

LIGHT COMPUTE, DEEP CITY

01 / FRAME

ONE SPINE · THREE YARDS · TWO WINGS · TWELVE SERVICES

01 LESS DATA

02 SHARED COMPUTE

03 FEWER SCREENS

04 REPAIRABLE SYSTEMS

12

LOW-DATA SERVICES

Less data, shared compute, fewer screens, and repairable infrastructure. One civic spine, three yards, two feedback wings, and twelve low-data services make public benefit, energy, privacy, and maintenance visible before expansion.

MAINTENANCE

GATE BEFORE SCALE

The coordinated area exports frugal-AI capability; the overall area shares civic infrastructure; three key areas test spatial and operating detail. Data, compute/energy, screen/sensor, and maintenance budgets gate every project.

THREE KEY AREAS

03 / KEY AREAS

THREE AREAS, THREE TESTABLE CAPABILITIES

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · RECOMPUTE AFTER OFFICIAL DATA

LIGHT COMPUTE, DEEP CITY · REV 1.2 · 2026

The Efficiency Yard tests compression and edge benchmarks. The Small-Model Library provides low-threshold learning and staffed access. The Repairable AI Market tests interoperability, logistics, and reuse.

LIGHT COMPUTE, DEEP CITY · REV 1.2 · 2026

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE

Walking, cycling, shade, rainwater, static interpretation, and staffed desks form the base layer. Every node retains a no-power, non-digital alternative; digital services appear on demand.

TWELVE SCENARIOS, THREE INDUSTRY TESTS

LC-01—12 cover heritage, accessibility, public services, transfer, edge benchmarks, low-speed logistics, interoperability, maintenance, and reuse. LC-08—10 are industry tests; every service has a non-AI baseline, human review, and stop condition.

LC-01 Offline heritage	LC-02 Accessible wayfinding	LC-03 Shade / rest	LC-04 Healthcare navigation
LC-05 Legal-service navigation	LC-06 Arrival concierge	LC-07 IP transfer navigator	LC-08 Edge benchmark
LC-09 Low-speed logistics	LC-10 Device / energy test	LC-11 Maintenance triage	LC-12 Device reuse

PROJECTS, PHASING, AND EVIDENCE

05 / EVIDENCE

EVIDENCE CHAIN: PUBLIC BASIS TO PROFESSIONAL REVIEW

KNOWN: layer areas, node counts, route length
UNKNOWN: statutory FAR, height, energy performance

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · RECOMPUTE AFTER OFFICIAL DATA

LIGHT COMPUTE, DEEP CITY · REV 1.2 · 2026

Eight renewal projects proceed in three stages. EPSG:4548 recalculates geometry; FAR, height, and energy performance remain unknown. Automated checks establish package consistency, not professional approval.
