

Site Overview and Open-Innovation Structure

Land-Use Structure and Open-Innovation Chain

Strategies for the Three Key Areas

Spatial Strategy and Key Evidence

- North-south commons: continuous heritage, ecology, active mobility and innovation services
- East-west stitching: safe crossings, shade, accessibility, cycle parking, civic ground floors and wayfinding
- Complementary hubs: Zhongzhiyuan validation, Origin Community translation and Dazhongsi global exchange

Twelve scenarios: user · location · data · privacy · human review · operator

01 Open-source release User University teams and developers Location Qingxi Community Data History of supporting historical context Privacy Anonymous and verifiable sensitive capacity controlled Human review Platform and university review Operator Individual social operator	02 Trustworthy model evaluation User Model firms and researchers Location Zhongyuan evaluation area Data Trustworthy data and source logs Privacy Least privilege, no claim of government certification Human review Independent evaluator review Operator Developer-provided operator	03 Embodied-intelligence test loop User Robotics and sensing firms Location Guangzhou Zhongyuan urban rules Data Edge processed operating data Privacy On identification by default, no unrelated data or voice retention Human review Site safety officer approval and emergency stop Operator Task-line safety operator	04 Device interoperability lab User Device, chip and application firms Location Guangzhou industry space Data Interoperable device data Privacy Only aggregate through research platform Human review Standard body and laboratory confirmation Operator Joint laboratory
05 Low-carbon compute and microgrid User Energy and compute firms Location Zhongyuan-Qingxi River edge Data Energy storage and equipment data Privacy Control and display information isolated Human review Energy operator verification Operator Energy operator	06 Accessible mobility navigation User Residents, commuters and disabled users Location Central urban public space Data Public space, facility status and security reports Privacy Location data only for active trip, no journey archive Human review Transport and park staff confirmation Operator Transport and park operators	07 Community service copilot User Residents, staff and visitors Location Community service stations Data User submitted service information Privacy No automatic eligibility, privacy or benefit decision Human review Neighborhood and township professionals final answer Operator Community service institution	08 Heritage and urban-memory guide User Citizens, students and visitors Location Heritage nodes Data Source archive and information Privacy Uncertainty about, no synthetic material presented as archive Human review Historians, archives and community co-review Operator Cultural tourism team
09 Blue-green resilience steward User Water, landscape, maintenance and public users Location Rivers and parks Data Environmental data and low-resolution aggregate box Privacy Security exception permitted Human review Water and landscape staff review work orders Operator Park and water operators	10 Talent-space matching User Young talent, visiting scholars and firms Location Three-hub service nodes Data Criteria activity provided by users Privacy No sensitive attribute release, personalization can be disabled Human review Talent and space agencies verify supply Operator Talent service agency	11 Urban event safety support User Producers, security, medical teams and public Location Exchanges and event nodes Data Event status, capacity, weather and inspection Privacy No real-time exception Human review Event commander makes final decision Operator Event operations team	12 SME compliance and internationalization User Startup and growth firms Location Exchanges and online entry Data Everyday business questions and final Privacy Common decision information support only Human review Licensed professionals sign final advice Operator Professional service consortium

Four governance zones

G1 Open Experience Exhibitions, heritage guidance and open-source events Cited sources: no mandatory login, human service available	G2 Assisted Service Navigation, community help, space matching and ecological work orders Data minimization, explanation, appeal and human confirmation	G3 Controlled Testing Model, robot, device and microgrid validation Permit, isolation, logs, observer, emergency stop and exit	G4 No Automated Decision Approvals, enforcement, benefits, medical, emergency and critical control Authorized people decide; AI cannot directly create legal or bodily consequences
---	---	--	---

Three-stage implementation

- 1

0–2 years: verify data, audit gaps, lightweight activation and governance rules
- 2

2–5 years: three-hub renewal, shared validation, Qing River edge and launch spaces
- 3

Beyond 5 years: complete network, stable services, annual performance and rolling renewal

Evidence and provisional warning

Geometry → projected calculations → metrics.json → drawings/visual index → unified recalculation after formal data. Statutory intensity, redlines, engineering, ownership and delivery entities remain unknown.
