"Jingzhang AI Symbiosis Corridor: Structuring an 'One Axis, Three Cores, Two Wings' spatial framework to transform the historic railway heritage into an open-source AI innovation and civic life corridor."

tracks: ["ai-traffic-walkability"]

scenarios: ["ai-traffic-walkability"]

iteration: "v1.0"

Design Basis and Source Inventory

This proposal strictly complies with the *Prequalification Announcement for International Call for Urban Design Concepts of Centennial Jingzhang AI Innovation Belt* issued by Haidian Branch of Beijing

The proposal introduces the overall brand identity and logo concept of "Jingzhang AI Symbiosis Corridor". The logo design draws inspiration from Zhan Tianyou's iconic "zigzag" railway tracks, combinin

Three-Level Scope Framework

A three-level spatial hierarchy of "Coordinated Research Area — Overall Design Area — Key Detailed Design Areas" is established [depth:three_level_scope_framework]. The Coordinated Research Area cover

Because the current organizer package provides provisional boundaries [source:BOUNDARY-SOURCE] [source:KEY-AREA-SOURCE], explicit precision limitation disclaimers are preserved across `geometry/\*.geoj`

Jingzhang AI Symbiosis Corridor: Site Overview & Three-Level Scope Framework

Jingzhang AI Symbiosis Corridor: Site Overview & Three-Level Scope Framework

Area: 11.41 km² | Green Ratio: 12.34% | Public Space Ratio: 7.33%
Key Areas: Zhongzhiyuan Acceleration Area, Beijing AI Origin Community, Dazhongsi Cluster
