

Centennial Jing-Zhang: A SciTech Timeline

9km AI Innovation Belt Urban Design

Using the 9 km Jing-Zhang Railway Heritage Park spine as a timeline connecting Railway 1909 → Zhongguancun 1980s → Internet 2000s → AI 2026+, the plan forms a walkable, interactive narrative space of “one axis · three hubs · four epochs · multiple nodes.” This is a conceptual/design proposal built on a provisional boundary; it is not an official redline, statutory control or government commitment.

Epoch	Period	Segment	Spatial character	Cultural symbols
Epoch 2 Zhongguancun	1909-1970s	Xizhimen-Dazhongsi	Industrial heritage, rails	Zhan Tianyou statue, Tsinghua Garden station
	1980s-1990s	Dazhongsi-ZGC	Electronics street memory	Market memory, knowledge plaza
	2000s-2010s	ZGC-Wudaokou	HQ offices, startup cafes	Brand wall, pitch pavilion
Epoch 4 AI	2026+	Wudaokou-Qinghe	AI-native buildings, AV shuttle	AI art, future experience hall

Spatial structure: One Axis · Three Hubs · Four Epochs · Multiple Nodes (~12 flexible nodes)

Key area	Area	Positioning	Epoch
Zhongzhiyuan AI Acceleration	72 ha	Smart economy & international exchange	AI 2026+ (gateway)
	192.1 ha	Garden-style full-stack innovation	Internet→AI (transition)
	104.3 ha	Near-campus conversion & talent	ZGC→Internet (origin)

Core metric recalculation (aligned with metrics.json)

Metric	Value	Unit	Source
green_ratio	11,412,825	m²	geometry/site_boundary.geojson
	0.240065	ratio	green_space + site_boundary
	0.195470	ratio	public_space + site_boundary
key_area_count	3	count	geometry/key_areas.geojson
scenario_cards	3	count	geometry/phasing.geojson
	12	count	proposal.md
