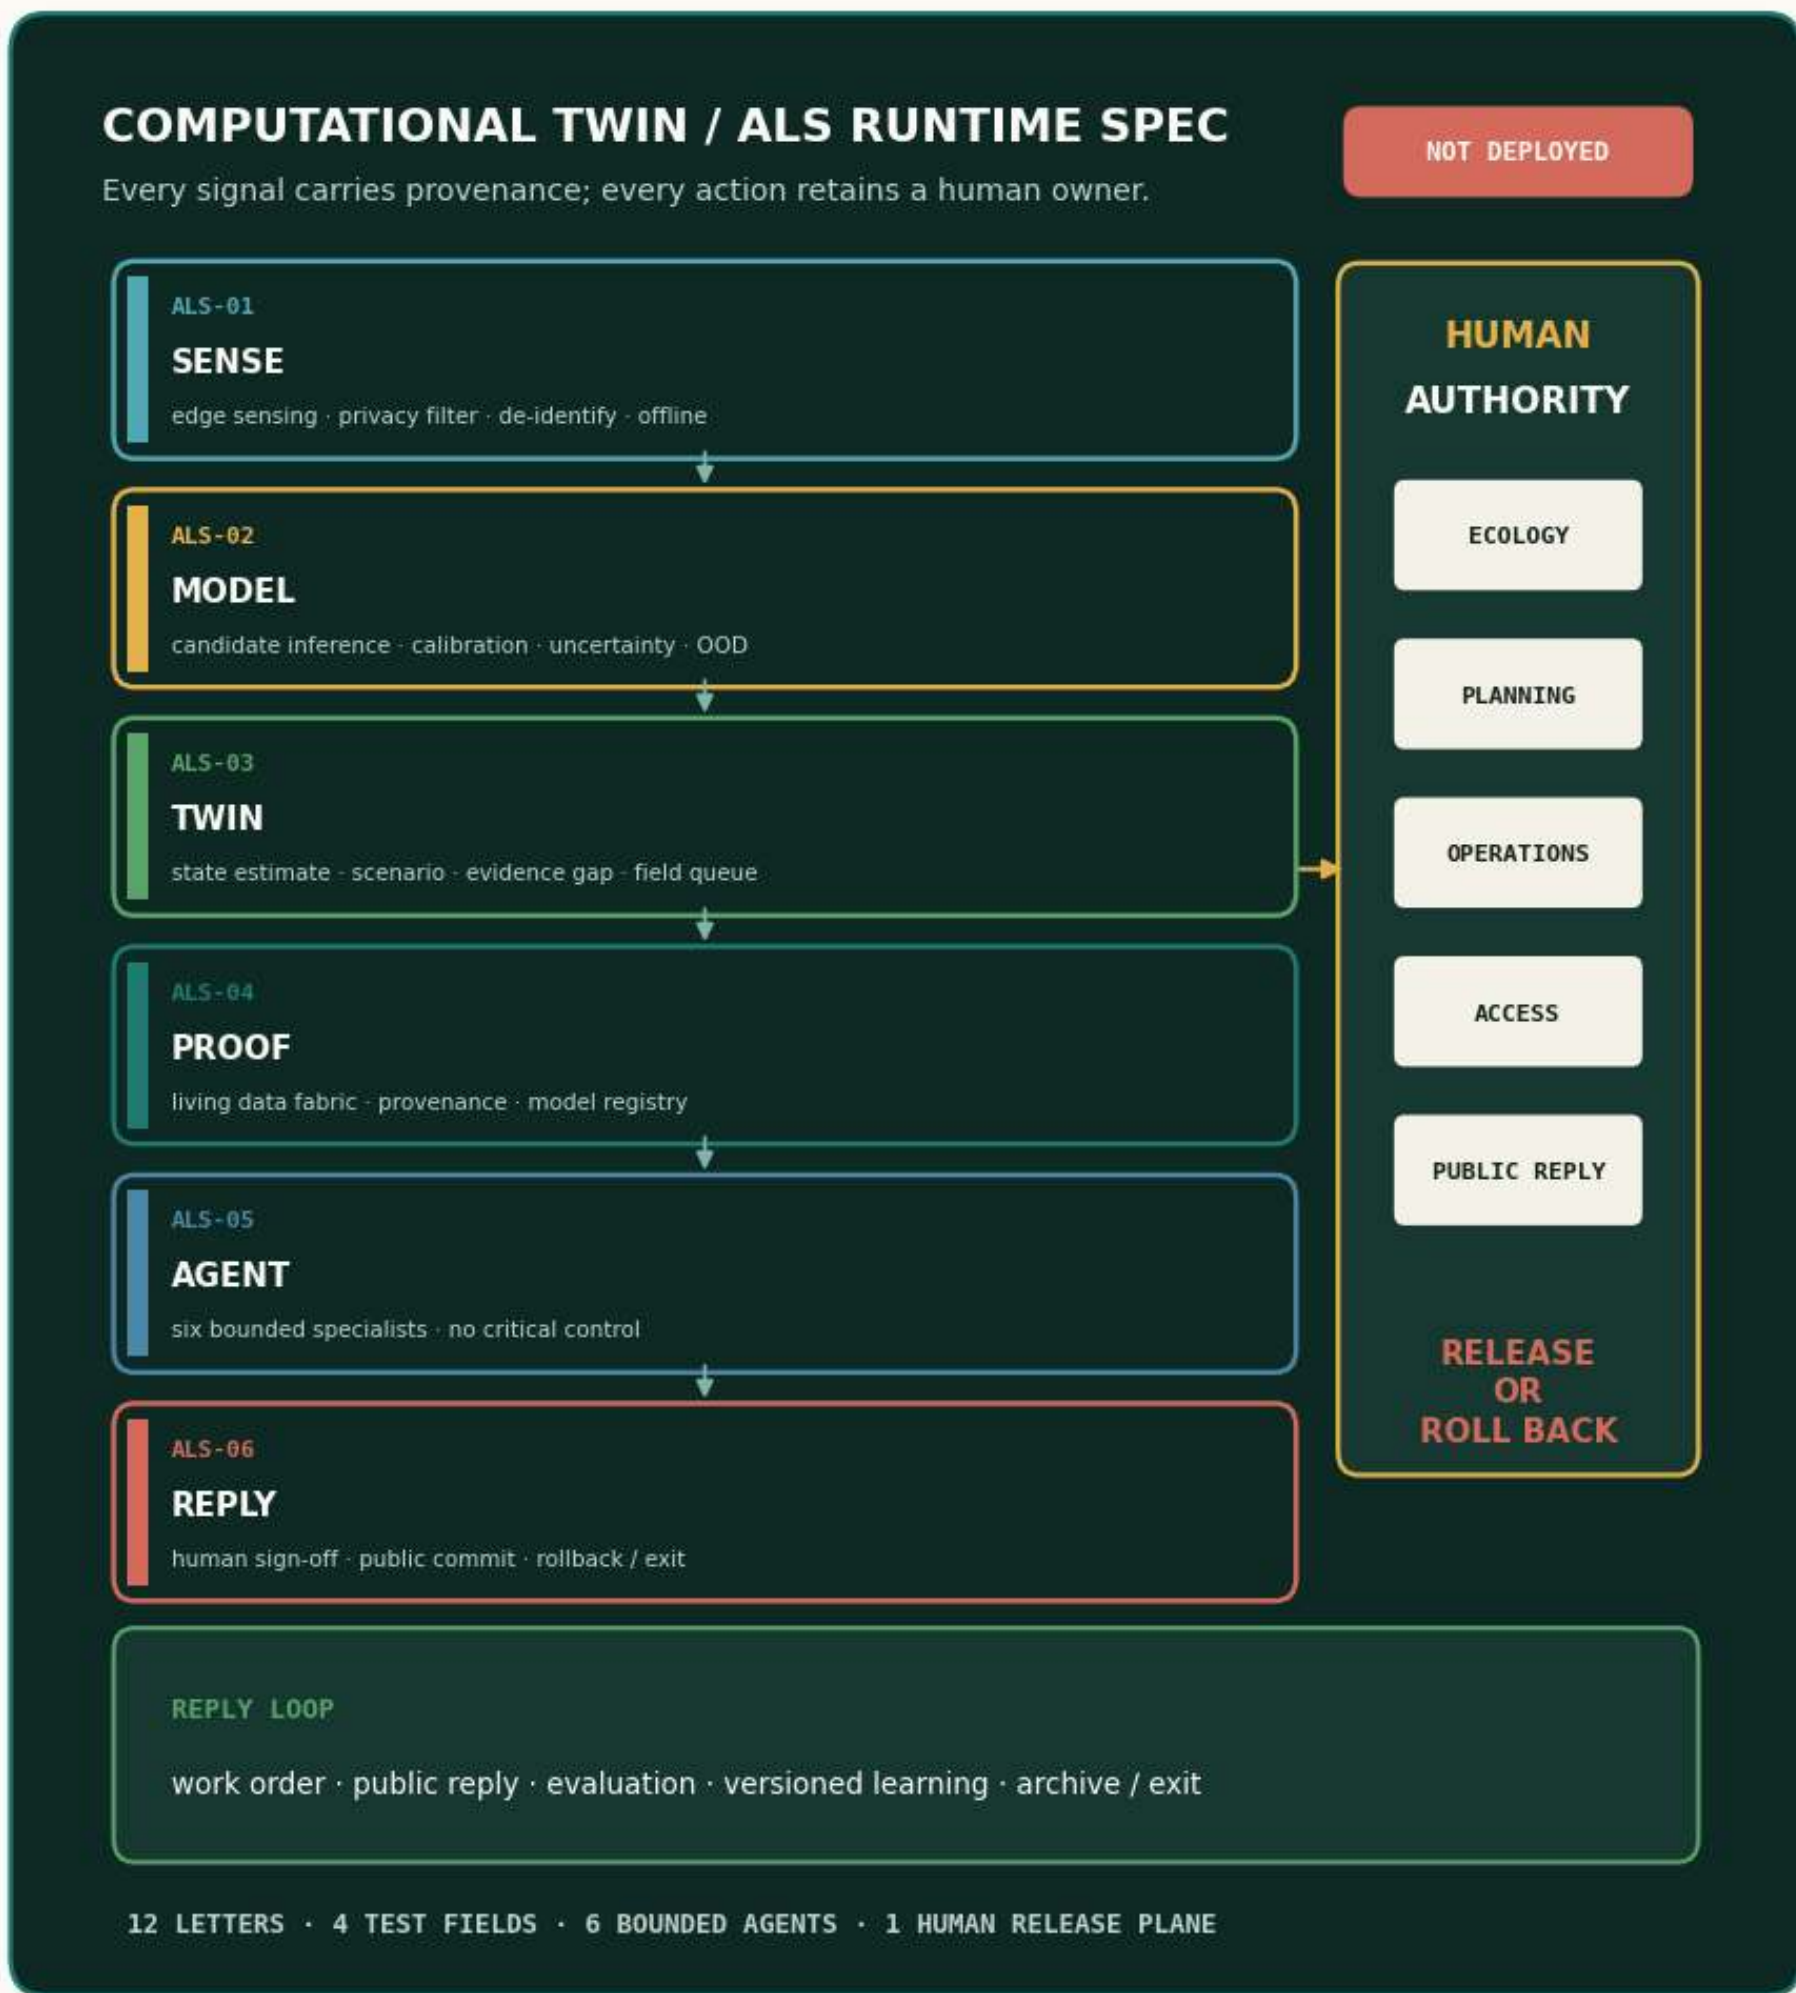

A provisional spatial plan is paired with a bounded, auditable computational twin architecture.

02 · LAND + ALS STACK 1.0

FIVE URBAN BANDS × SIX COMPUTE LAYERS

Land, public space and bounded AI are designed as one open interface specification.

SPACE-01

PHYSICAL TWIN

A provisional 11.41 km2 corridor contains five conceptual land-use bands, three key areas, eight habitat patches, twelve scenario anchors and a 16.93 km conceptual slow network. Dashed geometry is not an official redline.

COMPUTE-01

ALS RUNTIME

ALS-01 SENSE > ALS-02 MODEL > ALS-03 TWIN > ALS-04 PROOF > ALS-05 AGENT > ALS-06 REPLY. Edge privacy filtering lives inside SENSE. Six bounded agents operate under one human authority plane.

GATE-01

HUMAN AUTHORITY

Ecology, planning, operations, accessibility and civic-governance roles release, edit, reject, roll back or exit. No agent controls drainage, fire, traffic signals, policing, health or formal planning decisions.

03 · THREE AI LABS

TEST · INTERFACE · COMMIT

Three provisional key areas host different stages of one bounded urban-AI verification system.
