

Jing-Zhang AI First Launch Field

Urban-scale infrastructure where AI originality is discovered, verified
and adopted in the real city

Six-stage cycle: original discovery - prototype teaming - engineering verification
- city trial - product adoption - replication and diffusion

Centennial Jing-Zhang AI Innovation Belt International Open Call

A3 Booklet (English Edition) | weimx1991-beep/jingzhang-ai-first-launch

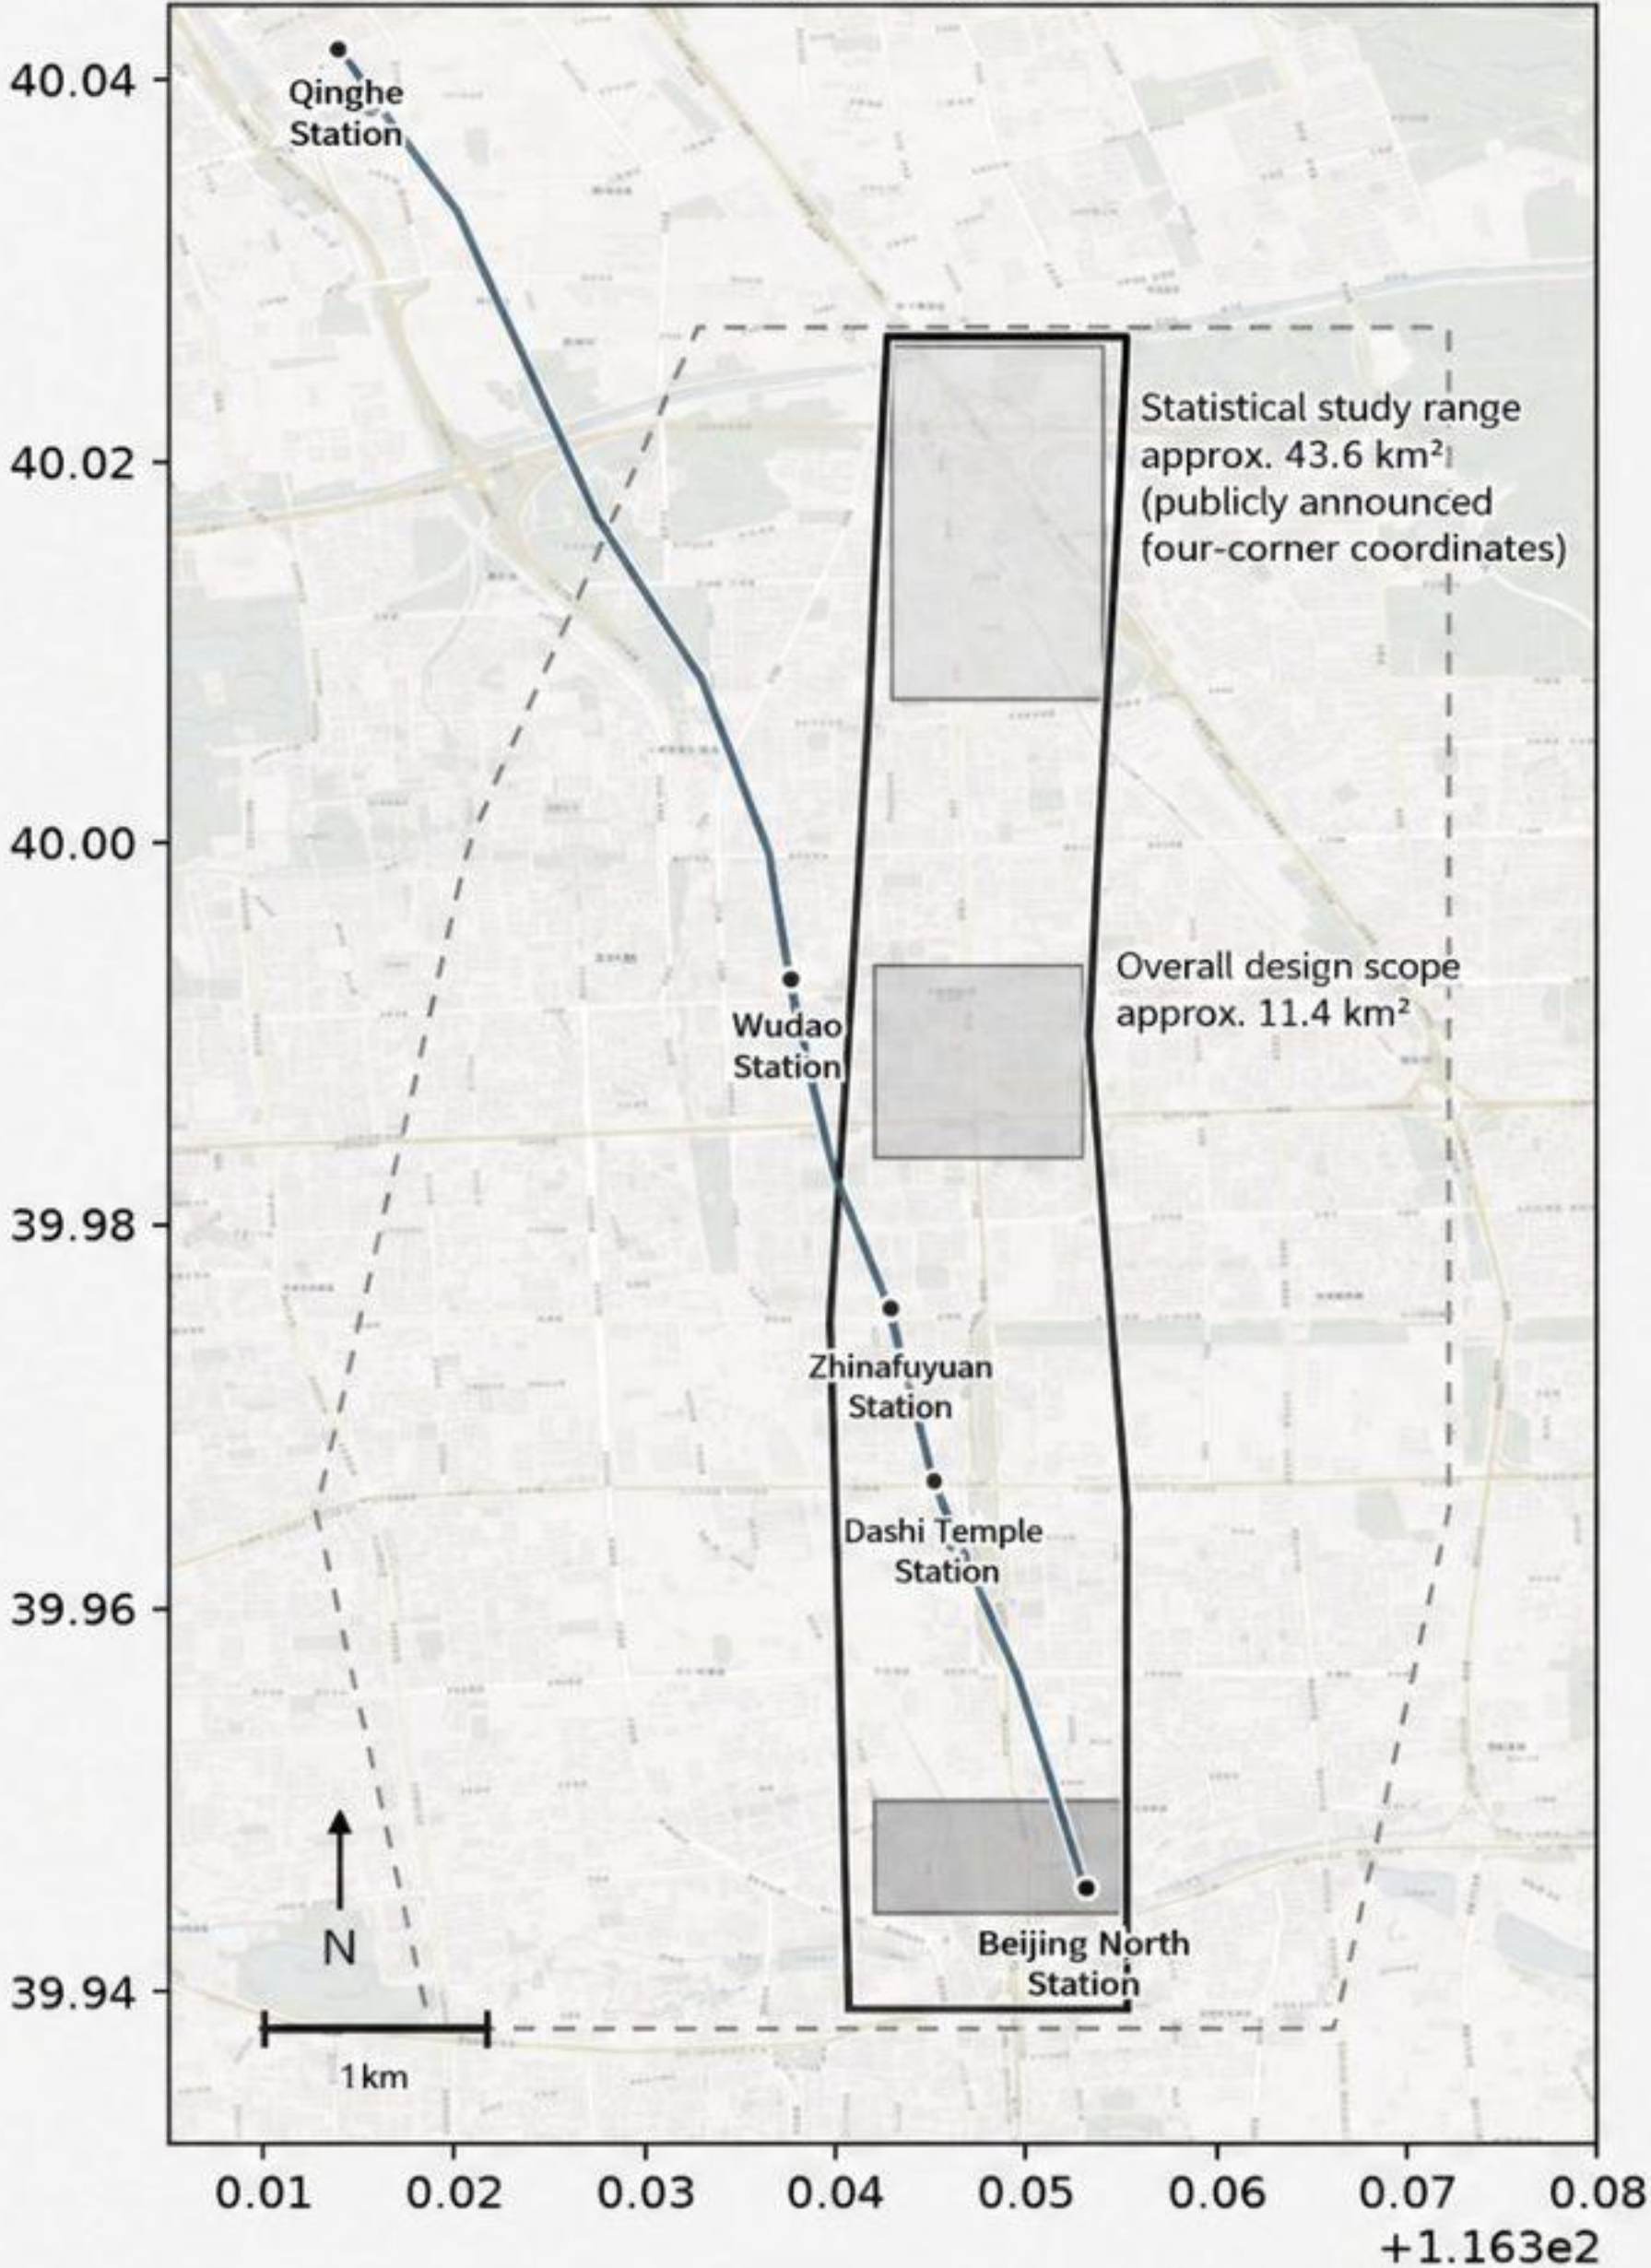

All spatial claims are conceptual suggestions based on provisional boundaries; official redlines pending.

FIG.1 Overall Concept and Dual-Track Structure - Site Overview

Data Evidence Chain and Submission Packaging Relationships

Official Announcement → Structural Serialization → Geometric Registration → Data Packaging Submission | Full Chain Traceable · 92 Files SHA256

Site Overview · Three-Layer Range Location (Geometry Plan)

Data Source: geometry/*.geojson (provisional boundaries) · Coordinate System: EPSG:4548-union · Base Map: CartoDB Voyager · Brightness and Contrast 25% · 2026-08-24

① Official Basis [source: OFFICIAL-ANNOUNCEMENT]

"Hundred-Year Beijing" SKAI Innovative Urban Design International Competition
Three-layer range: Statistical study 43.6 km² · Overall design 11.4 km² · Key area 368.4 ha (publicly announced)

② Structural Serialization sources.json · standard_matrix.json · assumptions.json

Source traceability registration: compliance_matrix.json records 23 items of compliance requirements
Official boundary coordinates not disclosed: Provisional boundaries provided for adjacent referencing

③ Spatial Design Layers geometry/ 9 GeoJSONs

Boundary1 · 29 land parcels · Key areas K3 · Buildings 7 · Roads 17 · Green space 11 · Public space 16 · Subareas 3 · Neighborhoods 5
All attributes are provisional (official boundary publication prevails)

④ Indicator Auto-Calculation metrics.json 18 known / 3 unknown

Map area → EPSG:4548 projection → Union operations → Ratio calculations
Site area 11,412,825 m² · green_ratio 0.2248 · public_space_ratio 0.0504

⑤ Built-in Self-Check self_check.json 4 items all PASS

DETERMINISTIC_VALIDATION · SPATIAL_REVIEW · VISUAL_PACKAGING · PROFESSIONAL_EVIDENCE
BOUNDARY_TRUST Note: Official online boundary release prevails; professional review prior to submission

⑥ Submission (Bilingual Contract) manifest.json 92 files

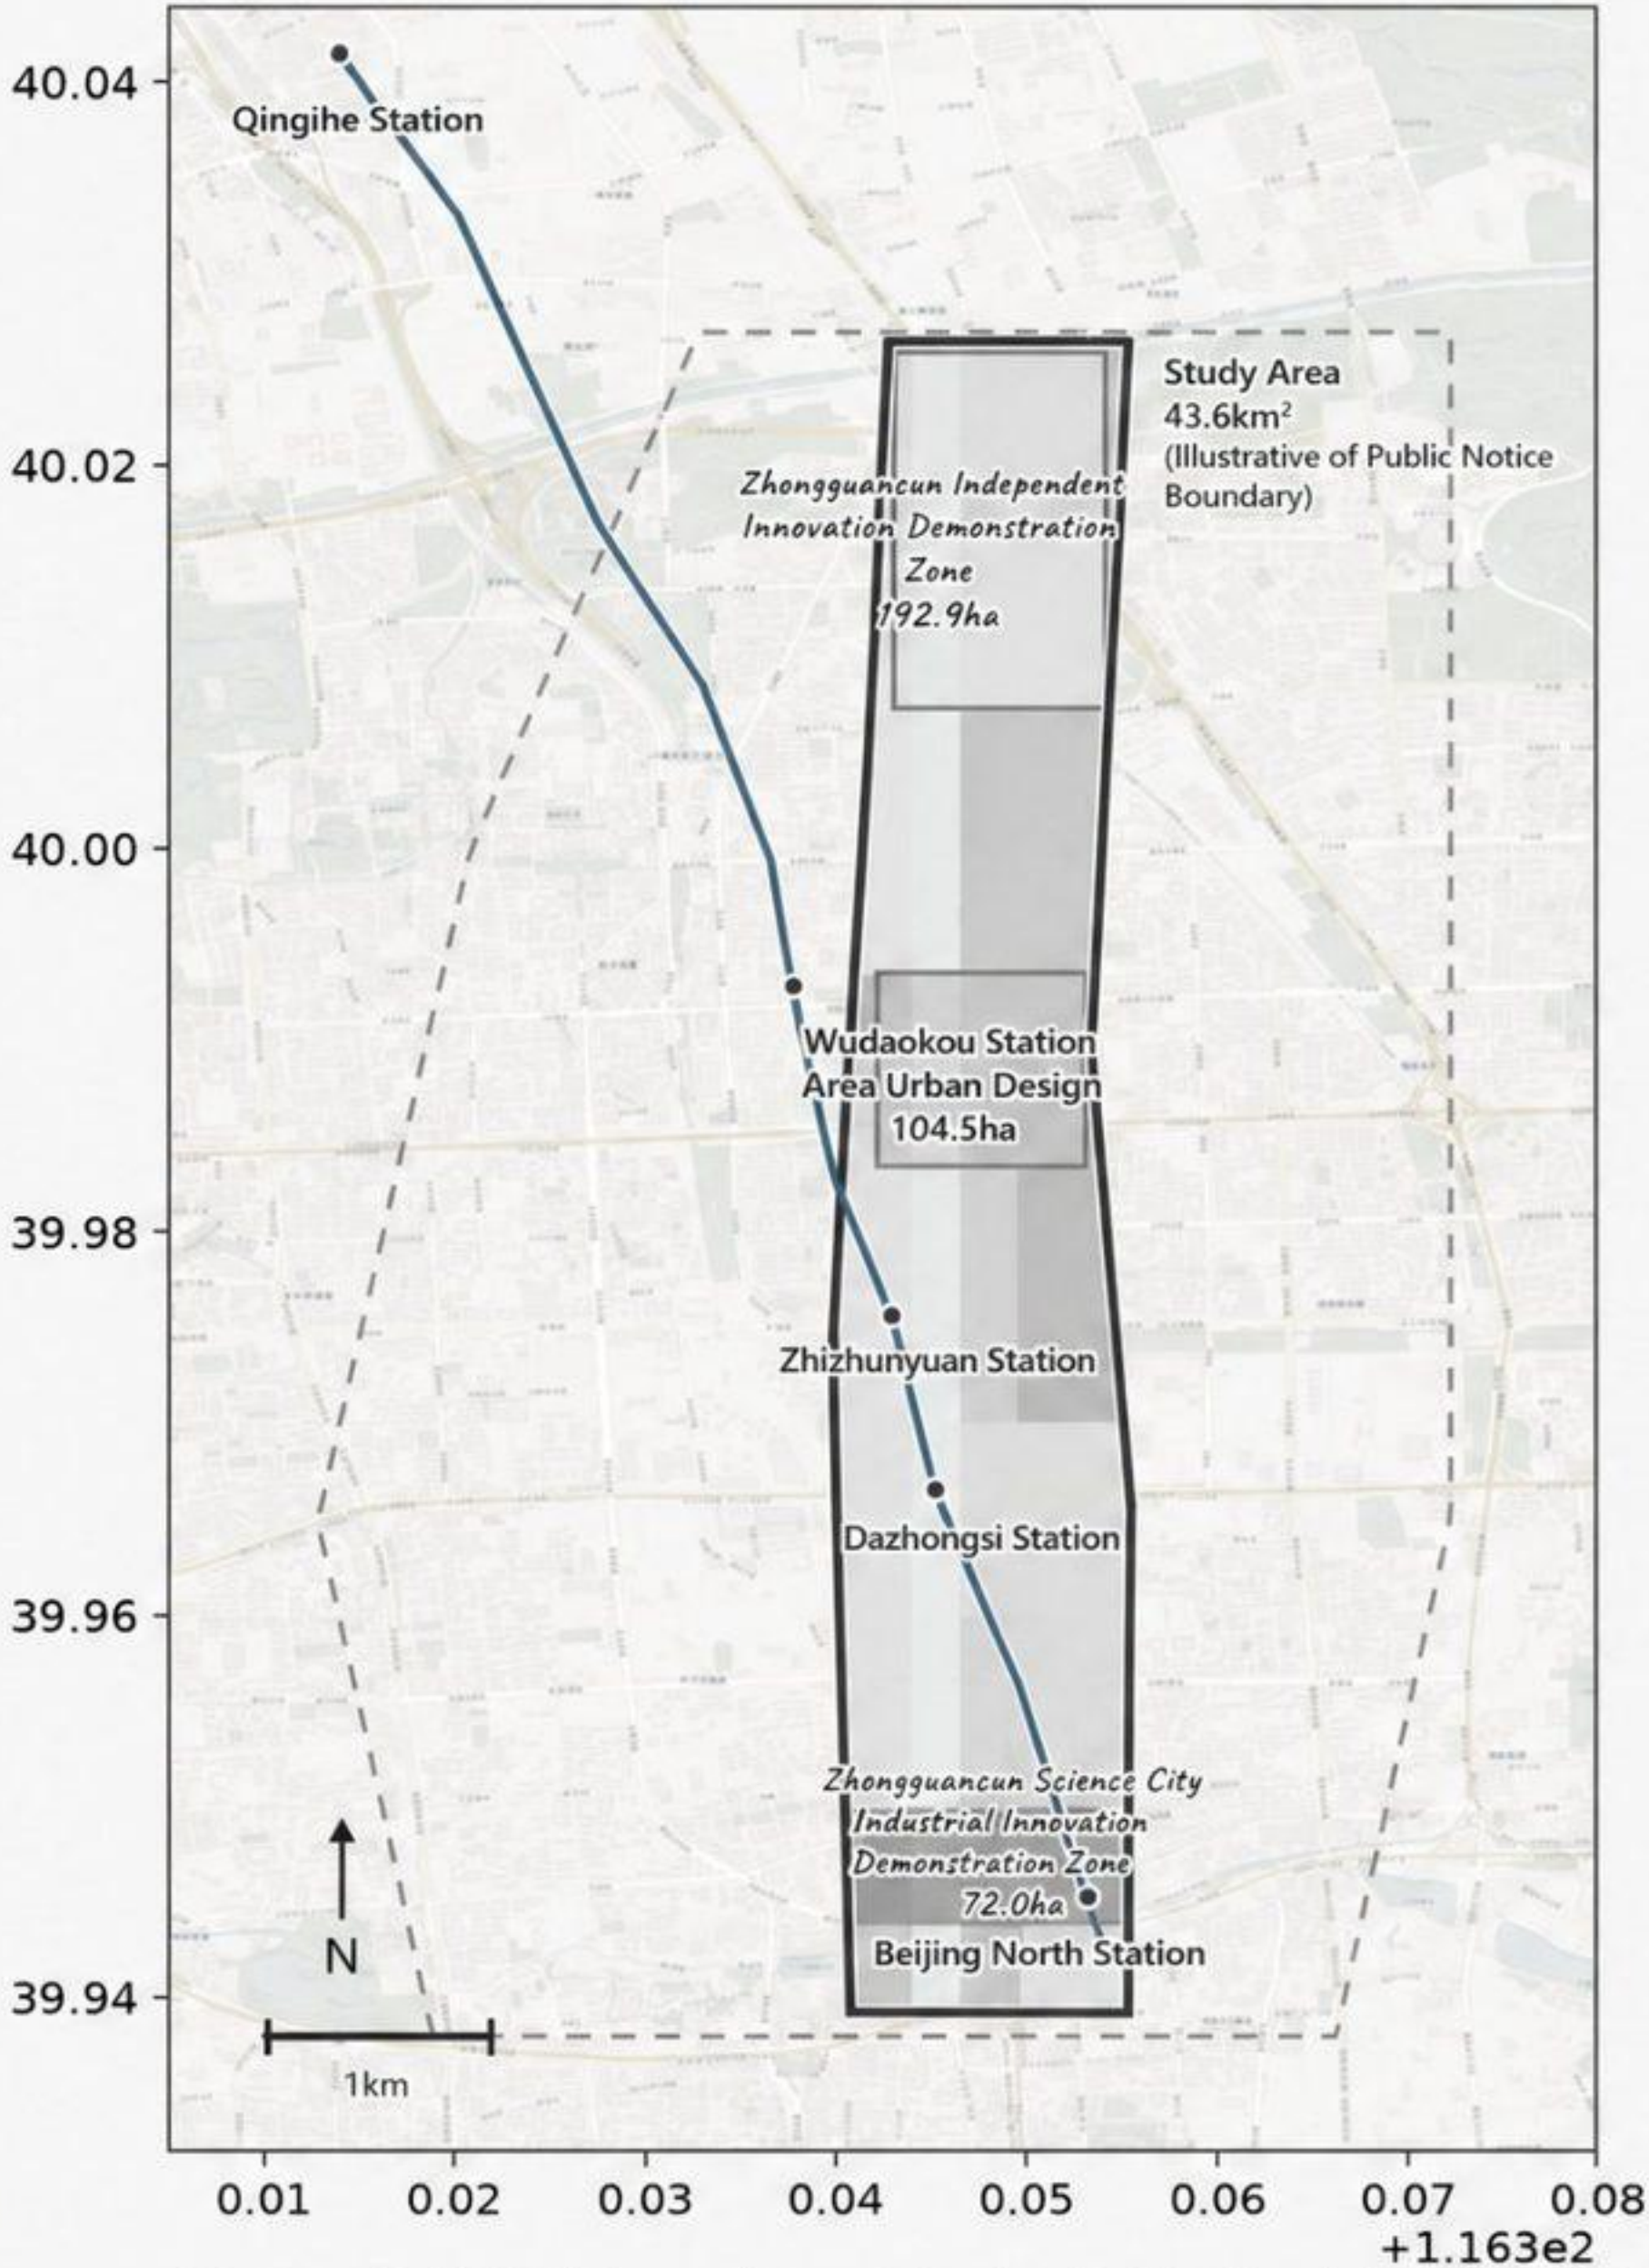

proposal.md / proposal.en.md · report/*.html · visual/index.html · drawings A3/A0
figures · compliance_matrix.json 23 items recorded · All 92 files SHA256 recorded

Traceability relationship derived from sources.json and standard_matrix.json registrations;
this diagram shows the logical operation of all digital files by the scheme team.

FIG.2 Three-Level Scope and Spatial Working Framework - Land-Use Structure

Three-Layer Spatial Penetration: 43.6km² Study Area • 11.4km² Overall Design • 369.3ha Key Area

Three-Layer Spatial Connectivity • Land Use Structure (29 Land Parcels • 9 Types • Intensity Classification)

Study Area

43.6km² (Public Notice Boundary)

Design Question: How to Organize a New Ecosystem for Global AI Innovation

Answer: "First Start" | Six-Loop System • Three Districts Coordination

Data Source: proposal Three-Layer Boundary: Public Notice 1.3

Overall Design Area

11.4km² (site_area_sqm 11,412,825m² actual)

Design Question: Industry, Space, Transportation, and Urban Integration

Answer: One Axis and Two Wings • Three Core Areas • Multiple Nodes • Blue-Green Infrastructure; 29 Land Parcels for Complete Coverage

Data Source: geometry/land_use.geojson LU-001~029

Key Area

368.4ha / 369.3ha actual (key_area_count 3)

Design Question: How to Achieve Fine-Grained and In-Depth Design

Answer: Validation by Zhongguancun • Key Points • Large Details for the New Three-Dimensional Model

Data Source: geometry/key_areas.geojson PROV-KEY-001/002/003

Land Use Composition (9 Types • Actual Area)

R&D Land	252.2 ha	Reserved Land	71.6 ha
Residential Land	210.8 ha	Commercial Service Land	66.1 ha
Park Land	207.5 ha	Sports Land	62.2 ha
Education Land	157.4 ha	Cultural Land	15.5 ha
Medical and Health Land	97.9 ha		

Variance Disclosure (Independent Reconciliation vs. Stated Area)

Public Notice 368.4ha vs. Actual Total	369.3ha (±0.9ha)
Land Parcels 29 Parcels vs. Land Use Areas	+16m ² (Closed Difference)

FIG.3 Index and Design Tasks of the Three Key Areas

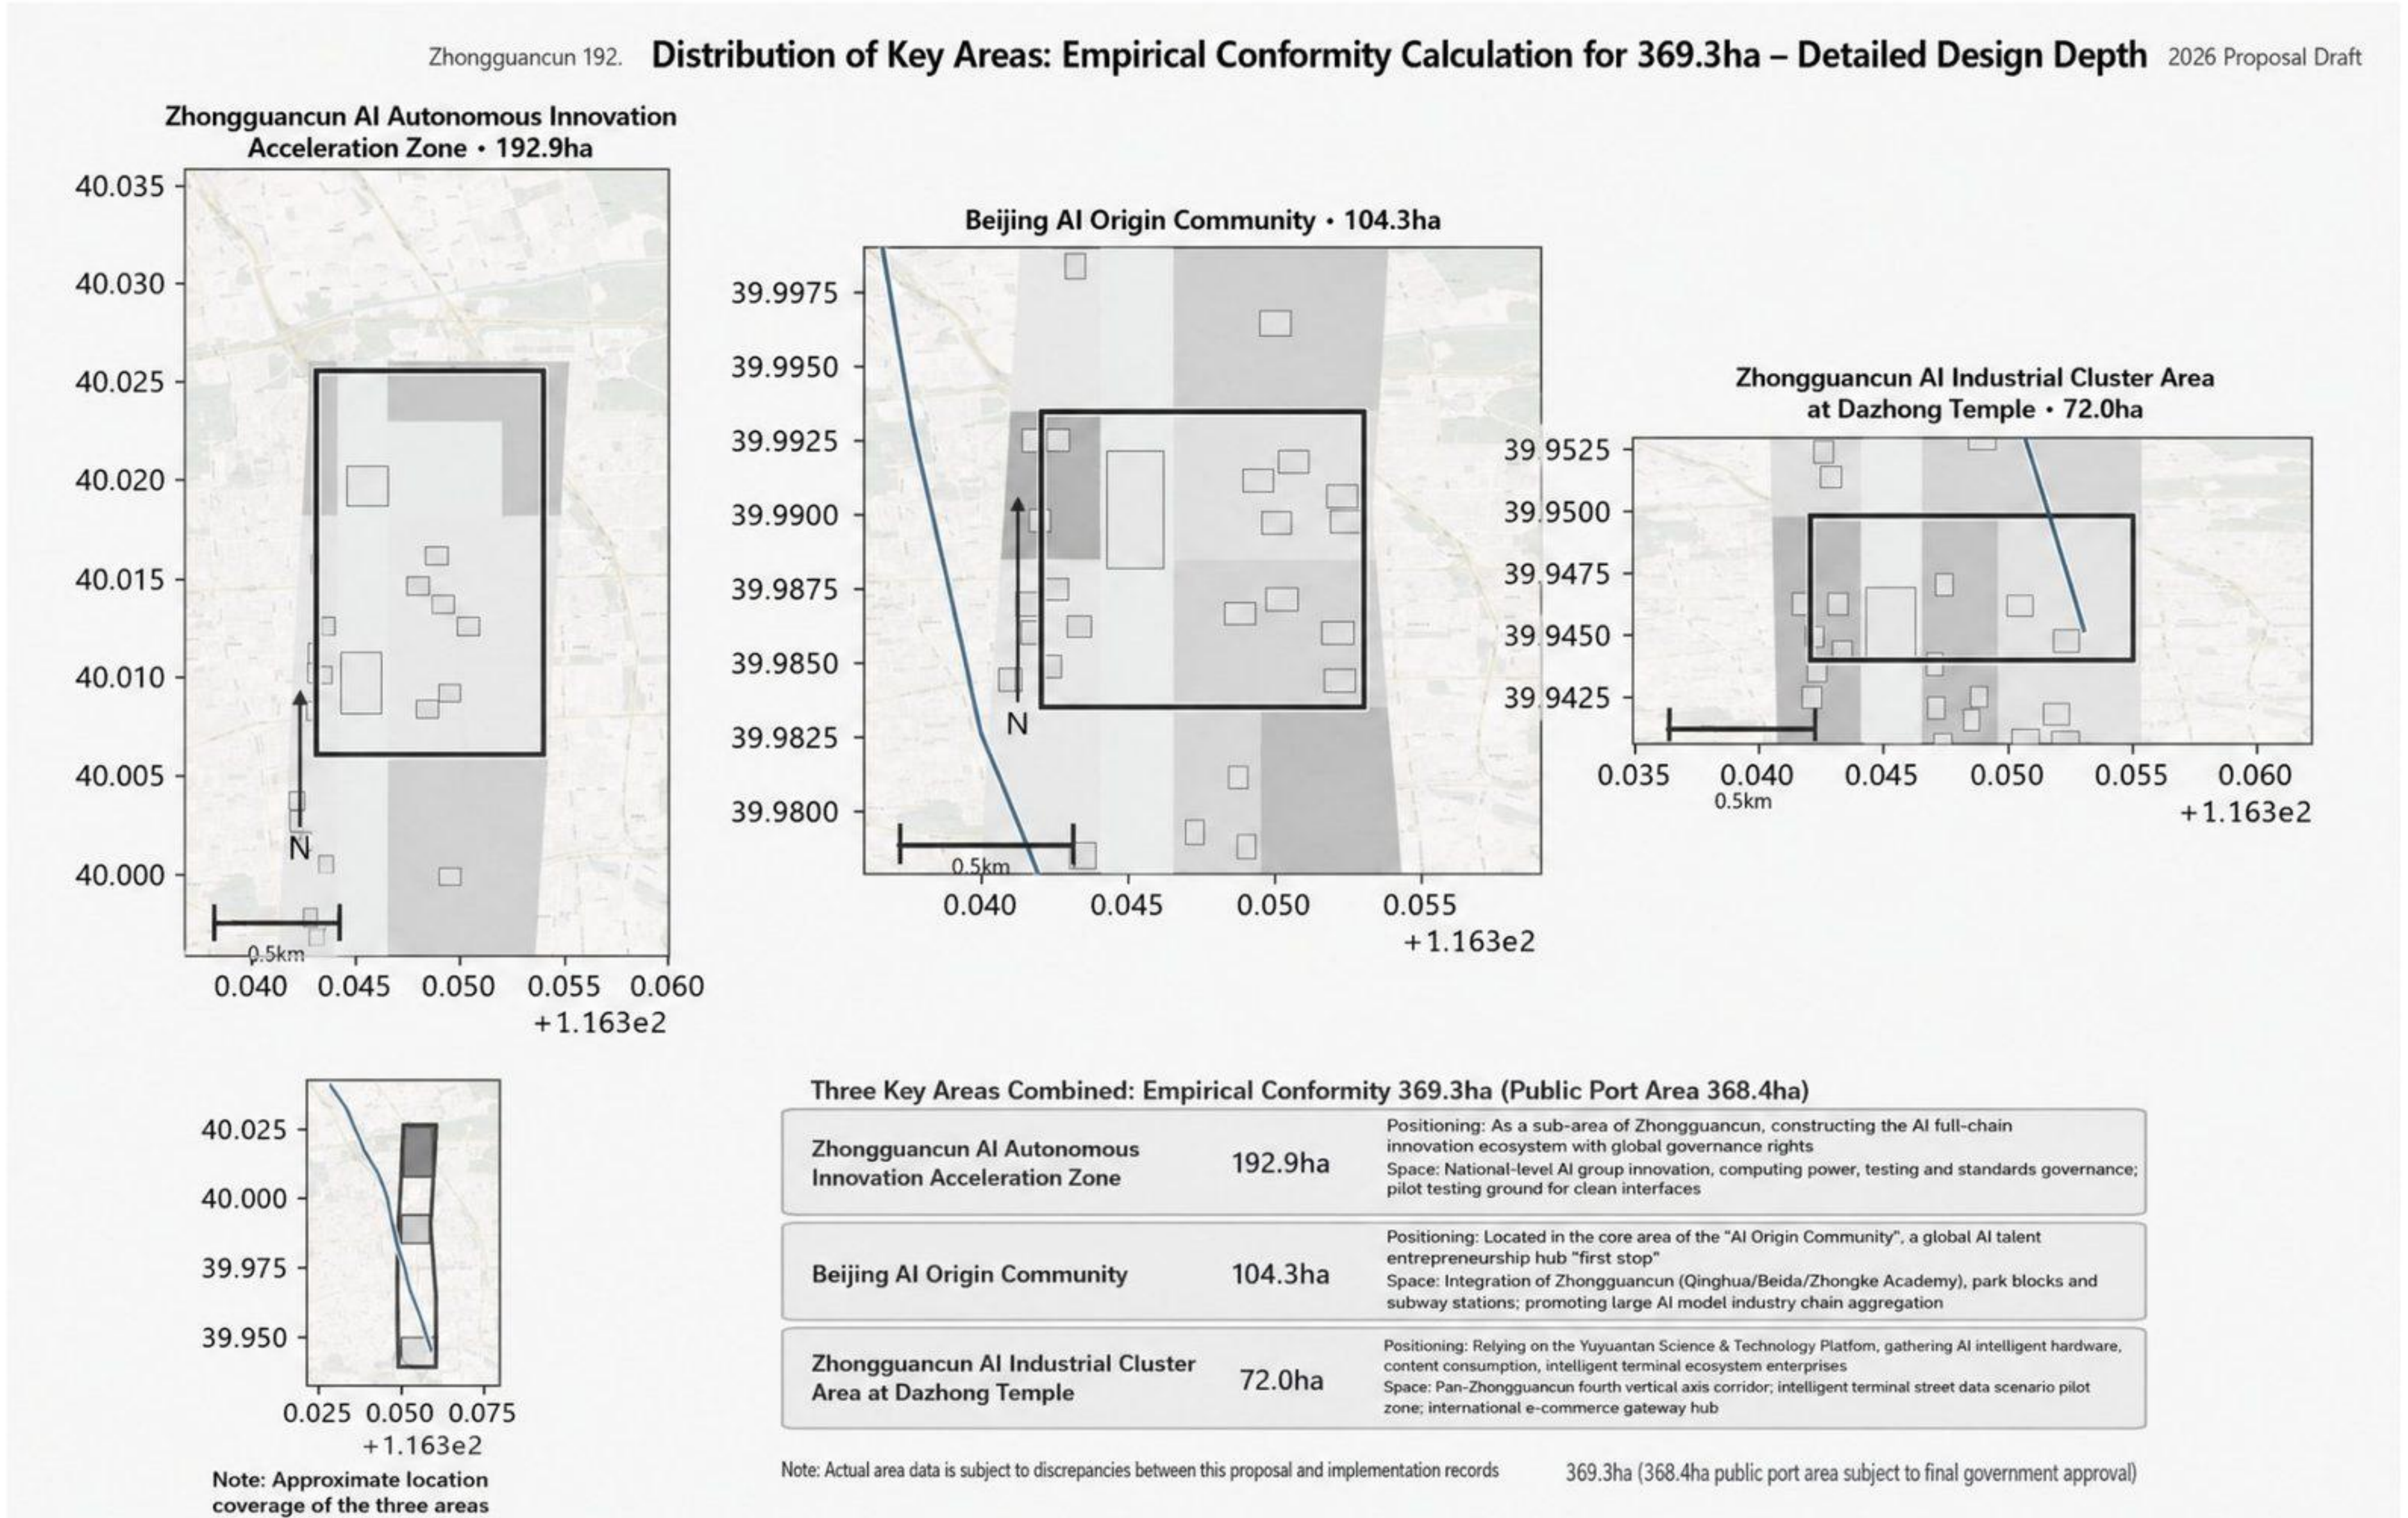

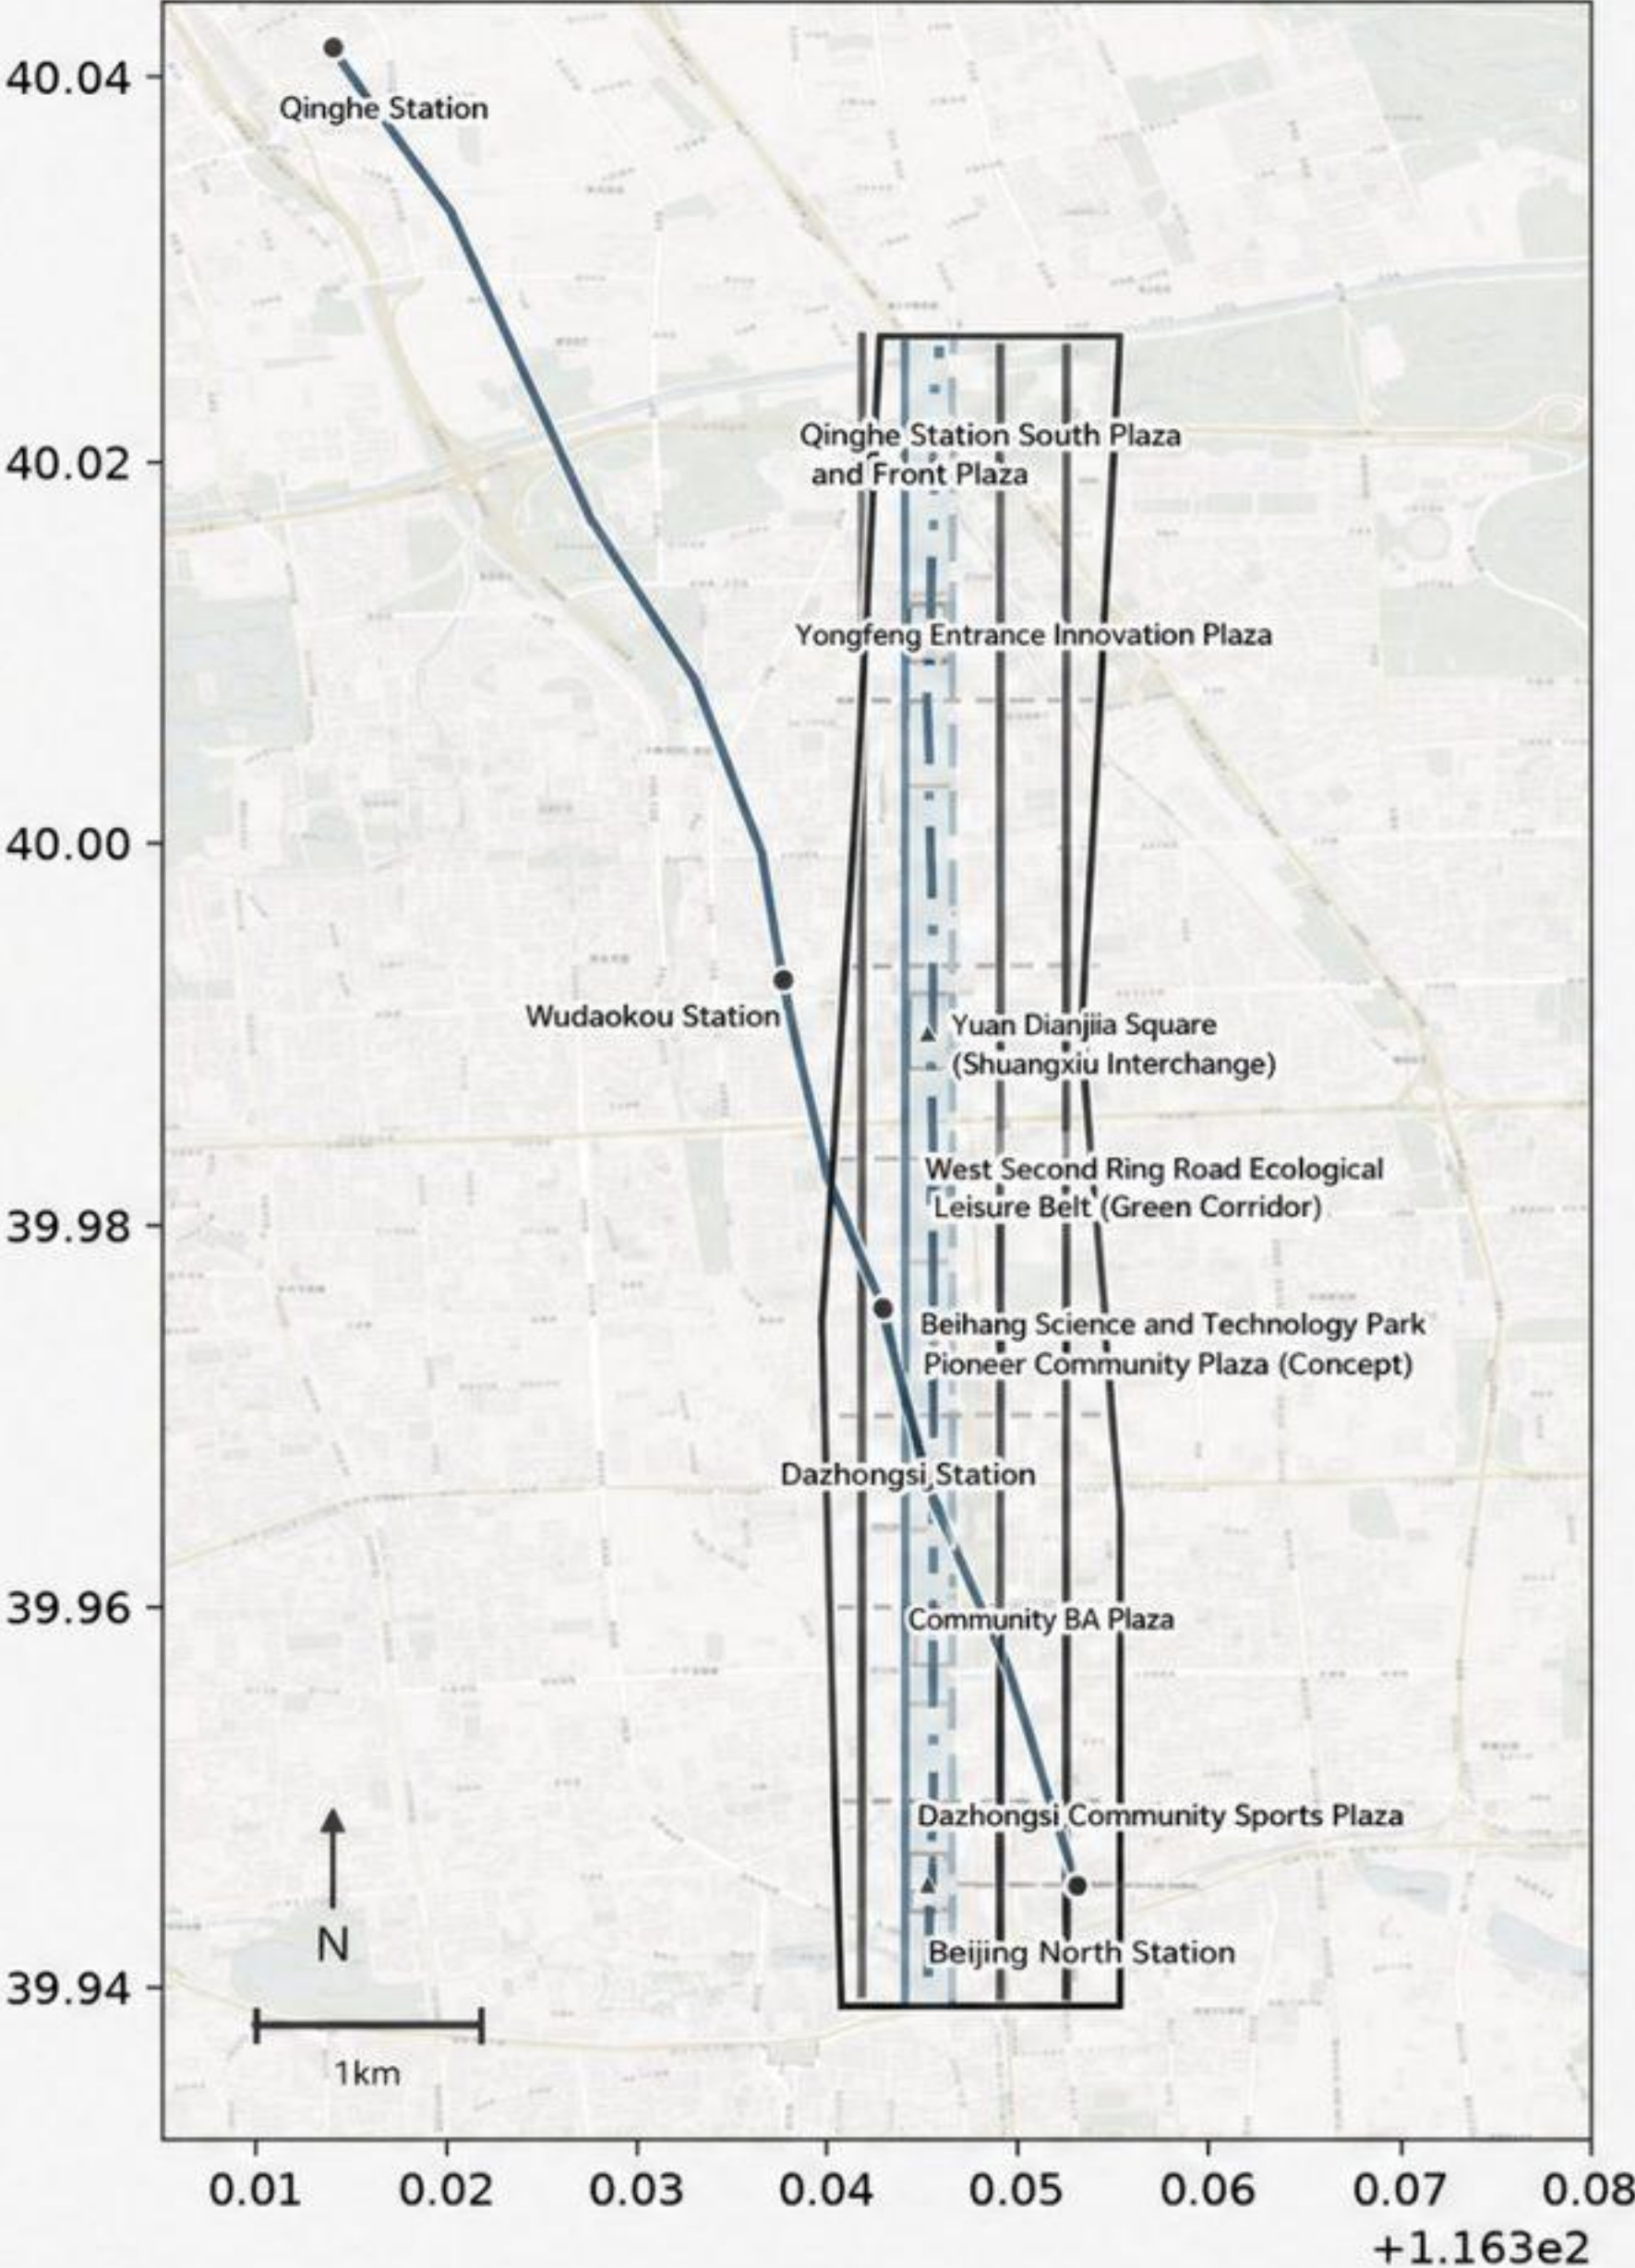

FIG.4 Mobility, Slow Traffic and Blue-Green Public Space Composite System

Page 5 of 6 | Jing-Zhang AI First Launch Field - Centennial Jing-Zhang AI Innovation Belt (conceptual, provisional boundary)

Transportation Skeleton x Blue-Green Public Space: 17 Roads 67.2km, 11 Green Spaces, 6 Public Space Nodes

Road System: 17 Roads · Blue Network: 11 Green Spaces · Public Space: 6 Public Space Nodes

- Beijing-Zhangjiakou Railway Corridor (Existing)
- Primary Roads (1 road, 9.7km)
- Secondary Roads (2 roads, 19.4km)
- Urban Roads (7 planned/under design)
- Green Corridors (1 corridor)
- Bicycle and Pedestrian Paths (1 path)
- Rail Direct Connection Alignment (1 route, indicative)
- Pedestrian Links (4 links)
- Green Spaces (11 sites, GREEN-001~101)
- Public Space Nodes (6 sites, triangle symbols)
- Overall Planning Boundary
- Railway Stations (5 stations)

Transportation Skeleton

17 roads · 67.2km [metric: road length m]
Dual-axis corridor connecting nine communities, 46 entrances
"Three belts" (pedestrian-friendly belt · green corridor · bike lane) full coverage
Bicycle and pedestrian prioritized green corridor

Integrated Railway Station Nodes

Wudaokou · Qinghe · Dazhongsi · Beijing North Station
Flat transfer platforms (Yongfeng Entrance South Plaza) · 15-minute walking
"One Station – One Theme" node integration with surrounding plazas

Blue Network

Beijing-Zhangjiakou Grand Canal Activity Belt (suburban belt)
Qinghe Riverside Ecological Park · Shuangxiu Interchange Community
Community BA Plaza · Station Integration Innovation Plaza (concept)
6 community green plazas · Station Integration · One-Station-One-Theme:
Innovation · Hospitality · Waterscape

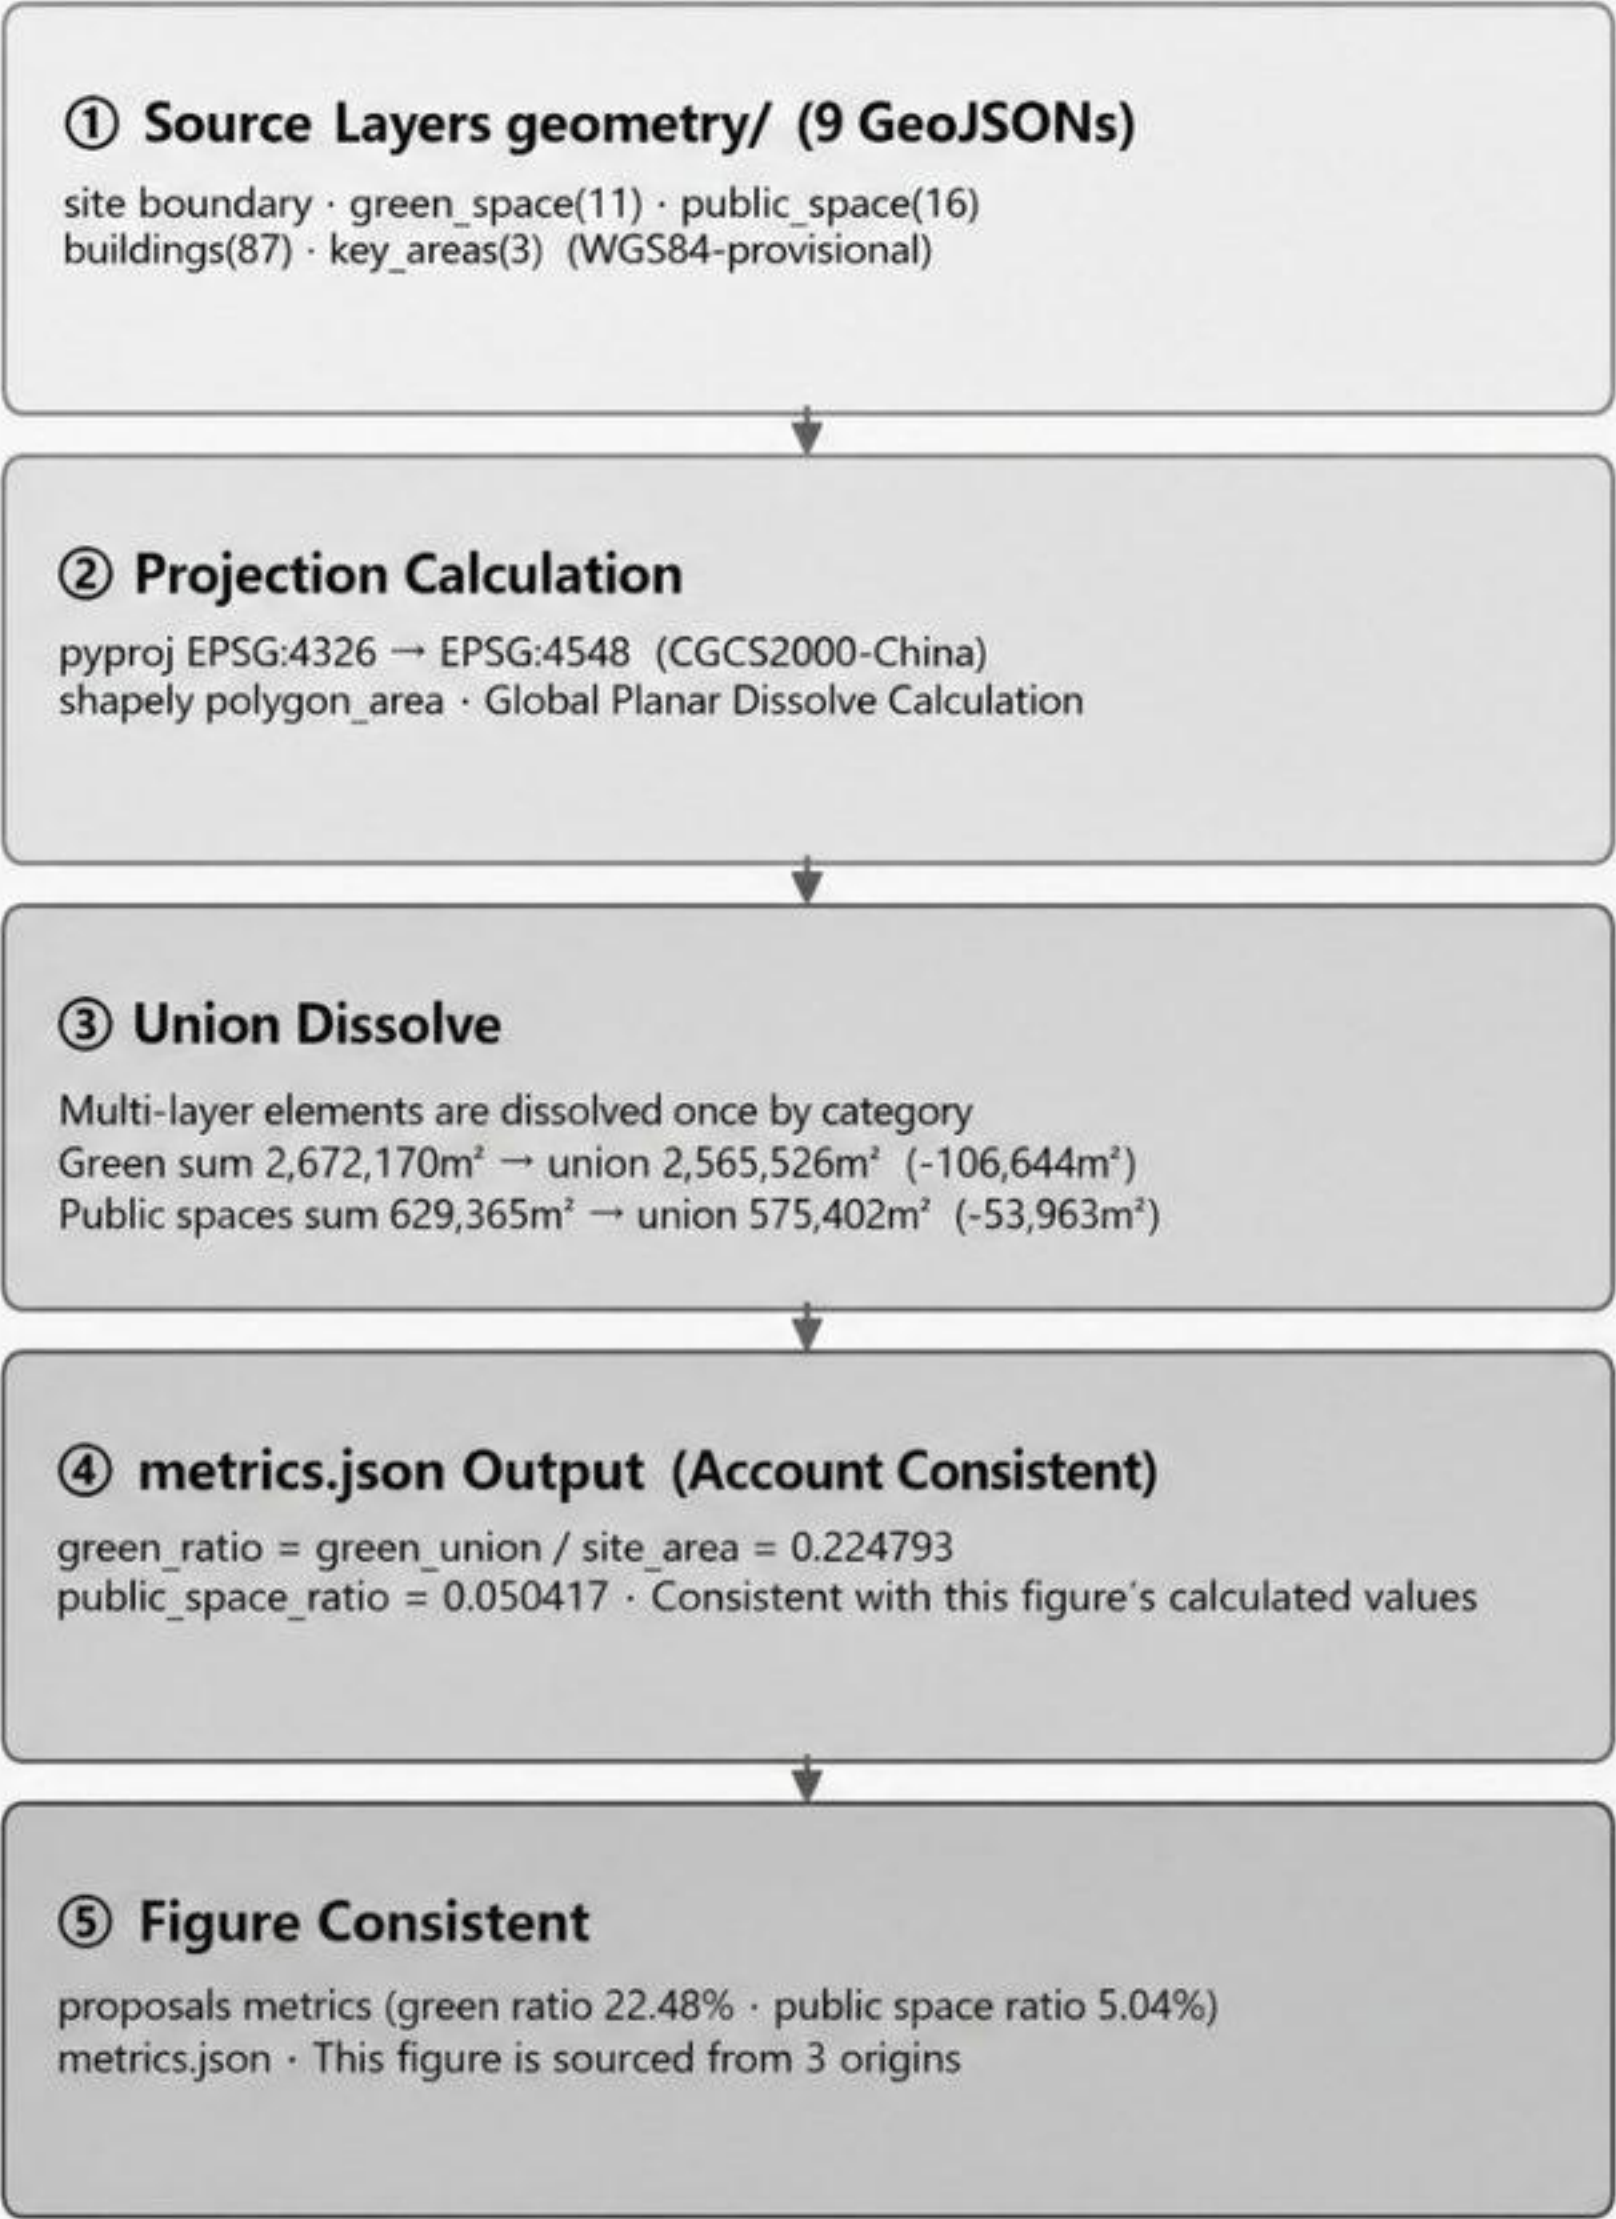

Notes on the Concept Plan (subject to adjustment and recorded upon approval)

· Conceptual road alignment: metric annotation "Conceptual road, not the actual route [alignment]" · Parking locations: proposal data for transport review [source: GREEN-100/101 as concept plan (concept)]

FIG.5 Core Indicator Recalculation and Evidence-Chain Diagram

Page 6 of 6 | Jing-Zhang AI First Launch Field - Centennial Jing-Zhang AI Innovation Belt (conceptual, provisional boundary)

Full-Chain Core Metrics Computation • GeoJSON → EPSG:4548 → union Dissolve → metrics.json (Account Consistent)

Core Metrics (metrics.json • Same as 5-proposals Metrics Table • This Figure Runs Calculations)

Metric	Registered Value	Calculation Source	Status
site_area_sqm	11,412,825	site_boundary.geojson	provisional-medium
green_space_area_sqm	2,565,526	green_space (union:11 elements)	medium
public_space_area_sqm	575,402	public_space (union:16 elements)	medium
building_footprint_area_sqm	644,095	buildings (87 elements)	medium
green_ratio	0.224793	green_union / site_area	This figure calculation: 22.48%
public_space_ratio	0.050417	public_union / site_area	This figure calculation: 5.04%
road_length_m	67,163	roads (17 elements)	Conceptual road network
key_area_count	3	key_areas.geojson	Zhongguancun Yuandian · Dazhongsi
land_use_parcel_count	29	land_use.geojson	9 land use types
floor_area_ratio etc. 3 items	unknown	Subject to official control conditions	Data gaps · Pending registration

Notes on Area and Diameter

Diameter A	Requested (sum)	Green 2,672,170m² · Public space 629,365m²	Multi-layer surfaces directly summed
Diameter B	After Dissolve (union)	Green 2,565,526m² · Public space 575,402m²	Duplicates removed using metrics.json
Includes self_check.json 4 fully automated PASS (DETERMINISTIC_VALIDATION · SPATIAL_REVIEW · VISUAL_PACKAGING · PROPOSALS_COVERAGE)			
Items unknown 3 Subject to official control conditions: FAR · Building height · Total floor area (pending registration)			

Provisional Boundary Note: The values in this figure are boundary-constrained calculations and are for reference only; The official results will be based on a full-chain core metrics recomputation after official release of all indicators (proposal registration; BOUNDARY_TRUST check).
