

Less data, shared compute, fewer screens, and repairable infrastructure. One civic spine, three yards, two feedback wings, and twelve low-data services make public benefit, energy, privacy, and maintenance visible before expansion.

01 / FRAME

ONE SPINE · THREE YARDS · TWO WINGS · TWELVE SERVICES

01 LESS DATA

02 SHARED COMPUTE

03 FEWER SCREENS

04 REPAIRABLE SYSTEMS

12

LOW-DATA SERVICES

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · RECOMPUTE AFTER OFFICIAL DATA

LIGHT COMPUTE, DEEP CITY · REV 1.2 · 2026

THREE KEY AREAS

The Efficiency Yard tests compression and edge benchmarks. The Small-Model Library provides low-threshold learning and staffed access. The Repairable AI Market tests interoperability, logistics, and reuse.

03 / KEY AREAS

THREE AREAS, THREE TESTABLE CAPABILITIES

01 ZHONGZHIYUAN

EFFICIENCY YARD

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · RECOMPUTE AFTER OFFICIAL DATA

LIGHT COMPUTE, DEEP CITY · REV 1.2 · 2026

SHADE AND STAFF BEFORE ALGORITHMS

Walking, cycling, shade, rainwater, static interpretation, and staffed desks form the base layer. Every node retains a no-power, non-digital alternative; digital services appear on demand.

04 / CIVIC SPINE

SHADE, SEATING, AND STAFF BEFORE ALGORITHMS

SHADE / SEATING

RAIN GARDENS

STATIC SIGNS

STAFFED ACCESS

ON-DEMAND DIGITAL

NO POWER? STILL WORKS.

Eight renewal projects proceed in three stages. EPSG:4548 recalculates geometry; FAR, height, and energy performance remain unknown. Automated checks establish package consistency, not professional approval.

EVIDENCE CHAIN: PUBLIC BASIS TO PROFESSIONAL REVIEW

KNOWN: layer areas, node counts, route length
UNKNOWN: statutory FAR, height, energy performance
